Dates are to the 25th February. The London mails of the 10th January arrived out on the 23rd February. The British steamer *Reiver* was chartered to carry the homeward mails by the Messageries Impériales in lieu of the *Labourdonnais*, which was to await at Hong Kong the arrival of the next French mail. H.M.S. *Tamar* was to leave for the Mauritius, Natal, and the Cape, on the 28th February.

A meeting of the Legislative Council was held on the 23rd February, all the members present, except the Surveyor-General and the Colonial Treasurer. After the minutes of the last meeting had been read and approved, the Governor intimated the matters to be considered were:—The third reading of an ordinance to amend the laws relating to offences against the person, &c.; the introduction of an ordinance for the incorporation, registration, and winding-up of joint-stock trading companies; and the revisal of the jury list for the present year. Beginning with the Limited Liability Act, as the second ordinance is sometimes called, his Excellency said that it was precisely the same ordinance which had already been submitted to the Council and rejected, but he believed that its rejection arose from the want of a due understanding as to the views of the Chamber of Commerce on the matter. A second address from the Chamber had been sent in, and there was no longer any room for misunderstanding. A petition from the foreign community in Hong Kong, signed by 354 names, was also in his Excellency's hands, both of which documents were read. After some remarks on matters of form, the second reading of the ordinance was carried by seven to two, the minority being the Hon. Mr. Whittall and the Colonial Treasurer (who arrived in time to vote). Mr. Whittall protested against the passing of the measure, for reasons to be furnished in the course of seven days; and a committee, consisting of the Hon. Mr. Chomley, the Hon. Mr. Murray, the Attorney-General, Judge Ball, and the Auditor-General, were appointed to report upon the ordinance before it should come on for a final reading. The Council then proceeded to revise the Jury List.

The Governor had been pleased to make the following appointments in the Hong Kong Volunteers:—

Artillery Company: First Lieutenant H. Cohen to be Captain, vice Myburgh, resigned; Second Lieutenant W. J. Henderson to be First Lieutenant, vice Cohen; F. I. Hazeland, Quarter-Master Sergeant, to be Second Lieutenant.

Rifle Company: T. G. Linstead, Colour-Sergeant, to be Lieutenant, vice Davidson retired.

In the Vice-Admiralty Court on the 15th, judgment was delivered in "the *Island Queen* v. the *Nepaul*." The judge said that he thought the amount tendered by the impugnants (the P. and O. Company), namely £3,000, and which amount was paid by them into the Court, was amply sufficient to pay the promovents for any salvage services they rendered to the *Nepaul* Judgment would be for the promovents (the *Island Queen*) for the amount so tendered, they paying all costs incurred subsequent to the time the tender was made to them.

At the Criminal Sessions, James Ellis, Inspector of Markets, was charged with extorting certain legs of mutton, turkeys, cases of brandy, &c., from the lessee of the Eastern Slaughter-house. Mr. Pollard assisted the Attorney-General for the prosecution, and Mr. Kingsmill appeared for the defendant. The trial lasted into the second day, Mr. Kingsmill addressing the Jury and calling Mr. May, Captain Quin, and Mr. Jarmain, who gave the defendant an excellent character for the time he had served in the Police force (over ten years). The defendant has been Inspector of Markets for six years, and during that time no complaint had ever been made by any of the market people. The Chief Justice summed up, and the Jury found the prisoner Not Guilty by six to one.

The trial of the men accused in the bank robbery case was remanded to Wednesday, March 1, as important witnesses for the prosecution were not yet forthcoming. Some discussion took place as to the accused being admitted to bail; which was refused, owing to the important nature of the case. If the witnesses arrived in the interval, the case would be resumed before the time mentioned.

The P. and O. Company have just completed a new landing wharf in front of their offices. It is made of the best timber, and will be found both commodious and economical by the company and the public. The wharf does not extend very far from the quay, and at the lowest neap tides gives a depth of twenty-three feet. The *Cadiz* was laid alongside of the new wharf, and the erection seems in every sense suitable for the purpose contemplated.

The *Daily Press* says—Messrs. Russell and Co. are erecting a wharf of the same description, opposite Wohang's, for the convenience of their Canton steamers. At least two wharves are either erected, or are being erected, at Wanchai, and we believe that others will spring up. The advantages to the colony in a commercial point of view from a system of deep water wharfage are too palpable and too well understood to require enlarging upon. Economy in the landing charges, the saving from pilferage and waste, and the despatch which can be given to ships, are the items on which the advantages will tell. Instead of rice being subject to a charge of eight cents per picul for landing, one or at most two cents would cover it. Instead of the pilferage and waste amounting to three per cent., they will hardly amount to one per cent.; and instead of a ship being a fortnight in discharging, four days will be sufficient. In delivering cargo from the godown the same advantages are multiplied.

Her Majesty's gunboat *Opossum*, which left for the Paracelle Shoal on the 5th February to receive the crew of the British barque *Fearnot*, which was lost upon the shoal on 12th Jan., has returned. She reports that she arrived at the Paracelles on the 8th, found six Chinese upon Lincoln Island who were part of the barque's crew. They stated that a Hainan junk had arrived three days previous and taken the treasure, con-

Digitized by Google

sisting of about $5,000, off the wreck; that when the six Europeans remaining on the island saw them they took the ship's gig, and with only three gallons of water and very little provisions got clear away from the place. The gunboat crew examined Woody Island, Rocky Island, and the Amphitrite group of islands, these being to leeward of the wreck, but gained no tidings of the men; several fishing junks were interrogated, but said they knew nothing of them. Took some sails, &c., off the wreck, and left for Hong Kong on the 9th Feb. On Saturday, the 11th, when within sixty miles of Hong Kong encountered a heavy gale, which drove them back and they anchored under Namoa Island until the 14th, when the weather moderated, and they were enabled to come on to Hong Kong. [It will be recollected that the last number of the *London and China Telegraph* reported the safe arrival of the chief officer and five seamen of the *Fearnot* at Singapore, they having been picked up by the *Cedars*, bound to Rangoon. The steamer *Plymouth Rock*, while returning from Canton on the night of the 17th Feb., in order to take her place against the *Kinshan* on the following morning, ran into a junk at the entrance to the Throat Gates, sinking her almost immediately. Five men and about $15,000 worth of property were lost.

The Sailors' Home is progressing more favourably than the projectors ever dreamt of. There have been about one hundred inmates in it at one and the same time. Many hands having been shipped, the number at present is reduced to about seventy, subject to daily fluctuations. The inmates are happy and contented, and the concern is evidently a thriving one. There is a great want of accommodation for officers, engineers, and seafaring men of the better class (remarks the *Evening Mail*). It says a great deal for the accommodation and the fare of the establishment, that a slight sprinkling of these should take advantage of its operation, and mingle with the sailors, in preference to resorting to the existing boarding-houses, which have hitherto been maintained by their reception. Still such a state of things is unseemly, and should be put a stop to with all convenient speed. We presume it is not intended to give up the whole of the building constructed for the accommodation of the Indian sailors, to the superintendent; and we should say that the mess-room for officers might be made in that building. Furthermore, we should imagine that one of the dormitories (of course we mean in the large building) might be kept select for officers, until the other dormitories should be full and additional bedding be required —and even then a space might be screened off. We believe that the accounts exhibit a fair surplus on the first month's transactions, and that the fear lest the Home should not pay its expenses is a lost one.

The 16th of February was the first day of the races, which were continued on the 18th and 19th. Among the more important we may notice, the Canton Cup, value 100 guineas,—for Arabs only. Weight 10st. One mile and a half.—1, Forrester; 2, Early Purl (a fair second); 3, Colonist (nowhere).

The Hong Kong Club Cup, for all horses. One mile and a half. 1, Exeter; 2, North Pole.

The Selling Stakes, value $500, for all horses that have never won any race out of China. One mile and a-half. 1, Pathfinder; 2, Magnet (broke down).

The German Cup, presented by the German community, value 100 guineas, for colonial horses only. One mile and a-half. 1, Warrior (carried 3 lbs. extra); 2, Scamp; 3, Pathfinder (carried 2 lbs. extra).

The second day's racing included the Challenge Cup, value 500 guineas, for all horses. To be won two years consecutively by a horse or horses the *bona fide* property of the same owner. Two miles. 1, Haddington (led all the way); 2, Exeter; 3, Millionaire.

The St. Leger Cup, presented by a subscriber, for Arabs only, 10st. The winner of the Canton Cup excluded. One mile and a-half. 1, Early Purl; 2, Hadji.

The Parsee Cup, value $250, presented by the Parsee community, for all horses, English excepted. 1, Warrior; 2, Pathfinder, 3, Scamp.

After the race, however, an objection was lodged against Warrior by the owner of Scamp, on account of an alleged foul. In the discussion which followed, far too much warmth was exhibited, on the part of one of the stewards, which led to several severe remarks being made. The objection was afterwards allowed, and the race now stands as under:—1, Pathfinder; 2, Scamp; 3, Warrior.

The third and last day included the Fakei Cup, value $700, presented by the American community of Canton and Hong Kong, for all horses; one mile. 1, Anecdote; 2, Sir William; 3, Loafer.

The Fuhchau Cup, value 280 guineas, presented by the Fuhchau community, for all horses, English excepted; from the Black Rock, twice round and in. 1, Exeter; 2, Pathfinder; 3, Warrior.

The Shanghai Cup, value 100 guineas, presented by the Shanghai community; for all horses; two miles. 1, Sir William; 2, Traveller.

The Stewards' Plate, value $500; for all horses; one mile and a-half. 1, Sir William; 2, Exeter; 3, Anecdote. The best race of the meeting; won by a neck.

CANTON.

One or two numbers of a weekly newspaper, published in Canton, in the Chinese language only, and edited by one of the foreign missionaries there, have been sent to us. The copy last received contains two advertisements and five articles or paragraphs on different subjects. The advertisements announce (1) Dr. Hobson's Medical Work, in five volumes (in Chinese), for sale; and (2) the Medical Missionary Society's Hospital, open for the dispensing of medical advice and assistance, free of charge. The subjects touched upon in the same number of the paper are (1) a notice of the Government schools in Hong Kong, their number, and the manner in which they are conducted; (2) notice of a misdemeanor in a village in the district of Koiu; (3) the present condition of the Taiping rebellion; (4) notice of the bank robbery in Hong Kong; (5) an article on the revolutions of the earth. The undertaking is as yet in its infancy, and its prospects cannot be stated with certainty; but the small price (two cash) at present charged for each copy, must, we should think, ensure a large sale for "The Chinese and Foreign Weekly Newspaper," as it is called. So far as we know, the experiment of starting such a newspaper in Canton is new. The amount of matter given for the money seems very large; and should the immense native population of Canton take a fancy to the new journal—should ten thousand copies be sold every week—the undertaking would more than pay itself. In that case, it would most likely be enlarged and become a useful advertising medium, in which event, we have been told, the price might easily enough be reduced to one cash per copy.

STRAITS OF MALACCA.

SINGAPORE.

Dates hence are to the 6th March. The London mail of the 26th January arrived out on the 4th March. The *Thunder* steamer arrived from Calcutta on the 3rd March, having on board his Royal Highness the Duke de Brabant, travelling under the title of the Count de Tervueren. The Hon. E. P. Levinge was also a passenger in her. The United States steam frigate *Iroquois* was at Galle when the *Ottawa*, the steamer that brought the London mails, left there. It was said she was coming on to Singapore, in search of the Confederate cruiser *Shenandoah*—which, as we know in England, was then in Australian waters.

The deaths from cholera were diminishing at Singapore.

The *Jubilaum*, Bremen barque, Vochler, master, bound from Rangoon to Hong Kong with a cargo of rice, had been wrecked on Batu Mandi, east of the Pedra Branca lighthouse. The wreck had been sold by auction for the sum of eighty-one dollars.

There was a rumour that a local joint-stock company was about to be started, to undertake general marine insurance business. It is urged that the amount of insurance effected at Singapore in a year is enormous, and that a local inspection and direction would give a company many advantages over other foreign offices.

The Governor has been pleased to accept the resignation by Mr. G. T. Wright of the office of Deputy Shipping Master and Assistant Master Attendant, Singapore, from the 3rd of Feb., 1864, the date of his departure from the settlement on leave of absence; and to appoint Mr. J. Anderson to those offices. Mr. D. C. Presgrave, J. P., has been appointed Deputy Coroner for Prince of Wales' Island.

Mr. Joaquim d'Almeida writes to the *Straits Times* in reference to the firm of Jose d'Almeida and Sons:—"We obtained our personal discharge from the Insolvent Court at the hearing on the 23rd of February, and there was no opposition made. His Honour the Recorder was pleased to com-

Digitized by Google

pliment us on its being very creditable that there was no opposition made."

A coroner's inquest was held on the 22nd February, on the body of a European named Mark Donovan, steward of the P. and O. Company's steamer *Orissa*. Deceased came by his death by accidentally falling over the wharf at New Harbour, while attempting, it is supposed, to save a native seaman who had also fallen into the water. A verdict of accidental death was returned.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTH.

PURVIS—On the 1st March, at Glassmount, Singapore, the wife of John M. Purvis, Esq., of a son.

MARRIAGE.

COOPER TICKELL.—On the 15th Feb., at St. John's Cathedral, Hong Kong, by Rev. J. J. Irwin, D.D., William M. Cooper, of H.B.M.'s Consular Service in China, to Mary Louisa, daughter of Colonel S. R. Tickell, late Bengal Staff Corps.

DEATHS.

CUMMINGS—On the 15th Feb., at the Seaman's Hospital, Hong Kong, Eduard Cummings, apprentice belonging to the ship Sea Nymph.

JEREMIAH—On the 5th Feb., at Singapore, Anthony Jeremiah, aged 34 years, 8 months, and 22 days.

NICOLSON—On the 18th Feb., at Shanghai, from injuries received by the explosion of the steamer Spitzbergie, Mr. Alexander Morrison Nicolson, aged 33 years, of Messrs. Nicolson and Boyd, Engineers. Deceased was a native of Stornoway, Island of Lewis, County of Ross, Scotland.

NOTT—On the 15th Feb., at the General Hospital, Hong Kong, Samuel Nott, corporal 99th Regt., aged 27 years, of consumption.

PARKINS—On the 26th Feb., at Mr. P. R. Lazar's residence, in Hylam-street, Singapore, after a few hours' illness, Mr. William Parkins, late of Penang.

ROBB—On the 23rd Feb., at Marine Vila, Singapore, Anne, the wife of Daniel Robb, Esq., shipbuilder.

SHORT—On the 13th Feb., in Singapore Harbour, Elizabeth Short, wife of Sergeant-Major Short, H.M.'s 99th Regt., on her voyage to England.

WILLIAMS—On the 15th Feb., at Shanghai, George Bond Williams, a native of Boston, Massachusetts, U.S.A., aged 29 years.

SHIPPING INTELLIGENCE.

ARRIVALS.

At SHANGHAI.—From London: Feb. 11, Eunice Nicholas; 14, Norwood. From Liverpool: 15, Gassamar. From Cardiff: 14, Sansparil. From New York: 9, Haversham; 19, Oliver Coutts.

At HONG KONG.—From Liverpool: Feb. 16, Abeona; 22, Albertine.

At SINGAPORE.—From London: Feb. 28, Eena and Gloucester. From Liverpool: 28, Mandarin. From New York: March 2, Tesso (str).

DEPARTURE.

From SHANGHAI.—For Montreal: Feb. 9, Shelbourne.

COMMERCIAL POSTSCRIPT.

A circular issued on Saturday (the 8th) notified suspension of payments by Messrs. Charles Joyce and Co. (formerly Joyce, Thurburn, and Co.), of 61, Moorgate-street, the old and respectable firm engaged in the Indian and Egyptian trade. The house must have stopped last Wednesday but for the arrival of remittances from Alexandria; the relief, however, was but temporary. Losses in cotton, especially Egyptian, have been so enormous that, notwithstanding the desire of friends to assist the firm if possible, it appeared hopeless to attempt the task. This may reasonably be imagined, when it is stated that the debts and liabilities represent £1,100,000, and that these are composed of direct engagements £600,000, and of indirect, £500,000, the principal portion of which, it is believed, will be covered. There is a firm at Alexandria interested, and an agency at Ceylon. The liquidation will naturally depend upon the realisation of cotton and other produce, cargoes of which are now coming forward. At present, from the position of the London and Liverpool markets, the prospects for creditors are anything but favourable.

ARRIVALS NOT INCLUDED IN THE TABLES.—April 8, at Deal, from Shanghai, Diligentia; 5, at Cuxhaven, from Foo-chow-Chow, Persia; 6, at Bordeaux, from Singapore, Birman; 6, off Plymouth, from Java, Sophie; 8, Clyde, from Singapore, Obex; 6, off Land's End, from Ceylon, Argali.

SPOKEN.—Patna, Liverpool to Shanghai, April 4, 52 N., 8 W.; H.M.S. Falcon, bound to Singapore, off Cape Rachado.

DEPARTURES.—April 7, from Shields, for Shanghai, Hotspur; 8, from London, for Newcastle and Batavia, Solo.

CHINESE CURIOSITIES AT THE CRYSTAL PALACE.

A valuable and most interesting collection of Chinese gems, relics, State emblems, and works of art has just been opened at Norwood, in a special enclosure of its own, in the French Court of the Crystal Palace. As might be anticipated, the great bulk of the very rare and often most costly articles shown here came originally from the Emperor's Summer Palace of Yuen-ming-Yuen, near Peking—a palace which was given up to plunder and entirely destroyed in retaliation for the monstrous treachery by which so many English and French men and officers were captured under a flag of truce and tortured to death. The fortunate owner of this collection is Captain Negroni, of the 102nd Regiment of the Line, who has succeeded in getting together one of the most curious, and probably one of the most valuable collections of the kind that has ever been seen in this country. In the rare old kinds of Chinese porcelain the collection is unusually rich. There are some splendid specimens of jade ornaments in the collection; among them a jewel stand, formerly used by the Empress, inlaid with rubies, pink coral, and lapis-lazuli, and an exquisite model of a junk, with rowers, interior furniture, and everything complete, carved out of a single mass of white jade. There are many smaller groups and large vases with covers, and a seal belonging to the Emperor, with an inscription on the back warning those who found the treasure that death was the penalty of not returning it to the Emperor. In Oriental jaspers and agates, and real chalcedony, there are wonderful works in cameos, carved groups, and vases. The Chinese jewels are of rare beauty, and of considerable value. Among them are two jewel cases, one of mosaic work formed of sapphires, rubies, emeralds, and pearls; another of small pearls, diamonds, rubies, sapphires, and emeralds. Here, too, is a State ornament formerly worn by the Emperor, and composed entirely of precious stones; the Emperor's State waist buckle, formed of a large uncut sapphire. Among the gems proper there are some rare and extraordinary specimens, which would be of immense value if they were not all most seriously depreciated either by perforation, by bad cutting, or by being cut flat to make one good stone into several thin "rose" gems of the same size. Among others is an Oriental sapphire weighing 48 carats, a ruby weighing 24 carats, a pair of ruby ear-rings, worn by the Empress, weighing 16 carats each, an amethyst weighing 150 carats, a rose ruby which is said to weigh 500 carats, and a monster sapphire, said to be the largest in the world, and weighing 742 carats. In China of the rarest and most beautiful types the collection is as rich as in jewels and carvings, lacquer, and inlaid work. In what is called the European portion of the collection are some fine works which have been presented from Europe to various Emperors of China, and which now, by the strange vicissitudes of fortune, find their way back to this quarter of the world almost centuries after they were made. One of the most interesting of these is a box sent to China by Marie Antoinette, and which bears her cipher. It is one of the most complete and valuable of them all, and the automaton singing birds which surmount one portion of it may still be regarded at this day as models of mechanical excellence. Altogether, the whole collection is emphatically one of the best and most interesting of its kind that has ever been shown in England, and it is certain at Norwood to prove one of the most lasting attractions of this season.

CONSUL WINCHESTER'S DESPATCH.

(From the *London Gazette.*)

The following despatch, with its enclosures, has been received from Her Majesty's Chargé d'Affaires in Japan:—

"Yokohama, Jan. 13.

"My Lord,—It is with great satisfaction that I find it my duty to bring to your Lordship's notice two additional instances of the humane and hospitable treatment, by the Japanese authorities and people, of shipwrecked crews, and of pains taken by them to preserve or recover property or gear belonging to stranded vessels.

"In November last the British barque *Ashmore*, proceeding to Hakodadi from this port, was wrecked at Benten Sama, or Low Island, in the Straits of Tsungaru; and Mr. Interpreter Enslie, who started from Hakodadi on the 27th of November, and was only able to reach the scene of the disaste several days later, refers in the highest terms to the kind attentions shown by the Prince of Nambu, who, immediately on hearing of the wreck, issued orders to render to the ship's company every possible assistance.

"Secondly, in December last, the British barque *Onward*, chartered to take the place of the *Ashmore*, was, on her voyage to Hakodadi, wrecked at Kashima, about 250 miles distant from Yokohama. The captain, his wife, two children, and crew were treated with the utmost kindness by the Hatamoto (squire of the village)—the property saved from the wreck, including all their clothes. A box of treasure ($5,000) was carefully guarded, and finally placed on board Her Majesty's steam despatch-gunboat *Coquette*, sent to their relief.

"It is also incumbent on me to point out the zealous and praiseworthy services of the gentlemen belonging to Her Majesty's Civil Service who proceeded to the assistance of these wrecks, and the risks to which the faithful performance of such duties exposes them. Mr. Enslie was seven days in reaching the *Ashmore*. Throughout this time he was in an open Japanese boat, exposed to the rigours of a commencing winter and the dangers of a stormy strait. Indeed, during his absence, the rumours of the boat being driven out to sea and cast away were so alarming and persistent that I deemed it right to ask Mr. Consul Vyse, who was here on unexpired leave, to return to his post on service in the *Osprey* which Sir Augustus Kuper was good enough on my representation to despatch to Hakodadi.

"In the case of the *Onward*, Mr. Satow, Student Interpreter of this Degation, proceeded in the *Coquette* to Cape Kona, and made his way on shore in the gig through a tempestuous surf, which they were only able to recross after their boat had been transported for four miles across a neck of sand to a more protected starting point.

"The procedure of the Japanese Government, in these cases, is so uniformly distinguished by genuine hospitality and kindness, and is in such marked contrast to the inhumanity and rapacity almost everywhere shown by the kindred race on the opposite coast of China, that I trust your lordship will hold me excused for occupying your lordship's time with details of events which are otherwise of ordinary interest.

"I have, &c., "CHARLES O. WINCHESTER.

"To the Right Hon. Earl Russell, K.G., &c."

"The following is the evidence of Capt. Jenkins, of the British barque *Ashmore*, wrecked off Cape Sarawasaki on the 24th of November:—

"'Left Yokohama on Monday, the 15th of November, 1864. Strong winds, fine weather, and at last arrived on the evening of the 24th off Cape Sarawasaki. At eight o'clock, bearing south, distance seven miles, strong wind and thick weather; took in top-gallant sails, double reefed the top-sails, and about half-past nine a man sung out, "Breakers on the starboard bow!" I saw a passage between Low Island and the Cape; tried to steer the vessel between, and about five minutes after the vessel struck heavily. The yards were immediately backed in order to move the ship off, but could do nothing, the seas making a breach over her, which hove her stern right on to the rocks and took the rudder off. I ordered the carpenter to sound the pumps about half an hour after she struck and found five feet of water in the hold; got the hands turned to, and got some provisions on shore; took a couple of sails to make a tent. At 4 A.M. found the water up to the lower deck beams. All hands went on shore by ropes. At daylight went on board and tried to save some of our effects. The mate and four

Digitized by Google

hands got the whaleboat and tried to go to Hakodadi to report the wreck; I and the remainder of the crew stopped, trying to save all we could. Saved the treasure at great risk. At 8 30 the ship sank in 4½ fathoms water. On Friday afternoon the ship went to pieces. On Thursday morning, at 9.30, some Japanese came off bringing rice. Assistance from the Consulate arrived, but nothing could be done till Tuesday morning, on which day Her Britannic Majesty's Acting Consul came himself. We left for Hakodadi in junks the following morning.

"'Dec. 18, 1864.'" "'JOHN JENKINS, Master.

"'I, Ferdinand C. Kreeft, late master of the British barque *Onward*, of Melbourne, which was wrecked on the east coast of Niphon on the 29th of December, 1864, wish to express my thanks for the great kindness and protection received by myself, crew, and family from the Japanese authorities of Kasima, where the vessel was wrecked.

"'During nine days, and until relieved by Her Majesty's steamer *Coquette*, every want and necessary was supplied to us.

"'The magistrate or chief Yakonin of that locality was so civil and attentive as to personally escort us on board the *Coquette*, and further to render great assistance to Mrs. Kreeft and children, and also to the officers and crew of the *Coquette's* gig, detained during two days by an impassable bar, and eventually had the boat and treasure carried over a distance of four miles to another part of the coast, to enable them to get off; the said head Yakonin himself seeing the last safely on board the *Coquette*.

"'I have no hesitation in saying, from my experience, that the kind treatment and efficient assistance which I received from those Japanese authorities could not have been surpassed in any part of the world.

"'F. C. KREEFT.

"'Yokohama, January 11, 1865.'

"Done before me, at Her British Majesty's Consulate, Kanagawa, this 11th of January, 1865.

"MARCUS FLOWERS, Acting Consul."

COTTON CULTIVATION IN CHINA AND JAPAN.

At the meeting of the Cotton Supply Association some Consular reports were received from the Foreign-office relative to the cultivation of Cotton, of which the following were from China and Japan:—

Report on the cultivation of cotton in the province of Chekiang, in China, of which Ningpo is the foreign shipping port, by Mr. CONSUL FITTOCK.

Area of land planted with cotton in 1863, about 54,000 acres; and in 1864, about 106,000 acres. No foreign seed is used at present in the province. The amount of produce for 1863 was returned at 200,000 bales, and the estimated quantity for 1864 is 400,000 bales. The season for sowing is May, and the season for picking about the middle of September. It is difficult to say what prices would be remunerative under ordinary circumstances. The present price is about 9d. per lb., but is entirely attributable to the demand consequent on the stoppage of supplies from America; before that took place, and prior to the devastation of the country by the rebels, the average price was less than 5d. per lb.

The war in America has given an immense impetus to cotton cultivation in this province. Four years ago little or none was exported; in the present year, as stated, the export will amount to about 400,000 bales, or 63,840,000lb., and, so far as I am aware, the power of increase is regulated entirely by the quantity in demand. Other crops are, of course, made to give way for its cultivation, more especially rice, which the more remunerative price of cotton enables the agriculturist to give up producing, and buy from a foreign market. Thus three or four years ago the quantity of rice imported was insignificant, while last year it was valued at $9,706,182. The cotton crop is made to alternate with wheat or barley, and beans. The mode of cultivation is this: about May the cotton seed is sown in the intervals of rows of wheat and beans, which in that month are full grown, and conversely in October the wheat and beans are planted in the intervals of the standing cotton rows. The seed is covered in when sown with a heavy iron mattock with four teeth. The growing cotton is manured with canal mud, vegetable ashes, human excrement, &c., but manure is not so universally applied as in the cultivation of rice. Previous to the foreign demand for cotton, the produce of this province found its way to the markets of Fuh-Kien. Although the distance from Kuan-hai-wei to Ningpo by land is only about thirty miles, owing to the water-way having to double the extremity of a range of hills, by that route by which all the cotton for exportation is brought, it has to traverse about sixty or seventy miles. Twelve miles of the water is along a canal which communicates with the tidal river Yung, by one of the rude sluices over which the boats are hauled by capstans. As the entrance to the sluice is narrow, the detention sometimes is very great, and the inconvenience and difficulties to be overcome here, and at another place about three miles further on, where the boats have to pass a narrow bridge, under which is an obstruction of rock, impassable at low water, are excessive, and the time wasted in transition from Kuan-hai-wei to Ningpo varies from a couple of days to four or five. These obstructions, it is believed, are easily removable, but the inhabitants are too indolent, inert, and indifferent to take any interest in improvements of this kind. The sluice capstans are worked by a band of peasants, with no responsible or influential management. No kind of order or system is observed in passing the boats, and the master of each has to make his own bargain, except when foreign or accidental influence somewhat expedites matters. The city of Kuan-hai-wei is about thirty miles this side of An-chang, and within two or three miles of the sea. It contains about 10,000 inhabitants. The cotton plains skirt the Hang-chow Bay along the whole of its southern shore, and it is surmised the northern shore affords equal advantages for the cultivation of the cotton plant. Nearly all the upper plains of the province, in fact, are admirably adapted for this description of agriculture.—British Consulate, Ningpo, 29th December, 1864.

Report on the cultivation of cotton near the consular district of Kanagawa, in Japan, by Mr. CONSUL WINCHESTER.

No means exist for ascertaining the quantity of land under cotton cultivation. It is stated by Japanese farmers and others that the high price of cotton during last year has stimulated production to about double the amount of former years in this immediate neighbourhood. No data exists for estimating the whole amount of the crop; but the figures below refer to the exports from this port:—July 1st, 1863, to September 30th, 1863, 11,094 bales, not pressed by machinery, so that the precise quantity cannot be ascertained. For the whole year 1863, the export from Yokohama was 4,892,933lb. avoirdupois, as returned by the Japanese customs at this port. July 1st to September 30th, 1864, 3,396,600lb., or 11,322 bales, all pressed by machinery, weighing 300lb. per bale. The probable export of this year will, I think, be over 7,000,000lb., or approaching 8,000,000lb. The great point of destination for the cotton crop of Japan is Osaka, on the inland sea, from which it is distributed. The season for sowing is the end of May or the beginning of June. The season for picking usually extends through the whole of October; in backward seasons it is protracted into the first days of November. Under ordinary circumstances 3d. per lb. would be remunerative.

The common yield of an acre of land is about 250lb., or about 100 to 115 pieces of Japanese long cloth, 9½ yards long by 12 inches wide. The replies to the queries refer only to this district and the neighbourhood of Yedo. The farmers produce little more cotton than is required for the supply of their own wants. The high price of cotton has stimulated production this year to perhaps double the amount of last. The best cotton districts in Japan are in the southern part of Nipon, bordering on the inland sea. In this region cotton is sown in drills, about 16 inches apart, between the rows of wheat and rapeseed, while it is still standing, and just before it is harvested. It is manured with liquid manure twice, and the plant attended to, its extreme ends, and all supernumerary buds and sprouts, so as to maintain a vigorous plant and a large boll.—7th October, 1864.

Parliamentary Intelligence.

HOUSE OF LORDS.

THE WAR IN BHOOTAN.

(April 7th.) Lord LYVEDEN desired to know what measures Government intended to take in consequence of the events lately reported to have taken place in Bhootan. He believed that the annexation of Bhootan to our Indian Empire would be most mischievous.—Lord DUFFERIN hoped that no discussion would take place on this subject until the papers were in the hands of the House. There was no intention whatever to annex Bhootan; but a sufficient number of troops had now been ordered up to hold and retain the frontier forts.—The Earl of ELLENBOROUGH would have preferred that the troops should have been withdrawn. He could not help feeling that the arrangements for our late expedition against Bootan had been most imperfect and inadequate.

EAST INDIA HIGH COURTS BILL.

(8th.) This Bill was read a third time and passed.

Their lordships then adjourned until Thursday, the 27th inst.

HOUSE OF COMMONS.

EAST INDIA (GOVERNOR-GENERAL'S POWERS, &c.) BILL.

(March 31st.) Mr. VANSITTART said that this Bill proposed to enlarge the powers of the Governor-General for making laws and regulations in India, and to that he entertained no objection. He deeply regretted the result of recent operations in Bhootan, which reflected no lustre on our arms. He wished to know whether instructions had not been issued to Sir J. Lawrence not to make any new appointments of greater value than £400 a year. He could not reconcile this petty interference with the professed object of this Bill.—Sir C. WOOD said the operations in Bhootan had been undertaken at the recommendation of the Lieut.-Governor of Bengal, but the troops were not to occupy territory, but only to hold a line of forts to protect our own frontier. With regard to the second point, it had been from time immemorial the standing rule not to make any new appointment above a certain value without the sanction of the Home Government. The Bill then went through Committee.

CHINESE LAW WITH REGARD TO EUROPEANS.

(April 6th.) Colonel SYKES, who had on the votes a notice of his intention to ask a question, said it would hardly be intelligible without explanation. A boat sent up the river for silk was plundered by three Europeans. They were apprehended, one at Shanghai, two at Hong Kong, and thrown into prison. A partner in the firm which had been robbed, Mr. Hart, wrote, and said, "We have the culprits in custody, and they will be punished if we don't get back the dollars." But instead of the prisoners being punished, the judge at Hong Kong had released them, on the ground that there was no law in China to punish Europeans who committed robberies in China. His question was whether the law controlling the conduct of British subjects in China was so inoperative that Europeans could commit robberies in the interior upon Europeans and natives with impunity.

The ATTORNEY-GENERAL said the only answer he could give was this,—that any Europeans committing an act which would be a crime by the law of this country were amenable, if they could be caught and the fact proved, to the consular authorities in China, and also to the Criminal Court at Hong Kong. There might be difficulty in getting evidence; and he supposed that a case in China could never be the same as one in England.

COLONIAL BISHOPS.

(6th.) In answer to Mr. H. SEYMOUR, Mr. CARDWELL said the patents which had been issued by the Patent-office were now undergoing careful examination, with a view of submitting a case for the opinion of the law officers of the Crown. It was the intention of the Government most carefully to examine the late decision of the Privy Council before any further patents were issued.

THE BHOOTAN EXPEDITION.

(6th.) In answer to various questions from Lord DUNKELLIN, SIR C. WOOD said that the instructions given in India were to occupy the passes leading into Bhootan, and not to make any occupation in that country,

Digitized by Google

and the right hon. gentleman said that he was very averse to any occupation of that territory, because he did not see how they could withdraw their troops if they once were allowed to occupy it. He had received information up to December last, from which it appeared that Her Majesty's forces had lost only five men. In January the Bhootians had taken up a position which led to Her Majesty's troops evacuating two of the passes. The result of the whole operations was that the Government of India had sent forward one regiment and a half of British troops into that country, but he could not say what arrangements had been made for the purpose of ensuring protection against the effect of the weather. The following was from a despatch which he had just received:—"We shall spare no pains to provide shelter for the troops and to secure their health."

THE WAR IN BHOOTAN.

(7th.) Mr. H. SEYMOUR wished to call attention to the great disaster which had occurred to our arms in India from the failure of the expedition to Bhootan. He wished to know what information on this subject could be afforded by the Secretary of State for India.—Sir C. WOOD assured the hon. gentleman that the reports from which they had obtained their information were without foundation, and devoid of truth. He denied that one-third of the force had been lost, or that any considerable proportion of the army had been sacrificed. The state of affairs at the present moment was that the Government were in possession of territory which they proposed to hold, and he submitted that it was not quite fair to condemn any officers until further information was afforded by the arrival of the mail.

INDIAN FINANCIAL ARRANGEMENTS.

(7th.) Mr. H. SEYMOUR asked whether it was true that a customs' duty had been placed on jute, coffee, and various other articles, and that the income-tax had been continued in India.—Sir C. WOOD said there was some inconvenience in the telegraph system, and no information could have arrived by post from Calcutta relating to the result of the propositions made at Calcutta on the subject of finance, because such financial statement could not be made earlier than March 31. Whatever had appeared in the papers could only be received by telegraph. He had received a telegram, dated the 3rd of April, stating that the income-tax had not been renewed, but that certain duties had been placed on certain articles of produce in India. He could hardly doubt the fact; but, at the same time, it was so totally the reverse of everything he had reason to suppose would be done by Her Majesty's Government in India, that he hardly knew whether to believe it or not.

BRITISH OUTRAGES IN CHINA.

(7th.) Colonel SYKES asked the Under-Secretary of State for Foreign Affairs whether Mr. Consul Swinhoe had made a report that the British merchant steamer *Elphin*, while loading sugar at Takao, was hired by the local Mandarin to go out of port and attack junks said to be piratical, on the agreement that captured junks should belong to the captain of the *Elphin* and crew; that the steamer went out and attacked a junk pointed out, which did not make any resistance, nevertheless she was fired into and one of the crew killed, and the remainder of the crew, twenty-one in number, taken prisoners and lodged in the hong of Messrs. Lesler and Co., and the junk carried into Takao; that Mr. Consul Swinhoe tried the captain, a Prussian subject, and condemned him to a penalty of 600 dollars, afterwards reduced to 400, as a sufficent penalty for the murder: and, in case Consul Swinhoe's report had not been received, whether it would be sent for; and whether the Hong Kong Ordinance, No. 1, of January 1855, which prohibits British subjects from giving military aid to the Chinese Government and the rebels would or would not be enforced, and commanders of British merchant vessels, or other offenders be suitably punished for sheding blood for profit.—Mr. LAYARD: In answer to my hon. and gallant friend, I have to state that no report of the circumstance mentioned by him has been received at the Foreign-office. I do not think it necessary to send to Consul Swinhoe for a particular report, because it is the duty of the consul to report all such cases as may require special notice. If it had been a case requiring special notice, I have no doubt we should have had a full report. As regards the second part of the question, I can add nothing to what has been stated twice by the Attorney-General. The law, of course, will be put in force if proper evidence is produced and proper proceedings are taken before the consular court in China.—At its rising the House adjourned to Monday, the 24th April.

Continental Intelligence.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

APRIL 6.

A Holstein newspaper, published at Altona, announces the return, on a visit to his father, who is a civil functionary in the town of Wilster, of Captain Alfred Tetens, who, after a series of romantic adventures, has become Viceroy of one of the Caroline Islands, a group but little known, lying in the Pacific to the north of New Guinea or Papua, and to the east of the Philippines. It appears that this gentleman, when quite young and fond of adventures, betook himself to a roving life, and served as sailor in several vessels navigating the China Seas, and in the course of his perigrinations visited one of the Caroline Islands to complete by barter with the natives a cargo of beche-de-mer for the China market. He subsequently returned to the same island, married the King's daughter, was tattooed right and left, commanded with success several hostile expeditions to the other islands of the group, returning in triumph with several chieftains as prisoners of war. For his courage and ability in conducting these expeditions he was raised to the dignity of Knight of the native "Order of the Bone." He then bought one of the islands, on which he built a comfortable house, now inhabited during his absence by his Royal father-in-law, who conferred on him the vice-royalty of the island, which produces abundantly indigo, tobacco, and excellent cotton. Having now undertaken the command of a vessel filled with a cargo of native produce, he arrived with it safely at Amsterdam, from which city he has travelled to his native place, and gladdened the hearts of his aged parents, who had long since given him up for lost. Captain Tetens has called the attention of the Prussian Government to the fact that the Caroline Islands are not occupied by any Europeans, and that possession of them might easily be acquired. It may therefore be expected that they will shortly be visited by one of the Prussian men-of-war on the China station.

From St. Petersburg we learn that the annual convivial meeting of the Oriental Siberians residing in that city was held last week, when upwards of eighty sat down to a sumptuous repast, which was honoured by the presence of Count Muravieff-Amoorsky, formerly Governor-General of Eastern Siberia, and several other notabilities. After the usual loyal toasts had been given and duly responded to, it was proposed to open a subscription for the purpose of founding a bursarship at the University of St. Petersburg, for a student native of East Siberia, to be called, in honour of the late Governor-General, "Bursarship of Count Nicholas Muravieff-Amoorsky." The proposal found general favour, and was immediately responded to in such a liberal manner, that the subscriptions on the spot amounted to 5,000 silver roubles.

On the 25th ult. the contract between the General Administration of the Russian Telegraph Department and Mr. Sibley, Chairman of the American "Western Union Telegraph Company," for the establishment of telegraphic communication between Europe and America via Siberia, was signed at St. Petersburg. The company binds itself to raise for the execution of the works the sum of ten millions of dollars, of which 8,434,600 dollars are already subscribed by American capitalists. The telegraph is to be finished the whole distance, and opened for the transmission of messages between New York and all the stations in Great Britain and Ireland within the space of five years from the date of signing the contract—consequently by the 25th of March, 1870, at the latest. It certainly seems extraordinary that our transatlantic cousins should be in such a desperate hurry to risk such a large stake as the above-mentioned sum already subscribed, with full knowledge of the fact that in the beginning of July next the *Great Eastern* will sail from the shores of Ireland to lay down the new direct Atlantic telegraph cable; and, if it succeeds, the messages will, of course, be transmitted by it not only quicker but much more cheaply. One would imagine common prudence would have dictated the desirability of waiting for at least three or four short months, under the circumstances of the case, as, if it succeeds, the Russian-American gigantic scheme will be of but little commercial or political importance, and, in fact, nearly superfluous.

COMMERCIAL.

COFFEE.—The business in this market is beginning now to take larger dimensions as the navigation with the north of Europe re-opens. Prices of all descriptions are well kept up. Sales of the week, 12,000 bags. Fresh supplies arrive freely, so that the imports to the end of March are now nearly what they were last year (13,100,000 lbs. against 13,900,000 lbs. in 1864), whilst the stock is rather larger (8,060,000 lbs. against 7,000,000 lbs. last year).

SUGAR.—A fall of 4 to 8 Sch. Bco. in values induced purchasers to come forward pretty freely; amongst the dealings may be noticed 13,000 bags of clayed and unclayed Manila. Refined rather dull, and a shade lower, especially for inferior qualities.

RICE.—Market steady, with a sufficiency of business. Rough attracts more attention, and 3,000 bags of common Bengal changed hands.

SPICES.—There have been no sales by importers, and but few by the dealers. Prices without alteration, and firm.

TEA.—More animation is evident, as the assortment is perfected by considerable direct supplies. Among the sales of fresh parcels just arrived were 258 packages of Pecco per Carausius, 460 do. of Congou, and 966 do. of Imperial per Gustav and Ernst, and 1,794 do. of Congou, 559 do. of Souchong, and 277 do. of Pecco per Picciola. Besides the above sales by importers, there were considerable transactions done by the dealers, especially in Souchong, Congou, and various descriptions of green teas. On the whole, the market is in a very satisfactory state, and the prices are steady.

DRUGS.—Refined camphor commands an easy sale, and former prices continue to be realised. A further sale of 200 chests of candied ginger is reported.

SPELTER continues to rise. Since the departure of last mail several parcels have been taken at 13 Mks. 4 Sch., and now higher prices are demanded.

DISCOUNT—$2\frac{3}{4}$ to $3\frac{1}{4}$ per cent.

SHIPPING.—Arrived at Cuxhaven: Nornen, from Macao; Cecilie, from Batavia; Persia, from Foo-chow-Foo.

LONDON, MONDAY, APRIL 10, 1865.

THE BISHOPRIC OF VICTORIA (HONG KONG).

No appointment has yet been made to this vacant colonial see. The recent judgment of the Judicial Committee of Privy Council on the Colenso case has brought into prominent notice the legal error under which the Sovereign had been led by her advisers to issue Letters Patent constituting colonial dioceses, and conferring on the colonial bishops so appointed ecclesiastical jurisdiction, beyond the powers of the Royal prerogative. Although this excess of the Royal prerogative applies only to colonies possessing self-government and an independent local Legislature, the case of Crown colonies is on this account reserved, as but partially affected by the recent judgment—it is nevertheless understood that there is a reluctance on the part of the Colonial Office authorities to make any new nominations in the present uncertainty, and that the whole subject is under review by the Home Government.

In small colonial communities like Hong Kong it is obvious that the institution of an Episcopate was intended by its promoters for far wider and more general objects than merely the local pastoral superintendence of a limited European community in one of the smallest of Brittish settlements. Superintendence of the Anglican missionaries on the continent of China itself, and visitations of the Government chaplains stationed in the various consular ports, formed a part of the arrangements originally contemplated by the founders of the see, and expressly mentioned in Her Majesty's Letters Patent. The unwillingness of the Foreign Office to part with its own direct and exclusive authority over the consular chaplains; the anomalous ecclesiastical position of the various military and naval chaplains in China; and the omnipotence of Home Committees in all the details of Missionary Societies' acts and proceedings in reference to the missionary clergy abroad, have been among those various causes which were calculated to dwarf the influence and usefulness of a bishop within the dimensions of a colonial chaplain-in-chief at Hong Kong. The late Bishop in some measure counteracted this disadvantage by active itinerant labours and periodical visits along the Chinese coast. But the voluntary relations of the clergy towards a bishop, grounded on friendly intercourse and mutual respect, fell far short of that diocesan jurisdiction usually attached to the idea of an episcopate, and were insufficient to meet the exigencies of an effective oversight of the clergy. It was a state of things satisfactory in some respects, but also unsatisfactory in many others. Unity of missionary plans for the extension of Christianity in China could but partially be secured. Sustained by the fraternal sympathies of the clergy as a body of personal friends, a bishop in such circumstances was at the same time powerless in point of legal jurisdiction for checking and removing scandals on the part of exceptional and unworthy members of the clerical order. The colonial community at Hong Kong may reasonably regret the result which appears likely to take place in the termination of an Anglican episcopate in China. It could hardly be expected, however, that amid existing complications of ecclesiastical law and Royal prerogative, any body of Churchmen at home should be able to interpose to preserve a colonial see which labours under the peculiar disadvantages which have been enumerated, and to which the colony itself has contributed no portion of the endowment or stipend. An American bishop at Shanghai, of the sister Protestant Episcopal Church of the United States, will probably supply to the Protestant Episcopal missions in the neighbourhood of the northern ports of China a ready and available means of confirmation and ordination of native Christians. An English bishop of Labuan, who, on the transference of the Straits' Settlements from the Indian Government to the Colonial Office, is likely to be placed in charge of the English congregations at Singapore and its vicinity, may also, possibly under new arrangements, be requested to pay occasional visits to Hong Kong for the performance of any required episcopal functions in the colony. For the present, we believe that nothing has been finally decided upon. While we desire carefully to guard the preceding statements as only falling at present under the category of probabilities, we beg leave at the same time to convey to our readers the impression that we receive our information from credible authority, in saying that it is in the highest degree doubtful whether there will be any second appointment of a Bishop of Victoria.

SAN FRANCISCO, JAPAN, AND CHINA LINE.

AFTER ten years' discussion of the project for connecting California with Japan and China by a subsidised steam line—a discussion which we have closely followed in its varying phases—the American Congress has at last sanctioned the payment of $500,000 (£100,000) per annum for that purpose, the line to be a monthly one, San Francisco and Shanghai to be the respective termini, the intermediate points touched at being Honolulu and Yokohama, with such other points at the Bonin Islands or in Japan, as may from time to time be thought desirable. The length of the entire route is estimated at 5,373 miles, or twenty-one days' steaming, which would allow of a large gain as to time in the transit between New York and the Far East. California herself, in addition to becoming thus the media for the passenger and more valuable merchandise traffic between the Atlantic States and the Far East, will find her account in the export of silver, her production of which, added to that of neighbouring States and territories, is estimated for the present year at no less than £4,500,000. In the case of a gold-producing country, the precious metals, regarded in the light of so much merchandise, are certain to prove one of the most profitable remittances even in the way of trade. The idea has already been actively entertained both in San Francisco and New York, of securing increased profit in the trade with Japan by the manufacture at private mints of pieces of the purity, size and shape of the Japanese ichi-bou. It is well known that the dollars on which Japanese exchange is calculated, are coined not only in Mexico but in the South American States; and we would be curious to watch the result of this experiment. The Imperial Mint at Hong Kong must be awake to this future. As the Bill has passed almost unanimously both the Washington House of Representatives and the Senate, we may assume that it has by this time been signed by the President, and will, with the usual enterprise of our American cousins, be at work early in 1866.

THE NEW MINISTER FOR JAPAN.

WE have the pleasure to announce that the suggestion made in our last has been carried into effect, and the official announcement will shortly be made apppointing Sir Harry Parkes to succeed Sir R. Alcock as Minister at the Court of Japan. We may now feel some security that the policy pursued during 1864 will be at least persevered in, if not carried through successfully, until the Tycoon is thoroughly convinced that we will not succumb to any threats.

MORE VESSELS FOR THE CHINA TRADE.

Messrs. Denny and Co., of Dumbarton, have launched another steamer, named the *Yangtze*, which it is very probable will be despatched to China, in addition to the *Corea*, which we lately noticed. The *Yangtze* is a handsome iron twin screw-steamer, of 1,100 tons B.M. She will be fitted with two pairs of direct acting condensing steam engines of 300-horse power nominal, and is adapted for passenger and goods traffic on a light draught. The ceremony of naming her *Yangtze* was performed by Miss Annie Daniel, granddaughter of P. Daniel, Esq.

There was recently launched from the yard of the Birkenhead Graving Dock Company the composite ship *Chusan*. The naming ceremony was performed by Miss Hunter, of Mount Alyn, Gresford. The *Chusan* has been built for the China trade, her owners being the British and Eastern Shipping Company, of Liverpool. The *Chusan* is a vessel of 800 tons. Her dimensions are:—Length, 183 feet; beam, 31 feet 6 inches; depth, 20 feet. This ship has been constructed with vertical iron frames and planked with teak horizontally. No internal component part of the vessel is of wood, and the whole of the inner surface is at all

Digitized by Google

times to be seen without the removal of any ceiling. She will be despatched first to an Indian port.

The other day there was launched from the building-yard of Messrs. Hart and Sinnot a very splendid ship for the East India trade called the *Oriflamme*. The vessel is 1,500 tons burthen, and has been built for the Bombay Shipping Company. Her length is 250 feet, breadth 36 feet, and depth of hold 23 feet. She is built of the best materials, and is classed A 1 at Lloyd's for 12 years, and at Liverpool for 20 years. She is intended for the Bombay trade, and will be commanded by Captain Broadfoot, of the R.N.R. The *Oriflamme* went off the stocks in beautiful style, and was christened by Mrs. Gilmore, the lady of one of the principal owners. The vessel will be ready for sea in about six weeks.

The launch of a vessel from the yard of Messrs. Hocking and Son, Stonehouse, took place on the 29th ult. She is metalled to the height of 18 feet, and is divided by lower and upper decks; her saloon (25 by 14) made of teak. Under the lower deck is a capacious hold. She is intended for the China Seas and Cape Mauritius, and was named *Sophie*. The following are herproportions:—Length between perpendiculars, 141 feet; breadth extreme, 29 feet; moulded, 28 feet 2 inches; burthen, for tonnage, 536 by the old, 475 by the new rule; depth of hold, 18 feet; draught of water when ready for sea, forward 8 feet, aft 10 feet.

Monetary and Commercial.

Much distrust exists in the East India and China trade. This feeling has been very much confirmed by the failure of Messrs. Kelson, Tritton, and Co., a house established in 1858, who entered largely into the East India trade, but, like many others, had ventures in the American trade. This house is of a similar calibre to Messrs. Halliday, Fox, and Co., and their difficulties about cotemporary, although they contrived to throw them over until the present. This is one of the cases to which we referred in January, when we cautioned our readers that heavy engagements had been thrown over from 1864 to 1865. With the existing prices in Mincing-lane other failures are imminent.

Many acceptances are current of bills drawn against India and China cotton at the rate of 1s. 2d. per lb., which is valued at 6d. to 9d. For the present there is little chance of any improvement in this staple, but if the Confederates can hold out another six months, we fully expect rates to advance to their former quotations. This opinion is based chiefly on supply and demand. We expect the supplies to fall off very considerably, and the consumption of the mills to be more active.

The liabilities of Messrs. Kelson, Tritton, and Co. are computed at nearly £1,000,000, and the assets will, it is believed, be satisfactory. This is without taking into account a Confederate speculation. A few months since these liabilities were very much larger, and there is little doubt but that acceptances and credit have been too freely granted, and the business extended over too large an area for a young house, while corresponding vigilance and labour has not been bestowed on the conduct of the business of the firm, judging from the fact of Mr. Kelson having engaged himself as a director on several of the schemes formed of late, while it is now known to the world that the affairs of the house he was at the head of required all his best talent and energy to conduct it through the enormous engagements to which it was committed. The penalty paid, we trust, will be for the benefit of others.

At a meeting of the Netherlands India Steam Company, on the 30th of March, the report was adopted. The report stated that the capital of the company, consisting of £300,000, divided into 15,000 shares of £20 each, was all subscribed for on the 1st of July last, with the exception of 3,000 shares reserved for Netherlands India. The company has now nine steamers in course of construction, and these, it is believed, will be sufficient for carrying on the steam service specified in the contract, and some extra service in addition. Interest at 6 per cent. per annum on the amount paid up has been paid to the shareholders to the 1st of January last.

The biddings for £300,000 in bills on India took place at the Bank of England. The proportions allotted were—to Calcutta £174,210, and to Madras £22,000. The minimum price was fixed at 1s. 11¼d. on Calcutta and Madras, and 1s. 11½d. on Bombay. Tenders on Calcutta and Madras at and above the minimum will receive in full. On Bombay all the tenders were below the minimum. These terms show a reduction of more than 1 per cent. from those obtained on the last occasion, and indicate a further rapid diminution in the demand for means of remittance from this country.

The following is from the report of the directors of the Chartered Bank of India, Australia, and China, to be submitted at the meeting on the 12th inst., and confirms the view we lately expressed, that the banks would be holders of shipping documents, representing, when realised, about half the amounts they had advanced;—

The general balance-sheet for the year ended the 31st of December last, now presented to the shareholders, exhibits a net profit of £104,827. 18s. 5d., to which has to be added the sum of £13,061. 14s. 4d., carried forward from the previous year. After deducting the half-yearly interim dividend declared on the 5th of October last, amounting to £54,540, there remains a disposable balance now of £63,349. 12s. 9d. The directors regret that they feel under the necessity of setting aside a sum of £22,000 to meet bad and doubtful debts, chiefly attributable to the recent depreciation of Eastern produce held as collateral security. Out of the sum of £41,349. 12s. 9d. remaining, they recommend the shareholders to declare a dividend for the half-year ended 31st December last, at the rate of 10 per cent. per annum, free of income-tax, and which with the previous half-year's *interim* dividend will amount to 12½ per cent. for the whole year. A balance of £1,349. 12s. 9d. will then remain to be carried over to the new account. At the last annual meeting the directors reported that the premium on the issue of 7,800 new shares had been received; and they have now to add that all the calls in furtherance of this increase of the bank's capital, raising it to £800,000, were duly paid up—the reserve fund now amounting to £105,000. The directors consider it extremely desirable for the interests of the bank to obtain for the shareholders the right, which most chartered banks, and all companies incorporated by Act of Parliament, appear to possess, of re-electing immediately all the directors duly qualified who may go out annually by rotation; the existing charter of this bank restricts the shareholders' choice to the re-election of only one of the out-going directors. The opportunity of this application to the Treasury would also be availed of to solicit that the directors may make provisional appointments in case of vacancy in their number during the year—such occasional appointments to be subject to confirmation by the shareholders at the next ensuing ordinary general meeting. They propose accordingly to apply to Her Majesty's Treasury for those privileges; and in terms of the deed of settlement, two extraordinary general meetings of the shareholders must sanction the application. After despatch, therefore, of the business of the ordinary meeting this day, it will be constituted an extraordinary one for the special objects indicated.

It will be seen from the following reply that it is very improbable, as we intimated at the time, that the change will be effected in the despatch of the mails.

"General Post-office, London, March 30.

"Sir,—With reference to the memorial which you transmitted to the Postmaster-General on the 20th of January last from merchants, bankers, and others suggesting that the East India mails should be despatched from London on the evening of every Friday instead of four times in each month, I am directed by his Lordship to inform you that this department has for a long time past been alive to the advantage which would be derived from an arrangement under which those mails would be despatched on a fixed day in each week, but that it has been deterred from the adoption of such an arrangement by the large additional expense which it would probably cause in a service already entailing a heavy loss.

"Any change in the days for the despatch of the Indian mails would, of course, affect the despatch also of the mails for Australia, which are carried as far as Point de Galle by the Indian mail packets, and in consequence of the receipt of the memorial referred to the form of tender which had been issued for the conveyance of the Australian mails has been altered with a view of ascertaining what would be the extent of the additional cost for this portion of the whole service, in the event of the mails being despatched every fourth week instead of once in a calendar month. The tenders are to be sent in on the 10th of next month, and when received they will, in addition to other information already obtained, afford the means of judging what would be the probable cost of the entire service beyond that which is now paid if the proposed arrangement were carried into effect. "I am, Sir, your most obedient servant,

"Mr. R. W. Crawford, M.P." "F. Hill.

At the meeting of the Oriental Bank Corporation, to be held on the 20th of April, the directors propose to declare a dividend of £2 a share, making, with £2 already paid, a distribution of 16 per cent. for 1864.

The amount of bullion by the P. and O. Company's steamer *Delhi* from Southampton on the 4th inst., was in gold, to Madras, £90. In silver, to Galle, £430; to Singapore, £21,000; to Hong Kong, £3,958; to Foo-chow-Foo, £2,000; to Shanghai, £5,230. Total in gold, £90; in silver, £32,618.

The results exhibited by the Board of Trade Returns for the month and two months ending the 28th February indicate a more cautious spirit than that prevailing last year. The decline of over a million and a quarter in the value of our exports during the past month is a strong sign of this feeling; but although the falling off extends to most of the leading articles of commerce, the chief decline is to be found in the articles of cotton yarn and cotton manufactures. The total declared value of exports for February last was £11,376,214, against £12,698,121 in the same month of 1864, and £9,298,576 in 1863, being a decline, as compared with 1864, of £1,321,907, but, as contrasted with 1863, an increase of £2,077,638. For the two months of the present year the total is £21,865,553, against £23,111,707 in 1864, and £17,343,731 in 1863, which is a decrease on the former period of £1,246,154, but an increase on the latter of £4,521,822. The brief changes as regards exports have been an increase in linen manufactures and machinery, with a decline in alkali, beer and ale, coals and culm, cotton yarn, cotton manufactures, haberdashery and millinery, hardware and cutlery, linen yarn, metals, seed oil, silk manufactures, wool, woollen

Digitized by Google

and worsted yarn, and woollen manufactures. In imports the increase has been in raw cotton, guano, hemp, raw silk, tallow, wool, coffee and sugar; and the falling off, in flaxseed and linseed, woollen manufactures, cocoa, spirits, tea, timber, tobacco and wine. The course of trade with the Far East is presented in these returns by the following figures:—

EXPORTS TO CHINA AND HONG KONG.

For the Month of February.

	1863.	1864.	1865.
Cotton yarn	12,410	383,130	98.050 lbs.
Cotton manufactures	509,672	2,788.445	5,885.356 yds.
Worsted stuffs	296.914	901.999	1,427.045 ,,
Woollen and worsted cloths	13.582	30.932	27,366 ,,
Lead	1,248	491	300 tons

Value for the Two Months ended 28th February.

	1863.	1864.	1865.
Cotton yarn	£13,413	£44,996	£27,976
Cotton manufactures	49.063	146,791	275.083
Worsted stuffs	55.747	108,118	165.246
Woollen and worsted cloths	32,606	47,879	40,573
Lead	39,283	21,713	14,148

The quantity of Cotton Manufactures exported to other ports and countries of the Far East during the month of February, and the value for the two months of the present year are returned as follows:—

For the Month of February.

	1863.	1864.	1865.
Ceylon	175.559	1,913,703	490.944 yds.
Singapore	185.080	6,600,262	4,289.066 ,,
Java	—	4.413,017	1,356,618 ,,
Philippine Islands	1,645,751	1,380,007	3,741,760

Value for the Two Months ended 28th February.

	1863.	1864.	1865.
Ceylon	£15,925	£117,252	£33.791
Singapore	35.922	191,214	162,912
Java	19,757	125,466	70,895
Philippine Islands	37,400	99,118	178,958

Of Cotton Yarn 170.600 lbs. was forwarded to Singapore in the month of February, and 4.000 lbs. to Ceylon; the value of the export, for the two months ended 28th February being—to Singapore, £25,848; and to Ceylon, £850.

IMPORTS.

Of Raw Cotton, the quantity imported shows an increase with respect to China but a decrease from British India, as compared with last year. This important article figures in the returns thus—

Quantity for the month of February.

	1863.	1864.	1865.
British India	188,599	203,672	158.243 cwts.
China	7,316	21,137	28,256 ,,

Quantity for the Two Months ended 28th February.

	1863.	1864.	1865.
British India	265,025	233,645	186,104 ,,
China	7,316	28,988	45,652 ,,

Value for the month ended 31st January.

	1863.	1864.	1865.
British India	£589,479	£310,619	£211,431
China	—	76,024	111.624

Unrefined Sugar, from Java and the Philippine Islands, was imported in the month of February, to the extent following:—2nd quality (not equal to White, but equal to Brown clayed) 1,154 cwt.; 3rd quality (not equal to Brown Clayed, but equal to Brown Muscovado) 16,216 cwt.; 4th quality (not equal to Brown Muscovado) 32,360 cwt. The value of the import for the month ended 31st January in the present year was—3rd quality (not equal to Brown Clayed), £460; 4th quality, £21,533.

Of Hemp, the import from the Philippine Islands in the month of February was 21,795 cwt., and for the two months of the present year 29,576 cwt. The value of the import for the month of January was £11,282. There was no import of this article during the months of January and February last year.

Of Coffee the importation from Ceylon, both for the month and the two months, exhibits a decrease as compared with preceding years:—

	1863.	1864.	1865.
For February	1,497,567	1,327,184	573,370 lbs.
For the two months	6,324,731	4,946,391	3,385,469 ,,

The present Returns give the value of the British and Irish Produce and Manufactures exported to different ports and countries during the month of January in this and the two preceding years; and also the Computed Real Value of the Merchandise Imported during the year ended the 31st December, 1864, and the same two years. We extract the figures relating to the Far East:—

Exports for the Month ended 31st January.

To	1863.	1864.	1865.
China (exclusive of Hong Kong)	£89.678	£173,536	£160,072
Hong Kong	80.263	58.936	110,779
Singapore and the Eastern Straits	72,125	35.143	109,819
Ceylon	38,483	88,416	37,615
Netherlands India	29,952	26.207	47,939
Philippine Islands	—	82.772	116,253
Japan	13,462	16,048	48,951

Imports for the Year ended 31st December.

From	1862.	1863.	1864.
China (exclu. of H. Kong)	£11,982,374	£12,897,403	£12.792,001
Hong Kong	154,721	1,288,907	2,881,929
Singapore and the Eastern Straits	2,375,813	1,830,522	2,056.817

ARTICLES OF IMPORT.

TEA.—There has been a reaction in the market since the departure of the last mail, producing a larger business. There has been a speculative movement in Common to Fair kinds of Congou, and the Trade also have bought with more confidence. The low and dusty kinds of Congou have recovered the decline of ½d. per lb. lately current, owing to some demand for Export. Fair to good common have also sold rather higher. Common to fair flavory kinds show about ½d. per lb. advance on the late low rates. Good to fine Kaisows have been in moderate request at former prices. Finest have been rather more inquired for. Common to fair blackish-leaf kinds, owing to further speculative purchases, have advanced about ½d. per lb. Medium qualities have been sold to a fair extent at about former prices; the finer kinds have been fairly saleable at rather better prices; in finest sales continue very limited. Tayshans show no change, they being now only in moderate supply; new-make Canton kinds have been sold at rather improved prices. Common to good Oolongs show no change; fine continue in moderate demand at full prices. In Souchongs a small amount of business has been done at former prices. Flowery Pekoes remain without improvement. In Scented Teas, both Capers and Orange Pekoes, but little has been done: prices show no quotable alteration, though the market for them is without animation. A few sales of uncoloured Japans have been made at from 11d. to 1s. 4d. per lb., but the supplies on offer are still in excess of the requirements of exporters. There have been no further public sales of Indian Tea, but some are advertised for Tuesday next (the 11th). Green Teas show no improvement, they continue to be sold without reserve at public sale at still lower prices. There has been some demand for export for Young Hysons, but even this has not prevented a further decline in prices. Hysons remain exceptionally firm. Gunpowders have sold at a further decline of 1d. to 2d. per lb. Canton-made kinds are still in very limited demand, and prices rather lower. The series of sales, which commenced on the 21st ult., only closed on the 29th ult. Out of 39,318 packages brought forward, 37,407 packages were sold, 36,445 packages being without reserve. 18,174 packages were brought forward on the 4th inst., of which 12,169 packages were sold, 10,129 packages being printed without reserve. The deliveries for the month reach 10,480.000 lbs. The stock in the United Kingdom on the 31st ult. was estimated at 115,000,000 lbs., against 106.400,000 lbs., and the quantity afloat at 21,465,000 lbs., against 26,195.290 lbs. last year.

SILK.—The necessities of consumers acting upon an extremely limited stock, has restored prices to the highest point previously obtained for China Silk, and almost the highest point for Japan Silk. The deliveries too, show some improvement upon those of February, while the arrivals have been very small. Deliveries up to 7th April:—China, 564 bales; Japan, 201 bales; Canton, 14 bales. Arrivals in April to date:—China 800 bales.

COTTON.—The London Cotton Brokers' Association again report a dull and drooping market for most descriptions. China and Japan are ¼d. lower. The closing quotations are—China: mid. fair, 7d.; fair to good fair, 7½d. to 8d.; good to fine 9½d. Japan: mid. fair, 7¼d.; fair to good fair, 8d. to 9½d.; good to fine, 10d. to 11d. The stock of China and Japan in London on the 6th April was 18,360 bales, against 24,515 bales at same time last year. The total stock in London was 127,545 bales against 90,333 bales last year. The stock in Liverpool on the 7th April was 605,453 bales against 308,640 bales in 1864. Afloat to Europe on the 7th of this year were 36,885 bales of China and 65 bales Japan; against 103,276 bales China and 6,792 bales Japan last year; the Anna Maria, arrived in London from Yokohama during the week, brought 632 bales. In the Liverpool market, China and Japan declined ¼d. to ½d. per lb. during the week.

SUGAR.—There has been a gradually improving demand during the past week, and rather large transactions have been concluded, mostly at firmer prices. 3,286 bags Penang were all disposed of, but at relatively moderate prices, good to fine fine brown 27s. 6d. to 29s. 6d., low to good yellow 30s. to 32s., fine and superior grey 33s. to 34s. 6d. By private contract the transactions have been of considerable amount, comprising 8,200 bags Clayed Manila at 28s.; 220 baskets Java, sound at 36s. 9d., washed 35s. 6d.

COFFEE.—The recent heavy arrivals of Ceylon continue to be liberally brought forward, and prices have again mostly given way. Public sales of Plantation, amounting to 2,030 casks, 1,060 barrels and bags, have gone off irregularly, in some instances at rather lower prices, but nearly the whole quantity offered has been cleared off; fine fine ordinary to low middling 77s. 6d. to 81s., middling to good middling 81s. 6d. to 87s., fine colory 93s. to 94s. 6d. The native description has been only saleable at a further depreciation of 1s. to 1s. 6d. per cwt., at which, however, the bulk of 94 casks, 5,920 bags found buyers; small, 64s. to 65s.; good ordinary, 66s. to 67s.; superior, 68s. 6d. to 70s. At auction, 654 bags Singapore sold steadily; good Campar, 63s. 6d., one lot 64s.; 187 bags common Manila were bought in. The lighter amount of 420 casks, 160 barrels and bags Plantation in public sale on the 7th met with a better demand, and were taken at prices rather higher than those just quoted; 152 casks native were held firmly and withdrawn.

RICE.—Prices are well supported, and the following sales have been effected:—15,000 bags Rangoon, fair 9s. to 9s. 6d., fine 10s.; 9,500 bags good fair Nakrenzie 9s. 3d., and 6,000 bags middling to good white Bengal, 12s. 3d. to 14s. 3d.

CAMPHOR.—This market has been very animated: large business done, attended with an ultimate advance of 7s. 6d. to 10s. per cwt., and the market remains very firm.

CARDAMOMS.—Are again and very materially dearer. 8 barrels Ceylon sold at 3s. 4d. to 3s. 8d. for middling.

CASSIA LIGNEA.—Steady; and 419 boxes at auction mostly sold at 78s. to 79s. per cwt. for good 2nd quality. Buds: Nothing of any consequence doing.

COCOA-NUT OIL.—This market has become much less buoyant. Former terms are not sustained, and at a slight reduction business has been very limited. 227 casks Cochin, 300 casks Ceylon, 29 casks Sydney, and 450 casks Manila at auction.

DRUGS.—Cubebs: Flat, and very little doing: 10 bags at auction retired. Dragon's Blood: Good quality scarce, and wanted; other sorts neglected; of 5 cases at auction, two sold at £11. 10s. per cwt. for very good lump. Galangal Root: Nothing of any moment doing. Rhubarb: Very firm: of 88 cases at auction, half sold at 5s. 10d. per lb. for fair round, and 2s. 4d. to 2s. 8d. ordinary dark.

GUMS.—Benjamin: Of 84 cases Sumatra at auction, two-thirds sold at £13. 5s. to £13. 10s. per cwt. for good 2nd, and £5. 7s. 6d. to £5. 15s. middling drossy 3d., being dearer. Damar: Is quiet; and of 147 cases at auction, a few only sold at 44s. per cwt. for fair picked. Gamboge: Quiet; and of 24 cases at auction, only two or three sold at £9 to £9. 5s. per cwt. for middling pipe.

GUTTA PERCHA.—Of 18 tons at auction only one-fifth sold, but at steady prices, 1s. 1¾d. per lb. for fair genuine but mixed, and 9d. ordinary. India Rubber: Flat, and lower; 144 baskets Penang at auction retired; good Singapore has sold to a moderate extent at 1s. 2d. per lb.

HEMP (MANILA).—Not any auctions have been held; moderate business is reported privately at £29 per ton for good roping, and £27 for arrival, of fair current quality.

HORNS (BUFFALO).—Firm: 4 tons Siam at auction sold at 42s. 6d. per cwt. for 3¼ lb. average.

JAPAN WAX.—Steady; of 99 cases at auction half sold at 56s. to 57s. per cwt. for inferior saucers; good block firm.

OILS.—Anniseed: Firmer: 14 cases at auction retired; fair business done privately up to 6s. 3d. per lb., and there is still inquiry thereat. Cassia: Large sale are stated to have been made at advancing prices, and value has risen to 8s. 3d. per lb., at which a few cases have been placed, and the market remains firm. Cinnamon: Firm: of 3 cases at auction two sold at 2s. 9d. per oz. for good sweet.

SAGO.—Flat: only 110 boxes at auction, and those retired. Tapioca: 132 boxes common to middling stained Singapore found buyers at 1d. to 2d.; 200 cases Flour in tins went off at 2½d. per lb.

SHELLAC.—The adverse course of this article continues, and we have report a further fall of 10s. to 15s. per cwt. in the fortnight, of 1,787 packages at auction little more than half sold: Orange at £5 to £6. 2s. 6d. per cwt.; Livery Orange, £5. 2s. 6d. to £5. 7s. 5d.; Button, £3. 10s. to £5. 7s. 6d.; Native £4. 10s. to £4. 12s. 6d.; and Block and Blocky, £4. to £5. 17s. 6d.

SPICES.—Cinnamon: We quote 1st sort 1s. 8d. to 2s. 7d; 2nd 1s. 5d. to 2s. 3d.; 3rd 1s. 3d. to 1s. 10d.; 4th and Jungle 10d. to 1s. 5d. per lb. 108 bales at auction sold at the previous currency. Cloves: Steady generally; 16 cases Penang at auction sold at 1s. per lb. for middling. Of 18 casks Amboyna, half sold at 5d. and 5¼d. per lb. for fair; 36 bags Zanzibar sold at 3⅞d. to 3¼d. for good. Mace: Very firm: only 4 cases Penang at auction, two sold at 1s. 4d. to 1s. 8d. per lb. for fair to good reddish. Nutmegs: Are the turn lower generally; and of 309 cases Penang at auction three-fourths sold at 3s. 5d. per lb. for good bold, and 10d. to 2s. 1d. ordinary small to fine medium.

PEPPER.—Black: The speculative demand having for the present subsided, prices have slightly receded; and of 1,424 bags Singapore, and 6,660 bags Penang at auction, about one-third of each sold at 3½d. to 3¾d. per lb. for the former, and 3⅝d. to 3¼d. for the latter. White: Is ¼d. per lb. cheaper; and of 253 bags Penang at auction, two-thirds sold at 5⅞d. to 6⅜d. per lb. for ordinary to very good; and 30 bags good Singapore at 6¼d.

TERRA JAPONICA.—Cutch, Pegue: Continues very quiet; and of 7,053 bags at auction, a very small proportion sold at 23s. 6d. per cwt. for ordinary. Gambier: Very quiet, with retail trade only within our quotations; 435 bales at auction, all retired.

TOBACCO.—Manila Leaf: The effects of large importations, with more to follow, and very few sales, have combined now to make the aspect of the growth look very dangerous for both holders and speculators. Prices must be considered quite nominal. Manila Segars and Cheroots have sold at full rates; late imports are somewhat inferior. Java: Sales limited; really good lots are wanted at a price. Japan: Continues in fair request; shippers must blame themselves for the result as far as profit goes, if they will send on unsound tobacco. Prices at auction for damaged were lower. Quotations:—Manila Cheroots and Segars, 8s. to 9s. 3d.; Manila Leaf, 7d. to 8s.; Japan, 4d. to 7d.; Java, 6d. to 1s. 0½d.

MISCELLANEOUS—Galls: Turkey flat, and holders very desirous of relling; China and Japan are quiet; only 20 cases China at auction setired. Musk: Firm; only 3 caddies Tonquin Pod at auction sold at 23s. per oz. for ordinary, and 5 tins Grain sold at 53s. to 54s. per oz. for good. Rattans: Steady; and 3,227 bundles Penang at auction sold at 3s. 7d. to 4s. 5d. per 100. Sapanwood: Steady; 24 tons fine clean Batavia sold at auction at £12. 5s. to £13. 10s. per ton; 4 tons Manila retired. Very little doing privately. There is export inquiry for good wood. Soy: Remains firm, with inquiry. Star Anniseeds: Dearer, moderate business having been done privately up to £6. 15s. per cwt.; 16 cases at auction retired. Sticklac (Siam): Very quiet; 163 cases at auction, all retired. Turmeric: No China offering; 10 bags Java at auction sold at 16s. 6d. per cwt. Vermilion: Flat; 20 boxes at auction all retired; sellers at 2s. 6d. per lb.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7. 5s.; nail rod, £8. 15s. to £9; hoops, £9. 15s. to £10; sheets, single, £10. 15s. to £11; Staffordshire bars, £8. 15s.; rails, £6. 10s. to £7.

STEEL.—Swedish keg, £15.

COPPER.—Sheet and Sheathing, £97 to £98 per ton; yellow metal, 8d. to 8¼d. per lb.

TIN.—95s. to 96s. for block; 90s. to 97s. for bar. Tin plates, best charcoal, I.C., 28s. to 29s.

LEAD, &c.—English pig, £20 to £20. 5s.; W.B., £21. 15s.; shot, patent, £23; sheet, £21; spelter, £19. 10s.; zinc, English sheet, €24.; quicksilver, £8.

The following is from the Circular of Messrs. French and Smith:—There has been but little improvement in the Metal Market during the past month, with but unimportant alterations in prices. Iron: Scotch Pig improved 1s. 6d. to 2s. per ton during the month, and continues to advance; the present price is 62s. 9d. for g. m. b. In Wales the manufacturers are very full of orders. In Staffordshire there is no alteration in quotations, but the iron masters decline fixing a time for delivery while the dispute with the workmen remains unsettled. Copper: In this metal there was more activity, particularly in unmanufactured, and the price is a little higher both for English and Foreign. Tin: English remained flat throughout the past month. For Foreign there was more demand, but, notwithstanding this, the price ruling early in March was not maintained; the price has now recovered to 88s. cash for Straits. Tin Plates continue unaltered in price. The shipments, 105,000 boxes last month, show an increase of 30,000 boxes over the shipments in February. The shipments in March, last year, were 90,000 boxes. Lead continues inactive, and the quotations about 5s. to 10s. per ton lower than at the commencement of March. Spelter is quiet. The stock on the 31st ult. was 7,365 tons, against 11,898 tons the same period last year. Quicksilver without variation.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

NICOLINA (Ham. ship), Batavia to Amsterdam, March 21, 32 N., 38 W.

FREIGHTS AND CHARTERS.

The increased ease in the money market, together with a fair prospect of a still further reduction in the rate of discount at no distant date, has imparted a firmer tone throughout the export market than has been evinced during the present year. Freights are now more freely offering, and rates show an upward tendency. Rates for coal to Galle are firm, and all available tonnage offering for that port is quickly taken up.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 20s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 40s. weight, 30s. measurement. To Bankok: 60s. weight or measurement. To Ceylon: 40s. weight, 25s. measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £31 and £1. 10s. For Shanghai: £40 and £1. 15s. For Manila: £1. 12s. 6d. For Batavia: £22 10s. For Singapore: £25 and £1. 1s. 0d. For Galle: £26 and £1. 2s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty having invited tenders for the conveyance of 350 tons naval stores, and 82 small spars, from the river Thames to Hong Kong, have ordered the Cambalu to be surveyed for that purpose.

The P. and O. Company have contracted for the delivery of 6,600 tons of coal at Hong Kong.

CASUALTIES.

The Carausius (barq.), of Hartlepool, from Shields, for Colombo, got on shore on the north part of the Goodwin Sands, March 23, but was assisted off by a Trinity steam vessel, and proceeded. She afterwards put into Plymouth to examine her bottom, and has since sailed.

The Bravo, Nordstrom, from Batavia for Amsterdam, arrived off Dover March 27, with loss of mainyard, canvas, and other damage, and was towed in the next day.

The Charlotte, of Derby, Longmead, from Schiedam for the Amoor, put into Falmouth, March 27, leaky, and with cargo shifted. She has since been surveyed, and commenced landing her cargo.

The Kaap Hoorn, Dik, from Batavia, which arrived off Dungeness, March 16, and sailed for Holland, put back to Dungeness Roads, March 22, from the Noord Hinder Light ship, with loss of sails. On the 29th she went on shore near New Sluice, Rotterdam, but got off without apparent damage.

The Columbine, Kok, from Batavia for Rotterdam, had to put back to the Downs, from Brouwershaven, March 29, with loss of two anchors and chain, and was supplied with others.

The Jan Hendrik, Lelyvelt, from Banjoewangie for Amsterdam, which put into Simon's Bay 30th Jan., leaky, has been repaired there. On the 23rd Feb. she reloaded the discharged portion of her cargo, with the exception of 422 bales of coffee and 75 serons of sugar, which, being damaged, would be sold.

The following notice has been posted at Lloyds:—The Claramont, McIntosh, which sailed from Shanghai 5th Sept. for London, arrived at Ascension 6th Dec., and sailed thence on the 8th, has not since been heard of.

The Jacoba Helena, Swart, from Java, which arrived at Brouwershaven, March 30, had encountered bad weather in the North Sea on the 26th and 27th March, had grounded on the Flemish bank, and received some damage to her after-deck.

Digitized by Google

BUENOS AYRES, Feb. 11.—The Geelong, Ferrier, hence to Batavia, which vessel was reported on the 11th Jan. as aground here, has been condemned, and was sold on the 30th Jan.

The Wildeman, Driest, which arrived at Texel 1st April, from Batavia, reports having encountered much bad weather, during which she sustained considerable damage to her sails, channels, and stanchions, and lost an anchor and chain.

MISCELLANEOUS.

At ST. HELENA.—Feb. 20, from Batavia, Jacob Roggeveen, Marken, and sailed 21 for Amsterdam; 21, from Banjoewangie, Azia, Molenaar, and sailed for Amsterdam; from Colombo, John Brewster, Lelean, and sailed 24 for London; 22, from Banjoewangie, Telanak, Popken, and sailed 23 for Amsterdam; from Amoy, Theodor and Julie, Lorenzen, and sailed for New York; from Hong Kong, Conrad Heinrich, Backmann, and sailed for Falmouth; from Batavia, Oceanus, Dirksen, and sailed 23 for Rotterdam; from Zebu, North, Brown, and sailed 23 for Liverpool; 26, from Macao, Guadalupe, Munos, and sailed 28 for Havana; 27, from Pasaroeang, Henrietta, Gertruida, Collin, and sailed March 1 for Amsterdam.

At TABLE BAY.—Feb. 12, from Colombo, Wynaud, Jones, and sailed 18 for London; 21, from Macao, David, Roberts, for Havana; 19, Ymuiden, Melenberg, sailed for Batavia.

At ALGOA BAY.—Feb. 10, Oleander, Taylor, sailed for Colombo.

At MAURITIUS.—Feb. 25, Alphonse Nicolas Cezard, Bouron, sailed for Singapore.

At PLYMOUTH.—April 7, The Corea (s.), Russell, from Dumbarton, for Hong Kong, has put in here, having in tow the Wigtonshire (barque), of North Shields, derelict: no news of crew.

LOADING.—At the Chinchas, for China, Cote d'Or, Captain Monnier

TUCKER AND SON'S

IMPROVED

ENAMELLED PUNKAH TABLE LAMPS.

THE celebrity which TUCKER AND SON'S LAMPS have acquired in the East for burning *steadily* under the Punkah or in side draughts, and *brilliantly* with any of the *coarse native oils*, renders eulogy unnecessary; but having been enabled, by increased facilities of manufacture, very considerably to *reduce the prices* of the above favourite (but hitherto expensive) description of their lamps, T. and Son beg to notify the fact to the Eastern public.

They are elegant and durable, are finished in exact imitation of many beautiful stones and marbles, such as Malachite, Lapis Lazuli, Serpentine, Sienna, Brocatella, Jasper, &c., and are not affected by heat, damp, friction, or insects; oil, spirits, or acids accidentally spilled. The enamel surface is so inseparable from the base (block slate, proverbial for its strength) that it cannot be removed except by an edged tool. It *requires* simply *dusting*, but if rubbed hard, it only adds a gloss to its appearance—at all times cool and agreeable.

After ten years' constant use and handling, these lamps are none the worse for wear.

Malachite (green), Serpentine (brown), or Lapis Lazuli (blue), are most recommended.

Table Lamp complete, with engraved glasses, as sketch, 72s.

A Plainer Lamp, without the Corinthian capital, 50s. complete.

Either pattern, with plain frosted glasses, 7s. 6d. each less.

*** *The above Lamps are supplied to burn Petroleum or Rock Oil also.*

Orders can be sent through any merchant or Agent, or, if accompanied by a remittance, direct to

TUCKER AND SON,

Silk, Alpaca, Gingham Steel Frames, Canes, Fittings and all kinds of Material for the Trade. Oiled and japanned silks and cambrics.

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, 12, THREE KING-COURT, LOMBARD-STREET, LONDON, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists' Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co's Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty, and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S PILLS.—Worn-out sufferers may hope for relief from these purifying and strengthening Pills after physic and physicians have failed to effect a cure. In all disorders of the stomach, irregularities of the bowels, derangement of the liver, and diseases of the kidneys, these Pills will be found especially useful in re-instituting order and restoring health. Holloway's Pills clear away obstructions, remove poisonous particles from the blood, secretions, and system generally, give purity and regularity to the circulation, tone and power to the stomach, energy and vividness to the brain. Holloway's Pills can be confidently recommended as restoratives of constitutions shattered and broken up by excessive mental labour, intemperance, inordinate indulgence, or other hardships which make the young man old.

List of Passengers.

PASSENGERS INWARD.

By this mail, to Marseilles, per P. and O Company's steamer Ceylon, arrived April 10—From Yokohama: Mr. Graham. From Shanghai: Mr. Stewart and native male servant, Mr. Davison, and native male servant. From Hong Kong: Mr. Murray, Col. and Mrs. Tickell, Mr. Deacon, Mr. Barrnetta, Mr. Hartmann, Capt. Nolan, Rev. Fisher, and two second-class passengers. From Singapore: Mr. Phillips, Mr. Marten, Don and Donna Rodriguez, Don J. Navas, Don and Donna Alonso and servant, Donna Vellard, infant, and servant, Don Guturrez and three children, Don. M. G. Penha. From Penang: Mr. and Mrs. Sandelands, three children, and native male servant. For Southampton: Mr. and Mrs. Ormiston, Mr. and Mrs. Hawke, Messrs. H. Pitt, R.N., W. E. Price, M. Klinck, M'Petre, Morice, Morison, Thompson, R.N., E. Krigge, Brooks, Howgate.

PASSENGERS OUTWARD.

Per P. and O. steamer Delhi, from Southampton, April 4.—To Shanghai: Mr. and Mrs. Medhurst and two infants and European servant, and five second-class passengers. To Hong Kong: Mr. R. M. Reddie, Lieut.-Col. T. W Lovell, C.B., R.E. Mr. C G. Tatham, Dr. A. M'Kenna, R.N., Mr. W. C. Johnston, Dr. Freer, Mr. W. L. Nash, Capt. Burland, Mr. G. E. Wilkinson, and five second-class passengers. To Singapore: Mr. Odardo Beccari and one second-class passenger. To Penang: Mr. Lyster. To Ceylon: Lieut. and Mrs. J. J. C. Miller and child, Mr. and Mrs. Hill, Mr. H. V. Ellis, Mr. A. Featherstonhaugh, and one second-class passenger. To Calcutta: Capt. Watts, R.E., Mr. Balderson, Col. Bagot, Miss H. Taylor, Mr. Abbott, Mr. Morris, Mr. Banyard, Lieut. R. J. O'Brien, and four second-class passengers. To Madras: Mr. F. R. Twynam, Miss Vincent, and three second-class passengers. To Suez: One second-class passenger. To Alexandria: Three second-class passengers and one child.

From Marseilles, April 12.—To Hong Kong: Mr. H. Pember, Mr. José Loureiro, Mr G. F. Vianna, Mr. and Mrs. A. A. de Zarate. To Shanghai: Mr. F. M. Satow, Mr. Theotoky. To Singapore: Baron R. de Tuyll. To Calcutta: Mr. G. Woodbridge, Mr. J. M. Clelland, Lieut. H. Collett, Ensign Cutbill, Mr. M. K. Angelo. To Madras: General Smythe, Lieut. G. S. Neile.

From Malta.—To Calcutta: Mr. and Miss Howard.

Per P. and O. Co.'s steamer Pera, from Southampton, April 20.—To Hong Kong: Dr. A. B. Messer, R.N., Mrs. Carey and two sons. To Singapore: Mr. Frohlich, Mr. F. H. Gottlieb. To Ceylon: Mr. and Mrs. G. A. Mackenzie, Mr. Cross, Miss Cumberland, Mr. J. L. Dewar, Mr. C. B. Culpepper.

From Marseilles, April 26.—To Hong Kong: Mr. G. Raynal. To Ceylon: Mr. and Mrs. Rose.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Dates are to the 15th February. The London mail of the 10th December arrived out on the 7th February.

All attempts at obtaining the introduction of a system of local self-government for the Settlement, appear at the moment to be fruitless. The community, in a public meeting specially convened by the Consuls for the consideration of the subject, having resolved upon the election of land-renters under a system of double election, embracing both national and property qualification, for the double purpose of deciding upon the best method of forming a Municipal Committee and of electing that Committee if they agreed upon the premises—and these elections having been carried out, so far as the English, French, Dutch, Swiss, and Portuguese were concerned, under the direct action of their respective Consuls—all appeared to be in a fair way of coming to a satisfactory conclusion when, at their first meeting, all such hopes were dashed away on finding that no American delegate had been appointed. In the stead thereof the United States Consul, Mr. G. S. Fisher, made an attempt to force upon the community a portion of a pet scheme of his own. This attempt was, in a dignified and positive manner, repudiated by the delegates assembled, who resolved that the following letter should be addressed and forwarded by the chairman to Colonel George S. Fisher; and which was then written and forwarded to him:—

"Yokohama, 6th February, 1865.

"SIR,—I am in receipt of your favour of to-day's date informing the delegates of the different nationalities assembled at this moment in the British Consulate Court-room, that J. S. Blydenburgh, Esq., has this day been elected as the committeeman on the part of the citizens of the United States. I have read your letter to the assembled delegates, and have been instructed by them to inform you that they have not assembled on the present occasion to elect committeemen for a municipality, inasmuch as the late resolution of consuls as to the formation of a Municipal Council cannot be accepted by the community. The delegates beg to call your attention to a resolution passed in the last meeting of land-renters, deciding that delegates should be nominated for the discussion of the proper method of forming a Municipal Council; and to inform you that, in consequence of no American delegates being present at the meeting, no discussion on the method of forming a Municipal Council has been entered into.—I have the honour, &c.,

"E. PIQUET."

Mr. Piquet was then authorised to act as convenor of the delegates in the event of any circumstances appearing to him to render further meeting useful or desirable, and the meeting broke up. There was some hope, however, that the United States Consul might at the eleventh hour withdraw his obstruction of a great public scheme universally concurred in by all his colleagues and the entire community,—in which obstruction he stands out alone and unsupported. In the meantime (remarks the *Japan Herald*) the Japanese, who have, on the condition of the foreigners repairing and keeping their Settlement in order, given up twenty per cent. of the ground rentals to have been and to be received by them, look on with wondering eyes whilst we wade *actually and literally* ankle deep in mud through our main street, or make a detour of perhaps a quarter of a mile from a direct course to get from one part of the Settlement to the other; and they are naturally puzzled as to what could be the purpose in releasing them from their understood obligation to keep our roads, &c., in proper order, whilst the money given up by them to our Consuls for the purpose remains unapplied in their chests.

A public meeting of British land-renters had been summoned for the 16th of February, at the British Consulate.

A vast improvement in the local postage arrangements, so far as the French post-office is concerned, has been effected by the institution of a system of late postings. Letters, &c., are now received at that office (on the payment of a trifling fee) up to an hour and a-half of the actual departure of the mail boat. The British post-office, however, closes finally at half-past four on the previous day, or seventeen hours before the departure of the mail. Our local contemporary observes on this:—

There is no denying the fact that in all improvements which have been effected in the local postal arrangements, the French authorities are fairly entitled to the honour of having taken the lead. At the British post-office our letters were formerly pitched out of the window for a general and indiscriminate scramble amongst the assembled crowd. The French Packet Agent commenced the proper sorting of them in his office, and the delivery to the owners or their messengers. In a few weeks the British Packet Agent followed the example, Next, the French Packet Agent fitted up a series of boxes and racks for the benefit of those desiring the accommodation, and shortly afterwards (though we had only just been told that the Post-office business being only by the sufferance of H. B. M.'s Consul conducted in a room at the British Consulate, no alterations could be permitted) some forty letter-boxes were fitted up and disposed of at $10 per annum each. Four months ago we alluded to the fact that although the mails never left here before 9 o'clock in the morning, even those who were willing to pay for the accommodation of a late postage could not obtain it, but must post all their correspondence before 4 o'clock on the preceding afternoon, or 17 hours previous to departure. During this four months no inclination has been shown, so far as the public are aware, by the British Packet Agent to correct this anomalous state of affairs; but now once again the French Packet Agent shows the way, leads off with one of the greatest possible improvements, and receives letters, &c., up to within an hour and a-half of the departure of the mail. We can only hope that in this, as in the former instance, his lead will be followed.

The Yokohama Volunteer Corps is near actual dissolution. The general yearly meeting of the members was held on the 26th January, at the residence of the Commandant, S. J. Gower, Esq. The Treasurer, E. J. Spence, Esq., brought up the accounts, showing a considerable balance in favour of the corps. Commandant Gower then tendered his resignation of that office, which, after a very unanimous and flattering acknowledgment of his services, was accepted. Captain W. C. Clarke tendered the resignation of his Captaincy: a like flattering compliment upon his services to the corps having been voted by acclamation, the resignation was accepted. A discussion then ensued upon the question of the dissolution of the corps, resulting, however, only in the appointment of a committee to realize the assets, to confer with the authorities as to the terms upon which present members might be allowed to retain the arms now in their possession, and to report again to another meeting.

The case of the Comptoir d'Escompte (Shanghai) *v.* J. Rumebe, had been tried before the American Consul, with Messrs. Blydenburgh and Stearns sitting as assessors. This was an action to recover principal and interest of five promissory notes of $1,000 each, lying under protest. The plaintiffs put in the notes in dispute (service and protest of which were admitted by the defendant), which were duly endorsed by and the payees, Messrs. De Forest and Co., of Shanghai, to plaintiffs, and asked judgment for amount and costs. The defendant pleaded fraud in the original transaction for which the notes were given; to-wit, for merchandise sold to defendant by Messrs. De Forest and Co., and which was overcharged in the invoice. The defendant claimed that he was a partner of Messrs. De Forest and Co., doing business for them at Yokohama, and under his partnership agreement was entitled to receive from Messrs. De Forest and Co. all merchandise forwarded by them to him for sale at the cost price. For their failure to keep this agreement he refused payment of the notes without set-off was allowed. He further claimed that the five notes were still actually in the hands of the original payees, and not of the plaintiffs in this suit, and that he had given notice in the papers in June last of his refusal to meet the notes when due The Court decided, that as to the three notes due respectively July, August, and September, judgment must be given for the plaintiffs, as the evidence, especially that of Mr. Morel, manager of the Comptoir d'Escompte, clearly established that they were passed into third hands for consideration prior to Mr. Rumebe's notice, and no defence to their payment could be had. As to the remaining two notes it appeared that they had passed into the plaintiff's hands after notice of refusal to pay, and although the defendant had failed to establish a fraud as alleged, he had shown such indication of possible fraud in the agreement between Messrs. De Forest and Co. and the defendant, that the Court would allow him three months to offer additional evidence; failing which judgment would be given for plaintiffs on the October and November notes also.

A late visitor to Yedo relates that on his way to the Tycoon's palace there he passed the site Choshiu's *gasigi*, covering some seven or eight acres of ground. "Destruction could not be more complete, a few trees being alone left standing. Heaps of stone and mortar, and charred timbers proclaimed to all Yedo the disgrace of this unfortunate Prince. The long line of front wall had been entirely demolished and replaced by rough-made palings. On the inside of the rear wall, near the exit, broad streaks and dabs of blood marked the spot where the adherents of Choshiu had made a last vain appeal to their merciless executioners. Three hundred men, women, and children were slaughtered here. What the Japanese at Yedo thought of the matter it is difficult to ascertain; at all events our escort declined being pumped on the subject: they were civil and smiling, but silent. It is known, however, to all Japanese that Choshiu did contend with foreigners at Simonoseki, and that the severe punishment he got at Yedo had some connection with it. Is not the inference favourable to foreigners?"

The Yokohama public had been gratified by two theatrical representations—one given by the Royal Artillery amateurs, and the other by the Garrison amateurs; and the former were about to give another performance for the benefit of Madame Yeamans. The pieces played were "Robert Macaire," "Diamond Cut Diamond," "Furnished Apartments," and "The Spanking Legacy." The band of the 20th Foot acts as orchestra on these occasions; and a little drop-scene, painted by an officer of that regiment, is very highly spoken of. It represents the view on the creek from a short distance above Homura, with Fusiyama and the range of hills in the distance, as they appear at present with "their summits clad in snow."

The list of men-of-war in harbour was showing rapid diminution. The British Admiral's flagship *Euryalus*, the *Coquette*, and the *Coromandel*, and his Netherlands Majesty's ship *Djambi* had all left. The arrival of the *Barossa* and *Rattler* helped, however, somewhat to fill the void.

SHANGHAI.

The *North China Daily News* states that H. E. Tseng, Governor-General of the two Kiang, has been invited to Peking, and will leave Nanking during the first week in March. It is said that his Excellency has lately been fortunate enough to discover 1,000,000 taels of silver hidden in Nanking, but whether or not this has had anything to do with the invitation from the Court, we are not in a position to decide.

The Fychow giant has postponed his trip to England and the Continent for an indefinite period.

In our last number we noticed the accident by which Messrs. Nicholson and Smeaton lost their lives. The following is a detailed account of the affair from the *Friend of China*:—

"We have seldom seen a larger attendance in the British Cemetery here than there was on Sunday at the funeral of Mr. Nicholson, of the firm of Nicholson and Boyd, Engineers at Pootung. Mr. Nicholson, whose first voyage to China was as third engineer in Messrs. Jardine, Matheson and Co.'s steamer *Fiery Cross*, ten or eleven years ago, was only thirty-three years of age when he came to an ultimately end by the blowing up of the small steamer *Spunkie* last week,—and, most correct, systematic and energetic in his dealings, was deservedly popular among men of his class. His loss to the firm which he managed must be irreparable.

"The contemptible craft in which Mr. Nicholson received his death-stroke is the property of Messrs. Jarvie, Thorburn and Co., of this port, and was intended, when first put up here by the defunct engineering firm of Russell and Co., for a cargo barge, worked by engines made in Scotland of nominally twenty-horse power. There was something the matter with the gear of the engines which it was thought Mr. Nicholson or his assistants might find out and rectify, and so enable the vessel to perform feats in travelling a trifle faster than those of a snail; and when they started on a trial trip last Thursday it was thought that success had been attained.

"They had been under weigh about eleven minutes only, the gauge showing a full complement of water, and were progressing quite spunkily for the *Spunkie*, under a pressure of 59 pounds (she could have been worked up to seventy) when, as is conjectured, some sediment in the cylinder forced the bottom out, killed Mr. Smeaton, formerly engineer of the *Fei-ma*, outright, and so severely scalded Mr. Nicholson that, after lingering in great pain till half-past two on Saturday morning, he expired, to the great regret of all who knew him.

Digitized by Google

"At the time of the catastrophe he was looking over the stern at the rotation of the propeller, to which his attention had only a few seconds before been drawn by his assistant, Mr. Rolls; and lucky was it for Mr. Rolls that, by so calling Mr. Nicholson to him, he was partially shielded from the volume of stream driven from the fractured machins. Although severely scalded and forced overboard, Mr. Rolls has got so far well as to be able to attend at the British Consulate and give his evidence before the Court sitting to investigate the circumstances of the accident, the most mysterious perhaps that ever occurred on this somewhat renowned river of steamboat explosions, and entirely upsetting the dictum which we heard poor Nicholson lay down on board the *Donnington* the other day, that so long as the steam-gauge shows a sufficiency of water in the boiler there is little fear of a blow up without previous warning; the remark being drawn from him in connection with a reference to the then recent bursting of the *General Ward*."

The following extracts are from the *Friend of China*:—

We have been favoured by a gentleman well acquainted with the past history of the force first known as Ward's, then as Burgevine's, afterwards as Holland's, and, lastly, as Gordon's, with the following list of officers whose names stood on the Quinsan Garrison roll immediately after the Soochow massacre, the principal periods of service in that epoch, and their after career as far as known:—

Col. Kirkham ..	1 year	9 mon.	Went home, severely wounded.
Col. Murrant ..	1 „	8 „	Went home, disarmed.
Col. Smith ..	1 „	6 „	In business, Ningpo.
Col. Brooks ..	1 „		Went home.
O'Brown, Major.	½ „		In Customs establishment, Shanghai.
Col. Tapp ..	1 „	6 „	Killed at Changchowfoo.
Col. Doyle ..	1 „	6 „	At Soosaqui.
Col. Tumblety..	1 „	9 „	Died at Shanghai.
Col. Williams ..	1 „	3 „	Went to Amoy.
Col. Morton ..	½ „		Killed at Changchowfoo.
Major Tuite ..	½ „	7 „	Killed at Kintang.
Major Mansfield .		7 „	Resides in Shanghai.
Col. Howard ..	1 „	1 „	In Customs department, Shanghai.
Major Caute ..	½ „		Went home.
Col. Chapman..	½ „		Killed at Changchowfoo.
	CAPTAINS IN THE ARTILLERY.		
Murphy.. ..	1 „	6 „	At Soosaqui.
Waters	1 „	6 „	Do.
Escott	1 „		Went home.
Dunn			Do. wounded.
Lawless.. ..			Stonemason, Shanghai.
Woolley ..			At Soochow, storekeeper.
Manson.. ..			With Mandarins.
Bottle	½ „		At Soosaqui.
Baffey		7 „	Was at Amoy and skedaddled.

Ohsen	„		Gone to Japan.
	PROVOST STAFF.		
Nissen	„		Invisible.
Reynolds	„		Dead.
	HONG KONG.		

Dates are down to the 1st March, or hree days later than per French Mail, full details of which were given in our issue of the 10th. We notice that, relying on the passing of th e Limited Liability Ordinance, the Hong Kong and Shanghai Banking Company will shortly commence business, also that a new scheme has been announced styled

THE CHINA AND JAPAN SHIPMENTS (FOREIGN AND COASTWISE) COMPANY (Limited). Capital, $5,000,000. In 20,00 0 shares of $250 each.

The list of directors, &c., is not yet announced. It is to be hoped that none of the first-class houses will give their countenance to this or any similar project. Limited liability may be useful at Hong Kong, but is not required for such schemes as this. The merchants are quite capable and have sufficient enterprise for all purposes of trade.

The vacancy in the Legislative Council caused by the return to England of C. W. Murray, Esq., has been filled up by the appointment of Thomas Sutherland, Esq., the Superintendent of the P. and O. Company.

H. W. Wood, Esq., has been appointed to fill the vacancy of Vice-Consul to Siam, vacant by the return to England of William Adamson, Esq.

COCHIN CHINA.

SAIGON.

The export of rice, from Saigon to China alone, for the year 1864, amounted to no less than 1,121,034 piculs. This is a very large amount, and (remarks the *Penang Gazette*) illustrates how rapidly the French settlement there is progressing. There is no doubt that this trade will yearly increase and be of immense importance, considering its vicinity to China. The year 1865 will, however, not prove nearly so prosperous, owing to the late commencement and short duration of the rainy season, and also to the fact of several storms having occurred during the earlier part of December, 1864, which are supposed to have somewhat affected the then standing crop. Supplies have, in consequence, been latelyshort, and dealers find some difficulty in fulfilling their engagements. Prices have risen, and no new contracts are being entered into. It is reported, however, that the crop, on the whole, promises to yield nearly an average quantity of rice.

The *Siam Times* also speaks well of the prospects of Saigon. It says:—"After many blunders it seems that the French have really taken hold in earnest to build up a city at Saigon, and

Digitized by Google

are determined to make it rival Singapore and Hong Kong. They have an immense rich productive back country, intersected by a great river and some smaller streams, to support them in their undertaking. We hear that Saigon has been laid out by French engineers for a great commercial emporium, and has been drained to remove the malaria, and is growing into a large healthy town. A friend of ours who recently visited the place states that the right course has been hit upon at last, and they are now pursuing a course to conciliate the natives and draw them into their territory."

A correspondent of the *Straits Times* complains of the French contract system. He writes:—

SIR,—On the 3rd of April tenders will be received in Saigon for supplying 40,000 casks of flour during 1866 and 1867. There are about 18 to 20 articles in the "cahier des charges;" some of which are certainly rather extraordinary. Here is an example:—"Every disagreement relative to the execution or interpretation of the contract will be judged by the governor without appeal. The contractor must agree to submit to such terms." The Governor, judge and party, without appeal, in spite of regular tribunals who are acting in the colony and in France! That is stronger despotism than in the mother country, for any administration contract is there submitted to an appeal to the "Consul d'Etat." It shows the spirit of the present administration. Let M. de la Grandiere be admiral of France, but let us pray that he may never return to Cochin China.

SIAM.

BANKOK.

The oil discoveries in the United States having attracted the attention of his Majesty the Supreme King, he has invited explorers to traverse his country to see if oil cannot be found in Siam. His Majesty appears to be of opinion that for the present his dominions are more likely to benefit by developing their productiveness in any way whatever, more than from the introduction of railways or the telegraphic wire. It is known that his Majesty writes English, and as our readers may be curious to see how far an Oriental Prince has mastered the difficulties of the English idiom, we subjoin a portion of the letter he addressed on the subject to our new contemporary, the *Bangkok Recorder*, for it must not be forgotten that the capital of Siam now boasts of two English papers:—

"I shall be glad, however, to have any person who may examine our land, and point out where some mineral oil would be obtainable from, either in like manner of the American oil or of the usual Berman mineral oil. It will be good production of our land. I think such the consideration and endeavouring is suitable for us who are very far from use of telegraph or railway, which endeavour no doubt might be liable to be favour to thieves, or metallic wires and iron bars, and long stones, &c., before use of telegraph and railroad. Ah! oh! many foreigners who are endeavouring very often to let us be advised, and have great expense for what we think will be of no use for this country of poor and ignorant people. I would be glad to know as soon as possible who will assist us to point out the place for some mineral oil in Siam.—I beg to be your good friend,

"S. P. P. MUNGKUT, R.S., in 5,017th day of reign."

The *Siam Times* notes the birth of "a royal son to His Majesty the First King, being the seventieth offspring and thirty-sixth prince, and the fifth child of the thirteenth mother, who is the daughter of the late Governor of the province of Ligore."

MALACCA STRAITS.

SINGAPORE.

Dates hence are to the 8th March. As mentioned in our last, the London mail of the 26th January arrived out on the 4th March.

Cholera was still on the decrease: at all events, nothing like the same number of funerals were to be seen along the roads. Great complaints, and apparently with good reason, had been made in the newspapers that no system of registration is adopted by which an authentic account of the varying mortality could be obtained. Disease in any form might be making the most rapid strides and yet nothing known of it comparatively. It appears that by an Act of the Indian Council the Municipal Commissioners have some power to enforce a correct periodical statement of the number and particulars of the interments in each burying ground, but in absence of any special legislation on the subject they decline to act. Here again is an illustration of the inconvenience, if not positive detriment, which Singapore suffers by its inability to pass enactments for itself.

The Duke de Brabant stayed only a couple of nights at Singapore, and was suffering slightly from rheumatism. His Royal Highness had gone forward to China.

That the *Shenandoah*, confederate cruiser, was at Melbourne was known at Singapore at the date of these advices.

The Governor has been pleased to appoint Mr. E. J. Westerhout to officiate as Deputy Sheriff at Malacca; and Mr. P. B. Maxwell, Senior Sworn Clerk to the Penang Division of the Court of Judicature, to officiate as Magistrate and Commissioner of the Court of Requests at Province Wellesley, *vice* Major Mitchell, deceased.

Joint-stock enterprise, which has slumbered in Singapore for a long time, seems now, with the example of Bombay before it, to be on the point of waking. Several companies are talked about; but that which is likely to be first realised is the Marine Insurance Company before mentioned. The Tanjong Paggar Company, the first joint-stock enterprise set on foot, is now in such confidence that its shares are said to command 15 per cent. premium. An accident which may slightly retard the operations of this company, occurred during the fortnight by the giving way of part of the embankment. It is stated that $3,000 to $4,000 will repair the injury.

On the 24th February a proclamation with beat of gong was made, that the copper doits which have been for some time in circulation as issued by the Sarawak Government, would not be received in payment at the farms, the Municipal office, or the Treasury. Taking their cue from this they are sedulously rejected even by the coolies, who call them *man* doits, in contradiction to *woman* doits; the former bearing the head of Sir James Brooke, and the latter the head of the Queen.

The British steamer *Pesso*, Capt. Cairns, from New York the 18th December last, arrived on the 2nd March.

PENANG.

The death of Captain William Somerville Mitchell, Officiating Assistant Resident Councillor, and Magistrate of Police at Penang, occurred on the 23rd February. Captain Mitchell belonged to H.M. 22nd Regiment of Madras Native Infantry, and commenced his career in the Straits service as Executive Engineer of Penang; thence he was removed to Malacca as Assistant Resident, and officiated as such till the present Resident Councillor resumed his duties, on his return from Europe. The deceased was we believe most useful in the Public Works Department, and was on that account retained in Province Wellesley, where he had been officiating as Assistant Resident during Mr. Earl's absence on sick leave. Captain Mitchell had been ailing for a few days and his death occurred unexpectedly; he is much lamented by a large circle of friends, and the public has lost a zealous servant.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

GUNTHER.—On the 5th Feb., at Shanghai, the wife of G. Gunther, Esq., of a son.
MACLEAN.—On the 24th Feb., at Hong Kong, the wife of G. F. Maclean, Esq., of a daughter.
MORRIS.—On the 2nd Feb., at Shanghai, the wife of Edward Morris, Esq., of a daughter.
PURVIS.—On the 1st March, at Glassmount, Singapore, the wife of John M. Purvis, Esq., of a son.

MARRIAGES.

COOPER—TICKELL.—On the 18th Feb., at St. John's Cathedral, Hong Kong, by the Rev. J. J. Irwin, D.D., William M. Cooper, Esq., of H.B.M.'s Consular Service in China, to Mary Louisa, daughter of Colonel S. R. Tickell, late Bengal Staff Corps.
JACKSON—WEDGWOOD.—On the 11th Feb., at St. John's Cathedral, Hong Kong, by the Rev. J. J. Irwin, D.D., Colonial Chaplain, Thomas Witter Jackson, Esq., of Ningpo, to Margaret, daughter of T. B. Wedgwood, of Rock Ferry, Cheshire.

DEATHS.

BOWRA.—On the 7th April, at Osborne-terrace, Clapham-road, Harriett Eliza Glover, eldest daughter of the late Robert Bowra, Esq., aged 45.
CUMMINGS.—On the 18th Feb., at the Seaman's Hospital, Hong Kong, Edward Cummings, apprentice belonging to the ship Sea Nymph.
MCCLELLAND.—On the 8th April, at Treanie House, Ayrshire, Annie Elizabeth Collins, wife of Charles Grey McClelland, Esq., of Singapore.
MAGUIRE.—On the 11th Feb., drowned at sea, from on board the British schooner Spray, John Maguire, ordinary seaman, a native of Ardrossan, N.B.
NOTT.—On the 15th Feb., at the General Hospital, Hong Kong, Samuel Nott, Corporal 99th Regt., aged 27 years, of consumption.
PRE.—On the 8th Feb., at Macao, Alexander Grand Pre, late of the Hong Kong Civil Service, aged 46 years.
ROBB.—On the 23rd of Feb., at Marine Villa, Singapore, Anne, the wife of Daniel Robb, Esq., of Singapore.
SCHOBOLT.—On the 25th Feb., at Tiang-Ho, Kowloong, Peter Schobolt, Munich, Bavaria, aged 23 years.
WILLIAMS.—On the 15th Feb., at Shanghai, George Bond Williams, a native of Boston Massachusetts, U.S.A., aged 29 years.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents., and is divided into decimal parts of ten.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—MACAO.—The season may be fairly considered at an end, and no transactions of any kind have taken place during the fortnight; total amount of deliveries as last reported. The Lochnagar, partly laden at Whampoa, took in here some 379,000 lbs. of Black, and sailed for London; but few to go forward, deliveries of which have been reported. Of common Tyshans the stock may be estimated at about 4,000 half-chests, which will probably find buyers for the Colonies, India, and Straits. The new crop Tyshans may be looked for in a month or so, and some small transactions are already reported in the country for the new leaf at 15 taels, which would correspond to 25 taels prepared and packed for shipment from this. Much depends, however, on the weather as to the extent of supply from the first crop, and no musters can be produced until first arrivals take place.

CANTON.—Although no settlements of the 25 chops Country Congous which form the stock can be reported, still upon the whole the market has shown greater signs of activity during the past fortnight. Canton-made Teas: Both Scented Orange Pekoes and Capers have received a good deal of attention during the fortnight. The Scented Orange Pekoes are now very deficient in scent and are coarse, while many of the Capers show very fair value. Gunpowders: About 3,500 boxes have been taken for the Continent; other kinds neglected. Country Greens: 287 half-chests Hysons have been taken for India, which is the only transaction in these kinds reported.

FOOCHOW.—The transactions of the fortnight have been trifling, and exhibit a decline of one tael on Congous, and nearly as much on Oolongs. The supplies from the interior have entirely ceased, and may be pronounced exhausted. The settlements since last mail are reported as under. Congous: 755 chests, at 6½ taels for dust and broken leaf, 12 to 13 taels for ordinary common, 14 to 15½ taels for good common, 17 to 18½ taels for light flavory, and 20 taels for good flavory to medium Kaisows. Oolongs: 1,400 hf. ch. common to good cargo at 11½ to 15½ taels. The stock on the market is stated as follows. Congous, 5,000 ch.; Souchong, 1,920 do.; Oolongs, 1,000 hf. ch.; flowery Pekoe, 140 ch.; scented teas, 4,200 boxes.

SHANGHAI.—Black: The small stock of Congou left on the market being firmly held for rates considerably above home prices, little or no business has been done. One chop of fair black leaf has been settled at Tls. 16½, and one of fair Ninchow at Tls. 23½, the former showing a decline of one tael, whilst the latter is fully up to the previous prices. Re-shipments have only been 450 chests, and the stock amounts to 4,600 chests. Quotations: Nangchow and Oopacks, medium to good, none; Oonams, medium to good, Tls. 21 to 24; fair black leaf, Tls. 16½ to 20 per picul. Total settlements and shipments from 1st June to date, 378,500 chests, against 382,900 chests last year. Green: The continued unfavourable advices received by the mail have at last compelled teamen to reduce their demands, and settlements are reported of 7,800 half-chests at prices showing a decline of four taels on previous rates, say, fair to good Fychow at Tls. 27 to 32; fair to good Moyune at Tls. 33 to 36½. Re-shipments amount to 7,500 half-chests, and the stock is estimated at about 55,000 packages. Total settlements and shipments from 1st June to date, 187,600 half-chests, against 252,900 half-chests last year.

KIUKIANG.—Green Teas: 1,300 packages had been placed partly in barter, at rather lower prices, but the Teamen showed no anxiety yet to realise, and buyers were consequently unwilling to operate largely. About 3,500 packages had gone forward on native account, and one contract chop, leaving the stock on the market 134,200 half-chests. Quotation were:—Moyune, Fine to Finest tls. 30 to 34; Common to Medium, tls. 28 to 30 per picul. Fychow, Medium to fair, tls. 26 to 29; Common, tls. 24 to 25 per picul. Total Settlements and Shipments: 66,200 half-chests or 3,608,300 lbs., against 172,400 half-chests, or 10,168,600 lbs. last year. Black Teas: In these there was again no business to report, and no change in quotations, which remained. Ningchow, Common, tls. 16 to 17. Hohow, Common, tls. 12 per picul. Total Settlements and Shipments: 110,800 chests, or 9,170,600 lbs. against 207,900 chests or 9,505,000 lbs. last year.

HANKOW.—No transactions have been reported during the fortnigh One chop has arrived from the interior, making stock on the market chops. The total shipments from this port for the season amount to 371,700 chests or 37,235,000 lbs., against 362,1000 chests, or 35,308,400 lbs. corresponding period last season.

YOKOHAMA.—Since last report, dated 30th ult., there are but few transactions to note in this article. The market remains much in the same state; one or two parcels have been settled at slightly easier rates, but dealers decline selling further at these prices and are asking about previous quotations. Settlements for the fortnight may be estimated at 820 picul. Stocks here continue light, and there is about 8,000 piculs up country, consisting principally of medium kinds.

RAW SILK.—SHANGHAI.—At the close of last mail an active deman commenced, which continued during the fortnight; the settlements ar estimated at 1,000 bales. The purchases have comprised medium and inferior Yuenfas, Hainings, Taysaams, and Szechuens, and have been influenced by the decline in the rate of exchange, the certainty of a short suppl for the season, and improved advices from Europe to hand by 26th Dec. mail. Prices have been very firm, and an advance of Tls. 10 to 20 per picul, has been established. The supply from the interior has been very limited,

Digitized by Google

and it is the general belief that there is little more silk up country to be brought down. The arrivals from Japan have been 342 bales per Corea, arrived yesterday. Prices at Yokohama had declined $15 to 20 per picul. Stock was estimated at about 900 piculs. Their export shows a deficiency of 3,580 bales as compared with last season. The settlements of the fortnight are reported at 1,000 bales, against 460 bales corresponding fortnight 1863-64, 400 bales 1862-63, and 1,900 bales 1861-62. The total settlements of the season to date amount to 24,000 bales, against 22,200 bales 1863-64, 46,480 bales 1862-63, and 51,600 bales 1861-62. The present unsold stock is only 500 bales, against 5,000 same period last season, 3,000 the season before, and 8,000 season 1861-62. The following are latest quotations:—Taysaam, No. 2, chops, Tls. 430 to 440; No. 3, Tls. 414 to 425; No. 4, 5, and inferior, Tls. 390 to 410 per picul.

YOKOHAMA.—Upon the resumption of business after the native holidays, transactions were at first somewhat difficult, the foreign buyers trying to get concessions on previous prices, which the Japanese dealers were little disposed to yield; subsequently, however, the latter having slightly given way, about 850 bales were settled at a reduction of about $20 to $30 on medium and inferior descriptions; the best and finest kinds being very scarce and more firmly supported. The unsold stock on the market may be estimated at 700 piculs. Total settlements to date, 10,350 bales against 13,500 at same time last year. Ida medium, 670 to 680; Mybash and Sinchu best parcels offering at 680 to 700; medium, 650 to 670; inferior, 600 to 640.

CAMPHOR.—HONG KONG.—The only transaction reported during the fortnight is a sale of 100 piculs at $19.20 per picul packed; and while no further supplies have arrived, nor can be expected shortly, prices are expected to advance a little. Stocks on hand about 700 piculs, and present market value $19.50 dollars per picul packed.

RAW COTTON.

HONG KONG.—The settlements of the fortnight have been confined to purchases for local consumption. The unsettled state of the Liverpool market, as advised by the 10th January mail, has had the effect of stopping the export demand. Supplies have been moderate—hardly equal to the local demand—and, consequently, the market does not suffer from the cessation of the export demand.

SHANGHAI.—A moderate business has been transacted in best dry Kampek at 17.7 to 18 tls., and in Shanghai descriptions, which are all more or less wet, at 16.5 to 17.2.5 tls. The shipments at the highest quotation and current rates of Exchange, and freights, cost F. O. B. with freight and insurance, 1s. 9¼d. to 1s. 0¾d. The quality of the dry cotton, as previously stated, is very good indeed, and will probably realise the extreme quotation for China staple. Attention is called to the deficiency in the export compared with that at this period last year, and to the fact that the estimated yield of this crop is 25 per cent. less than that of the last. Export from 1st June to date, 14,049,891 lbs., against 36,415,097 lbs. 1863-64.

YOKOHAMA.—There have been no receipts of this staple, and the transactions of the fortnight are confined to the settlement of a small parcel at $29. The value at Yedo is said to be $28, in which case lower rates can hardly be expected to prevail for some little time. The exports for the present season amount 22,910 bales, against 40,891 do. same period last season, and 6,227 do. the season before.

CHINA IMPORTS.

COTTON YARN.—Continues to meet with but little demand, and the value of the lower grades again shows a slight decline upon the quotations given under date of 14th inst. The sales of the past fortnight have been confined to the settlement of 165 bales of Nos. 16-24, and the article is in comparatively large stock. Grey Shirtings: These goods do not show any decline in value, but the dealers continue to exercise great caution in making purchases, the settlements of the fortnight are put at 8,800 pieces, and sales from Foochow of 2,850 pieces at $4.70 to $5.75 for 7 lbs. to 8½ lbs. goods are reported. White Shirtings: Remain as quoted under date of last circular, but the business transacted during the fortnight has been upon a small scale, and does not exceed 3,500 pieces. T-Cloths: Have been in less request than during the early part of the month, but holders are very firm in demanding full prices for their goods. The transactions of the fortnight amount to 4,650 pieces, in addition to which some 2,000 pieces of mildewed cloths have been moved off at public sale. Settlements of 2,850 pieces 7 lbs., at $3.60 to $3.72 are reported from Foochow. American Drills: There are not any transactions to notice, and our quotations are quite nominal. White Spotted Shirtings, Dyed do., Brocades, White and Coloured: There has been no inquiry for these fabrics in the Hong Kong market, and quotations are nominally as before. Some 500 pieces White have however found purchasers in Foochow at $5 per piece. Damasks: There have not been any sales of these goods reported Chintzes: Have found buyers in this Colony to the extent of 1,000 pieces. Handkerchiefs: Have remained without any inquiry, and there are not any sales to report. In the Canton market the quotations for all the foregoing descriptions of goods must be considered as entirely nominal: there has not been a single transaction reported, and there is at present no business doing in Foreign manufactures at that port.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths: These goods have met with a moderate amount of inquiry during the past fortnight, and the sales of Spanish Stripes at this port amount to about 860 pieces. In Canton the sales are put at 120 pieces, and in Foochow 160 pieces assorted have found buyers at 90 per cents per yard. Long Ells: Have again improved slightly in value, and have met with a fair amount of inquiry during the past fortnight; the settlements amount to 1,900 pieces at the annexed quotations. Camlets: Have been in fair request, and the purchases reported since the date of last circular amount to 900 pieces. Lastings: Have been in small demand, and sales are restricted to 150 pieces. Blankets: There are not any transactions to notice.

METALS.—Iron, Flat &c.: There is not much change to notice in the value of the various descriptions of Iron enumerated, and the amount of business transacted during the past fortnight has been of moderate extent, amounting to 840 piculs of Nail Rod, 400 piculs of Hoop, and 260 piculs of Wire. The sales in Canton amount to 900 piculs of Nail Rod, which have been taken at a slight decline in value. Lead: the inquiry for Lead in the Hong Kong market has been extremely trifling, and the sales of the fortnight amount to 200 piculs. In Canton, where prices have also declined slightly, settlements of 1,600 piculs are reported. Tin has been largely dealt in, and has changed hands to the extent of 2,800 slabs. Tin Plates: 260 boxes have changed hands.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From London: Feb. 8, Sea Witch.
At SHANGHAI.—From Sunderland: Feb. 21, Chalmers.
At HONG KONG.—None.
At MANILA.—From Cardiff: Feb. 14, Tewkesbury. From Newcastle; Peiho.
At SINGAPORE.—From Liverpool: Feb. 22, W. Dixon; March 6, Oleander. From Sunderland: Feb. 23, Fontenage.
At PENANG.—From London: March 2, Devonvale.

DEPARTURES.

From YOKOHAMA.—None.
From SHANGHAI.—For London: Feb. 21, Stanley.
From FOOCHOW.—None.
From HONG KONG.—None.

At PENANG.—For London: Britannia and Dunmore. For Boston: Rocket.

FREIGHTS AND CHARTERS.

YOKOHAMA.—To London: Cotton and tea, £3 to £3. 10s. per ton; silk, £4. 10s. of 50 cubic feet.

SHANGHAI.—Unemployed tonnage in the harbour is large, with little freight offering either for coast or home. To London and Liverpool the rates remains at £3 to £3. 10s. tea and cotton and £4.

FOOCHOW.—To London: £2.

HONG KONG AND CANTON.—The following is from the circular of George Holmes:—Tamana (629), Manila to St. Thomas or Pernambuco, for orders; if to New York or Boston, £3. 5s. per ton for sugar; £4. 5s. for hemp; and 5s. per ton extra if on to Great Britain. Ceserza (344), Manila to Falmouth, for orders, at £3 per ton for sugar and £4 for hemp. Osprey (597), Manila or Zebu to London or Liverpool, at £3 to £4. 5s. for hemp. The rates to Saul and back are 25 cents per picul; if on to Ningpo, 45 cents; and to Shanghai, 50 cents. To Newchwang and back 40 cents per picul; and to Cheefoo and back 40 cents.

MANILA.—Although no vessel has been taken up during the fortnight, tonnage is in better supply, and some settlements may soon be expected.

SINGAPORE.—To England: Little inquiry exists; vessels on the berth are loading at £2. 10s. dead weight, and £2. 17s. 6d. light freight.

PENANG.—To London: The Britannia and Devonvale are on the berth at £3. 5s. for dead weight, £3. 10s. light freight, and £4 measurement.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—Feb. 10, La Plata Newcastle to Singapore; 13, Edinburgh Castle, Glasgow to Singapore; Solide, Newcastle to Sourabaya; 14, Jan Van Galen, Rotterdam to Singapore; 15, West, London to Singapore; 16, Hasty, Swansea to Singapore; Singapore, Rotterdam to Singapore; Cornelia Hendrika, Newcastle to Tegal; Celebes, Amsterdam to Sourabaya; 17, Cornelia Agnes, Sunderland (orders); Johanna Oluffa, Newcastle to Singapore; and 21, Nordstern, Hamburg to Singapore.

From CHINA, &c., to ENGLAND and CONTINENT.—Feb. 13, Hawthorn, Singapore to London; 17, H.I.M. Albreck and Colarvala, Singapore to Cronstadt; 23, Lamal, Japan to London; Naomi, Shanghai to London; 23, Empress of India, Lebu to Liverpool; 24, Joanne Dare, Hong Kong to Bordeaux; 25, Hindostan, Hong Kong to Plymouth; Blohm, Singapore to Falmouth; Constance, Shanghai to Liverpool.

From CHINA, &c., to MONTREAL.—12, Princess of Wales, from Shanghai.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—April 9, off Dungeness, from Java, Bezoekie; 8, off Plymouth, from Batavia, Nicoline; 7, off Scilly, from Batavia, Ridderkirk; March 19, at Havana, from Macoa, Encarnacion; April 11, at Falmouth, from Maulmain, Devonshire.

DEPARTURE.—March 14, from Sunderland, for Galle, Alphington.

SPOKEN.—Harkaway, Sunderland to Japan, April 1, 46 N., 8 W.

CASUALTIES.—The Labrador, Williams, from Cardiff, for Manila, put back to Cardiff, April 1, after having been in collision: she had her port mizen rigging carried away, chain plates torn out, and her stanchions, &c., broken.

MISCELLANEOUS.—Laid on at Liverpool: For Valpar and Hong Kong, Crusader, Gentoo.

ARRIVALS AT NEW YORK.—March 21, N. B. Palmer, from Hong Kong, December 19, spoke in lat. 38 N., lon. 28·15, ship Glencoe from Glasgow for Shanghai.

SAILED FROM NEW YORK.—March 24, ship Samuel Russell, for Hong Kong.

SUBMARINE TELEGRAPH CABLES.

Mr. Francis Gisborne has compiled, and Messrs. Edward Stanford, of Charing-cross, published, a very useful table of the statistics of submarine telegraphcables up to April, 1865. By it we are told when and where the cable in question was and is laid, its length, its weight, the material with which it is covered, how it has answered, and how long it has been in operation. After stating these statistics, certain truths of great weight are deduced from them, which must of necessity be granted, as they are grounded on facts, not on any uncertain hypothesis.

Naval and Military.

Lieut. Col. J. W. Lovell, C.B., the head of the field fortifications department of the Royal Engineer Establishment, Chatham, having been appointed Commanding Royal Engineer in China, is succeeded at Chatham by Major F. H. de Vere, who has commenced his duties.

Mr. A. Boyton, Assist. Paymaster, R.N., recently in charge of Her Majesty's ship Psyche, has absconded from Malton. He has taken with him about £420 from the Government cash chest. It appears that Mr. Boyton asked from the commander, Lieut. R. Sterne, leave to pass Saturday and Sunday with some friends in the country, and to return to his ship on Monday morning. Hence his absence excited no suspicion. It has been discovered that he was taken on board the Messina packet. Messrs. Bone and Autey, Paymasters of Her Majesty's ship Hibernia and Magicienne, have been ordered to hold a survey on the Psyche's stores, and to examine her accounts. They reported the extent of the defalcation to amount to about £590, and it is stated that, in addition to this, the mess-funds have suffered to the extent of about £100. Had Mr. Boyton remained a little longer he would have received a very considerable sum, his share of salvage, effected by Her Majesty's ship Psyche off Alexandria, during the course of last year. The impression is that he has made for China, where he served for some time.

Notice is given of the distribution of the tonnage bounties awarded for slave dhows, names unknown, captured by the boats of the Penguin, tender to Her Majesty's ship Narcissus.

For the dhow captured on the 7th of July, 1862, the following are the shares due to an individual in the several classes:—Flag, £13. 16s.; captain, £21. 17s.; commander, £10. 18s. 6d.; second class, £2. 14s. 1d.; third class, £2. 3s. 4d.; fourth class, £1. 8s.; fifth class, 15s. 6d.; sixth class, 14s. 1d.; seventh class, 9s. 5d.; eighth class, 4s. 7d.; ninth class, 3s. 1d.; tenth class, 1s. 6d.

For the dhow captured on the 16th of July, 1862, the following are the shares due to an individual in the several classes:—Flag, £27. 18s.; captain, £44. 3s. 7d.; commander, £22. 1s. 10d.; second class, £5. 9s. 6d.; third class, £4. 7s. 7d.; fourth class, £2. 16s. 4d.; fifth class, £1. 11s. 5d.; sixth class, £1. 8s. 2d.; seventh class, 18s. 10d.; eighth class, 9s. 4d.; ninth class, 6s. 3 t.; tenth class 3s. 1d

For the dhow captured on the 6th of October, 1862, the following are the shares due to an individual in the several classes:—Flag, £20. 5s. 9d.; captain, £32. 2s. 8d.; commander, £16. 1s.5d.; second class, £4. 1s. 9d.; third class, £3. 5s. 3d.; fourth class, £2. 2s. 1d.; fifth class, £1. 3s. 5d.; sixth class, £1. 1s. 1d.; seventh class, 14s. 9d.; eighth class, 7s.; ninth class, 4s. 7d.; tenth class, 2s. 3d.

The Queen has been graciously pleased to give orders for the following appointments to the Most Honourable Order of the Bath :—

To be Ordinary Members of the Military Division of the First Class, or Knights Grand Cross of the said Most Honourable Order, viz.:—

Admiral Sir Edward Harvey, K.C.B.
Admiral Sir Fairfax Moresby, K.C.B.
General Sir William Rowan, K.C.B.
Admiral Sir Houston Stewart, K.C.B.
General Sir William John Codrington, K.C.B.
General Sir George Augustus Wetherall, K.C.B.
Admiral Sir Henry Ducie Chads, K.C.B.
General Sir James Frederick Love, K.C.B.
General Sir James Jackson, K.C.B.
Lieut. General Sir John Cheape, K.C.B., Royal (late Bengal) Engineers.
Lieut. General Henry, Viscount Melville, K.C.B.
Vice-Admiral the Hon. Sir Frederick William Grey, K.C.B., and
Vice-Admiral Sir James Hope, K.C.B.

To be Ordinary Members of the Military Division of the Second Class, or Knights Commanders of the said Most Honourable Order, viz.:—

General William Wood, C.B.
General Thomas Kenah, C.B.
Admiral Sir George Rose Sartorius, Knt.
General Abraham Roberts, C.B.
Lieut. General Thomas Monteith Douglas, C.B., Bengal Army.
Lieut. General William Cator, C.B.
Lieut. General Patrick Montgomerie, C.B., Royal (late Madras) Artillery.
Lieut. General Thomas Reed, C.B.
Lieut. General John Scott, C.B.
Lieut. General William Wyllie, C.B.
Lieut. General Charles Ash Windham, C.B.
Vice-Admiral Thomas, Earl of Lauderdale, C.B.
Vice-Admiral Robert Smart.
Vice-Admiral John Kingcome.
Vice-Admiral Horatio Thomas Austin, C.B.
Lieut. General John Edward Dupuis, C.B.
Lieut. General Fortescue Graham, C.B., Royal Marines.
Rear Admiral Sydney Colpoys Dacres, C.B.
Major General Lord William Paulet, C.B.
Major General the Hon. Augustus Almeric Spencer, C.B.
Major General Robert William Honner, C.B., Bombay Army.
Colonel John William Gordon, C.B.
Colonel Edward Harris Greathed, C.B.
Colonel Charles William Dunbar Staveley, C.B.
William James Tyrone Power, Esq., C.B., Commissary General in Chief.

It will be seen, from the subjoined list, that there are still nineteen veteran officers who live to celebrate the sixty-fourth anniversary of Lord Nelson's memorable battle of Copenhagen. The following are the names of the survivors, together with the rank they then held, the rank they now hold, the ship in which they served, and the date at which they entered the Royal Naval Service:—

Admiral Lewis Hole, on the Retired List, was lieutenant in command of a division of boats attached to Lord Nelson's squadron, previous to the attack made upon the Danish line of defence before Copenhagen, and, on the 2nd of April, served on board the Polyphemus, 64, as a volunteer. He entered the Navy as an able seaman in 1793.

Admiral Bateman Dashwood, on the Retired List, entered the Navy in 1799, as a first-class volunteer, and, as such, served in the Defiance, 74.

Vice-Admiral Thomas Wren Carter, C.B., on the Active List, entered the Navy as a first-class volunteer in 1800, and was midshipman of the Warrior, 74.

Vice-Admiral John Wyatt Watling, on the Retired List, who had been in the merchant service, entered the Navy as ordinary, March 4, 1801, and rendezvoused in the launch on board the Elephant, 74, bearing Lord Nelson's flag.

Vice-Admiral Philip Westphal, on the Retired List, entered the Navy as first-class volunteer in 1794, and at the above action was master's mate of the Blanche, 36.

Vice-Admiral Charles Crowdy, on the Retired List, entered the Navy in 1799, as ordinary, and was aide-de-camp to Capt. T. F. Fremantle, in the Ganges, 74.

Vice-Admiral Thomas Mansel on the Retired List, was midshipman of the Elephant. He entered the Navy as first-class volunteer in 1798.

Vice-Admiral Alfred Luckraft, on the Retired List, entered the Navy in 1799, as first-class volunteer, and in that capacity served in the Monarch, 74.

Vice-Admiral John Hackett, on the Reserved List, was midshipman of the Raisonnable, 64. He entered the Navy as an able seaman in 1799.

The Chartered Bank of India, Australia, and China v. Gladstone.—This was an ex parte application by the Chartered Bank of India, which carries on an extensive banking business in the Eastern possessions of Great Britain, and related to the rival claims of the defendants to certain shares in the bank. Previously to October, 1864, John Gladstone, a merchant in the City of London, was the registered holder of fifty such shares, of the value of upwards of £1,500. In the course of that month he executed an irregular and informal instrument, purporting to transfer the shares to his son, the defendant, John Hall Gladstone, for the nominal consideration of five shillings. The bank, however, refused to register the transfer, partly because of the informality, and partly because the company had a lien on the shares for a debt due from John Gladstone the father. The debt was, however, satisfied in November, but on the very day on which it was paid John Gladstone was adjudicated bankrupt. His assignees in bankruptcy thereupon set up a claim to the shares; and the bank, being thus subject to two conflicting demands, sought to relieve itself from them by an interpleader suit, in which the assignees on the one hand and the transferee on the other were called upon to settle and adjust their claims between themselves. John Hall Gladstone having commenced an action for a mandamus against the bank to compel a transfer of the shares, the present application was made to stay his proceedings at law. The Vice-Chancellor granted an interim order accordingly, upon the usual undertaking by the manager of the company to be answerable for any damages which might be occasioned by such order.

The Taipings and the Bible.—A letter, written by an "Anglo-Taiping," has appeared in some of the English papers, strongly advising the recognition of the Taipings by England, and condemning those who prefer "the Buddhism, tyranny, and hatred of the Manchoo." He declares that the Taipings would Christianise China, and writes:—"I have often seen great bales of the newly-printed Bibles packed up in the late Taiping capital, Nanking, and sent off to the country for distribution. The Tienwang (Taiping King) employed upwards of 400 men printing the Bible, and more than 1,000 copies were regularly turned out every week. Nanking, through British interference, has been captured by the Imperialists, and the printing and circulation (or even possession of the Bible by a Chinaman) has been annihilated; therefore, I maintain, if any sincerity or Christian feeling induces the people of England to send so many missionaries to China, a very little of the same motive might cause them to at least endeavour to make the poor Chinese some recompense for what the wicked policy of our Government has destroyed. An opportunity now offers itself, and if the people do not take advantage of it, their silence may be taken for approval of the conduct of their Government towards the Taipings."

Admiral Meynell.—Admiral Henry Meynell died at Paris on the 1st inst. after a short illness. The deceased entered the Navy in June, 1803. He was actively employed during the first seven years he was in the service in the Mediterranean and home stations, and he afterwards sailed as lieutenant of the Theban with a convoy for the East Indies and China. He was appointed Acting Commander of the Arrogant, at Bombay, in 1813; and in August the same year promoted to be Commander of the Cornwallis. He subsequently in 1815 became acting Captain of the Newcastle, bearing the flag of Sir Pulteney Malcolm at St. Helena. Admiral Meynell was in the Spring of 1820 appointed Gentleman Usher to George IV., which office he held until the King's death. He also held the same post for a short time in the household of William IV.; and for some years, up to April, 1845, he was one of the Grooms in Waiting to Her Majesty the Queen. He represented the borough of Lisburn in the House of Commons from 1826 until 1847. His commissions bore date as follows:—Lieut., 8th of November, 1809; Commander, 24th of August, 1813; Capt., 10th of April, 1816; Rear-Admiral (reserved), 29th of April, 1851; Vice-Admiral, 9th of July, 1857; and Admiral, 4th of October, 1862.

LONDON, WEDNESDAY, APRIL 12, 1865.

THE PRINCE NAGATO.

IT will be observed that the present mail gives no confirmation of the report that a fleet of steamers under the TYCOON'S flag had formed a *rendezvous* in the Samuda Sea, with the purpose of attacking Nagato. Had such an intention been entertained, it must have led to such representations on the part of the Foreign Ministers as would cause its abandonment; at the same time it would serve as an affective and harmless demonstration. It savours of barbarism not to be satisfied with any triumph not accompanied with the gratification of a bloodthirsty revenge. If we cannot educate the Japanese into an appreciation of the amenities of civilization, we have attained a position and an influence that will henceforward, it is to be hoped, allow of our controlling any such wayward and despotic acts. Unquestionably it is a high gratification for the TYCOON'S Government to find the maritime Daimios, who were wavering in their allegiance, so decidedly ready to take its part now that its fortunes are in the ascendant; but as this is solely owing to the foreign aid on which it counts, it is ours to watch that the influence thus given and acquired shall not be perverted to any barbaric purpose. Triumph enough has been secured, so far as the consolidation of the power of the TYCOON'S Government is concerned, in our having sought its permission to open, trade relations with Simonoseki and other ports; though indeed, with the threat of seeking them out for ourselves, were such permission not granted. The hostilities of Nagato and Choshiu have thrown a serviceable light on the causes that were at work to bring about that disastrous political disintegration which, without undue intervention, we have happily averted. The question of the ascendency of the rebel Princes was manifestly to be determined by the relative value of their territorial position-commanding, as they did, the key to "the valley of deep waters," so long as they could effectively bar its entrance—opening and no man shutting, shutting and no man opening; for otherwise Osacca, backed by the range of Niphon hills, and embayed in a region watered by deep rivers, could not fail to continue to assert its supremacy. Yedo has ruled Japan by the force of the same great natural law by which Rome once ruled Italy; Osacca becoming, like the Queen of the Adriatic, the radiating centre of trade by land and sea. It is less the political constitution of the Empire than actual territorial advantages which have secured to the TYCOON'S Government the homage of Daimios near and far, just as the Alban, Etruscan, and other States yielded successively to the rule of Rome. In having dashed to pieces the fortresses that would have dominated over the most important outlet of the Samuda Sea, we have not only strengthened most materially the power of the TYCOON, but enforced on the Japanese mind the lessons taught by their traditions, which refer to Yedo as the seat of the Empire, and to Osacca as the great natural emporium of trade.

IN our notice of the appointment of Sir HARRY PARKES to the post of Minister in Japan, we omitted to state that CHARLES ALEXANDER WINCHESTER, Esq., now H.M.'s Consul at Yokohama, would succeed Sir HARRY PARKES at Shanghai.

DEMAND FOR ORIENTAL WORKS OF ART IN FRANCE.

TEN years since the Parisians generally knew nothing of China and Japan beyond the fact that silk, tea, and indian-ink, porcelain, fans, carved ivory, and a few other pretty things came from there. At the present moment shops for the sale of Chinese and other Oriental productions are to be found in all quarters of the capital of the Continent—or, as some less bashful please to call Paris, of the world, and one or two of these establishments exhibit collections which will bear comparison with the first in London, as regards taste, at any rate, if not quantity. It is the fashion in Paris, whose stone-built houses are not dry enough for first-class dealers to place their goods in until they have been erected one or two years, to let the unfinished shops to hucksters, who fill the bare space which will one day shine in all the honours of painting and gilding, looking-glass and gas, with toys, tools, purses, braces, and all the sweepings of the greater establishments. Of late, china, screens, lanterns, fans, and all kinds of Chinese and Japanese wares have taken the place of Parisian trumpery in these temporary shops at the West-end of the town. A notable instance may be quoted at the present moment at the corner of the boulevard opposite the new Opera, the Grand Hotel, and the Rue de la Paix. A Chinese theatre or singing-hall has just been built in one of the new boulevards in the vicinity of the Northern Railway Station, and there are numberless other proofs of the rage for things Chinese and Japanese in artistic Paris.

One of the strongest of these proofs is the price that such objects fetch at the public sales, where they are to be found largely and constantly. The POURTALES' collection of pictures, sculpture, and other works of art, one of the finest private collections in the world, has just been dispersed, and has yielded between four and five millions of francs to the family purse, which is said to be already lined with about eight times that amount. Some few of the gems of this famous collection have been purchased for the National Gallery and the British Museum. Amongst others a glorious head, of no matter who—Apollo, some people call it in the highest style of Greek art, and two large portraits by REMBRANDT, which will almost throw into shade those already in our gallery. Amongst the treasures of the POURTALES family were some choice Oriental works, most of which fetched high prices. A small Mandarin's sceptre in rock crystal fetched, converting francs into pounds sterling and omitting odd shillings, £16. An agate tazza, about five inches in diameter, and less than two inches high, the outline being divided into eight curves, fetched nearly £77. Another Oriental cup and cover, but mounted in gilt work of the time of Louis XVI., £92. A green jade cup or tazza, about six inches in diameter, the exterior worked in forty-four curves, and decorated with bands of foliage, £62; a cup and cover in light-green jade, about the same height and diameter as the preceding, worked in twelve panels, and having fine cone handles and decorations worked out of the solid, £80; a smaller cup in dark jade but without cover, oval in form and divided into four lobes, with dragon handle, the exterior and handle ornamented with arabesques encrusted with gold, and the interior with eight arabesques painted in gold, of ancient workmanship, £84; a travelling or dressing case, in fine lacquer, containing a box in four compartments, a tray and a water-bottle, the corner-pieces and the bottle being in the form of the bamboo, richly ornamented on a gold ground, £56; lacquer box in three stages, one of the divisions containing two smaller ones, £8; another in lozenge form, containing a plateau and four small boxes, £14; two large lacquer bowls with covers and stands, festooned with black and gold, and decorated with birds and flowers, £130; lacquer vase with two handles, black and gold, £20; tea caddy, in the form of a double peach, old Japanese lacquer, black, with gold figures in relief and mother-o'-pearl, inside two small China jars with covers mounted in gilt bronze, £17; square box on feet, containing plateau and five small boxes, £10; quatrefoil shaped box in fine lacquer, the cover decorated with a group of six persons playing at a game like blindman's-buff, £20; small Chinese bronze vase, in form of two bottles, £8; small Chinese idol, in fine bronze, £6; perfume burner, of square form, on four feet, the cover decorated with a dragon, Chinese bronze, £9; vase of Tonquin bronze, in form of fountain, with three taps, two handles, and three feet, decorated with medallions in relief and gilt, £29; two porcelain vases, form of bamboos, decorated with animals and marine plants in relief on yellow Nanking ground, mounted in gilt bronze, £50; large China dish, jasper red ground, decorated with a cock and

Digitized by Google

enamelled flowers, £17 ; two cups with handles and a salver, mounted in silver, £14 ; two China bowls, with the Imperial dragon on a violet ground, very old, £5 ; four cups and saucers in the form of flowers, £7 ; China bowl, with flowers outside and bats inside on a yellow ground, £5 ; two apes seated, holding fruit, in Chinese enamelled earthenware, £6 ; tea-pot in red Boccaro ware, with silver gilt handle and spout, £5 ; painting on glass, representing a Chinese woman with her neck uncovered, and another of a female holding a rose, together, £6 ; volume in folio, containing thirteen Chinese drawings in colours, £9 ; large folio volume in red morocco, containing thirty-three pictures Persian and Indian, £48 ; large bowl *cloisonné* enamel, decorated with flowers and animals, on a turquoise ground, £18 ; pair of spectacle frames in gold filagree, in a richly carved ivory case and outer carved wood box, £16 ; four carved ivory plates, from a casket, £14.

The Chinese fever is in fact very high at the present moment. The EMPRESS has re-arranged a collection at Fontainbleau, where a special pavilion has been erected for the purpose, and another at the Tuileries. More than one Minister and official living in the splendid official apartments in the new Louvre has his Chinese museum, one of these being of a very *récherché* description. The ornamentalists of Paris have produced a number of articles based more or less on Chinese art ; an immense number of pieces of Sevres and other porcelain are now mounted on carved wooden stands *a la mode Chinoise ;* and there is scarcely a fancy dress ball given in Paris, and these occur almost every evening at the present season, without one lady at the least being present in Chinese costume, with a real Chinese dress, Chinese shoes—not golden lilies, however—Chinese ornaments, Chinese fan, and as nearly as possible Chinese coiffure. Some wicked wag once called the French the Chinese of Europe : is there really any peculiar sympathy between Jacques Bonhomme and John Chinaman, or is the fickle goddess Fashion patroness of all these *Chinoiseries ?*

CIVIL SERVICE ESTIMATES.

The Civil Service Estimates for the year ending March 31, 1866, have been laid on the table of the House of Commons. The following refer to China and the Far East :—

CHINA.

The total amount is £71,532. 15s., against £76,081. 10s. 2d. for the previous year. The items are—

PEKING.—Envoy Extraordinary and Minister Plenipotentiary, and Chief Superintendent of Trade, £8,000 ; Secretary of Legation and Chinese Secretary, £1,200 ; Second Secretary, £500 ; Assistant and Accountant, £500 ; Surgeon, £200 ; Assistant Chinese Secretary, £600 ; ten Student Interpreters. £2,200 ; Chinese Writers or Linguists, £250 ; Special Allowances to Colonial Officers at Hong Kong for services rendered to Superintendency, viz. :—The Attorney-General, £250 ; the Surveyor-General, £200 ; the Colonial Auditor, £500 ; Assistant, £300.

CANTON.—Consul, £1,600 ; Vice-Consul at Whampoa, £750 ; Interpreter, £700 ; First Class Assistant, £400 ; Second Class Assistant, £350 ; Chinese Writers or Linguists, £180.

MACAO.—Consular Agent, £150.

SWATOW.—Consul, £800 ; Interpreter, £500 ; First Class Assistant, £400 ; Chinese Writers or Linguists, £100.

AMOY.—Consul, £900 ; Interpreter, £500 ; First Class Assistant, £400 ; Second Class Assistant, £300 ; Chinese Writers or Linguists, £125.

FOOCHOW.—Consul, £1.000 (last year, £900) ; Interpreter, £500 ; First Class Assistant, £400 ; Second Class Assistant, £300 ; Chinese Writers or Linguists, £100.

NINGPO.—Consul, £800 ; Interpreter, £400 ; Second Class Assistant, £350 ; Chinese Writers or Linguists, £100.

SHANGHAI.—Consul, £1,500 ; Vice-Consul, £750 ; Second Vice-Consul, £750 ; Interpreter, £700 ; Second Interpreter, £500 ; First Class Assistant, £400 ; Second Class Assistant, £350 ; Third Class Assistant, £300 ; First Linguist, £300 ; Second Linguist, £300 ; Third Linguist, £200 ; Writers, £120.

TAIWAN.—Consul, £750 (last year, £800 ; Interpreter, £400 ; Third Class Assistant, £300 ; Chinese Writers or Linguists, £100.

CHIN-KIANG.—Consul, £900 ; Interpreter, £400 ; Third Class Assistant, £300 ; Chinese Writers or Linguists, £100.

KIU-KIANG.—Consul, £900 ; Interpreter, £400 ; Third Class Assistant, £300 ; Chinese Writers or Linguists, £100.

HANKOW.—Consul, £1,300 ; Interpreter, £500 ; Second Class Assistant, £350 ; Third Class Assistant £300 ; Chinese Writers or Linguists, £100.

TANG-CHOW.—Vice-Consul, £750 (last year, £900) ; Third Class Assistant, £300 ; Chinese Writers or Linguists, £100.

TIEN-TSIN.—Consul, £900 ; Vice-Consul at Ta-ku, £500 ; Interpreter, £400 ; Third Class Assistant, £300 ; Chinese Writers or Linguists, £100.

NEWCHWANG.—Consul, £1,300 ; First Class Assistant, £400 ; Chinese Writers or Linguists, £100.

For Mission and Superintendency, £15,100 ; Consulate, Canton, £3,980 ; Consular Agent, Macao, £150 ; Consulate, Swatow, £1,800 ; Amoy, £1,925 ; Foo-chow, £2,300 (last year, £2,200) ; Ningpo, £1,650 ; Shanghai, £6,170 (last year, £5,670) ; Vice-Consulate, Taiwan, £1,600 (last year, £1,550) ; Consulate, Chin-kiang, £1,700 ; Vice-Consulate, Kiu-kiang, £1,700 (last year, £1,550) ; Consulate, Hankow, £2,550 (last year, £2,450) ; Tang-chow, £1,150 (last year, £1,300) ; Tien-tsin, £2,200 ; Newchwang. £1,800 (last year, £1,700) ; total for salaries, £45,775 (last year, £44,925).

Contingent expenses, £1,500. Allowances for passages for consular officers and student interpreters, £1,600 (last year, £471). To complete Consular buildings at Hankow, £3,000 (last year, £4,000). Repairs to Consular buildings at Foo-chow-Foo, £1,600.

Erection of gaol and constables' quarters at Swatow, £900. Raising the river facing ground at the Consular Residence at Newchwang, £1,500. Excess of expenditure beyond the sum voted in 1862-3 for Consular residence, offices at Amoy, £250. Temporary allowances at Shanghai, £1,350. Pay of Legation guard and escort at Peking. £857. 15s. Outfit for ditto, £300. Total, £7,532. 15s. (last year, £76,081. 10s. 2d.)

JAPAN.

OFFENCES BY EUROPEANS IN CHINA.

(THE TIMES.)

The name of Colonel Sykes is not a good omen for an attempt to draw attention to a substantial evil. That gentleman is in the habit of promulgating such eccentric notions as to the virtues of the Taiping robbers, and he has sometimes shown himself so careless or credulous as to the authenticity of the stories which are from time to time told him, that we should not have much hope of getting a hearing for a grievance which comes only from the sources whence Colonel Sykes derives his information. Yet the question which he put to the Attorney-General on Thursday night is one which must, sooner or later, receive very serious consideration. It is necessary that it should be thoroughly understood whether crimes committed by Europeans in the interior of China are or are not punishable, and adequately punishable, by the European authorities in that Empire. We have insisted upon the Chinese recognising the sacredness of European life. We will not allow a Chinese magistrate, however far from any consular establishment, to take cognizance of a crime committed by a European. Whatever may be his malpractices, if a European brigand be a thousand miles up the country, plundering, burning, and slaying, still the magistrate and people of the distant province can do no more than overpower him by a gentle resistance, bind him firmly, and send him down to Shanghai. It is true that popular feeling has sometimes proved too strong for treaty rights, and that European robbers in the inner waters have been put to death summarily. It is also true that in extreme cases, where the offences have been very heinous, the mandarins have tied their captives so tightly with sharp strips of bamboo, and have sent them down so slowly and in such narrow cages, that their revenge lost little by their observance of European rights. In these instances of breach of treaty, however, reclamations were always made, and the too excitable populace or the too careful mandarins were always punished. It is looked upon as the most important birthright of every European in China that he shall not be accountable for any offence he may commit to a Chinese magistrate. His character as a foreigner is an immunity from Chinese law. The question put by Colonel Sykes is, whether he thereby becomes absolved from all law and all punishment.

The answer of the Attorney-General is correct so far as it goes, but is far from satisfactory. His explanation was that " Europeans who com-

Digitized by Google

it in China what would be crimes in this country, if they could be caught and the facts proved against them, are amenable to the Consular authorities in China and also to the Colonial Court at Hong Kong." No doubt this is so, but probably no one in the House of Commons knew what the powers and procedure of these Consular authorities are, or what is the uniform issue of a prosecution in the Court at Hong Kong. We know nothing of the case quoted by Colonel Sykes; but we do know of a case, and a very much stronger case, which was recounted in our columns a few days ago, and which is in many respects more instructive than the robbery mentioned in the House of Commons. It will be remembered that a European, well known, as it would appear, at Shanghai, was proceeding in his boat up the river. This river, which is not very wide, was crowded with market boats, and, no doubt, the passage was also impeded by the floating residences which the Chinese moor upon their waters. The European was in haste, as Europeans usually are; he would brook no delay, he fired off his fire-arms, loaded with ball, to give warning of his approach and to signal the market people to get out of the way. One woman's boat was more embarrassing to him than the others. Very likely the woman, with the stolid obstinacy of her race, would not give way till the last moment. The European went on firing his signals. Here the evidence is a little doubtful. It is affirmed that the European lost his temper and fired directly into the boat which had angered him. Certain it is that he wounded the woman, and that the woman died of her wound. We will not believe that the man committed a ruthless murder. Enough that he fired recklessly close over the heads of a crowd of market people with intention to terrify and not to kill them. But he does kill one of them. In the eyes of every one of those Chinamen he has committed a wanton murder; in the judgment of the calmest European he has certainly committed a very aggravated manslaughter. In England he would probably have been punished with five years' penal servitude. What happens to him in China, where it is all-important that the people should have confidence that we act with justice? This man is, as the Attorney-General says, "caught" and the facts "proved against him." He is summoned before the Consular Court at Shanghai. The Consuls, upon occasions of the nature, take to themselves, we believe, two assessors, who are always merchants of the place, and the jurisdiction is limited to imprisonment for twelve months. We are not informed what the proceedings were upon this occasion, but the result was that the man was fined $100, and sentenced to be deported from Shanghai. This was the Justice which the Chinese population got at the hands of the Europeans in Shanghai—a fine of 25*l.* and an injunction to go away for a time from the neighbourhood where he had made himself so obnoxious! Really it would seem as though there were something more than a lawyer's periphrase in the Attorney-General's expression, "Europeans who committed in China *what would be* crimes in this country." There are Consuls —and we are glad to say that some of them are British Consuls—who have acted with promptitude and severity in cases of this kind, and have put forth all their power, such as it is; but the case we have now quoted is a specimen case of the class; this is how such offences are generally heard and decided by European Consular authorities and their assessors.

The Attorney-General, however, rightly tells us that this man might have been sent down to the Court of Hong Kong, where he might have been tried either for manslaughter or murder, and, if convicted, adequately punished. This is a remedy, no doubt. A Chinese market-woman is shot, either in wantonness or in recklessness, by a European. Her own magistrates are not allowed to punish the criminal, but her relatives may carry him before a Consul,—we have seen with what result,—or they may gather together the witnesses of the transaction and go with the offender down to Shanghai, and thence may take the next mail steamboat, if there should happen to be room, and steam, at costly charges, seven hundred miles down to Hong Kong, where they may institute a prosecution against the offender in the Queen's Court! The Attorney-General states the law as it is, and this is what the law is. But even if we were to suppose this a case in which not a market-woman, whose wealth is all contained in a string of copper cash, but some rich Chinaman had been murdered, and that his relatives were determined to follow up the matter. Let us suppose the case to be proved at last before a Hong Kong jury. We believe there is no instance, and could be no expectation, of a full conviction. Some years ago the Chinese Custom-house officers attempted to stop a sailing vessel in the Shanghai harbour which was leaving contrary to the Customs' regulations. The master fired his revolver into the boat and killed one of the Chinese Customs men. This case was carried to Hong Kong; the master was tried, the facts clearly proved, and the prisoner was immediately acquitted. The jury, no doubt, thought they were quite right. They were members of a mercantile body resident in China, and it was very natural that nothing should suffice to convince them that any Chinaman, no matter under what pretence, should be allowed to interfere with a square-rigged vessel. It was, no doubt, their honest conviction that the master was acting in his right in shooting the man who would have boarded him. So they would probably think to-morrow; but whether we blame them or not, it will not alter the facts or the practice, past or future; and, although we do not care to blame them, we cast much blame on the system which makes them the judges in such cases. We cannot believe, with Colonel Sykes, that the Chief Justice of Hong Kong has ever decided that he has no jurisdiction over crimes committed upon Chinese territory, but we think we have shown that, practically, his jurisdiction can have very little terror to prevent the commission of crimes there.

Is it not time, then, that our Law Officers should be able to tell us, not what a mocking burlesque of justice we have established in Hong Kong and Shanghai to cheat the Chinese with a semblance of punishment for crimes committed upon them, but rather that some plan really has been adopted for protecting these poor people and for vindicating our own good faith? There has been a general expectation for some time past that something was about to be done. We were told of a travelling Consular Judge, who was to be armed with large powers—a scheme which seems rife with difficulties. It would be perhaps more feasible to get the Chinese Government to establish by its own authority a European Court for the trial of Europeans according to fixed and civilised laws. Or, perhaps, the marauders who commit these offences outside the limits of the Treaty Ports might be made subject to martial law, and subject to court-martial on board the ship of war on the station. We have no special plan to push, or favour, and, indeed, we see great difficulties in forming any scheme which shall be effective and free from great objections; but we owe it to ourselves to make some attempt to remedy the utter powerlessness to do justice which the Attorney-General so naively admitted to the House of Commons on Thursday last. One of these homicides will rankle in the memory of a Chinese province for scores of years; and if we had no higher motive to induce us to suppress them, we ought to think how expensive they are for they have been in all times the raw material of China wars.

PROHIBITION AGAINST THE IMPORTATION OF CHINESE COOLIES INTO THE SANDWICH ISLANDS.

(To the Editor of the *London and China Telegraph.*)

SIR,—Her Majesty's Consul at Hawaii might be instructed to urge on the attention of the King the rescinding of the existing prohibition against the importation into the Sandwich Islands of Chinese coolies. The especial use of these men would be their employment in sugar cultivation, for which they are fitted by their industrious and orderly habits which strongly contrast with the qualities of the Hawaiian natives. The advantage derivable from the influx of Chinese coolies would extend beyond the aid thus afforded to present cultivators of sugar, leading to a larger investment of English capital in the business, to extensive and rapidly increasing orders for suitable sugar machinery in London, and to the supply of the article at a cheaper rate to the colonists of Oregon and British Columbia. The ostensible motive to the enactment was the discouragement of certain evils connected with the coolie traffic, but, in reality, to shield the Hawaiian race from a competition that would accelerate their natural decay. It will be remembered that the introduction of coolies into our own colonies was forbidden shortly after slave emancipation, with what results need not be detailed. How did the Mauritius languish under our scruples - an island of the same size as Hawaii, and which produces annually 300,000 tons of sugar against its 12,000? The route from Shanghai to the Sandwich islands, 5,500 miles, lies through temperate latitudes, and the cost need not exceed £4 per head, the price of conveyance to California. It might be stipulated that the coolies should bring their wives and families, and be permitted to work according to their favourite contract system, each gang or congsee cultivating 100 acres of land to be paid for according to the weight of the cane they deliver at the mills. The rights of labour no less than the rights of capital are arrayed against the pretensions of the Hawaiian King, who appears to have been far more busied in strengthening his power at the expense of the constitution than in promoting the interests of his subjects.—Yours, &c.,

City, April 8, 1865. HONOLULU.

PROPOSAL FOR A LONDON, CHINA, AND JAPAN CLUB.

(To the Editor of the *London and China Telegraph.*)

SIR,—I see that a London Indian Society has been formed for the purpose of discussing political, social, and literary subjects, relating to India and Ceylon, and circulating their opinions; an association highly suggestive of the desirability of forming a London, China, and Japan Club, which, besides constituting a place for *reunion* among former residents and merchants connected with those countries, might as an organization bring to bear upon the policy of the Government a certain amount of influence which, as proceeding from practical knowledge, could not prove otherwise than beneficial. I am, yours respectfully,

Athenæum Club, April 11, 1865. SAMUDA.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, of all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot is 9, RUE RICHER, PARIS.

Sold Retail.—London: Jozeau, Hannay. New York: Fougera, Gaudelet, Milhau. Gibraltar: Patron and Danilowich. Malta: Dr. Pirotti, Bugeja, Magri, and Rolando, Esperanza. Alexandria: Bellamore, Galette, Perinie, Bombay: Framjee Nesserwanjee and Co. Singapore: Martin and Little. Batavia: L. Platon and Co. Macao: J. D. Freita.

TUCKER AND SON'S

IMPROVED

ENAMELLED PUNKAH TABLE LAMPS.

THE celebrity which TUCKER AND SON'S LAMPS have acquired in the East for burning *steadily* under the Punkah or in side draughts, and *brilliantly* with any of the *coarse native oils*, renders eulogy unnecessary; but having been enabled, by increased facilities of manufacture, very considerably to *reduce the prices* of the above favourite (but hitherto expensive) description of their lamps, T. and Son beg to notify the fact to the Eastern public.

They are elegant and durable, are finished in exact imitation of many beautiful stones and marbles, such as Malachite, Lapis Lazuli, Serpentine, Sienna, Brocatella, Jasper, &c., and are not affected by heat, damp, friction, or insects; oil, spirits, or acids accidentally spilled. The enamel surface is so inseparable from the base (block slate, proverbial for its strength) that it cannot be removed except by an edged tool. It *requires* simply *dusting*, but if rubbed hard, it only adds a gloss to its appearance—at all times cool and agreeable.

After ten years' constant use and handling, these lamps are none the worse for wear.

Malachite (green), Serpentine (brown), or Lapis Lazuli (blue), are most recommended.

Table Lamp complete, with engraved glasses, as sketch, 72s.

A Plainer Lamp, without the Corinthian capital, 50s. complete.

Either pattern, with plain frosted glasses, 7s. 6d. each less.

*** *The above Lamps are supplied to burn Petroleum or Rock Oil also.*

Orders can be sent through any merchant or Agent, or, if accompanied by a remittance, direct to

UMBRELLAS and SUNSHADES suitable for all Foreign Markets and the Colonies are supplied to Shippers on the most favourable terms by JOHN MORLAND and SONS, Wholesale Manufacturers 50, Eastcheap, London-bridge, City. Silk, Alpaca, Gingham Steel Frames, Canes, Fittings and all kinds of Material for the Trade. Oiled and japanned silks and cambrics.

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, 12, THREE KING-COURT, LOMBARD-STREET, LONDON, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Mihtary Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Toilet Vinegar, Inexhaustible Salts, Aromatic Vinegar, Aromatic Eau de Cologne.

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

JOHN GOSNELL and Co.'s La Noblesse Perfume.

JOHN GOSNELL and Co.'s La Noblesse Pomade.

JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists' Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty, and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S PILLS AND OINTMENT.—INSTANT RELIEF.—Indisputable remedies for bad legs, old wounds, sores, and ulcers, if used according to directions given with them. There is no wound, bad leg, ulcerous sore, or bad breast, however obstinate or long standing, but will yield to their healing and curative properties. Numbers of persons who have been patients in several of the large hospitals, and under the care of eminent surgeons, without deriving the slightest benefit, have been thoroughly cured by Holloway's Ointment and Pills. For all glandular swellings, tumours, scurvy, and diseases of the skin, there is no medicine that can be used with so good an effect; in fact, in the worst forms of disease dependent upon the condition of the blood, these medicines are irresistible.

CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne (see "The Times" of July 13, 1864), and all others must be spurious.*

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery—"So strongly are we convinced of the efficacy of is remedy that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in neuralgia, asthma, and dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an antispasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa."

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words "DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor.

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,

24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

Has less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

WILLIAM BOLTON,

146, HOLBORN BARS,

LONDON.

(FORMERLY DYMOND AND CO.)

FOR SHANGHAI, the well-known clipper ship ASSYRIAN, A 1 ten years, 555 tons register, ANDREW MEARNS, Commander; lying in the East India Docks. This ship has just been thoroughly overhauled and re-classed. Has excellent accommodation for passengers.

For Freight or Passage apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

FOR YOKOHAMA and KANAGAWA (to sail 15th April), the splendid fast-sailing clipper CASTLETON, A 1 twelve years; 499 tons register; WILLIAM HILL, Commander; lying in the London Docks. This beautiful vessel has just arrived from Japan. Has good accommodation for passengers.

For Freight or Passage apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

COLOMBO, CEYLON, Direct, with quick despatch. The splendid clipper-built ship STAR OF CEYLON, 390 tons register, loading in the London Docks.

For Freight or Passage apply to TOULMIN, LIVINGSTON, and Co., 31, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "Empress."—With Despatch.

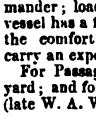
FOR COLOMBO Direct, the very fine clipper barque SKIMMER OF THE WAVES, A 1 eleven years; 396 tons register, W. H. HAMMOND, Commander; now loading in the London Docks. This beautiful vessel, built under special survey in 1860, is well-known for her fast sailing qualities, and the excellent condition in which she invariably discharges her cargoes. Has good accommodation for cabin passengers.

For Freight or Passage apply to STUART and SIMPSON, 9, Clement's-lane, Lombard-street, London, E.C.

FOR COLOMBO, CELYON, Direct, having a considerable portion of her cargo engaged and shipping, the magnificent well-known clipper ship AVON, A 1, for thirteen years; register 645 tons; J. EDMOND, Commander; loading in the West India Docks. This splendid vessel has a full poop, with unrivalled accommodations for the comfort and convenience of Passengers, and will carry an experienced Surgeon.

For Passage apply to W. H. TINDALL, 5, Tokenhouse-yard; and for Freight or Passage apply to F. TALLACK (late W. A. Winkley), 23, Birchin-lane, Cornhill, E.C.

Loading in Queen's Dock, and will be despatched in a few days,



FOR SINGAPORE, and will take cargo for Bangkok or Saigon, if inducement offers, the new iron screw steamer BINTANG, Captain WEBBER; 316 tons; A 1 for nine years. Will proceed under steam and canvas, and has room for only a limited quantity of cargo.

For terms of Freight or Passage apply to Messrs. GRANT, MURDOCH, and Co.; or to M'DIARMID, GREENSHIELDS, and Co.

Regular Line of Packets.

FOR BATAVIA, the fine, fast-sailing barque WILLIAM SIMPSON, A 1 thirteen years, 396 tons register, coppered and copper-fastened throughout, DAVID NAPIER, Commander; lying in the St. Katharine Dock. Has superior accommodation for passengers.

For Freight or Passage apply to the owners, Messrs. THORNTON and WEST, Old Swan-wharf; or to BANGEL, WOOLLETT, and Co., 1, Lime street-square.

To follow the "Carleton."
With very quick Despatch, having a large portion of her Cargo engaged.

DIRECT for CALCUTTA, the splendid British-built clipper ship REVENUE, A 1 ten years, 797 tons register, THOMAS MOURANT, Commander; lying in the London Docks. This beautiful vessel offers a first-rate opportunity to shippers of fine goods.

For Freight or Passage apply to TOULMIN, LIVINGSTON, and Co., 31, Great St. Helen's, Bishopsgate-street, E.C.

With immediate Despatch.

DIRECT for BOMBAY, the magnificent clipper-built ship JAMES SEDDON, A 1, 1,445 tons register, J. JEFFARES, Commander; East India Docks. This splendid vessel, built in 1863, offers a first-rate opportunity to shippers requiring quick despatch.

For Freight or Passage apply to TOULMIN, LIVINGSTON, and Co, 31, Great St. Helen's, Bishopsgate-street, E.C.

Will follow the "Adelaide."
With immediate Despatch.

DIRECT for RANGOON and MAULMEIN, the well-known British ship WASHINGTON IRVING, A 1 (owned by Mr. T. R. Edridge), 777 tons register, R. GARBUTT, Commander; lying in the London Docks. This vessel, so well known in the India trades, offers a favourable opportunity to shippers desirous of despatch

For Freight or Passage apply to TOULMIN, LIVINGSTON, and Co., 31, Great St. Helen's, Bishopsgate-street, E.C.; or to EDWARD HIGGIN and Co., 2, East India-avenue, Leadenhall-street.

TO STEAMSHIP CAPTAINS.

REQUIRED, One or Two Experienced Men to navigate Steamers to the East, and continue in command afterwards at the option of Owners. It is essential that they understand and speak the Dutch language. No masters of sailing vessels only need apply.

Apply by letter only, addressed S. S. C., care of CHARLES BARKER and SONS, 8, Birchin-lane.

PAYNE'S INDIAN CURRY POWDER

IS unequalled for its delicious flavour and stimulating qualities.

In Bottles, 3s. 6d., 2s. 3d., and 1s. 6d. each.

Curry and Mulligatawny Paste, jars, 3s. 6d. and 2s. 3d. each. Royal Combination Pickle, bottles, 2s. each.

N.B.—This pickle is highly approved, and as a zest for cold meat, &c., will be found unrivalled

LIST OF CONDIMENTS, &c.,
Prepared by PAYNE and CO., at the Belatee Bungalow, Calcutta.

	Bottles.
Pindaree Chutnee	1s. 6d. and 3s.

Telegrams from Hong Kong up to 1st April were received on the 22nd, but announce nothing of importance. The French mail, with dates to the 26th March, is due on the 4th May.

List of Passengers.

—o—

PASSENGERS INWARD.

By this mail to Marseilles per P. and O. Company's steamer Euxine, arrived April 25.—From Shanghai: Mr. Hayes. From Hong Kong: Mr. Hauschild, Mr. J. Russell, Mr. S. Watson, Mr. Broband, and one 2nd-class passenger. From Singapore: Mr. and Mrs. Adamson, three children, and two servants, and three 2nd-class passengers. From Batavia: Mr. Pels, Mr. and Mrs. Houghton, Mr. Brocklin.

To Southampton, per "Delhi," expected to arrive April 30.—From Yokohama: Mrs. Edelmann, Commander Holder, R.N., and one 2nd-class passenger. From Hong Kong: Dr. and Mrs. Carnegie, three children and native servant, Assistant-Commissary General Eichbaun, and five 2nd-class passengers. From Singapore: Mr. J. E. Smale, and one 2nd-class passenger.

To Gibraltar.—From Hong Kong: Mr. Johnston, Mr. and Mrs. Crespo, and three native servants, Mr. Pontes and native servant, Mr. S. Tait, four 2nd-class passengers, and one child. From Singapore: One 2nd-class passenger.

PASSENGERS OUTWARD.

Per P. and O. Co.'s steamer Pera, from Southampton, April 20.—To Shanghai: Miss Brass, Mr Wyllie. To Hong Kong: Dr. A. B. Messer, R.N., Mrs. Carey and two sons. To Singapore: Mr. Frohlich, Mrs. F. H. Gottlieb, and infant. To Ceylon: Mr. and Mrs. G. A. Mackenzie, Mr. Cross, Mr. Geo. Hawkins, Miss L. A. Slater, Mr. J. S. Dewar, Mr. C. B. Culpepper, Mr. Barker, Mr. W. O. Pickford. To Calcutta: Capt. Hill, Ensign C. Tuck, Mrs. W. Ashworth and two children, Mr. P. Maxwell, Surg. Thompson, Asst. Surgeons A. Hale and D. Canny, Mrs. Thompson, Mr. G. Kemp, Mr. E. Craddock, Mr. Griffin, and five second-class passengers. To Madras: Capt. Campbell, Mr G. Rogers, Surgeon Lewis, Rev. A. Walker, Ensign C. L. Allan and two second-class passengers. To Suez: Two second-class passengers. To Alexandria: Mr. G. G. Ward and one second-class passenger.

From Marseilles, April 26.—To Hong Kong: Mr. G. Raynal, Mr. A. M. Moore, Commandante Torrida. To Singapore: Mr. S. Higginson and one second-class passenger. To Ceylon: Mr. and Mrs. Rose. To Calcutta: Mr. and Mrs. Newburn and native servant, Lieuts. Norris and J. R. Pearson, Mr. T. Hill, Miss Hill, Capt. and Mrs. N. Robinson. To Madras: Lieut.-Gen. Sir G. Le Marchant, Sir Wilford Brett, Major and Mrs. Benson and infant, Capt. C. E. Bates. To Alexandria: Capt. Chitty. From Suez.—To Calcutta: Mr. M. Beaufort.

Per P. and O. steamer Nyanza, May 4, from Southampton.—To Shanghai: Mr. and Mrs. Tate. To Hong Kong: Mr. W. B. Miller. To Ceylon: Mrs. Howie and two children, Mr. F. M. Mackwood. From Marseilles, May 12.—To Singapore: Mr. E. Hagerom.

(Per Prince Alfred, to Shanghai, April 25.)

Rev. J. Mars, Mrs. Mars, Mr. Picot, Miss Skinner.

Summary of News from the Far East.

—o—

JAPAN.

YOKOHAMA.

Dates are to the 28th February.

We have received no newspapers, and we find, on inquiry, that very many of the large mercantile houses are in the same case.

The *North China Herald* states the news from Japan to be of no importance, the only point of any interest being a rumour of the projected opening of the port of Hiogo. The prospect, however, appears very doubtful, and excites no great enthusiasm at Yokohama. The settlements of silk during the fortnight are estimated at 550 bales; prices fully as high as at the date of last advices. In cotton a very small business only has been done.

The *China Mail* also corroborates the statement that the feeling among the merchants in Japan is opposed to new ports, observing—"It has long been admitted that the multiplication of ports of trade, in China or Japan, is not necessarily an advantage, for it happens that large houses do not find business sufficiently paying or sufficiently promising to encourage the maintenance of branches in many of the newly opened ports."

NAGASAKI.

The first Roman Catholic church ever opened in this port was consecrated on the 19th February. The men-of-war in harbour furnished a guard of honour on the occasion, and the Russian band was also in attendance. The Russians have started a new band, which is described as far superior to that they formerly possessed. The bund is once a week enlivened by the strains of martial music proceeding from the new instruments, and the foreign community evidently appreciate very highly the gratification thus afforded them.

HAKODADI.

An extensive fire occurred at this port on the 15th February, which burned down several ranges of native store houses, at the time containing an enormous quantity of produce accumulated in view of the approaching new year. Amongst other merchandise it is estimated that fifteen thousand piculs of seaweed were destroyed, out of which seven thousand piculs were the property of Messrs. Lindsay and Co. The fire also attacked the Government coal-godown, and the contents remained unextinguished for a week afterwards. The conflagration extended over a space of about ten thousand square yards, with a water frontage on the harbour and a canal at the back, and raged between the Japanese Government ship-yard and the saw-mills of the West Pacific Company. The latter establishment had a very narrow escape, and, but for the fire-engines kept on the spot, would undoubtedly have shared the fate of the surrounding buildings. The foreign residents turned out *en masse* and manned the fire-engines of the Russian Consulate and of Messrs. Dent and Co.'s hong, both of which proved eminently useful. Another fire broke out on the 16th February at H.B.M.'s Consulate, completely destroying the entire building, and rapidly spreading to the Russian Consulate, the residence of the Russian doctor, and several other buildings in the vicinity. A very large amount of property has been destroyed, but the origin of the fire is not known. It is, however, supposed to have commenced in one of the rooms occupied by the Japanese servants.

CHINA.

PEKING.

The following notices are from the *Peking Gazette* :—

Nov. 29th—Tseng Kue-fan begs that the Chao-chung hall of memorials, which was destroyed by the rebels, be rebuilt. The Futai of Honan, Chang Chi-wan, reports that the soldiers despatched to different places will not be satisfied unless their wages are regularly and properly paid.

Nov. 30th—Tso Tsung-tang, Governor-General of Fukien, reports that the Loochoo tribute-bearers have arrived in Che-kiang.

Dec. 1st—Lao Tsung-kuan, Governor-General of Yunan, in conjunction with the Futai of Kuei-chow, Chang Liang-chi, reports a victory over the combined forces of the Miao-tzu and Mahometan rebels.

Dec. 2nd—Seng Wang (San-ko-lin sin) and others beg that several mandarins who have shown themselves incapable be punished.

Dec. 3rd—Mao Hung-ping, Governor-General of the two Knang, and Kuei Sungtiao, report that Ping-yuan-hsien and Chenping-hsien, which had been seized by the rebels, have been recovered. They further request that the officials whose negligence caused the loss of these cities may be subjected to examination, and that those who gallantly lost their lives may be rewarded.

Dec. 4th—The Futai of Kuei-chow requests that the people be induced by offered rank to give money for necessary expenditure, and that the mandarins who have lately displayed energy be rewarded.

Dec. 5th—The Futai of Kuei-chow reports a victory over an army of rebels which was proceeding from Hsu-chow-fu in the province of Szu-chuan to Kuang-tung. He begs that the officials and soldiers concerned be rewarded.

Dec. 6th—The Futai of Fukien requests rewards for the officials and soldiers who fell in battle at Chan-Chow.

Dec. 7th—The Futai of Shantung, Yen Chin-ming, reports that a Chi-chow has captured a celebrated robber, and the Futai requests that the captor may be rewarded.

Dec. 8th—The Futai of Shan-si, Liu Yung, requests that stringent measures be adopted to remedy the avarice, incompetence, and cowardice of the civil and military mandarins.

Dec. 9th—A Censor, Mei Chi-chao by name, abuses one Teng Fu-lun, an expectant Taotai in the province of Che-kiang, who has been convicted of dishonesty.

Dec. 10th—A Manchow general in Shan-si, named Wên-chi, reports that the Mahometan rebels at Ha-mi, in the province of Kansu, had made an incursion into Shan-si, but were driven back with considerable loss. He begs that the officials and soldiers concerned, as well as the Mahometans who did not join in the movement, be rewarded.

Dec. 11th—A decree is issued announcing that in consequence of the misery induced by the rebel occupation of Nanking, the people of the country round will for three years be relieved from the Imperial tribute. Tseng Kuo-fan and Li Hung-chang are appointed to see after the matter.

Dec. 12th—Chiao Sung-nien, Futai of Anhuei, reports the services of several Taotais and Chi-fus in his province, and begs that they may be promoted as rapidly as possible. Chang Shang, a Manchow, requests that the inland transit duties on produce be devoted to the purchase of rice for the soldiers at Peking.

Dec. 13th—Li Hung-chang reports that he has examined into the arrears of tribute due since the period previous to the 10th year of Hsien Feng, and he begs the Emperor, in view of the poverty of the people, to remit what now remains due. The request is accordingly granted.

Dec. 14th—Shen Pao-chen, Futai of Kiang-si, reports that Hung Fu-tien, the son of the *soi disant* T'ien Wang has been cut to pieces in accordance with the Imperial mandate. He likewise reports that the three chiefs Hung Jen-kan, Hung Jen-chen and Huang Wen-ying have been executed.

Dec. 15th—Yang Yo-ping, Hsio-tai, of Kiang-si, in conjunction with Shen Pao-chen, abuses Wang Mu, a Taotai, who having been ordered to lead an army against the rebels, refused to do so. A military mandarin named Wang An-chen had taken the soldiers and committed various outrages amongst the people. The Emperor directs that Wang Mu be degraded and banished, while Shen Pao chen will arrest Wang An-chen, and impose a suitable punishment upon him.

Dec. 16th—Tso Tsung-tang represents that, as the people of Si-yang-hsien and Yung-chia-hsien have undergone so many privations during the rebel occupation, they are unable to pay the arrears of taxes. He therefore begs that the amount now due be remitted.

Wu Tang, Grand Superintendent of the Huang-ho, reports that the Ching-chiang-pu is the very neck of the northern and southern provinces, and that accordingly a city has been built and a garrison placed in it. He begs the Emperor's approval.

Dec. 17th—Shen Kuei-feng, Futai of Shan-si, reports that he has carefully examined into the salt question, and that the Wei yuan appointed to act as Salt Commissioner has fulfilled his term of office. This officer has proved himself most energetic, and he is therefore recommended for promotion. Shen Pao-chen requests that as a reward for the great exertions of the Mandarins and the generosity of the merchants of Ching-an-hsien, the number of civil and military sewtzai-ships appropriated to Ching-an be increased.

Dec. 18th—An edict complying with the request of Liu Yung (Dec. 8th) for the punishment of certain offenders.

Dec. 19th—Tseng Yuan-fu (an official in Formosa) reports that the last military commander-in-chief, by name Ling Hsiang-yung, while on a trip to Tou-hu, lost his official seal. The office is in consequence now vacant, and the memorial begs that the Boards be directed to furnish another seal.

Dec. 20th—The Futai of Honan reports that a number of people having some time since departed for Peking to lay certain complaints of the conduct of the local officials before his Imperial Majesty, and his Majesty having referred the complainants back to him, he has accordingly examined the affairs and dealt with each side in accordance with the code.

Dec. 21st—Yu Ling-chen, a Chinese official at Chi-ling (in Manchuria), reports that there are so many riotous and disorderly people at that place that it will be found necessary to send a high Manchow official as Criminal Commissioner to pacify the district. Tsung How, Commissioner at Tien-tsin, recommends for promotion the men who were engaged in negociating the late treaties. A Soochow man named Puan Wei is recommended by Tsung How for promotion. Puan Wei is at present Taotai of Teng-chow, near Chefoo.

Dec. 22nd—A Censor enlarges on the disturbed state of Chi-ling. (See *Gazette* of 21st.) Tso Tsung-tang, in conjunction with Chü Tsung-kan, reports that a Wei-yuan who had been directed to carry the tribute of the province of Fukien to the capital, has disappeared with the money. All attempts to discover his whereabouts have hitherto failed.

TIEN-TSIN.

A correspondent writes, under date 27th January:—A custom exists in China that, on every New Year's-day, one thousand of the descendants of Ginghis Khan should pay their respects to the Emperor, and by our last advices we understand that many Mongols were in Peking for that purpose. As, however, the Europeans are forbidden to enter Peking for trading purposes, this circumstance is of little service to the mercantile community. And even if this restriction were removed, the benefit derivable is very dubious; for so poor are the Mongol chiefs, that they cannot trade without an advance being previously made, and their security is of an exceedingly doubtful description. An uncle of the Emperor has recently paid the debt of nature, and Prince Kung was despatched to perform the necessary rites; but his mother demanding the Emperor's presence in *propria persona*, a mandarin was sent to prepare the way before him. Now, in the proposed route was a French Roman Catholic chapel, surmounted by a cross. This cross was objected to by the mandarin, who asked the priest to have it removed before the arrival of the Emperor. But on application for advice being made to the French Minister he ordered it to be left alone, adding that the Chinese might remove it if they thought fit. On the arrival, therefore, of the Emperor the obnoxious cross was in full glory, and, what is more, the priest, with his unsanctified eyes, obtained a glimpse of the Celestial Monarch, whom he described as a "nice-looking little fellow." Dr. Martin has held at his house a most interesting meeting on the unity of the human race as deduced from language. A great many Chinese were present, some of whom read papers on the subject.

At Tien-tsin business is remarkably dull, in fact, there is no business at all, not even sufficient to merit the charge of being dull. The Customs returns, however, for 1864 show an increase in the principal articles of import since 1863. This, however, may be accounted for by the fact that foreigners have had a large stock remaining over from 1862. The Chinese have of late gone in large numbers to Shanghai to make their purchases, which they bring up in steamers and pass through the foreign Customs, whereas they formerly brought them in junks. A report is current at Tien-tsin that a foreigner (name and country unknown) has killed two Chinese; but it is, of course, impossible to speak with any degree of certainty on a subject so likely to be coined merely to produce excitement.

In a later letter, dated the 10th of February, the name of the perpetrator of this deed is stated to be Mr. Blackwood. The Chinese broke into his room by night, and were immediately shot by him. Mr. Blackwood was to be tried before the Consul at Newchwang.

A budget of Customs returns, sent to us too late for publication in this number, will be given in our next.

Mr. Sandrie, a French merchant of this place, has gone overland to Chinkiang, in Yangtze, and will report on that route; even if a little longer by land than to Chefoo, it will have the advantage from that to Shanghai, as a steamer is obtainable every two or three days, when from Chefoo, in winter, there is no dependence to be placed on the communication between the places.

SHANGHAI.

The P. and O. Company's mail of the 10th Jan. arrived out on the 28th Feb., and the French mail, with dates to the 17th Jan., on the 7th March. Dates are now down to the morning of the 9th.

The 2nd Regiment Beloochees were about to leave for Bombay, in the *Caroline Coventry* and *Shakespeare*. The authorities have been much blamed for selecting vessels said to be too small for the purpose; the said authorities, as usual, have not "explained."

The palisading raised on the French Settlement to mark the boundary line had come down, owing to its insufficient construction.

Rumours of wars still prevail amongst native circles. The local authorities are now greatly disturbed by the repeated

Digitized by Google

presence in Shanghai of an old Taiping chief named T'ang, formerly known as the Five-thousand year-King. The precise danger to be apprehended from his presence does not clearly appear. The most definite statement that can be extracted is, that he is going round the opium shops and houses of entertainment, seeking to excite discontent which on a convenient opportunity may be fanned into a flame. If a little of the energy which is being exhausted in his pursuit were directed towards preventing the shipment of arms and foreign recruits to the Foh-kien rebels, the result would probably be more useful.

Business has been next to nothing, owing to the discouraging accounts from home and the constant rains. The roads in many places about the British Settlement have been covered ankle deep with mud; while great strides have been made in grading and draining the streets, much remains to be done to make them convenient thoroughfares for pedestrians. The bund in the American settlement, along the Hwangpu river, needs to be raised in some places, covered with broken brick and shingle, and then it will become passable. The steamer *Feima*, originally built for the Canton river trade at Whampoa, has been sold for 9,400 taels.

It is stated that the Church-building Committee intend to refer the plans and estimates again to England before building.

A census of the Foreign Settlement is about to be taken.

Piratical craft again swarm. Captain Pike, of the Chinese steamer *Pluto*, sighted five piratical junks on the 23rd Feb., near Little Chusan Island, and drove them on shore there. The steamer sent boat's crews in pursuit of the pirates who landed. Twenty-three prisoners were taken, twelve or fifteen were killed, as they showed fight. Two men from the steamer were slightly wounded. Three of the junks driven on shore were saved, and the others burnt. They were well armed—the sulphureous vessels for suffocating, being among their weapons.

Murder and piracy have also been perpetrated on board a boat from Hankow bound to Ningpo, called the *Fox*, owned and commanded by an American named Beaver. The affair has only recently come to light, although it occurred two months ago; and the head boatman has confessed at the American Consulate at Ningpo that the foreigner was murdered, and the goods, valued at 1,800 taels, landed at Chinhai.

On the new Court at Shanghai we find the following in the *Recorder*:—

"The gentleman, whom report says has been nominated to this post, is Sir Edward Hornby, one who from his experience as Chief Justice in the Supreme Consular Court in the Levant, is in every way qualified to be the pioneer of a similar system in China. We understand that Shanghai will be his headquarters, and that he will hear appeals from all the Consular Courts in China and Japan; we feel convinced that he will gain far more experience in judicial work during his residence in China than he can have hitherto met with at Constantinople. Indeed, the business there must have been of a very trifling nature for the Government to have decided on the step of withdrawing the chief judicial authority. All British subjects will now be anxiously looking for the new 'order in council,' which this change will render necessary, and it is to be hoped that more competent legal advice may be taken in its framing than was apparently made use of when that famous budget of bungles and inconsistencies, yclept the Queen's order in council of 13th of June, 1853, was cast adrift by the chief superintendent of British trade at Hong Kong, to be the bugbear of British subjects and a standing cause of irritation and annoyance to British Consuls in China.

"What arrangement will be made to provide the judge with court-house and quarters we have not yet heard, but as it is not improbable that before another couple of months are passed he will be with us, we presume that steps will soon be taken for the accommodation of himself and staff—and now will begin to be felt the paltry policy of selling a few acres of the consular ground, because, forsooth, it was considered to be too large for Government purposes at Shanghai."

The *Cotton Tables* compiled by Mr. Birt, of the *Wo Kee* Hong, exhibit at one glance the price of the staple laid down in England, under every possible variation of price. The hypothetical prices range from Tls. 10 to Tls. 25 per picul, and the rate of exchange allowed for varies from 6.0 per tael to 7.6. A table is also added showing the freight upon 1 lb. compressed cotton from China to the United Kingdom, allowing a variation in freight quotations from £1. 10s. to £7. per ton of cubic feet. Finally there is a *pro forma* invoice of 100 bales of cotton shipped from China to England, which invoice comprises all the charges incidental to China cotton, and exhibits as a result that, exclusive of interest, freight, and loss of weight, cotton can be laid down in England (without loss) at the minimum advance of 14.96 per cent. on the cost in Shanghai.

From the *North China Herald* we take the following items concerning the rebellion:—

A rumour gained ground at Hangchow a few days ago, amongst the Chinese, that this city had been taken by the rebels, and that the Imperialist garrison had joined them. The officials, however, have received no confirmatory intelligence, and disbelieve the report. It is acknowledged, however, that there have been disturbances amongst the soldiery, and that the gates of the city are kept shut, except for a short period in the morning and evening, to permit the ingress and egress of the country people.

We learn that a visit has been paid by H.M. Consul and a few naval officers to the rebel chief at Chang-chow. They were received very courteously, and assured that neither Amoy nor any of the treaty ports would be assailed. There is, however, a fixed determination to conquer the interior of the Fukien province, and in attaining this object the rebels will not, we should imagine, have to dread any foreign interference. Rumours were afloat in Amoy to the effect that Cheohbey, a place of considerable importance on the river, about twenty miles from the sea, had fallen, but there is no doubt that the rebels are at least investing it closely, and will obtain possession of it. By capturing this place they hope to establish a trade with foreigners, but for some months even the small business now done at Amoy will be rendered still less satisfactory by the presence of an invading body in the neighbourhood of the port. Tong-san, a fine seaport about sixty miles south of Amoy, will be attacked in a few weeks, and the chief announces that if he be successful in his attempt, he will immediately throw it open to foreign trade. When the Consul was leaving, an official was sent with him to call on the senior naval officer at Amoy, and confer with him as to the likelihood of securing foreign assistance or foreign neutrality. Trade is, of course, excessively dull. The natives are unwilling to enter the interior so long as there appears to be a chance of danger, and market quotations are consequently unchanged from last advices.

H.M. ships *Swallow* and *Dove* have lately executed a much needed survey of the harbour at Swatow. Masters of vessels have hitherto complained greatly of the want of a proper chart of that port, and will learn with satisfaction that, in the course of a few months, that prepared under the superintendence of Commander Wilds will probably have been lithographed and sent out from England.

HONG KONG.

The P. and O. Mail of 26th January arrived out on the 11th March; the French Mail of 17th having arrived on the 1st. The dates are now down to the 15th.

Sir Hercules Robinson resigned the position of Governor into the hands of the Colonial Secretary, Mr. Mercer, pending a settlement of the permanent appointment, and proceeded to Ceylon by the present mail.

The following account of entertainments is from the *Evening Mail* of 14th March:—

The departure of Sir Hercules Robinson for Ceylon, where he proceeds to administer the government, has been marked by two complimentary entertainments—one, a dinner, given by the members of the Civil Service, the other, a ball, given in the Theatre Royal by the community.

The Civil Service Dinner was held in the Club on Saturday (March 11th). It was given by the heads of departments in the Colonial Government. Many distinguished guests were present—naval, military, and mercantile. Want of time on the eve of the departure of the mail prevents our publishing a detailed report of the proceedings.

The ball came off last evening (March 13th), and was attended by between two and three hundred persons. It was acknowledged to be the best entertainment of its kind that had ever been given in Hong Kong. The arrangements were most tasteful, and reflect the highest credit upon the Committee. The refreshment rooms and supper-room were most commodious, and the whole affair gave general satisfaction. H.R.H. the Prince Royal of Belgium (Duc de Brabant), who is at present travelling in the East, was among the guests at the ball. His Royal Highness is the eldest son of Leopold I., King of the Belgians, who married (in 1832) the eldest daughter of Louis Philippe, King of the French. He is

Digitized by Google

the Prince Leopold who married (in 1816) the Princess Charlotte of Wales. The late Duchess of Kent having been sister to Leopold, the Duke of Brabant is first cousin to Queen Victoria. He bears a striking resemblance to his ancestor Louis Philippe.

After supper the usual loyal toasts were given by the Chairman, Mr. Pollard, who also gave the toast of the evening, "Sir Hercules and Lady Robinson." His Excellency replied very cordially on behalf of himself and Lady Robinson, thanking the large assemblage present for the compliment that had been paid to him. The toast was received with loud applause. Dancing was resumed after supper, and kept up with enthusiasm until a late hour.

A meeting of the Legislative Council was held on the 4th; present: His Excellency the Governor, the Colonial Secretary, the Attorney-General, Judge Ball, the Auditor General, and the Honourables Messrs. Chomley and Sutherland.

The minutes of last meeting having been read and confirmed, his Excellency said that he had to lay before the Council supplementary estimates for expenditure in excess of the amount already voted. Those estimates would be printed and in the hands of members in a day or two; but his Excellency said the total revenue for the year had been $637,848, of which $620,391 had been voted by the estimates. The actual expenditure was $763,307, and the excess had been caused chiefly by the outlay on the mint, and the sums paid in compensation to Chinese proprietors at British Kowloong being over what had been estimated and voted. The position of the colony for the year was better than had been expected, the excess of revenue over that of the previous year having been estimated at $185,000, while it really proved to be $298,190, while the expenditure proved to be under what was estimated. The sum wanted at present was $250,000, but of that only $140,000 belonged to this year's charges.

The Council then went into committee on the Limited Liability Ordinance, which was, after a last revision, about to be read a third time when a note from Mr. Whittall was received by the Governor. Mr. Whittall had called upon his Excellency to deliver the protest against the third reading of the Ordinance. He was unaware of there being a meeting of Council.

Mr. Whittall gave in his protest, which was read to the Council. Mr. Forth, who also came in late, supported the protest. The Attorney-General quoted some opinions of the best commercial writers at home, to show that in the views he had first expressed he was not alone. He would vote for the measure, as there was a strong feeling in its favour here. When he first gave his Excellency an opinion, he was not aware that the community wished limited liability.

The protest was then examined in some points. The first reason of protest was "that the re-enactment of the measure after its once being rejected was precluded by the rules of Council."

The second was "that its course was unnecessarily hurried through the Council."

The third was to the effect that at the last meeting of Council, Mr. Chomley, the Chief Justice, and the Attorney-General had reversed the votes of the previous meeting, the two latter, while voting for the ordinance, having expressed themselves as being opposed to its principles, and of opinion that they would lead to ruin and disaster.

Mr. Sutherland supported the measure.

Mr. Whittall complained that there was no necessity for its enactment. There were no undertakings delayed for want of it.

The Colonial Secretary said that the community were waiting for it.

His Excellency the Governor then moved that the Ordinance as amended do now pass, its operation to commence on the 1st of May next, and to be numbered Ordinance 1 of 1865.

The motion was carried.

With regard to the reception of Mr. Whittall's protest, certain passsages in it were proposed to be expunged as "offensive."

Mr. Mercer moved that the protest be not received at all, as it was uncalled for, and certain parts of it were offensive to the Council.

Mr. Forth insisted upon it, that the rejection of the protest was unconstitutional. The rules allowed of expunging certain clauses, but not of rejecting the protest.

The motion against the protest being received was lost by a minority of 2 to 6.

Mr. Sutherland moved that the protest be gone over clause by clause, which was carried. On the clauses being read separately, the fact of the protest being against the re-enactment of the measure (when there was no re-enactment but only a re-introduction) seemed to be fatal to the protest; which was, after some conversation, withdrawn by Mr. Whittall, who intimated that he would hand in another protest within seven days. The Council then adjourned *sine die*.

A sad accident happened on the 8th March, causing the death of three men of the 9th Regiment, and the injury of a fourth. The soldiers had been engaged excavating the hill-side at Scandal Point, near the Cathedral, when, the earth giving way, they were buried alive. Two were suffocated before they could be reached, a third died in hospital, and the fourth is rather seriously hurt. Every endeavour was used for their recovery, but unfortunately with not the least success.

On the transport of the 2nd Regiment Beloochees to Bombay alluded to in our Shanghai summary, the *China Mail* has the following:—

In military matters, two cases which have lately occurred in China demand more than a passing notice. The first is that of a Beloochee regiment being sent from Shanghai to Bombay. There were 800 men, and the lowest allowance of space at two-and-a-half tons per man required a vessel of 2,000 tons, or vessels aggregating that amount. Notwithstanding this, the men were sent home from Shanghai in two vessels, the *Caroline Coventry*, 888 tons register, and the *Shakespeare*, 656 tons register. The men had served well in China; they had never engaged to leave India; and very many of them are likely to die on the passage, even should it be a short one, which it cannot well be in this season when the monsoon has abated. The other case is that of the *Oasis*, of 1,116 tons register, chartered here to convey 600 men of the 22nd Bengal Native Light Infantry. A medical board examined the vessel and reported that she could take no more than 500 men, being rather more than the number of Chinese Coolies allowed by the emigration rules, and a little below what an African slaver of such tonnage might carry. Yet the general commanding in China has ignored the medical report and sent on the men to Bombay as stated. Should fatalities occur, the medical board will be exonerated; but what position has General Guy placed himself in? The general is understood to be a strict red-tape officer, which renders the affair more surprising. A spirit of mutiny in India would seem to demand encouragement rather than repression, if such acts are to be sanctioned and approved. We record the case for the future guidance of the authorities at the Horse Guards. The facts are only too true, and it would be useless to supplement them with any comment of ours. Such an irregularity could never have occurred in India, and it is disgraceful to all concerned. General Guy is of course the man to blame, and that all the more so if it be true that he has been guided by one of his quartermasters. Our Chinese interests are in bad custody while such officers assume at will responsibilities that a Macao coolie-broker would shrink from.

In order to put an end to the trade carried on with the rebels at Fohkien in ammunition, the Governor of Hong Kong has issued a proclamation prohibiting the export of arms from that colony. But it is to Shanghai that the Tzewang is indebted chiefly for the aid with which he has been enabled to gain his various successes, and it is extremely unlikely that the Hong Kong authorities will be gratified by any very large seizures. It is difficult, if not impossible, for the foreign authorities to stop these proceedings, or even to ascertain that they are in progress; and the Chinese have not sufficient force at their disposal to seize the contraband men and material after they are clear of the Yang-tsze. The only preventive power lies in the Custom House, the officials of which, by increased vigilance, may do much to check the present thriving trade. It is, moreover, becoming apparent that the local troops have by their bad behaviour to a great measure alienated the goodwill of the peasantry, who are daily becoming more reconciled to the rebels; and it is evident that if the Tzewang carries out the promises of protection made in the proclamation which he has lately issued, inviting the country people to return, while the local officials, on the other hand, fail to restrain their troops from the commission of excesses, the latter will certainly find themselves in the midst of a hostile population, disposed rather to be governed by the rebels than oppressed by the agents of their own authorities. It is rumoured that the General commanding the Chekeang forces is not acting with

Digitized by Google

sufficient energy to satisfy the Futai, who has ordered up the Fantai to supersede him.

The Bank robbery case was resumed on the 12th of March, and once more remanded. The compradore and the two shroffs were admitted to bail; as also were the witnesses previously charged with giving false evidence against the former. The Chinese female, who has been sent down by the authorities at Canton as a witness in this case, was found in possession of part of the stolen property, in notes and gold, from the information of a Chinese spy who had evidently followed her from this place. She is a concubine of the principal head of the gang; and on being brought down as a witness here, has identified (1) the boy who was found possessed of several thousand dollars, and who said he was in the drain, as she had seen him frequently in her paramour's house in Canton; and (2) the house-coolie of the Bank, whom she had occasionally seen in the same house. They were both recognised by her while in the dock, which is a step in the right direction. It is feared, however, that the leader of the gang will not be secured.

The passing of the "Limited" Act had caused an improvement in the shares of the Hong Kong and Shanghai Banking Company. The following is an extract of a letter on the matter:—"It has eked out privately that the self-constituted directors have quietly appropriated to themselves, managers and friends, some 30 to 40 shares each at par. These it would appear they obtained out of a number reserved at the time of allotment (for what purpose I know not, seeing that all the shares were applied for), while some could have been sold on the market for the benefit of the Bank at a premium of from 25 to 30 per cent., or say a profit of from $30,000 to $40,000. Each individual thus favoured, if the report is true, has gained $2,500."

JAVA.

BATAVIA.

Dates are to the 16th March.

A drought, unusual at this time of the year, had prevailed in Java since the middle of January, and in some residencies, especially Tagal and Samarang, had injured the rice crops. The price of rice has risen considerably, and it is feared there will be a scarcity of this chief and indispensable article of food of the population. It is said the Government is taking precautionary measures to provide against this scarcity and the distress it must occasion.

The merchants of Batavia are considering the question of the constructing a dry dock for the repair of ships at that port. A committee was appointed to consider plans and to report on the subject, and a subscription had been opened to defray preliminary experiments and expenses, which are estimated at f. 10,000.

During the month of December the income from the import and export duties in Java and Madura amounted to f 790,378.68. The receipt for the whole year 1864 amounted to f9,422,009·86.

Among these are comprised factitious duties on Government produce (exported)	f2,864,413.31	
Drawbacks	98,513.87	
		f2,962,927.18
Net receipts		f6,459,082.68

During the whole year 1864 less was received than in the same period in 1862-63. The difference is as follows:—1862 fl,724,619.12; 1863 fl,038,472.18.

The account of the works on the Java Railway, during the month of January, states:—The works are continued so far as the monsoon permits it to be advisable. The dwelling of the station chief at Samarang is in readiness, except the hanging of the doors and frames. The making of the castings, &c., for the workshops is continued. The key wall for the magazine is ready. The casting of an iron crane for 15 tons is made. The rails are laid on the station ground. One house for the officials is ready. The earth road of the first section is closed up on the various places from Tangoeng to Kedoeng Djatti. The station ground at Kedoeng Djatti is made level; plenty of ballast is found everywhere There is an experiment being made in the burning of lime at Tanjoeng. Natural stones, wherever they are at hand, are brought to the place where a workshop must be built. The earthworks, as well as on the station ground, as on the earthroad, have suffered almost nothing during the extraordinary great floods of the former month; the whole damage consists in the washing away of some cubic yards of ground on the way from Samarang to Goebuck. It is now shown that the railroad bears up against the strong floods. The riveting of the ways is also small. The direction of the 2nd, 3rd, and 4th sections not being yet approved, the preparatory business of the execution is alone as yet done. Three ships bringing from Europe railroad-iron, sleepers, iron-ties, and other implements, have been lost.

MALACCA STRAITS.

SINGAPORE.

Dates are to the 23rd of March. The *Benares*, with the London mail of the 10th February, arrived out on the 16th of March, and the French mail of the 17th February reached on the 22nd March.

There had been more animation in trade since the departure of the preceding mail. Previous to the arrival of the mails purchasers were active in buying goods to meet the demand for Siam, Saigon, and other markets, and good prices were obtained for most articles, particularly in cotton goods; but the news by the telegrams of the decline in cotton at home, and the continued success of the Federals in America, naturally created some uneasiness among holders of manufactured goods. Until details should be received confirming the telegraphic accounts, purchasers were not likely to add to their stocks, and business would be dull. The small supplies of produce suitable for Europe had crippled operations, and prevented ships on the berth from obtaining cargoes. The unprecedented number of seeking vessels that had arrived during the last few months caused considerable anxiety to find employment for them; but the demand for the rice ports had enabled many to obtain favourable charters. This demand had subsided, and lower rates of freight were being accepted.

Three Portuguese young men have been committed for trial at the next Criminal Sessions for having attempted to obtain payment at the Chartered Mercantile Bank of a second bill of exchange, the first having been paid. One is committed for forgery, and the others as accessory to the fraud.

Within the last few days, preceding the departure of the mail, a steamer, three masted and schooner rigged, had been seen hovering about at a safe distance to the eastward. After a distant view of the roads she turned off and disappeared

The United States war-steamer *Iroquois*, which arrived on on the evening of the 8th of March, left for Batavia on the 11th.

On the 15th of March, a meeting was held in the Exchange-room, to consult as to the establishment of a local Marine Insurance Company in Singapore; Mr. J. G. Davidson in the chair. It was proposed and carried "that a Marine Insurance Company should be formed in the place, and that it should be called the Singapore Insurance Company (Limited)." It was proposed, also, that the capital should be $1,000,000, in a thousand shares of $1,000 each. An amendment was made that the arrangement should be 2,000 shares of $500 each, but the former proposal was carried. A provisional committee was composed of Messrs. G. Cramer, S. Gilfillan, J. Davidson, H. H. Wilsone, C. H. Harrison, and Leah Teek See.

On the 14th, the chief officer of the schooner *Rusulka* reported at the Court of the Marine Magistrate that Captain Carnuchan, of the said vessel, left the ship in a boat on the 11th, and that nothing had been heard of him since by any one on board. He expressed much uneasiness at the circumstance, and wished for advice in the dilemma.

On Sunday the 12th, a pistol was discharged at a Chinese Catechist, in St. Andrew's Church, to the great alarm of those present. On investigation it appeared that the pistol (a common one) had been loaded with powder and grains of rice only. The party who fired the pistol was a Hylam Chinese, a countryman of the catechist, and he declared that he had fired it thus to mark and injure the catechist, but not to kill him, as he had transgressed the laws of their common country by bringing away a female child thence, in the face of a mandarin prohibition. There must have been other covert reasons for such an act, as the offender was professedly a Christian Chinese. He has been committed for trial.

The Marine Magistrate had the mate of the British barque *Sea Nymph* brought before him for refusing to obey the lawful commands of his captain. The mate pleaded inebriation, and

Digitized by Google

was sentenced to four weeks' imprisonment in the House of Correction.

The Rajah of Tringanu arrived on the 10th with a retinue of about a hundred in number, on his way to Mecca.

H.M.S. *Tamar*, Captain Stirling, arrived from Hong Kong on the 8th with troops.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ANNESLEY—On the 15th April, at Horseheath Rectory, Cambridgeshire, the wife of the Rev. Francis H. Annesley, of a son.

BROWN—On the 6th March, at Whampoa, the wife of W. G. O. Brown, of a son.

DE RODAS—On the 25th Feb., at Singapore, the wife of Don M. M. Caballero de Rodas, Spanish Consul, of a daughter.

D'ALMEIDA—On the 4th March, at Everton, Singapore, the wife of Joaquim D'Almeida Esq., of a daughter.

FRIEDERICHS—On the 7th April, at Penang, the wife of F. H. Friederichs, Esq., of Penang and Hamburg, of a son. (By telegraph.)

HAPPER—On the 27th Feb., at Canton, the wife of the Rev. A. P. Happer, D.D., of a son.

TOWNSEND—On the 16th April, at 3, Upper Harley-street, the wife of Meredith Townsend, Esq., of a son.

MARRIAGES.

BELL—MURRAY.—On the 17th April, at 13, Grosvenor-terrace, Glasgow, by the Very Rev. Principal Candlish, D.D., Joseph Bell, Esq., M.D., F.R.C.S., Lecturer on Surgery, Edinburgh, to Edith Katherine, only surviving daughter of the late Hon. James Erskine Murray.

BLACKENBURY—RUSSELL.—On the 25th April, at St. Paul's, Knightsbridge, by the Rev. John Kitcat, M.A., incumbent of Swallowfield, George Brackenbury, Esq., Her Majesty's Consul for the Philippine Islands, to Priscilla, youngest daughter of the late Sir Henry Russell, Bart., of Swallowfield, Berks.

EDWARDS—MANSELL.—On the 27th April, at St. Barnabas Church, Kensington, by the Rev. W. W. Edwards, B.A., Herbert Montague Wright, Esq., Addison-gardens South, and of Nagasaki, to Elizabeth Mary, eldest daughter of Joseph Mansell, Esq., of Addison-road and Red Lion-square. No cards.

GRANT—PETONHOFF.—On the 15th Feb., at the Cathedral of Troitskasafst, Kiachta, Siberia, by the Right Rev. the Arch-Priest Alexandroff, C. Mitchell Grant, F.R.G.S., F.I.G.S.R., late of Bangkok and of Tientsin, eldest son of the late Alexander Grant, Esq., of Capoln House, Rotherham, Yorkshire, to Barbara, second surviving daughter of His Excellency the late Pietre Andraevitch Petonhoff, K.St.A., K.St.V., Counsellor of State and Governor of Kiachta.

LONGLEY—DAWSON.—On the 19th April, by special licence, at Lambeth Palace Chapel, by his Grace the Archbishop of Canterbury, father of the bridegroom, George Longley, Major Royal Engineers, to Catherine Alice, widow of the late Rev. J. Dawson, of Rollesby Hall, Great Yarmouth.

MACKENZIE—SEYMOUR.—On the 20th April, at St. Thomas's Church, Portsmouth, by the Right Rev. the Lord Bishop of Winchester, assisted by the Rev. Richard Seymour, canon of Worcester, uncle of the bride, Donald MacLeod Mackenzie, Esq., Captain R.N., fourth son of the late Sir George Stewart Mackenzie, Bart., of Cowl, Ross-shire, to Dorothea, eldest daughter of Admiral Sir Michael Seymour, G.C.B., Commander-in-Chief at Portsmouth.

MURRAY—MADDEN.—On the 28th Feb., at Christ Church, Canton, by the Rev. J. H. Gray, A.M., James W. Murray, Esq., Assistant Commissary General, eldest son of the Rev. J. G. Murray, D.D., to Elizabeth Emma, second daughter of Major-General J. M. Madden, retired list Bombay Army.

VIDAL—BROWNE.—On the 15th April, at St. Barnabas, Kensington, by the Rev. Dr. Hessey, Carl, second son of Adolph Eduard Vidal, Esq., merchant, Hamburg, to Annette Augusta, eldest daughter of the late Hutchinson H. Brown, Esq., of London. No cards.

VICENTE—SUT.—On the 28th Feb., at H.B.M. Consulate, Bangkok, by the Rev. S. J. Smith, Mr. Simon Vicente, printer, to Amdeng Sut. No cards.

DEATHS.

DONNELLY—On the 2nd March, at the General Hospital, Hong Kong, Samuel Donnelly, private 2nd batt. 9th Regt.

ENDICOTT—On the 28th March, at New York, after two days' illness, William, youngest child of James Bridges Endicott, Esq., aged four years and four months.

HOWLEY—M'DONALD—WHITE.—On the 8th March, at Hong Kong Thomas Howley and Jeremiah M'Donald, both privates of H.M.'s 9th Regt., from suffocation by a land slip; also, on the 9th, John White, Lance-corporal of the same regt., from the effects of the same accident.

JOHNSON—On the 5th March, at the General Hospital, Hong Kong, John Johnson, gunner, R.A.

KNEVITT—On the 14th April, at Margate, Ada Grace, the beloved child of Mr. R. K. Knevitt, of 19, St. Paul's-road, Canonbury, aged seven months.

LAWFORD—On the 11th March, at Murray Barracks, Hong Kong, Amabel Mary, the infant daughter of Sergeant Lawford, Commissariat Staff Corps, aged 1 year and 9 months.

LEWIS—On the 27th Feb., at Bangkok, of apoplexy, Oliver Lewis, a native of Berwick-on-Tweed, but for many years a resident of Cape Colony.

MACTAGGART—On the 17th April, at Blackheath-park, after a few hours' illness, Susan Maud, infant daughter of William Mactaggart, Esq.

MUIO—On the 3rd March, at the General Hospital, Hong Kong, Hugh Muio, sapper, 22nd company R.E.

PEREIRA—On the 14th April, at 11, Park-crescent, Emilia, the third daughter of Antonio Pereira, Esq.

ROBERTS—On the 5th March, at Hong Kong, Augustus Henry Roberts, of Messrs. Gilman and Co.'s, aged 29 years.

SPARKES—On the 13th April, at his residence, Pelham Villa, Portswood, Southampton, George Crabbe Sparkes, Esq., aged 34, Commander P. and O. Steam Navigation Company.

STIRLING—On the 22nd April, at Woodbridge, Guildford, Admiral Sir James Stirling, Kt. (formerly in China), in his 75th year.

SCHOEDTL—On the 25th Feb., at Tiang-Ho, Kowloong, Peter Schoedtl, Munich, Bavaria, aged 23 years.

SHIPPING INTELLIGENCE.

ARRIVALS.

At SHANGHAI.—From Liverpool: Feb. 26, Thomas Seddon; 27, Water Witch. From Cardiff: 24, Coromandel. From Shields: Adelina.

At FOOCHOW.—None.

At HONG KONG.—From London: March 9, Kensington. From Cardiff: 7, Desdemona. From Hamburg: 10, Ino. From New York: 7, Douglas; and 12, Yesso (str.).

At MANILA.—None.

At SINGAPORE.—From London: March 19, West. From Cardiff: 10, Virginia; 18, Finke Seniore; 19, Zephyr; and 21, Pioneer. From Newcastle: 11, Tycoon and Frey. From Glasgow: 16, Douglas Castle and Edinburgh Castle. From Swansea: 10, Flosty. From Rotterdam: 10, Singapore; and 11, Jan Van Galen.

At PENANG.—None.

At BATAVIA.—From Liverpool: Hercules.

DEPARTURES

From SHANGHAI.—For London: Feb. 24, Beatrice. For Liverpool, 28, Blackwood, and, March 2, Carrisal. For New York, 2, Finella.

From FOOCHOW.—None.

From HONG KONG and CANTON.—For London: March 13, Silome.

From MANILA.—For London: Feb. 22, Sir W. F. Williams.

From SINGAPORE.—For London: March 17, Orinico; 19, Betty Perlbach; 21, Alexandra. For Falmouth, 11, George Heinrich; 15, Arab.

From PENANG.—None.

LOADING.

At YOKOHAMA.—For London: Gabalvu and Mirage.

At SHANGHAI.—For London: Grenadier, Antipodes, and Vanguard. For Liverpool: Queensbury, John Nicholson, Stuart, Lalla Rookh, William Methuish, Woosung, Her Majesty, and Agamemnon. For New York: Resolute. For Montreal: Shelburne.

At FOOCHOW.—For London: Maiden Queen.

At HONG KONG and CANTON.—Sovereign of India, Phillipine, and Ocean.

At MANILA.—For New York: Malay and Marmion. For Boston: California.

At SINGAPORE.—For London: British Crown, Early Dawn, and Silver Cloud. For Liverpool: Velos. For Channel for orders: Carl Julius and Falco.

At PENANG.—For London: Dunmore, Britannia, and Devonvale. For Boston: Rocket.

At BATAVIA.—For Channel: Bremen, Antelope, and Lord Raglan. For Rotterdam: Dordrecht, Maria Anna, and Jacob. For Holland: Helen Baird. For Boston: Hamboldt.

FREIGHTS AND CHARTERS.

YOKOHAMA.—To London: Cotton and tea, £3 to £3. 10d.; and silk, £4. to £4. 10d. per ton nominal.

SHANGHAI.—The only transaction to report is the Woodville (361), to load at Nagasaki for London, £1,700 in full. A few small vessels have been taken up for the rice ports at unremunerative rates. The Caroline, Coventry, and Shakespere have been engaged for troops to Bombay at £8. 10s. per man, and £65 for officers.

FOOCHOW.—To London: £2 per ton.

HONG KONG AND CANTON.—The circular of George Holmes gives the following settlements: Sovereign of India (778), to the Cape and London, with invalids, at £23 per head, and £90 for each officer; Aline (600), Manila to Falmouth, for orders to London or Liverpool, with hemp, at £4 per ton. To Saul and back the rates are 20 to 25 cts. per picul, and if on to Shanghai, 45 to 55 cts.

SINGAPORE.—Tonnage in harbour is large, and only small vessels are inquired after; the rates to Great Britain are £2. 10s. dead weight, and £3 for measurement goods.

BATAVIA.—To London, £2. 17s. 6d. per ton, and to Continent, £3. 2s. 6d.

PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT, to CHINA, &c.—Feb. 16, Hasty, Swansea to Singapore; Admiral Piet Hein, Cardiff to Batavia; Maria Luisa, Bordeaux to Batavia; 12, Edinburgh, Glasgow to Singapore; 16, Celebes, Amsterdam to Sourabaya; 17, Cornelia Agnes, Sunderland (order); Johanna Oluffa, Newcastle to Singapore; 21, Nordstern, Hamburg to Singapore.

From UNITED STATES to CHINA, &c.—Feb. 16, Alexander, Boston to Batavia.

From CHINA, &c., to ENGLAND and CONTINENT.—Feb. 17, Albreck and Calavalu, Singapore to Russia; 20, Quarrel, Batavia to Amsterdam; 25, Laurel, Japan to London; 24, Naomi, Shanghai to London; 23, Empress of India, Zebu to Liverpool; 24, Jeanne d'Aer, Hong Kong to Bordeaux; 25, Blohn, Singapore to Falmouth; Constance, Shanghai to Liverpool; Lotus, Singapore to Gibraltar; 28, Sailors Home, Shanghai to Liverpool; Djan, Japan to London; Countess Russell, Shanghai to London; March 1, Benvenue, Shanghai to London; 3, Norval, Singapore to London; 10, Lochnagar, Macao to London.

From CHINA, &c., to UNITED STATES.—Feb. 28, Europa, Hong Kong to New York; Alhambra, Manila to New York; March 3, Queen of the Seas, Japan to New York; 8, Benefactress, Japan to New York; Feb. 28, Baron Melbourne, Foochow to Montreal.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—The season for Black is nearly over, what little business has been done displays an upward tendency. Nothing remains to speak of, except the stock at Canton, which contains some fine chops. The alarming state of political matters will doubtless cause the market to be swept of these ere the departure of the next mail. As for Green teas, shippers have displayed so much firmness that holders have had to yield a little because their stocks became pretty large.

Digitized by Google

CANTON.—A moderate business has been transacted during the fortnight. Two chops of country Congou have been taken for India at absurdly high rates, in fact, two taels above the prices at which these same chops were offered. The teamen have, as might be expected, become a little elated, and the market is firmer in consequence. Scented Teas remain unchanged, there being but few desirable chops remaining on the market. The business done in Country Greens has been confined to transactions in Hyson for India, and that done in Canton Greens to purchases of Hyson and Young Hyson for the Continent of Europe.

AMOY.—There has been rather more inquiry during the past month, but settlements have been checked by the firmness of the teamen, who assert that the coming crop will be seriously interfered with, should the rebels remain in the present position, and that the cost will be much enhanced by the difficulties of transit. Oolongs: Settlements are 5,165½ chests, at $14 to 16 for mixed Ankoi and common cargo grades; $17 to 19½ for fair to good cargo. Congou: 60½ chests common have been settled at $16½.

SHANGHAI.—Black: Two transactions only to advise for the fortnight, 600 chests low Oonams at 21 taels, and 143 boxes at 20 taels per picul. Reshipments 324 chests and 62 half-chests. Stock 13 chops, 7 chops (1,050 chests and 3,600 half-chests) in Chinese hands, and 6 chops (1,010 chests and 1,286 half-chests) belonging to foreigners. The market is firm, ond one tael higher rates are demanded. Green: Immediately after the departure of the last mail prices became further depressed; large quantities were placed upon the market, and a reduction of one to two taels had to be submitted to. This, combined with the easy rate of exchange, induced business, and a good amount has changed hands at 22½ to 37 taels per picul for Fychow and Moyune. The market closes a little stronger, but the supply is likely to continue heavy for some time to come; the stock here is large, and whether prices will advance or remain stationary becomes a matter of speculation. The settlements for the fortnight are 18 chops, comprising 9,253 half-chests and 500 boxes, one chop only Shanghai-packed, the Fychow and Moyune. Reshipments 6 chops, 3,236 half-chests, Fychow and Moyune. The total stock is 78 chops—58 chops Fychow and Moyune, 21,966 half-chests in the hands of Chinese and 14,255 half chests belonging to foreigners; 19 chops Shanghai-packed in Chinese hands, consisting of 5,472 half-chests and 3,378 boxes; and a chop, 1,900 half-chests, Japan in foreign hands.

FOOCHOW.—The business transacted has been trifling, the purchases of Congou displaying an advance of one tael on last quotations. The Oolongs reported were of very common quality. The transactions in Scented Orange Pekoe have been at full rates.

HANKOW.—No settlements have taken place during the past fortnight. Present stock consists of only 5 chops of common kinds, but which the teamen do not press on the market. Total settlements to date 27 chops. Quotations are quite nominal.

KEWKIANG.—Green Teas: Nearly 6,000 packages were reported settled at Tls. 26 to 32, prices which show a decline of about one tael on medium Moyunes and Fychows, though the fine teas of which the supply is very small were firmly held. Teamen were beginning to transfer their stocks to Shanghai, and one steamer alone brings down 12 chops on native account. The stock on the market had increased to 143,600 hf.-chests. Moyune: Fine to finest. Tls. 30 to 33; Common to medium, Tls. 27 to 29 per picul. Fychow: Medium to fair, Tls. 26 to 29; Common Tls. 23 to 25 per picul.

YOKOHAMA.—Since the departure of last mail our tea market has relapsed into a state of great inactivity, caused chiefly by the repeated bad reports of the state of the London market and the high prices demanded by the teamen, who do not at present seem inclined to part with their produce on anything like reasonable terms. During the past few days a small parcel has been settled for the American market at rather over our last quotations, and prices generally are very firm. Settlements for the fortnight amount to about 550 piculs, leaving a stock of about 3,000 piculs.

RAW SILK—SHANGHAI.—The transactions have been very trifling, barely amounting to 50 bales. The local trade has taken off a large proportion of the supply for native consumption at extreme prices, and the remaining stock is chiefly composed of inferior, and very foul parcels of Hainings and Taysaams, the refuse of the season. The arrivals from the interior have again been very small, but it is reported that some 500 bales may be expected down in the course of the month. With such trifling settlements and the absence of stock, we cannot give any quotations, but may remark that as there are many anxious buyers, the dealers remain very firm, and it is not likely we shall see lower prices, as the season's supply must prove considerably short of previous years. The arrivals of Japan Silk have been 332 bales and the unsold stock by latest advices from Yokohama was about 1,000 bales. Prices had declined $10 per picul, and from the best native sources it was ascertained that the supply would be short as compared with last year. It is not expected to yield over 15,000 to 17,000 bales.

YOKOHAMA.—After the departure of the last mail steamer from here, the prices of some descriptions of Silk (especially of inferior quality), the stock of which had accumulated, gave way to the extent of about $20, which had the effect of inducing buyers to operate rather more freely. But upon the arrival of the 26th December mail the demand became more active, and prices sprung up again, thus fully recovering the ground they had lost within the last month. Settlements of the fortnight may be estimated at 550 bales, making the total settlements of this season 10,900 bales against 13,575 bales same time last year. Our unsold stock may be estimated at 480 piculs: Ida medium, 670 to 680; Mybash and Sinchu best parcels offering, 690 to 700; medium, 660 to 680; inferior, 630 to 650.

DRUGS AND OTHER EXPORTS.—MACAO.—Cassia Lignea: Mere nominal price, $15.75. Cassia Buds: No sales; 60 piculs offering at $50. Cassia Oil: No sales; stock 20 piculs held at $190. Anniseed Oil: Sales 2 piculs at the advanced rate of $172, leaving 20 piculs on the market. Star Anniseed: Sales 50 piculs at $25, stock 50 piculs. Galangal Root: Continues quite neglected, nominal quotation $1.75 to 2; stock 3,000 piculs. Gall Nuts: None offering. Vermilion: Small sales for India at $34.

CAMPHOR.—HONG KONG.—A lot of about 500 piculs has arrived quite unexpectedly, and which have been sold at $18.50 per picul. The holder of the remainder in this market has sold his whole stock at $18.10 per picul packed (some 900 piculs) and the market is quite bare at present.

RAW COTTON.

HONG KONG.—A good local demand has been experienced during the fortnight, and notwithstanding the unfavourable nature of the advices from Liverpool, the market has not only been maintained but in some instances an advance of 50 cents has been established. The exhaustion of the stock of piece goods has at last told on the native looms, which at present rates for Manchester goods, can turn out domestic goods at a relatively cheaper rate than the imported article. The local demand, thus stimulated, is fully equal to the supply. The sales of the fortnight are reported at 4,000 bags, the closing quotations being: Shanghai, $25 to 25.75; Ningpo, $26 to 27; Tientsin, $24 to 25.

AMOY.—There have been no sales from foreign hands, but Chinese have been willing sellers at $25½ to $26. Our present quotation is $26½ to 27½, and $25 to 26 for Chefoo. Stocks 900 bales, which with the quantity held by natives is sufficient for about two months' consumption on the present reduced scale.

YOKOHAMA.—A very small amount of business has been done in this staple during the past fortnight. It is believed that the high prices ruling in the interior prevent supplies from reaching this market. Our quotations of $26.50 to 27.50 are quite nominal.

COMMERCIAL POSTSCRIPT.

NEW YORK MARKETS—COFFEE.—Demand more active, but with fall in gold lower prices realised. Sales, 78,695 bags and mats Java on private terms, 6,872 bags Ceylon ditto.

SUGAR.—Owing to fall in gold, no demand outside of the urgent requirements of the trade. Holders firm in pretensions and generally demanding previous rates. Sales effected on terms not allowed to transpire. Quotation for refined 18¼ to 18½ cents for powdered, crusted, and granulated.

TEA.—Fair demand for all descriptions; the market closing firm with fair inquiry. Sales include, 10,000 half-chests Oolong; 1,000 do. Souchong; and 200 do. green, on terms not ascertained.

ARRIVALS NOT INCLUDED IN THE TABLES.—April 22, off Folkestone, from Sourabaya, Maria; 21, off Dungeness, from Sourabaya, Aristides; 22, from Java, Thos. Mitchell, Marie (Spanish barq.), and Jacob, Roggeveen; at Queenstown, from Manila, Lady Love: off Queenstown, from Shanghai, Roodee; 8, at Fayal, from Java, Telanak; 25, at Liverpool, from Manila, Alicia Annie; 24, at Texel, from Batavia, Bernard and Agnes.

DEPARTURES.—April 23, from Shields for Shanghai, Clothilda; 20, from Hamburg for Hong Kong, Jupiter; 20, from Shields for Sourabaya, Twee Gerzusters; 19, from Rotterdam for Batavia, Princess Amalia; 21, from Shields for Shanghai, Mathilde; 24, for Batavia, Pauline and Rascindens (?); 21, from Sunderland for Hong Kong, Oxus; from Copenhagen, for the River Amoor, Alerte; 17, from Rotterdam, for Batavia, Min. Fransen v. d. Putte.

LAID-ON.—At London: For Galle, St. Paril. At Glasgow: For Cape of Good Hope, Singapore; and Hong Kong, Japan (P.S.). For Singapore and Penang: Cosmos.

SPOKEN.—Emma (Portuguese), Macao to Havana, March 17; Queen of Avon, Colombo to London, March 3, 29 S., 10 E.; Violet, Foo-chow-Foo to London, March 31, 20 N., 35 W.; Nordstern, Sourabaya to Amsterdam, March 4, 1 N., 21 W.; Australia (Dut. barq.), Amsterdam to Batavia, April 13, 49 N., 9 W.; Hugo Grotius, Java to Rotterdam, March 15, 8 N., 28 W.; Kirkland, China to London, April 19, 44 N., 20 W.; Thusnelde (Brem. barq.), Sunderland to Singapore, March 26, 2 N., 25 W.

Off ASCENSION.—March 6, from Cochin China, for London, Eaglet; 12, from Padang, for Amsterdam, Tjielingsie; 26, from Colombo, Frances; 27, from Foo-chow-Foo, Dilkhoosh, both for London.

At SIMON'S BAY.—March 11, Cornelia Geertruida, Wiedema, sailed for Batavia.

At ALGOA BAY.—Feb. 28, Emma, Tesselsen, sailed for Singapore.

At TABLE BAY.—Feb. 28, from Hong Kong, Welf, Bahns, and sailed, March 9, for Hamburg; March 3, from Macao, Emma, Spinn, and sailed 8, for Havana; 4, Auguste and Gustave, Benassit, and sailed 6, for Havana; 5, Lombard, Brousmiche, and sailed 7, for Havana; 6, from Yokohama, Pembrokeshire, Hemsworth, and sailed for London; 10, from Macao, Port Durand, Dubois, and sailed 11, for Havana; Feb. 24, Ocean Belle, Jarvis, sailed for Singapore; March 7, Elizabeth Maria, Flens, sailed for Batavia.

MISCELLANEOUS.—The Admiralty have invited tenders for the conveyance of 42 tons naval stores and 800 hhds. porter, from the River Thames to Hong Kong.

COMMERCIAL BANK CORPORATION OF INDIA AND THE EAST.

The first half-yearly general meeting of this corporation was held yesterday afternoon at the London Tavern; J. J. LOWNDES, Esq., in the chair.

The CHAIRMAN, in moving the adoption of the report, which will be found in another column, observed that the corporation only began their direction of the bank at a very late period. They were in hopes that arrangements might have been made which would have enabled them to have obtained the transfer of the business of the Commercial Bank early in July, but delays which were unavoidable in their character arose, in consequence of which the corporation were prevented from taking the direction of the affairs of the bank until the close of December last. In declaring a dividend of 10 per cent. on the whole paid-up capital of the Corporate Bank on the 31st of last December, the board did not take credit for any wisdom in managing the concern, so as to give the shareholders who had taken shares at a premium a dividend of 7 per cent. on the amount which they had paid for them, that credit being due to those who managed the affairs of the old Commercial Bank of India up to the present year; but the directors hoped they

Digitized by Google

would be able to present a prosperous working of the concern for the future. The detailed reports and accounts of the bank had only been received by the mail which arrived on Saturday last, in consequence of some delay which had arisen in transmitting the accounts of the Calcutta branch to Bombay, so that the directors had only been able to sign them as presented by the head office at Bombay. He explained that the mode which had been adopted by the Commercial Bank of India in reference to the accounts was to have those of all the branches sent to the head office at Bombay and there made up, and the dividend declared upon the general balance then shown. The Bombay agency had accordingly sent them the statement, balance-sheet, and profit and loss account, in the same manner has they had hitherto been in the habit of preparing them, for the purpose of enabling the board to declare a dividend upon them. Hitherto, also, the accounts had been audited in Bombay, but upon this occasion they had been audited in this country by Messrs. Strong and Ball, so far as an audit was practicable. He informed the shareholders that Mr. Cartwright, one of the directors, having occasion to go to India on his own business, and the Bombay agency, which had always hitherto been assisted by a local board, being now without such assistance, the directors, unwilling to lose Mr. Cartwright's valuable services, had requested him give his assistance to the Bombay agent, and he therefore remained upon the board for the purpose of enabling him to give his advice and assistance in conducting the affairs of the corporation at Bombay. The business at the present meeting was the re-election of the directors and auditors, and the fixing of the remuneration of the latter. This was the first meeting of the corporation, and he hoped they would have many meetings and a long and successful career. The success of a bank no doubt consisted in the amount of other people's money which they had to deal with, and they could not but entertain sanguine expectations that, from the soundness of the security and the favourable rate of interest they would be able to offer, they would attract a very considerable number of depositors for fixed periods, and in return for which they were enabled to give a higher rate of interest, combined with great security, than could perhaps be given by any other similar institution in the country. He begged to move the adoption of the report.

Mr. THORNTON seconded the motion.

In reply to a Shareholder,

The CHAIRMAN said that, in future, the accounts would be made up in London.

Mr. CROUCH complained that shareholders who had paid £10 premium for their shares received only, in reality, 7 per cent., while the holders of old shares received 10 per cent., which was an inequality, and he suggested that the dividend should be made up to 10 per cent., contending that the balance proposed to be carried over was amply sufficient for that purpose.

Mr. LEGGAT was of opinion that it would be extremely impolitic in the present embarrassed state of commercial affairs in India to adopt such a course. He did not think that the sum of £69,500 proposed to be carried to the reserve at all too much. If there was anything that was doubtful in the policy of the bank, he thought it was the payment of a dividend and bonus in Bombay for the first half of the year, amounting to no less than 18 per cent. per annum, because there were at that time premonitory symptoms which should have induced hesitation in declaring so large a dividend. He inquired whether the directors were able to separate the item of £3,942,554 in the credit account put down as bills receivable and loans. He wished to know the amount of the loans, and thought that if the item was separated they would have a better prospect of knowing whether the reserve of £69,500 would cover the losses which in the present state of commercial affairs in India they all knew must have occurred.

The CHAIRMAN said he could not give the exact figures, but the bills receivable were about £3,000,000, the remainder being loans. He also stated in reply to another question, that the item of unpaid capital appearing in the balance-sheet, which was made up to the 31st December, had all been since paid, with the exception of a very trifling amount.

A SHAREHOLDER inquired whether there was any definite account of losses sustained to be covered by the reserve of £69,500.

The CHAIRMAN said that the directors, who for the most part had paid the premium, were most anxious to give as large a dividend as possible, but they must always be restrained by prudence in recommending a dividend, and in the present case they had not thought it prudent to declare more than they had proposed. With respect to the observation of inequality, he was unable to see its justice, because many persons had bought the old shares at Bombay at a high premium. No one ever reckoned that he was to get interest on premium. (Hear, hear.) Although, therefore, the honourable proprietor might at first sight think himself badly treated, he would, on reflection, agree that a new bank which paid £7 per cent. upon money almost practically useless, on account of the short time in which the operations of the corporation had been carried on, was not doing very badly. It by no means followed that because they considered it prudent to hold over the £69,500, that sum would all be required to cover losses. They hoped and trusted that it would not (hear, hear), but in the present very unsettled state of affairs they considered it a prudent course to adopt, instead of dividing 12 or 14 per cent. (Cheers.) Since the accounts had been made up there had been one or two heavy failures, and there might be more. All that he could say was that all the known losses up to 31st December last had been provided for out of the profits, and such portion of the £69,500 as was not required to meet losses in the present year would eventually go into the pockets of the shareholders. (Cheers.)

The report was adopted unanimously, and the directors and auditors were re-elected, one hundred guineas per annum being awarded to each of the auditors for their remuneration.

On the question of the election of auditors,

Mr. CROUCH took the opportunity of calling the attention of the meeting to the importance of ascertaining whether or not there was a regular and constant attendance of directors at board meetings, pointing out that it was owing to laxity in attendance, and consequent ignorance of the real state of the affairs of banks, that the great disasters which occasionally came before the public in connection with joint-stock banking arose; and the reports of public proceedings of late had shown plainly enough that directors had not attended board meetings and taken an active part in carrying on the affairs of banks.

The CHAIRMAN replied that if the hon. proprietor called at the office he might satisfy himself as to the attendance of directors in this case by inspecting the attendance book.

A cordial vote of thanks was then given to the chairman and directors, and the proceedings terminated.

MARRIAGE OF THE DAUGHTER OF ADMIRAL SEYMOUR.—The marriage of Captain Donald M'Leod Mackenzie, R.N., with Miss Seymour, eldest daughter of Admiral Sir Michael Seymour, G.C.B., the gallant and respected Naval Commander-in-Chief at Portsmouth, took place at Portsmouth, in the parish church of St. Thomas, on the 20th inst., accompanied by unusual demonstrations of rejoicing and good wishes for the happy pair. The ceremony was performed by the Right Rev. the Bishop of Winchester, assisted by the Rev. Richard Seymour, Canon of Worcester. A large party of relatives and friends were entertained to breakfast at the Admiralty-house, Portsmouth dockyard, which was supplemented by a ball in the evening. Captain and Mrs. Mackenzie left Portsmouth on Thursday afternoon for Norwood to spend the honeymoon.

OPIUM FRAUD ON THE ORIENTAL BANK.—A Melbourne paper describes a fraud by Chinese:—A neat fraud has been perpetrated by Chinamen at Hong Kong, who shipped a number of cases said to contain opium per mail steamer, consigned to Chinamen, said to be merchants of Little Bourke-street. They took the bills of lading to the Oriental Bank, and got an advance of £1,700. The Chinamen here could not be found. When the cases were opened they were discovered to contain arrowroot.

SUBMARINE CABLE.—In our last issue we briefly mentioned Mr. Gisborne's pamphlet on submarine Telegraph Cables, we may add, that his conclusions are decidedly in favour of heavy cables laid in a moderate depth over all others, a moderate depth being equivalent to from 20 to 100 fathoms, and a heavy cable weighing 2 tons per mile.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, April 14.

The topic of the day is the international flower show in the Crystal Palace at Amsterdam. A beautiful collection is gathered there, and many thousands of strangers are visiting our capital. There is no question that this first international flower exhibition will give an impulse for others.

Political news is very scarce, now that Parliament is prorogued till the end of this month. Several are the rumours about the Bill of Cultures in India. The general opinion is that it is not yet presented to the Council of State, but that the Government is still consulting authorities. On the other hand, it is quite certain that the Council has already examined the Bill by which capital punishment will be abolished and changed to thirty years' imprisonment.

In my former letter I told you that Mr. Graen van Prinsterer had resigned as member of the Second Chamber of the States-General. This example is followed by Mr. Van der Keins van Duyvendyke, member of the First Chamber. Mr. J. P. J. A. Earl van Zuylen van Nyeveldt, Ambassador at Berlin, certainly will fill the place of Mr. Graen, because this gentleman is warmly recommended by the eminent ex-leader of the anti-revolutionary party, Mr. Graz.

The international convention about the sugar duties still meets with much opposition. The hope that Parliament will reject this convention augments, because it is positively said that your Government makes important objections. Mr. Uytenhoven, the Secretary-General of the department of Foreign Affairs, started for London in order to explain those objections.

The King has been pleased to confer the Knighthood of the Order of the Netherlands Lion on O. van Rees, Member of the Council of State in India; R. Scherius, late resident of Samarang; F. H. A. van de Poel, Resident of Cheribon; Dr. A. J. D Steenstra Toussaint, First Civil Doctor at Batavia; and A. C. K. Th. de Ruyter, First Civil Doctor at Samarang; and the Knighthood, Fourth Class, of the Military William Order on P. Graef, sergeant-major of the R.A.; and on the Amboinese First Lieutenant of Infantry of the R.A., J. Rakarias. This last appointment—the lieutenant being the first coloured person on whom the Military William Order has been conferred—meets with the general sympathy of all the officers.

His Majesty has given his authorisation to the medical officer, Dr. A. F. Bauduin, to remain again two years in the Japanese military service.

HAMBURG.

APRIL 15.

The *Russian Invalide* publishes a letter from Kopal containing the following further particulars of the insurrection of the Dunganes. The principal armed body of the insurgents is now at

Digitized by Google

Urum-tsi, under the command of Sachan-Dschan, Kodschi-Tidu, and Mona, who were all formerly officers in the Chinese Imperial Army—the two former as ambanes, or generals, the latter as goldai or colonel. The communication is interrupted by the Dunganes not only with Peking, but also with Kashgar and Tchugutschak, so that the Mandchurians living in the province of Kultscha are hitherto in perfect ignorance of what has taken place and the further progress of events. The town of Kultscha itself has been destroyed and the inhabitants obliged to fly for safety to the mountains. Those only who have remained faithful to the Imperial Government and a few Mandchurians have shut themselves up in the citadel, which is armed with falconets and iron pieces of artillery. All the adherents of the insurgents have removed to Old-Kultscha. A Dunganese corps of twelve thousand men, which left Kashgar and was advancing by way of Musert, had not arrived at Kultscha when the courier left. According to the universal belief of the Chinese, the arrival of this corps will decide the fate of Western China.

Herr Kupfer, the Director of the Central Physical Observatory at St. Petersburg, calls attention in the Russian newspapers to the decimal metric system and the abuses of the present clumsy weights and measures now in use in Russia, insisting urgently on the necessity of a speedy alteration. The appeal has been well received, and in several parts of the Empire committees have been formed to further the agitation and draw up petitions to the Government in favour of the immediate introduction of the decimal system and abolition of the present one.

An agitation is going on in Hamburg with the view of abolishing the well-known banco currency, which formerly was of great service in mercantile transactions, but is now felt as an embarrassment in the transactions of Hamburg with the rest of Germany. It is now proposed to substitute the ordinary currency of Germany for the artificial banco system.

Seven Hamburg consulates in various parts of the world are now vacant, including those of Singapore and Akyab. Last week a public meeting of the merchants of this city was held at the Exchange Rooms for the purpose of making a *wahl-aufsatz*, or list of three candidates for each vacancy, by virtue of the powers vested in them by the constitution, from which list the Senate has to make a selection.

The *Leipzig Illustrirte Zeitung* contains a well-executed woodcut of the late Sir Robert Schomburgk from a photogram by Hermann Gunther in Berlin, together with a biography of the distinguished traveller, who was the son of a Protestant clergyman in the Black Forest (Kingdom of Wurtemberg), and a short memoir of his indefatigable exertions in the cause of science.

COMMERCIAL.

COFFEE.—An increased demand has sprung up for finer descriptions which fetch full prices, whilst inferior and middling qualities are rather neglected. Sales of the week, 9,000 bags.

SUGAR.—A further decline of 4 Sch. Bco. has to be recorded, but this produced an animated business. Among the sales were 11,000 bags of Manila. For the finer qualities of Refined there is an improvement both in the demand and the value, whilst inferior is dull of sale and can with difficulty realise previous quotations.

RICE.—A very lively business has been done in cleaned grain, in most cases at higher prices. On the other hand, Rough is neglected.

SPICES.—There have been some large dealings in Cardamoms at rising prices, and the article is still in great demand. In Cassia Lignea no alteration, market steady. Pepper commands more attention, and is firm, with a tendency to rise.

DRUGS.—Of Oil of Cassia 70 chests have been disposed of by private contract, and a similar quantity of Oil of Star Anniseed. Refined Camphor continues in request, and better prices are paid.

TEA.—A moderate amount of business has been done both for export and consumption. The fresh arrivals facilitate sales, and the market is in a satisfactory state.

SPELTER.—A few sales have been made, but there is not much disposition to buy. No alteration in values.

DISCOUNT.—2¾ to 3¼ per cent. Money plentiful.

SHIPPING.—Sailed, from Cuxhaven, Fagel, to Batavia.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, April 23.

Parliament still enjoys the Easter recess in the delight of the finest summer weather possible (the thermometer has for ten days been at 75 to 79 degrees of Fahrenheit). Several members of the Chambers and the Cabinet are making a trip to France and Germany. Some are labouring under illness at their country seats, without their maladies, however, exciting any serious fears. The political world is very quiet, and the papers are obliged to reargue what they have already said about the several Bills that have been put forward by the Cabinet, the discussions on which will be resumed on the 2nd of May, when Parliament will be reopened.

In a former letter I told you that Mr. J. A. Baron van der Heym van Duyvendyke had sent in his resignation as member of the First Chamber of the States-General. Mr. J. W. Hein was elected in his place; and thus a Liberal and democrat will fill the seat of a *pur sang* conservative and aristocrat.

Two pensioned Indian functionaries died on the same day (14th inst.) at the Hague—Pieter van Rees Moorrees, Resident at Sourabaya and Batavia, and his colleague, Thomas Josephus Willes, formerly Resident at Western Borneo and Riouw. He was the official who restored peace to Borneo when the Chinese disturbed it.

Although the law by which Swiss citizens are authorised to take military service abroad has been abolished, a large number of these men have been enlisted on speculation for the Northern States of America. For some reason or the other they declined to fulfil their engagement. Our Government accepted their offer to serve in their East Indian possessions, they each receiving 120 florins as bounty. Further reinforcements will speedily be despatched to the East Indies.

COMMERCIAL.

COFFEE.—The American news influenced this article considerably, and in consequence thereof the valuation was paid in full at the Company's sales on the 19th inst., and consisted of 88,301 bales. The inferior qualities were paid, however, 1½ ct. under valuation, but since the auction an advance of 1 ct. was paid; for the pure tasting sorts there was also a lively demand. The 982 b. Java and triage, and 733 b. 2nd quality Padang, which were offered in public sale, were sold from 28 to 40 cts. The bulk was in general unclean. There were sold 1,000 b. Java, ex Sylphide, at 45 to 45½ cts.; 1,161 b. do., ex Robertus Hendrikus, at different prices; 2,005 b. Padang, ex Joan, at 43¾ to 45 cts.; 500 b. Padang, ex Bulgersteyn, at 43¾ to 47, and 350 b. do., ex ditto, at 40½ cts.

TEA.—The market continues active, and an advance is still paid for the lots of the auction "Freya." The Company will offer at public sale on the 26th, 1,510½, 4-8, and 1,458 half-chests Java tea.

SUGAR.—The market is in a very firm condition, holders declining to operate at the actual prices; the sales have been extremely light. Only 1,500 kr. Java, and 1,206 kr. and 213 bags Java, ex Sylphide, were sold, at prices that did not transpire. For refined there is a lively demand, but the stock is insignificant. An advance of ½ f. is willingly paid on the former rates.

RICE.—With more demand; 2,040 b. Java, ex Haamstede, were sold at 8¼ f., and 1,184 b. do., ex den Elshout, at secret prices. The prices will certainly make an advance, our market being the lowest of the Continent.

TOBACCO (JAVA LEAVES).—The market was inactive before the auctions, consisting in 2,883 p., several marks of which were sold at 13 to 76½ c.; 1,456 p. C. H. D. B. which were paid in average with 18½ c.; 303 p. W. Malang at 21 3-10ths; 300 p. Java V. at 48¾. In the whole, 6,230 p. were offered, and nothing was retired.

SEGARS.—In auction 50,000 p. Malang were offered, and sold at 1½f. to 2½f. Only a small part of the 500,000 Manila segars, 2a. Cortados, was sold at auction at 40f. to 42f., 400,000 p. being retired; of the 150,000 Cavite, 1864, 110,000 were taken at 39¾f. to 44f.; of the 120,000 2a. Habanas, 1864, 60,000 were sold at 36f. 38f., the other part was retired at 40f.; 30,000 2a. Habanas, 1861, were sold at 34½f., 50,000 of the same quality retired at 35f.; 36,000 2a. Habanas, 1863, were retired at 36f. These Manila segars arrived by the Sea Belle and the Staffordshire.

BANCA TIN.—The market is steady, but a very limited business was done at 57½f. to 58¾f. Holders now decline to sell under 60f.

SPICES.—Without any transactions. Only for Mace there was some demand, but the large arrivals stopped all speculative inquiry. Pepper: 500 b. ex Joan only were sold.

COTTON.—Notwithstanding this article was highly influenced by the news from America, there was a lively speculative demand at the lower prices. Our market being badly provided of current qualities, the greater part of the transactions consisted in East Indian sorts.

INDIGO.—The trade is occupied inspecting the parcels which will be offered on the 2nd and 4th of May, and which consists in 4,447 ¼-chests Java Indigo, and 80 chests Java Cochineal. In the meanwhile a fair business was done, and the greater part of the parcels which were to be offered in the private auctions on the 26th were sold at high prices.

DRUGS.—The business is confined to the execution of a few small orders for consumption.

JAPAN WAX.—303 chests offered at the company's sales were sold at 28½ f., likewise 80 chests Japan Soya at 41 f. to 42½ f.

MONEY.—The attention is now only fixed upon American stock. 5 per cents., 1874, are quoted 62¾; 6 per cents., 1881, 68¾; 6 per cents., 1882, 69½; Confederates, 2 15-16ths to 3 1-16th; Dutch stock unaltered; 2½ per cents., 61⅝; 3 per cents., 72¼; 4 per cents., 95⅝; Amortis Syndicaat, 89¾; Handelmaatschappy, 143½; Expl. State Railways, 92½. Bank Discount: For bills, 3½ per cent.; acceptances, 4 per cent.; open market, 4 per cent. Change: London, 3 mo., 11.73 f.; 2 mo., 11.76½ f.; short, 11.82 f. Paris, 3 mo., 46.52 f.; 2 mo., 45.66 f.; short, 47 f. Hambro', 3 mo., 34.95 f.; 2 mo., 34 f.; short, 35.25 f.

SHIPPING.—ARRIVALS.—April 14, At Texel from Banjoewangie, Sophie; 18, at Brouwershaven from Batavia, Ridderkerk; 20, at Texel from Samarang, Nicoline.

READY TO SAIL.—To Sourabaya, Huydecoper; for Batavia, Mentor, Twee Cornelissen; for Samarang, Ida Elizabeth.

DEPARTURES.—April 17, from Brouwershaven to Batavia, Minister Fransen van de Putte; 16, from Texel to Sourabaya, Tweelingen; from Flushing to Batavia, Middelburg; 19, from Brouwershaven to Melbourne,

Digitized by Google

Hendrik, Ido, Ambacht; from Texel to Batavia, Isis; 20, from Brouwershaven to Batavia, Prinses Amalia; 22, from Texel to Bavia, Zephir.

LOADING AT AMSTERDAM.—For Kanagawa and Decima, Julie, Bantam, Batavia; for Padang, Pauline, Constance, Eleonor, Brouwershaven; for Macassar, Elizabeth Jacoba; for Batavia, Indian Packet, Krimpenerwaard; for Batavia and Samarang, Koning Willem II., Koophandel, Anthony van Hoboken, Kandanghauer; for Batavia and Sourabaya, Loevesteyn, Amesterdam, Nicolaas Witsen, Louise; for Samarang, Estafette, Maria Regina, Maria Veronica, Mathilde; for Samarang, Maria Veronica, Mathilde, den Elshout, Petronella, Quintet, Staatsraad van der Houven; for Sourabaya, Petronella, Nederland en Oranje.

FREIGHTS.—Quotations of Messrs. Fouchey and de Vletter, ship brokers, Rotterdam:—For Batavia, Kortenaer, 973 tons; Copernicus, 742 tons; van Grootmeester Nationaal, 755 tons; Kosmopoliet, 753 tons; G. K. Graaf Hogendorp, 754 tons; Dageraad, 724 tons; Noach, 892 tons; Mary and Hillegonda, 754 tons; Nieuwland, 754 tons; Onrust, 808 tons—18f. to 20f.: for Batavia and Sourabaya, Twee Cornelissen, 742 tons; Lichtstraal, 1,500 tons; Ottolina, 714 tons—18f. to 20f. for B., 25f. for S.: for Macassar, Macassar, 328 tons; Samarang, Hendrika, 667 tons; Ida Elizabeth, 724 tons; Landbouw, 725 tons; Henriette Geerardina Susanne, 575 tons; —25f. to 30f.; for Sourabaya, Antonia Petronella, 711 tons—25f. to 30f.; all per last of 2,000 ks. or 120 cubic feet Amsterdam, and 15 per cent.: for Melbourne (H.B.), Kanagawa, 1,216 tons—40f. to 45f. and 5 per cent.: for Singapore and Hong Kong, Albrecht Beiling, 507 tons; Sophia Amalia, 319 tons—30f. for S., 40f. for H., and 15 per cent.: for Singapore, Neerlands Vlag,—30f. to 35f. and 15 per cent.; all per ton or 1,000 ks., or 40 cubic feet English.

PASSENGERS INWARD.

From Java, per Bezoekie, Capt. Reckers, Mr. Roon Swaan and family; per Ridderkerk, Capt. Molenaar, Mr. S. Bonsema; per Nicoline, Capt. Winter, Mr. C. Ammedieck and family.

PASSENGERS OUTWARD.

To Java, per Minister Fransen van de Putte, Capt. Forbes Browning, Messrs. C. Th. O. Gunther, A. Huidekoper, L. Berner, P. Herklots, W. L. Dykman, D. Harting, V. Schmidt, L. Savoye, H. de Jager, G. J. Hut, Granpré and family, Mrs. Keulemans and child; Misses Koenen, Krieger and Lawson.

PARTIAL EXPORTS.

Per Australie, Capt. J. G. Lucas, from Amsterdam to Batavia, cleared April 3:—Vinegar, 6 barrels; geneva, 687 litres; vegetables (preserved), 330 lbs.; linseed oil, 220 litres; coals, 9,000 lbs.; colours, 320 lbs.; meat (all sorts), 2,692 lbs.; wine, 127 litres.

Per Baron van Pallandt van Rozendaal, Capt. A. Hoogenstraten, from Rotterdam to Batavia, cleared April 3:—Geneva, 888 litres; flour, 400 lbs.; confectionery, 765 lbs.; meat, 1,800 lbs.

Per Kosmopoliet II., Capt. J. Bouten, from Dordrecht to Batavia, cleared April 3:—Vinegar, 240 litres; animal charcoal, 60,000 lbs.; beer, 6,900 litres; butter, 2,504 lbs.; bread, 1,400 lbs.; geneva, 1,595 litres; tiles of glass, 1,000 f.; vegetables (preserved), 800 f.; cheese, 240 lbs.; copper nails, 600 lbs.; flour, 540 lbs.; furniture, 1,000 f.; linseed oil, 3,000 lbs.; passementry, 200 f.; cement, 9,650 lbs.; coals, 70,000 lbs.; turpentine, 300 litres; rope, 2,796 lbs.; arrack casks, 1,450 f.; meat, 11,019 lbs.; wine, 2,472 litres; gas retorts, 28,000 lbs.; railway bars, 229,952 lbs.; soap, 11,579 lbs.

Per Hendrika, Capt. A. J. Bus, from Rotterdam to Batavia, cleared April 3:—Earthenware, 364 lbs.; vinegar, 360 litres; confectionery, 470 lbs.; beer, 1,200 litres; butter, 780 lbs.; books, 762 lbs.; bread and buscuit, 4,440 lbs.; opium, 4,090 lbs.; brandy, 631 litres; geneva, 800 litres; looking-glass, 200 lbs.; furniture, 12,000 f.; musical instruments, 1,500 f.; cheese, 715 lbs.; confectionery, 167 lbs.; mercery, 1,238 lbs.; cotton (manufactured), 22,918 yards and 4,192½ lbs.; flour, 1,000 lbs.; paper, 9,900 lbs. and 170 reams; bazalt stone, 500.000 lbs.; whitelead, 5,300 lbs.; meat, 5,500 lbs.; fruits (preserved), 1,369 lbs.; wine, 4,221 litres; perfumery, 375 lbs.

Per Maria and Elizabeth, Capt. E. F. Boujer, from Rotterdam to Batavia, cleared April 4:—Vinegar, 120 litres; butter, 797 lbs.; geneva, 1,156 litres; cheese, 350 lbs.; arrack casks, 11,100 f.; meat and pork, 5,839 lbs.; wine, 253 litres.

Per Triton, Captain W. C. Schey, from Rotterdam to Batavia, cleared April 9:—Vinegar, 540 litres; confectionery, 489 lb.; beer, 4.793 litres; biscuit, 3,915 lb.; brandy, 2,040 litres; Geneva, 46,042 litres; cotton (manuf.), 54,582 yards, 384 lb.; woollen (manuf.), 13,043 yards; linseed oil, 1,675 lb.; writing paper, 110 ream; perfumery, 2,000f. and 801 litres; coals, 19.900 lb.; meat and pork, 5,579 lb.; wine, 15,032 litres; iron nails, 6,300 lb.

Per Maria Elise, Captain T. D. van Deursen, from Amsterdam to Java, cleared April 10:—Vinegar, 320 litres; Geneva, 628 litres; wine, 202 litres; meat, 2,790 lb.

Per Vyf Vrienden, Captain C. Johan, from Rotterdam to Samarang, cleared 11th April:—Earthenware, 7,318 lb., and 1,730 dozen; vinegar, 200 litres; confectionery, 678 lb.; beer, 5,918 litres; butter, 2,480 lb.; mineral water, 5,000 cruches; machinery, 10,500 lb., geneva, 12,675 litres; vegetables, preserved, 160 lb.; ink, 500 f.; cheese, 1,400 lb.; copper plates, 2,920 lb.; mercery, 423 lb.; cotton manufacture, 288,660 yds., 1,625 lb., 5,000 f.; silk manufactures, 5,300 lb.; gorges, 3.000 p.; cotton ribbon, 38,400 yds.; flour, 5,300 lb.; linseed oil, 9,000 litres; paper, 590 reams; perfumery, 300 f.; passementry, 1,300; mustard, 300 lb.; Bazalt stone, 100,000 lb.; coals, 8,000 lbs.; cigars, 180 lb.; colours, 5,469 lb.; meat, 6,282 lb.; wine, 1,702 litres; iron bars, 12,817 lb.

Per Madura, Captain B. A. T. van Bruggen, from Amsterdam to Batavia, cleared April 11:—Earthenware, 760 f.; vinegar, 550 litres; beer, 23,827 litres; butter, 2,615 lb.; chemicals, 480 f.; Geneva, 5,480 litres; rum, 103 litres; brandy, 456 litres; window glass, 300 f.; plate glass, 120 f.; vegetables (preserved), 530 f.; stearine lights, 1,075 f.; playing cards, 960 f.; cheese, 578 f.; confectionery, 4,835 lb.; copper plates, 2,358 lb.; mercery, 4,765; linen, 3,480 yards; jute (manufactured), 48,000 yards; cotton 139,372 yards; wollens, 50,025 yards; silk, 1,420 yards; flannel, 1,133 yards; furniture, 1,337 f.; millinery, 962 yards; carriages, 1,600 f.; perfumery, 194 litres; shoes, 670 f.; tar, 4,590 lb.; meat, 3,000 lb.; wine, 434 litres.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

APRIL 23.

From Irkutzk we learn that the tribe of the Tunghuses commenced their hunting campaign remarkably early this season, as game is exceedingly plentiful, and their sport so abundant that they have already used up their ammunition and come in to get further supplies of powder and shot. The number of squirrels in the forests of Kirensk is something quite extraordinary, but though large quantities have been killed, the profits are small, as many of the hunters spent the proceeds of their chase in spirituous liquors, and returned almost as poor as they set out. Notwithstanding the extreme abundance, grey squirrel skins were well paid, the price varying between eight and nine copeks per skin. A good many foxes have also been shot, and a fair quantity of lynxes were obtained on the banks of the Kirenga, where they are not uncommon. On the upper part of that river even lions are occasionally seen. The most useful description of game for the natives themselves are hares, which furnish them with wholesome food, and the skins provide them with clothing.

The annual fair, which is held in the most remote north-east corner of the Russian dominions on the banks of the Anjui, far beyond the Arctic circle, though of no great importance as regards the value of the sales, is described by an eye witness, M. Anatowsky, Judge of the Peace in the circle of Kolymsk, as one of the most curious and interesting sights that it is possible to imagine. Having just returned from that inhospitable region he has written a lively description of it to the Statistical Society at Jakutzk. All the nomadic and stationary tribes of the Far North East congregate to this fair to barter the produce of their chase for supplies of ammunition and other articles they require, the principal of which are tin kettles, knives, scissors, axes, needles, fish-hooks, and other items of ironmongery and cutlery; plates and dishes of tin, copper, and wood; ribbons, printed shawls, and thimbles, for all which they offer in exchange furs, skins, and walrus teeth. The former include red foxes, white foxes, beavers, reindeers, and bears. The most interesting and untutored tribe seen at these fairs are the Tchucktchees, who inhabit the regions close to Behring's Straits, and are in regular communication with the natives of the north-western coast of (Russian) America. Between three and four hundred of this tribe annually make their appearance, travelling with their wives and children, arms and habitations, which latter consist of tents made of reindeer skins. They trade with the Esquimeaux and Indians of North America, and their journey lasts between five and six months. They travel in sledges drawn by reindeer, whilst the Russians come in sledges drawn by dogs, though the goods the latter bring for sale and barter are carried on pack-horses. The fair lasts for only two days, which, however, are busily employed, and then they disperse again in all directions. One of the articles most in request brought by the Russians to the fair of Anjui is tobacco grown in the Caucasus. For a pood (40 lbs.) of this the Tchucktchees readily give ten red fox skins, or five of the river beaver. Walrus teeth are only given in exchange for ironmongery.

The Senate of this city has appointed Her Johann Heinrich Dauelsberg to be Consul for Hamburg at Singapore.

Amongst the latest arrivals here from the Far East are Mr. Alfred Hasche, from Penang; Mr. C. Arnemann, from Hong Kong; Mr. Ad. Koch, from Batavia; and Mr. G. W. Schwemmann, from Hong Kong.

COMMERCIAL.

Owing to the Easter holidays the markets generally are calm, and the dealings have been on a limited scale. A better feeling prevails for coffee, in consequence of favourable accounts from the Brazils, as also from the result of the Dutch coffee sale, and though the Easter week, the sales amounted to more than 17,000 bags. The market for raw sugar is inactive, and former prices can with difficulty be supported; but a fair amount of business has been done in refined, 10,000 loaves having changed hands at full values. A lively demand has again set in for cleaned descriptions of rice, and a further advance is established. About spices there is very little to report; pepper is the only article in any demand, and market improving. Cassia lignea, steady. The inquiry for cardamoms has abated, and ginger is quite neglected. Spelter has assumed a more lively attitude, the feeling for the article is favourable, and the dealings are more extensive. Among the sales of the week were 5,000 centners at 13 mks. 5 sch. Banco for delivery; 3,000 centners ex warehouse, at 13.8; 2,000 centners afloat, at 13.7; 500 centners for arrival, at 13.8; and 500 centners for delivery in May and June, at 13.9. Discount 2¼ to 2¾ per cent.

SHIPPING.

SAILED.—Ceres, for Singapore and China; Herrman and Emma, for Calcutta; Jupiter, for Hong Kong.

ARRIVED.—Luchow, from Bangkok.

Digitized by Google

TRANSACTIONS OF THE ETHNOLOGICAL SOCIETY OF LONDON.—The third volume of the transactions of this society has just been published, and, in interest, equals in every way the preceding ones. One of the most remarkable papers is that by Mr. A. R. Wallace, "On the Varieties of Man in the Malay Archipelago." It contains not only a graphic description of the principal races visited by him during an eight years' cruise in the Malay Archipelago, such as the Malays, the Negritos, the Papuans, and Alfurus, but it starts an ingenious theory on the submergence of an oceanic continent, the remnants of which are to be found in the eastern islands, now inhabited by the black Papuan and the brown Polynesian races. The evidence of the subsidence is of two kinds. One is supplied by Mr. Darwin in his essay on "Coral Reefs," where he proves that the great mass of the coral islands of the Pacific have been produced by subsidence, and that every mountain summit, as it successively sank beneath the waters, left an atoll to mark its former existence. The second proof is taken from the distribution of animals among these Islands, which shows at the same time that the breaking up and the subsidence was a comparatively recent operation. "There is a very general similarity," Mr. Wallace writes, "in their productions over a vast range of latitude and longitude. Even islands so remote as the Sandwich and Society groups have land birds common to the two, as have also the Society and the Fiji Islands. The majority of birds, however, have closely allied representative species in the several islands; but there is reason to believe that the forms and species of birds change more rapidly than those of large mammalia, for while the birds of Java, Sumatra, and Borneo are mostly distinct species from those of the south-eastern parts of Asia, many of the great quadrupeds are identical. There seems every reason, therefore, to believe that man, who existed in Europe along with quadrupeds now extinct, may have also existed at the time when a great continent occupied the tropical portions of the Pacific Ocean." And in another passage of the same essay we read:—"The islands of Baly and Lombock are only fifteen miles apart, yet they really belong to two distinct divisions of the globe. The naturalist, who is accustomed to distinguish characteristic forms of animal life, is at once struck with the remarkable difference between them. In Baly he is still in the Indian region of the Archipelago; the common birds which he sees are barbets, black and white thrushes, crested starlings, fruit thrushes, and woodpeckers—all of which are common forms in India, Sumatra, Borneo, and Java. He may see all these in the morning, and in the afternoon cross over to Lombock, where a totally different set of birds will present themselves. He will now see white cockatoos, long-necked honeysuckers, and the mound making megapodiur—all common forms in the islands farther east and in Australia, but not one of which ever passes across this narrow strait to the islands further west. If larger and more distant islands are compared, the difference is more complete in every department of nature, so that between Borneo and New Guinea, though almost exactly agreeing in climate and physical features, there is a total diversity of animal productions—a diversity as complete and striking as that which exists between the Old and New Worlds.

A SHANGHAI CHARTER DISPUTE.—REYNOLDS V. JEX.—This case related to the right to freight on a cargo of cotton shipped at Shanghai for Liverpool. On the 11th of September, 1863, Jex (the defendant), at New York, chartered a vessel of about 400 tons burden, from New York to Hong Kong or Whampoa, and thence to Shanghai, and thence to an Atlantic port in the United States (not south of the Chesapeake), or to a port in Great Britain (not beyond London) on the east coast, or to a port on the continent of Europe between Havre and Hamburg (inclusive), on the terms of paying "for charter or freight" £3,000, to be paid—£1,500 on the correct discharge of cargoes at Hong Kong and Shanghai (less an advance provided for), and £1,500 on correct discharge of return cargo in the United States; £1,000 to be advanced in New York on signing the bills of lading, to be signed without prejudice to the charter-party; the vessel to be consigned at the port of discharge to the charterer's agents. Such was the charter at New York, in which it is to be noted there was no clause expressly creating a specific lien in favour of the shipowner for the chartered freight on goods shipped. On the day of charter the owner, Jex, received £1,000 on account of charter—as an advance—to be deducted from the chartered freight on correct discharge of cargo at Shanghai and Hong Kong, and the master received £959, *i.e.*, 2,952 taels at 6s. 6d. The ship went to Shanghai in May, 1864, consigned to a firm of Fraser and Co. there, and was thence despatched to Liverpool, as the final port of discharge, with a cargo chiefly of cotton. The main part of the cargo was 690 bales of cotton, of which the bills of lading ran thus—"Shipped by Fraser and Co., to be delivered at Liverpool, unto their order, or to their assigns; he or they paying freight for same to Reynolds and Co., at Liverpool, as per margin;" and then in the margin of the freight was stated thus:—"691 bales at £3. 15s. a ton, at 50 cubic feet a ton." The ship arrived at Liverpool in November 1864, and at that time (as will appear from the above statement) about £1,040 of the chartered freight remained due to the shipowner,—that is the defendant,—and he accordingly stopped the delivery of the cargo at the docks at Liverpool in order to enforce payment thereof. Thereupon the plaintiffs, Messrs. Reynolds and Co., the merchants there to whom the 950 bales of cotton had been consigned, and who held the bills of lading, deposited with the Dock Company £1,495 in order to liberate the cargo. Of this sum about £1,140 was for the 691 bales of cotton, and the rest for freight on other goods shipped on other bills of lading. An interpleader order had been obtained, under which the money was paid into court, and an issue was directed to try whether the defendant was entitled as shipowner to have the money in dispute. The issue came on for trial at the last Assizes at Liverpool before Mr. Justice Shee, who said the question in substance came to this,—whether the plaintiffs, consignees of the cotton, were entitled to have it delivered to them without payment of the freight due by charter. The facts were not in dispute, and were taken formally, with a view to reserve the question of law for this Court. It was proved that the plaintiffs, Reynolds and Co., of Liverpool, were agents of Fraser and Co., who consigned the cotton to them, and also sent both charter and bills of lading.—A verdict was taken formally for the plaintiffs, Reynolds and Co., subject to the question of law, and Mr. Temple, Q.C., now moved, on the part of the defendant, the shipowner, for a rule to enter the verdict for him. The question, he said, was whether the plaintiffs, the holders of the bills of lading, were to be taken as having notice of the charter and the freight due thereunder; and, as he put it, they had received the copy of the charter as agent for the charterers, as well as the bill of lading, as agents for Fraser and Co., the consignors.—The Court granted a rule *nisi*.

THE COCHIN CHINESE AND THE TOREDO.—An officer of the Imperial Navy of France, Lieut. Mariot, being in Cochin China, learned that the natives possess a secret for protecting wooden vessels against the depredations of the toredo, an insect which does immense damage to ships and timber on the shores of the Black Sea, the Mediterranean, the Asiatic, and other waters. The Cochin Chinese refused to tell the secret; but Lieut. Mariot, by diligent inquiry, ascertained that it consists in the employment of a mixture of resin and oil obtained from trees in the country. He further ascertained that it is so effective as a preservative, that junks—so old that the precise year of their construction is forgotten—are, though constantly plying in waters in which the insect abounds, still sound and strong. He has communicated his discovery to the French Emperor, who has manifested great interest in it; and, at his Majesty's request, Lieut. Mariot is to return to Cochin China to make further inquiries, and bring back the wood steeped in the mixture.

CHINESE SHIPBUILDING IN ADVANCE.—Captain G. F. Goble has during the past week submitted an elaborate series of working drawings connected with wood and iron shipbuilding, copied from original diagrams found in the Summer Palace of the Emperor of China, and supposed to be many thousands of years old. The construction of the vessel is in every way remarkable, especially considering the great antiquity claimed for it; the hull, masts, sails, screws, &c., being either of a character equal to the most approved arrangement of the present time, or considerably in advance of them. Captain Goble is seeking the co-operation of a few antiquarians, or others interested in the subject, in order that a working model of the vessel may be built, and there appears to be no doubt that many very material advantages will be gained as compared with any ship at present afloat. Not only are the several portions of the ship itself of the highly efficient character described, but even the chain cables are apparently superior to those now in use, though totally different in construction; they are said to be capable of bearing a strain of 10,000 tons.

ADMIRAL SIR JAMES STIRLING.—Admiral Sir James Stirling, Knight, died on the 22nd inst., at his residence, Anningsley, in Surrey. The deceased admiral, who was born in 1791, entered the navy at an early age, and continued in active service throughout the last French war. He was midshipman of the *Glory*, in Calder's action, and of the *Diadem*, at the siege of Monte Video. He also commanded the *Brazen*, in the last American war. For ten years he was Governor and Commander-in-Chief of Western Australia, and his name will ever be identified with the establishment of that colony. He was highly popular with the settlers, who expressed before his departure their gratitude for the zeal and ability he had invariably shown for their general welfare. On his return home, in 1833, he was made a Knight Batchelor. He was appointed to the *Indus*, 78, in October, 1840, in which he served four years, and in the spring of 1847 was appointed to the *Howe*, 120, in which ship he conveyed Queen Adelaide and her sister, the Duchess Ida of Saxe Weimar, to Lisbon, and afterwards to Madeira, on Her Majesty's last visit to that island. For a few months in 1852 he was one of the Junior Lords of the Admiralty. The deceased officer was appointed to the command of the East India and China station in January, 1854, which he resigned in 1856. His commissions bore date as follows:—lieutenant, August 2, 1809; commander, June 19, 1812; captain, December 7, 1818; rear-admiral, July 8, 1851; vice-admiral, August 27, 1857; and admiral, November 22, 1862. The deceased officer was a Knight Commander of the Redeemer of Greece.

SUEZ CANAL SETTLEMENTS.—Among the frequent endeavours to entice English shareholders, we notice the following in the *Daily News*:—"Sir,—It may not be generally known to your readers that the territory formerly belonging to the Suez Canal Company, situated on the eastern side of the basin of Port Said, is included amongst the lands which, in accordance with the Emperor Napoleon's decision, have been retroceded to his Highness the Viceroy of Egypt. This is not unimportant as far as this country is concerned, seeing that there is nothing now to prevent an English town for commercial purposes being constructed on the opposite bank of the canal, forming, as it were, one of the keys to its entrance. Nor is there any feeling of rivalry on the part of the French to be apprehended to frustrate such a plan; for I can undertake to say that every facility will be afforded to accredited Englishmen visiting Port Said with this object in view.—I am, &c., DANIEL A. LANGE, Director and English Representative of the Suez Canal Company."

THE P. AND O. STEAMER "TANJORE."—This new iron steam-ship, 2,129 tons, built for the Peninsular and Oriental Steam Navigation Company, was hauled into the Victoria Dock to be fitted out. She was built by the Thames Iron Shipbuilding Company at Blackwall, and was launched on the 13th. Her dimensions are—300 feet in length, 28 feet beam, and 29 feet depth of hold, and is to be fitted with engines of 400-horse power.

Le Moniteur of the 21st inst. contains a letter from Yokohama, dated Feb. 15, in which the writer says:—"The situation continues to be good in Japan. The Tycoon will leave in a few days for Miako to assist at a great religious fete celebrated every fifty years. It is presided over by the Mikado, assisted by 60,000 priests from all parts of the empire. In quitting the capital the Tycoon will leave the direction of affairs to the members of the Gorogio."

La Presse of the 23rd inst. states that the more intimate relations established between the French possessions in Lower Cochin China and the kingdom of Cambodia, having led the Vice-Admiral Grandiere to direct researches into the manners and literature of the Cambodians and the religion of Buddha, the mission sent to London to this end has discovered divers manuscripts in Cambodian characters treating of the war with China, of marriage and espousals, precepts of Buddhism and offences and punishments, also some tragedies and comedies. These documents have been placed in the hands of M. le Marquis de Chasseloup Laubat, who has engaged to transmit to the Institute portions of the inscriptions and *belles lettres* in translated forms.

LONDON, THURSDAY, APRIL 27, 1865.

SUGAR AND COFFEE TRADE OF THE UNITED STATES WITH THE FAR EAST.

THE trade of the Northern Atlantic ports of the United States with the Far East, stimulated to increased activity by a tariff favouring direct importations of raw produce, exhibits this improvement, after the article of tea, particularly in that of sugar. The effect of the withdrawal of the yield of the southern sugar crop of Louisiana, Texas, and Florida, the amount of which formerly determined the extent of the demand in the northern markets, and the necessity in common with ourselves of obtaining in Eastern trade the greatest possible value in produce for manufactures or other merchandise carried out, must continue to ensure a greater proportionate increase in importations of sugar from Penang, Sumatra, Manila and Java as compared with augmenting supplies from Brazil, the West Indies and Cuba. Still, the quantity received from the Far East constitutes but a fraction as yet of the 350,000 tons annually required to meet the cousumption of the North-eastern, Western, and South-western States, not even covering the exports to foreign ports, shipments to San Francisco and inland to Canada. San Francisco receives in addition direct supplies from Manila and the Sandwich Islands. As to coffee, there is every certainty that Java, Sumatra, Singapore, Manila, and Ceylon, will furnish the United States with increased supplies. The total of the next season's importations from these quarters may be set down at 11,000,000 lbs., of which Ceylon will probably furnish one-fourth. Should commercial confidence continue in the United States, the coffee taken from Ceylon will probably be doubled in quantity the next few years. Indeed, we anticipate seeing its exports of this staple to Europe rapidly augmented. With the extension of the area of cultivation, and the additional capital and skill about to be invested, it cannot be otherwise than that Ceylon must gain more rapidly than ever on the coffee yield of Java and Sumatra, for in these the culture appears to have been already stimulated to nearly if not its utmost extent. It is certain that in various parts of the comparatively narrow belt in which coffee can profitably be raised, its cultivation has been latterly abandoned for that of the sugar cane.

AFFAIRS IN COCHIN CHINA.

THE news brought from Cochin China is well fitted to delight our Gallican friends, containing, as it does, every element of the picturesque and sentimental in arms, in the triumph of negotiations, in the exchange of international courtesies, in the display of religious rites, and in the pomp of a Governor's visit of inspection, added to the fact that high-flown proclamations have been sent by the King TU-DUC into all the provinces, commanding that agitation at the presence of the French shall henceforth cease, whilst an indemnity in silver, placed on board a war vessel in the harbour ready for despatch by the next mail, confirms the renewed promise of the Annamite SOVEREIGN to abide by the treaty of 1862. The Imperial Government has spoken, and there is a great calm. We have in the foreground the Chief Mandarin of Justice presenting presents and felicitations for the new year; in the middle ground an Annamite priest performing mass at the inland village of Baria (the Christians numerous and assisting in great numbers); children displaying wonderful precocity in writing and learning French, the group surrounded by an "active and industrious population;" whilst in the background is a military reconnaissance in force, insurgent bands becoming invisible before the flying horsemen who reach the frontier of Bienhoa without encountering an enemy. But this is not all. A finishing touch is needed, and we find it in the re-embarkation of Admiral GRANDIERE with the confidence and sympathy of the natives. The scene closes with a contest for the designs of a palace at Saigon for the Government, and the change of the numbers that have hitherto designated the streets of the city for the names of French generals. Seriously, civilisation and evangelisation was never undertaken on a more magnificent scale. A palace for the seat of the missions, an Admiral for an apostolic supervisor, the sword for an argument, and gunboats as a reserve of moral force, presents a strange contrast to the crozier of St. FRANCIS XAVIER. Still, the assiduous efforts to extend religious and secular teaching merit every praise, and the results will not be marred by the mixed motives of benevolence and the love of ideal glory that have led to them. All we think of is the cost. No doubt, however, the augmented trade that will be carried on between Saigon and China, under concessions lately granted, will in time contribute largely to the revenue. At present the Imperial Government in Cochin China is very much in the position of a large landed proprietor who has sunk large funds in the investment, looking to future years for the return. As long as there exists the thing called progress, why should not the French Government hope on and hope ever?

THE TAIPING PROPOSAL OF COMMERCIAL ALLIANCE.

ALTHOUGH the Taiping proposal to enter into liberal commercial arrangements with foreign nations cannot be entertained by us, we cannot question its sincerity. It may be taken as a recognition on their part that foreign trade is an element of conservation and of strength—a truth which the Imperial Government has hitherto affected ostentatiously to ignore. China, by the increase of its own junk trade with neighbouring islands and countries, especially Japan, has proved the necessity of a vent for its productions. The spirit of commerce is necessarily opposed to all violent anarchical changes, and the Imperial Government has yet to learn that just to the extent to which trade is carried, and points of exchange multiplied, will the progress of the country be promoted. The influence to stimulate development must come from without. We anticipate the time when we shall possess numerous inland stations that will enable us to dispose of a larger proportion of our manufactures as compared with our purchases of tea and silk. These stations will, no doubt, come to be regarded by the Chinese Government as so many *points d'appui*, so many protective strongholds against revolutionary risings. The influence of this motive is well calculated to act beneficially in our favour. Henceforth the assistance of British officers cannot be counted on for the suppression of rebellion in China: but as the existence of that very rebellion may be traced to the difficulties which the industry of millions of the people encountered in securing remuneration, so its best corrective will be found in the extension of foreign trade, in giving us free access to the population, and thus enabling the gains accruing from the disposal of Chinese products to reach more directly the producers.

THE INDIAN TARIFF AND CEYLON.

THE most direct effect of the duty of 3 per cent. imposed by Sir CHARLES TREVELYAN on coffee will be to stimulate the production in Ceylon of that article; not that she particularly needs this artificial encouragement in the cultivation of her chief staple, but that it must ensure to her a certain amount of capital that would have been elsewhere applied, and direct generally the attention of investors to the advantages she can offer. The duty now placed on Indian tea—an industry yet in its infancy—is, if possible, still more impolitic, for against the high prices realised at home in consequence of the preference given to the article, must be set the higher price of labour in India as compared with China, and the greater risks attending the manipulation. Besides, few of the plantations have yet covered the original outlay for land and machinery. Ceylon is in a position to profit also by this impost, which must direct attention to the facilities she offers for tea cultivation. So with the articles of indigo and hemp, the Ceylonese production of which might be largely increased. Even silkworms

Digitized by Google

and mulberry plantations have been tried with success in Ceylon, and, with or without the duty to be imposed on silk exported from India, no reason can be adduced why Ceylon should not make this a staple commodity of trade. If the present Indian financial policy is persisted in, it will be found to have been the fortune of Ceylon not to have been incorporated with that country. It is probably from Ceylon that the first practical lesson as to the impolicy of taxing exports will be received by Indian statesmen.

THE STRAITS SETTLEMENTS

It is rumoured that after the passing of the Bill—which will be introduced next month—for the transfer of the Straits Settlements to the Colonial Office, a Governor will be appointed for the new *regime* by the Secretary of State forthe Colonies. A Commission is now sitting to report as to the best mode of defence for Singapore. It is very probable that a Queen's regiment will in future garrison the place.

STEAMERS FOR THE FAR EAST.

The Netherlands India Steam Navigation Company have launched their second screw steamer from the yard of Messrs. Randolph, Elder, and Company, Glasgow. She has been named the *Koningin Sophia*. Her tonnage is 1,055 tons, and the engines of 200-horse power nominal. The two vessels building in Holland for this company will be launched about July.

Another screw steamer for the China coast line of Messrs. Douglas Lapraik, Lane, and others, has been laid down at the yard of Messrs. Hall, Russell, and Co., Aberdeen. She is about 800 tons, with engines of 150-horse power nominal. She will be commanded by Capt. Baker, well known in the service, who is now in this country. It is expected that the vessel will be ready within six months.

Sir EDMUND HORNBY, the new Judge for Shanghai, has not yet engaged his passage, and we may infer that he has been advised to delay it in order that his arrival may be nearer to the cool season. This course will be found the most desirable in every respect, seeing that a great deal of work will await his coming, which will require more vigour than the months of June and July fairly admit. We hear that Mr. C. W. Goodwin, the Deputy-Judge, is a man of considerable literary ability, and known as one of the writers in the celebrated "Essays and Reviews." He has been in some measure induced to accept the appointment, as China will afford food for his head and pen in a new direction. A secretary has also been appointed. The salaries of these officials were given in our last issue.

THE RUSSO-CHINESE TELEGRAPHIC LINE.

(To the Editor of the *London and China Telegraph.*)

SIR,—In a few years the Russian telegraphic line, proceeding at the rate of 1,000 miles per annum, will reach Peking. It is important that we should get there, telegraphically speaking, before her, or, at least, that the honours should be divided. Our way thither now lies by land, not by water. Science is manifestly at fault in our deep sea cables, as I could well show had you space. What concerns me is that Russia, having carried her line to Peking, may be in a position to obtain important concessions of Chinese lines to the exclusion of our own enterprise, and thus literally as well as figuratively hold China by a thread. The construction of lines east, west, and south might even be aided from the Chinese Treasury, so important would be the advantages of communication with all the provinces of the empire, in a political and military point of view. What is the British or Indian Government doing in the matter? A moderate guarantee, with such assistance as both Governments could furnish, is all that is required for individual enterprise to effect a connection of our treaty ports with the Indian wires. Not to speak of the benefits that would thus be conferred on India, the advantage to English trade with China in the possession of a competing and independent line would be incalculable.—I am, &c., ANGLO-INDIAN.

April 24, 1865.

A NEW ARTICLE OF TRADE.—MEDICATED CHINA TEAS.

(To the Editor of the *London and China Telegraph.*)

SIR,—Allow me to suggest to our enterprising traders in China, the obtaining of medicated teas for sale in England. I am satisfied from the known, not to say reputed qualities of these teas, that if once introduced they would presently find a place in our pharmacoœpia. I am not aware whether the Chinese have discovered the secret of extracting the essential oils of plants, but whether this be the case or not, their medicated teas have a singular virtue in various complaints. The costliness of these teas is a recommendation rather than otherwise. Mandarins are accustomed to offer them as the choicest gifts at their disposal, and it will be remembered that when Commissioner Yeh was tendered every luxury by his captors, he preferred a request for prepared native tobacco and a medicated tea, which he said was necessary for his health's sake.—Yours, &c.,

London University College, April 10. M.D.

CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA.

At the meeting held on the 12th inst., the report, given in our last, was adopted.

The CHAIRMAN, in moving its adoption, observed that he needed not to say that the result of the half-year ending 31st December had not answered the expectations which had been held out at the last meeting. The crisis in England had then only commenced, and it had resulted in enormous failure in the East, and in what affected this bank still more, in the depreciation of East Indian produce—tea, sugar, cotton, and jute—on which the bank held security, it being its business to take bills hypothecated on such produce: and it had suffered accordingly, by the failure of houses by whom bills were drawn, and by the fall in the value of the produce. The loss of £22,000 mentioned in the report had been estimated after careful examination by three of the directors most conversant with the trade of the East, not down to the 31st Dec., but to the 15th of March—(hear, hear)—and he believed that it was a complete estimate of the loss down to that time. What further losses might be incurred he could not say, for the crisis was not over; houses connected with the East were still falling, but he could say positively what the loss would be up to the 15th March. He would not specially and by name allude to any house by which there had been a loss; but he desired to mention that in the case of Mr. John Gladstone, who had been one of the directors of the bank, there had not been the loss of a shilling by him. (Hear, hear.) In the case of a house from which the bank had bills to the amount of £70,000 secured on produce, the debt had been reduced to £10,000, and though there was some loss on the produce realised, that had been met by the drawers of the bills, who had paid the difference, and eventually no loss at all would be sustained. Another serious drawback to the prosperity of the bank in the last six months was the high value of money, which resulted in a difference to the bank of £20,000, which must be decucted from profits, and thus had tended to reduce the dividend. Nevertheless, looking to the state of the times, when the bank was enabled to pay on the whole year 12½ per cent., it was not so very bad. The Government Securities held by the bank, amounting to £280,000, had been taken over as usual at their actual market value, but other securities on land, buildings, &c., had been taken over at their cost, although they could be realised at double the amount. There was property which had been acquired at Kurrachee, Bombay, and Rangoon, which could be realised at a handsome profit. With regard to the future, the directors had inculcated caution on their agents in making advances, especially on cotton. Speaking his personal opinion, he should say that any week might bring a statement of the close of the American war, which would be followed by a reduction in the price of cotton; but judging from his personal experience in the case of linseed and other Russian productions during the Crimean war, he believed that a trade like that of cotton which had now been established in India would continue to keep up the supply. As regarded the position of the branches of the bank, they had not suffered. There was an increase in their deposits, and they were in good credit; so that, looking to the affairs of the bank, he anticipated for it nothing but prosperity. (Hear, hear.)

Mr. BELL, a director, seconded the motion.

In reply to questions from shareholders, the CHAIRMAN said that, unsolicited, the shareholders had last year raised the remuneration of the directors from £2,500 to £4,000, and they had certainly received it. The only reason why the names of the directors were not published in the advertisements of the bank was a consideration of expense, but there was no objection on the part of any of them to have their names published, and as it seemed to be the wish of the meeting, it should be done in future. There was no intention of increasing the capital of the bank by the issue of new shares, there being no want of capital.

The report was then agreed to, as were resolutions declaring the dividend, re-electing one retiring director and electing two others, and re-electing the directors.

The meeting was then made special for the purpose of authorising the court of directors to apply to Her Majesty's Treasury for a removal of the restriction in clause 84 of the deed of settlement, by which the shareholders are limited to the re-election of only one of the outgoing directors annually; also, for authority to the court of directors to fill up temporarily any occasional vacancies in their number, subject to confirmation by the shareholders at the next half-yearly general meeting; and for the purpose of effecting the proposed alterations by authorising the court to apply for and accept a supplemental charter, or to adopt a supplemental deed of settlement, or, with the approval of Her Majesty's Treasury, to take such other steps as may be necessary.

Some objection was taken to the second clause, authorising the temporary appointment of a director, and an amendment against was proposed; but the original resolution was put to the meeting and carried by 35 to 11. With the usual vote of thanks the business concluded.

ORIENTAL BANK CORPORATION.

The annual general meeting of proprietors was held on the 20th inst., at the bank's offices, Threadneedle-street; H. G. GORDON, Esq., in the chair.

The report stated that—"The general statement of affairs and balance-sheet for the year 1864, now submitted by the directors for the information of their co-proprietors, show the net profit of the corporation for that period to be £206,089. 18s. 4d., after defraying current expenses, and providing for all bad and doubtful debts. The dividend of 8 per for the half year ending 30th June, already paid, has absorbed £100,800 of the profits, leaving £105,289. 18s. 4d. available for present distribution; out of which it is now proposed to pay an additional dividend of 5 per cent., and a bonus of 3 per cent., making, with the previous payment, a distribution of profit for the year 1864 equal to 16 per cent. on the capital of the corporation. The present dividend and bonus, amounting to £2 per share, will be paid, free of income-tax, on and after the 1st proximo, at the office of the corporation; and after these payments have been provided for, there will remain a balance of £4,489. 18s. 4d. to be carried to the credit of the next account."

Digitized by Google

The CHAIRMAN, in moving the adoption of the report, said that the first thing he had to do was to declare a dividend for the half-year of 5 per cent., and a bonus of 3 per cent., making, with the previous payment, a distribution of profit for the year equal to 16 per cent. When they met in October last the country was passing through the first stage of one of the most severe and disastrous periods which had been known for many years. He was very much afraid the crisis was not over yet, unless it was counteracted by the improvement of business which was likely to follow the termination of the unfortunate civil war in America, of which there was now a prospect. However that might be, the directors saw that mischief was coming, and they took early precautionary measures to guard against it, by restricting the credit and limiting the business of the corporation at home and abroad. They sustained, nevertheless, some loss; but he was happy to say that it was not so heavy as others had experienced. In order to prove that these were not mere words, he might mention that some 18 months ago they held a large amount of the paper of four firms which failed for £4,500,000; but owing to the precautionary measures to which he referred, it was not likely they would lose £1,000 by those immense failures. (Hear, hear.) And whilst the losses where amply provided for, they were able to declare a dividend of 16 per cent. per annum. (Hear, hear.) In addition to direct losses, their profits were indirectly affected by the competition they experienced in the most important seats of their business. They would readily believe this when he told them that a few years ago there was only one bank in the presidency of Bombay, with four or five branches, whilst there were now 22 banks and bank agencies, besides 10 or 12 financial establishments. It was quite true that business had increased, but with such an amount of competition, the margin of profit was curtailed to some extent. There was nothing in this, however, to dishearten them, for with their long established connection, their great means, and extensive commercial credit, they would be able to maintain their ground against any new comers. (Hear, hear.) Allusion was made in the report to the issue of new shares last year, and in consequence the capital and reserve fund now stood respectively at £1,500,000 and £444,000. The distribution of the new shares was made in the proportion of one to six. This absorbed 8,400 shares, leaving a balance of 1,200 shares to be appropriated at the discretion of the court. These shares had been appropriated, and he trusted the mode of appropriation would receive the support of the shareholders. Some two or three years ago he spoke of a fidelity or guarantee fund, which was created and upheld by the contributions of the officers of the corporation. The primary object of that fund was to dispense with the usual mode of guarantee by making the establishment their own guarantors. The second object was to combine, if possible, with this guarantee fund an allowance or pension fund. Many of the members of their staff served in all climates, and sickness and death were frequently their lot. The time must come when they would have to consider the claims arising out of such contingencies as these. They hoped to be able to confine these two funds so as to make a provision which was deservedly due to their officers without greatly taxing the shareholders. The guarantee fund now amounted to a considerable sum, but it was still inadequate for the double purpose of a guarantee and an allowance fund. In order to advance this object, the court presented to the trustees of the guarantee fund the 1,200 shares at the same price at which they were allotted to the shareholders, namely, £45. The guarantee fund was now £54,000 and upwards. Apart from the policy of this measure in a pecuniary point of view, he was certain it would produce a good moral effect, for it associated the staff indirectly with the shareholders, and would induce them to increased exertions to promote the welfare of the corporation. With regard to the cash deposits bearing interest, notwithstanding the great dearness of money for the last twelve months, they never altered the rate of interest, and these deposits showed a slight increase. But on the other side there was a falling off of upwards of £2,000,000 in the amount of notes and bills discounted, arising from the precautionary measures which had been taken to avoid increasing their risk. (Hear, hear.) He could not omit mentioning in terms of merited eulogy the conduct of their chief manager, Mr. C. J. F. Stuart. (Hear, hear.) They were aware of the extraordinary changes which were going on in India and China, and Mr. Stuart had very properly requested permission to see for himself what changes had taken place, with a view to introduce such modifications and arrangements as might be necessary to meet those changes. He left on the 20th of November last; visited Bombay, Ceylon, Singapore, Hong Kong, Shanghai, taking an opportunity of conferring on his return with other establishments which he could not visit on his journey out. He brought back a good report, and he had no doubt the corporation would benefit by the valuable information he had acquired. (Hear.)

A SHAREHOLDER referred the chairman to a statement which appeared in the *Money Market Review* of the 15th inst., to the effect that the company had sustained losses by frauds committed by clerks, and inquired how far the statement was true.

The CHAIRMAN said the only loss of the kind was a loss of £1,500, which they sustained through the misconduct of a ledger-copier in Ceylon.

In answer to another SHAREHOLDER,

The CHAIRMAN said that the premium profit on the new shares went to the credit of the reserve fund. As to the transacting of London business, they were precluded from doing anything of the kind by the charter. And as to the third question, whether they made any advances to banks with which the name of the gentleman mentioned (Mr. Cargill) was connected, they had nothing to do with them in any way, directly or indirectly. (Hear, hear.) The chairman further stated that it had been mentioned in the report of last year that a loss had been sustained through the defalcation of a Chinese comprador, but that there was reason to believe they had ample security to meet that loss. They had got judgment in that matter, but it was not yet completed. The report was then adopted.

The Chairman, Mr. Mackenzie, and Mr. Cargill were re-elected directors, some slight display of opposition being manifested to the re-election of the last named gentleman. The auditors were re-elected, and a vote o thanks passed on them. A vote of thanks to the chairman, directors secretary, and manager terminated the proceedings.

ALBERT INSURANCE COMPANY (LIMITED).

The first general meeting of the shareholders in this company was held at the London Tavern on the 20th inst.; P. W. SPENCE, Esq., in the chair.

Mr. G. G. KIRBY (the Managing Director) read the report, which will be found in our advertising columns.

The CHAIRMAN, in moving the adoption of the report, said that as the report and accounts, which had been presented, and of which a copy had been sent to every shareholder, detailed fully the position of the company, it would not be necessary for him to enter into any minute particulars; but he should be happy to give any explanations or answer any inquiries the shareholders might wish to make. On the formation of the company, the directors, feeling it desirable to commence operations as quickly as possible, entered into negotiations with, and finally secured the business of the Oriental and General Marine Insurance Company. They secured that business on terms very advantageous to the Albert, and thereby acquired a most valuable and influential connection, with whom they had been and were still doing a large business. (Hear, hear.) They had entered into spacious and commodious offices in Finch-lane, which were well adapted for conducting an extensive business, much larger than they were at present transacting, but such as they hoped soon to obtain. They had been fortunate in securing the services of a secretary and officials who were familiar with all the details necessary for carrying on an office of this description. They had also secured the services of an underwriter who had had very long experience in a marine insurance company, and whose integrity of character was second to that of none in the City of London. (Cheers.) He referred to Mr. Philip Secretan. Since their formation they had had to pass through a period of great anxiety and pressure in the commercial world; but, notwithstanding this, they had every reason to be satisfied with the amount of business they had transacted, which held out encouragement for the future. (Hear, hear.) In the fire department they had secured the services of a gentleman who, by his personal exertions and energies, combined with the agents, had obtained an amount of premium which had fully—nay, more than fully—justified what was anticipated by the board at the onset; and the more so when they remembered that the fire account only extended over a period of six months. In the first three months of the present year the fire business had gone on steadily increasing, the premiums for January, February and March being £2,700, which on the year would give an average of over £10,000—a result which he thought they would agree with him in saying was most satisfactory. (Hear, hear.)

Dr. STEVENSON had much pleasure in seconding the resolution, and could endorse everything the chairman had said. The directors could congratulate the shareholders on the acquisition of the business of the Oriental and General Marine Company. After a few questions and answers from the Chairman, the report was adopted and a vote of thanks passed to the chairman, &c.

CHINA COTTON CONTRACTS.

(Liverpool Journal of Commerce.)

WILLIAMS V. REYNOLDS AND ANOTHER.

The plaintiff is Mr. Owen Hugh Williams, a cotton broker at Liverpool, and the defendants are Francis and William Reynolds and James Gibson, of the same town. The action was brought by Mr. Williams, on behalf of his principals, Messrs. Rylands, Seddon, and Co., to recover damages for a breach of cotton contract whereby the defendants agreed to sell the plaintiff 500 piculs of China cotton at 16¼d. per lb., to be delivered in the month of August last. The plaintiff stated that although 181 piculs had been delivered, the residue were not delivered as per agreement, and the plaintiff was unable to perform a sub-contract for the sale of the cotton at a higher price than he was to give for it; and that the plaintiff lost the benefits of the profits which he would have received had sub-contract been carried out. The plaintiff therefore claimed £515. 19s. damages. The defendants pleaded, first, that it was not agreed as in the declaration alleged; secondly, that the plaintiff was not ready and willing to accept the residue of the cotton, nor to pay the price for the same according to the terms of the contract; thirdly, that they did deliver the residue to the plaintiff in the month of August; and, fourthly, that they were prevented from delivering the said cotton in the month of August by the acts and conduct of the plaintiff. Mr. Mellish, in stating the case to the jury, said that a picul of cotton was 133⅓ lbs. weight, gross, and that a bale of cotton varied in weight from a half picul to three piculs. The contract in this case was what was termed a forward delivery contract—that is, the cotton was not to be delivered at once, but at some future date, and in this case the month of August had been fixed upon as the time for delivery. According to the custom of the Liverpool cotton trade, it was the duty of the sellers of the cotton some time prior to the last day of the month of August to have delivered the cotton in discharge of a contract they had made; or, in other words, the seller had to inform purchasers when the cotton was lying ready for delivery. In accordance with custom, the defendants on the 29th of August sent a notice to the plaintiffs that 250 piculs, ex the ship *General Putman*, were then ready for delivery to their warehouse. On the 30th August defendants gave plaintiff a further notice. The plaintiff, having received this notice, was bound to apply to defendants for a sampling order for the cotton, which he did and obtained two orders, With regard to the cotton by the *General Putman*, delivered on the 27th of August, there was no dispute as to the facts. Defendants admitted that the cotton declared on the occasion when weighed did not amount to 250 piculs, but only weighed 181 piculs. Mr. Mellish contended that the plaintiff was entitled to recover the difference in price at which he purchased the cotton (16¾d.), and the price at which he had re-sold (19¼d.), or 3d. per lb. For the defence, Mr. Quain submitted that the defendants had no notice of any sub-contract, and even if they had they were not liable for any damages more than the difference in price between the market quotations on the 31st August and the price at which they had sold. The plaintiffs were bound, on the defendants explaining their difficulty, to have gone into the market immediately and bought other cotton. That would have enabled them to have performed the sub-contract. China cotton on the 26th August, 1864, was worth

Digitized by Google

18½d. per lb., and the 2nd of September 18¼d., so that there would only have been 1¼d. With respect to the other 250 piculs all the facts were disputed. The plaintiff based his case upon the fact that the defendants were not prepared to deliver to him any portion of the cotton in the month of August; that as the defendants said there were 119 bales ready for delivery; that the plaintiffs had refused to receive any portion of these 119 bales; and that there was a cross action then pending to compel payment. It was proved in evidence that the sampling order was not ready until one o'clock on the 1st of September, and the question, therefore, was, whether under these circumstances the plaintiffs could refuse to receive and pay for these 119 bales. The jury returned a verdict for the plaintiff for the full amount claimed. Leave was granted to move to reduce the amount of damages to £257. 19s. 6d. The record in the cross-action was withdrawn.

Naval and Military.

Captain Durnford, Royal Engineers, having returned to England in consequence of illness during the voyage out, Captain Barry has been appointed to leave for China in his stead.

It is rumoured that Colonel Laffan, Royal Engineers, will proceed to Ceylon and report on the military expenditure of the island.

The following flag promotions, dated the 11th inst., have been made in consequence of the death of Rear-Admiral Thomas Henderson on the 10th inst. :—

Captain George William Douglas O'Callaghan to be Rear-Admiral.

Retired Captains William Knighton Stephens, George Henry Parlby White, and William Windham Hornby, to be retired Rear-Admirals, under the provisions of the Orders in Council of the 1st August, 1860, and 9th of July, 1861.

The following flag promotions, dated the 13th inst., have been made in consequence of the death of Vice-Admiral Sir John M'Dougall, K.C.B., on the 12th inst. :—

Rear-Admiral the Hon. Edward Howard, on the reserved list, to be Vice-Admiral on the same list.

Rear-Admiral Sir Alexander Milne, K.C.B., to be Vice-Admiral.

Capt. Charles Wise to be Rear-Admiral.

Retired Rear-Admiral John Monday, to be a Retired Vice-Admiral.

Retired Capt. David Peat, to be Retired Rear-Admiral, under the provisions of the Orders in Council of the 1st August, 1860, and 9th of July, 1864.

The Queen has been graciously pleased to signify her intention to confer the the decoration of the Victoria Cross on the undermentioned midshipman and seamen of the Royal Navy, whose claims to the same have been submitted for Her Majesty's approval, on account of the gallantry displayed by them during the operations in the Straits of Simonoseki, Japan, as recorded against their names, viz :—

Mr. Duncan Gordon Boyes, midshipman, of Her Majesty's ship Euryalus, for the conspicuous gallantry which, acording to the testimony of Captain Alexander, C. B., at that time Flag-Captain to Vice-Admiral Sir Agustus Kuper, K.C.B., Mr. Boyes displayed on the occasion of the capture of the enemy's stockade. He carried a colour with the leading company, kept it in advance of all, in the face of the thickest fire, his colour-sergeants having fallen, one mortally, the other dangerously, wounded; and he was only detained from proceeding yet further by the orders of his superior officer. The colour he carried was six times pierced by musket balls. Thomas Pride, captain of the after-guard of Her Majesty's ship Euryalus, the survivor of the two colour-sergeants who supported Mr. Boyes in the gallant rush which he made in advance of the attack, is also recommended for the Victoria Cross for his conduct on this occasion. Dates of acts of bravery, September 6, 1864.

Willian Seeley, ordinary seaman of Her Majesty's ship Euryalus, for the intelligence and daring which, according to the testimony of Lieutenant Edwards, commanding the 3rd company, he exhibited in ascertaining the enemy's position, and for continuing to retain his position in front during the advance, after he had been wounded in the arm.—Date of act of bravery, September 6, 1864.

The Queen has been graciously pleased to give orders for the appointment of General Charles Menzies, of the Royal Marine Artillery, and Major-General Charles Warren, C.B., to be Ordinary Members of the Military Division of the Second Class, or Knights Commanders of the Most Honourable Order of the Bath.

Literature.

Araki the Daimio; a Japanese Story of the Olden Time; by Mona B. Bickerstaffe. London: Jackson, Walford, and Hodder.—On reading the title-page and the first few chapters of this work, we were under the impression that it was the production of an authoress in England bearing the name inscribed on the volume, and clothing in the garb of a lively narrative facts and incidents supplied by some person conversant with Japanese scenes on the spot. As we continued our perusal, however, the suspicion flashed across our mind, and was more fully confirmed as we advanced further into its contents, that Mona B. Bickerstaffe is no other than a *nom de plume;* and that the little volume now under our review is the literary offspring of a lady lately returned from that quarter. If the little tale unfolded in these pages fail, in these days of sensation novels, in exciting a deep and thrilling interest in the mind of the general reader, the fault will consist not so much in the unskilful treatment of the author as in the defective materials out of which the story is woven. It is not an easy work to deck the common ordinary incidents of Oriental life in the gaudy colours and showy dress of Western romance. The author, or authoress, of these pages may fairly lay claim, however, to the merit of having developed a Japanese story of ancient times in a commendable tone of Christian sentiment and in a style of refined taste. If the work be one of somewhat unequal merit, and if, in some of the earlier portions, it occasionally verges on a careless and unduly-familiar mode of phraseology, these slight drawbacks are amply compensated for by the intellectual vigour and philanthropic sentiment which everywhere pervade the narrative, and which will (as we venture to predict) render the book highly popular among all persons who have resided in the Far East, and also among those who wish to obtain an insight into the real character of the Japanese Government and people. The past history of Japan, the divided powers of its double system of Government, its religions, the relations between the territorial nobles and the Central Government, and the natural beauties and fertility of the country, are described in a graphic and masterly style of narrative. We cannot recommend any work of its size containing a more interesting and accurate delineation of the every-day scenes and manners of this remarkable race recently brought into more familiar contact with Western Christendom. The general plot or framework of the story is simple and brief. During the exciting period of Jesuit missions in the sixteenth century, a zealous padre, Don José de Sebina, arrives in the neighbourhood of Abama, and reaps the results of his missionary zeal in the conversion of a Japanese gentleman of territorial wealth and influence, Sako Miyako, and his fair daughter, named Ama. Araki, the Daimio, or territorial Prince of Hakoni, in his annual visit to Yedo, arrives with his cavalcade of retainers at the village, and rests for some days in the hospitable mansion of Sako Miyako for the cure of a wound. Becoming enamoured of the only daughter of his host, and repulsed in his advances, he broods in secret vexation of soul over plans of revenge, and avails himself of the recent penal laws against Christianity to work the ruin of the family, and thus to bring the Christian maiden under his power. Their narrow escape on ship board, their departure to a foreign land, the martyrdom of the padre, who remains behind, Araki's suicide, according to the prescribed rules of the national "Hara-kiru," the subsequent retrieval of the family fortunes of Sako Miyako's sons, and the marriage of the Christian heroine Ama to the Portuguese poet Camoëns at Macao, in China, are among the successive steps of interesting events, which, if in some of the final stages somewhat improbable in themselves, serve nevertheless to conduct the reader to the *denouement* of this interesting and profitable tale. We had intended to mark a few passages for quotation, but our space permits us only to insert the following extract, which, beautiful in itself, is peculiarly touching as revealing the depth of feeling and exquisite tenderness of affection, in which, if we mistake not, we recognize the heart-bleedings of one who has, in times past, drunk to its bitterest dregs the cup of domestic sorrow :—

The last time! How like a tolling bell is the sound of those few words! A bell that stirs up painful recollections in almost every heart; for who is the favoured mortal who cannot recall some agonising memory of—a last time? Be it the mourner whose heart has wept over a bereavement that has left him desolate; his sorrow may have long since passed away, time may have healed his wounds; still, do they not sometimes bleed afresh when accident, or circumstance, recalls the memory of that silent hour when he gazed for the *last time* on the beloved features, "so fair, so calm, so softly sealed" in death? Yet death is not the only source of sorrow; his is not the only hand that turns our hour-glass for the *last time.* Nay, some have met, and have parted, in full hopes of another, and perhaps a happier meeting, and so they closed that last interview, and being ignorant of the future, they were thus spared the indescribable heart-ache; but has it not since been felt with ten-fold bitterness? for now, when all is past, words and looks, circumstances of little import in themselves, become replete with harrowing interest, when associated with the memory of *that last time.*

The *Dublin University Magazine* for April contains an article under the heading, "China Two Hundred Years Ago," made up of extracts from a ponderous folio, entitled "*An Embassy from the East India Company to the Grand Tartar Cham, Emperor of China,*" with comments by the reviewer on the text. These comments are chiefly noticeable for ignoring the fact of the late destruction wrought on Nanking, the reviewer (p. 455) describing the streets at the present moment as "handsome, well paved and clean, and lined by nice-looking shops and private houses." In the concluding remarks the reviewer says: "Let the Emperor be as well disposed as he may (is the writer aware of his youth?), while the great body of the Mandarins continue corrupt in conscience and in practice, little improvement can be effected." This is telling us very little.

Digitized by Google

However, the reviewer, to use his own language, "reckons upon a change for the better," though not by anything he can see, for he considers that "the influx of sea-faring people and their intercourse with the inhabitants of large cities, cannot tend to the improvement of either party."

The Victoria Cross, an official chronicle of the deeds of personal valour achieved in presence of the enemy during the Crimean and Baltic campaigns, the Indian mutinies, and the Persia, China, and New Zealand wars, is a book (published by Messrs. O'Byrne) which fully carries out the professions it makes in its title. At the end of the work are the names of all the officers and men (alphabetically arranged) on whom the honour has been conferred, with a reference to the page in which the individual act of bravery is detailed. The book has been carefully compiled, and is beautifully printed on toned paper.

The Times has at last noticed Mr. MICHIE'S *Overland Route from Peking to Petersburg*, and that too in a manner highly creditable to the author. We extract the following passage from the two columns which are occupied by the review:—

An overland journey from Peking to St. Petersburg is such a very uncommon performance on the part of an Englishman that it is entitled to the special attention of his countrymen. It is not only that the way is long, and the hardships, if not the perils, of the way are numerous, but such elaborate preparations have to be made in the way of passports and introductions, of passports from the Celestial authorities at Peking, and of introductions to Lamas and other Mongol dignitaries, that a considerable time may be expected to elapse before this, which is the real "overland route" from China, becomes sufficiently popular with other Englishmen to induce many of them to imitate Mr. Michie's example. There was a certain John Bell, of Antermony, who, in the reign of Peter the Great, travelled this route in the suite of a Russian Ambassador, and who has left a charming narrative of its incidents; and it was this narrative which inspired Mr. Michie with a longing desire to visit Siberia and other little known regions on the way, and to give us such a continuous account of the whole journey between the capitals of China and Russia as has not appeared in the English language for a century and a half. Huc and others have certainly imitated John Bell, but it is welcome, nevertheless, on such a little worn track, where so much has changed and is continually changing, to have the recent impressions of a sensible Englishman on a route which a very few years ago would have been about as feasible as a journey from China to England by way of the moon.

THE JAPANESE TROOPS.—A French paper states:—"The Japanese troops are composed of two distinct elements. 1. Those maintained by the feudal lords, called Daimios, and destined for the defence of their domains. 2. The troops kept by the Taicoun, and constituting the Imperial army, properly so-called. The number of Daimios who have troops in their service amounts to 200, keeping up an effective force of 370,000 infantry and 40,000 cavalry, which form the Federal army, and are placed at the orders of the Taicoun when the independence of the country is threatened. The Imperial army, kept up by the Taicoun himself, reaches the nominal figure of 100,000 infantry and 20,000 cavalry; but its actual force does not exceed half of that amount. The present Taicoun has just re-organised this force. Henceforth it will comprise 80,000 men, infantry, cavalry, artillery, and engineers. The infantry will be formed into regiments, manœuvring like the French soldiers and armed as they are. A certain number of Japanese officers and sub-officers have been instructed by the French at Yokohama, and are to train their fellow-countrymen."

THE QUININE PLANT IN CEYLON.—Dr. J. E. de Vrij, in his work "On the Cultivation of Quinine in Java and British India," remarks: "The plantation at Hakgalle, near Newera Ellia, in Ceylon, is 5,200 feet above the level of the sea, and is managed by Mr. McNicoll, under the superintendence of Mr. G. H. R. Thwaites, director of the Botanic Garden, at Peradenia. At the end of 1863 this plantation contained 22,050 plants. As the quinine trees of Java, according to the present mode of cultivation in that island, must be at least thirty years old before they are fully capable of yielding a good quality of bark, I very much doubt whether any capitalists would be found willing to employ their capital in that way for so long a period. The English system, on the other hand (as carried on in Ceylon), which admits of good interest on capital within four years at the most, and continues regularly progressing in that respect, is certainly one which prepares the way for the transfer, in the course of time, of the cultivation to private industry."

THE GREAT FYCHOW GIANT'S BEREAVEMENT.—The following is from the advertising columns of the *Daily Telegraph*:—(Free translation). Great Princes, Good People in High Stations, and Peaceful People of the lands beyond the Eastern Seas.—My greatest teacher, Confucius, tells me that the people of the West have sages, good and true men, knowing in all knowledge of the world and of the human heart, men that fawn and cringe not for high favours, but stand erect at all times before their fellow men, and awaiting the will of Heaven. To such I now appeal for sympathy in my great sorrow that, by the hard hand of fate, my visit to your lands is rendered now impossible for several moons to come. Just now, when on the eve of my departure, tidings of a family calamity have reached me, and filial duty, which is the root of virtue, demands of me to hasten to the tombs of my ancestors to fast and pray. May your exalted race ever continue at peace with mine, and may the sun, and the moon, and the tranquil stars shed their united pity on all who know such grief as I, that I cannot for a season visit your heaven conferred country.—CHANG. Shanghai, 2nd moon, 1st day, year 1865.

THE *Illustrated London News* of the 22nd inst. has an engraving of the attack on some Chinese pirates near Amoy, by the crews of H.M.S. *Pelorus*, *Flamer*, and *Janus*.

Monetary and Commercial.

The demand for money at the Bank continues on a moderate scale, at the minimum rate of 4 per cent. for first-class paper but houses known to have been engaged with heavy liabilities on tea and cotton have had their paper refused for the first time. This feeling was much confirmed by the announcement on the 20th of the failure of Buchanan, Hamilton, and Co., Glasgow, who are connected with Messrs. Hamilton, Gray, and Co., Singapore, and Messrs. Jarvie, Thorburn, and Co., Shanghai. Their London agents, Messrs. Harvey, Brand, and Co. could, we hear, have seen them through had it been deemed desirable, but in the present condition of the market for East India and China produce it was next to impossible to fix the amount of loss or the time necessary to complete the affairs. We understand that Messrs. Ashton and Co. will protect the drafts of Messrs. Gilman and Co. The liabilities are stated to be about £700,000 or £800,000, and the assets about £600,000. It is, however, quite uncertain what dividend the estate will ultimately yield. In consequence of some comments on this failure, *The Times* had the following on the 24th inst.:—

"A Glasgow paper, while characteristically attributing the failure of Messrs. Buchanan, Hamilton, and Co. to 'the sudden and erratic movements of the issue department of the Bank of England,' adds that 'the Mathesons of London, in the same trade, are said to acknowledge having lost a million sterling from the same causes.' So far as the London public are concerned there can be little necessity to notice these statements, but for the rectification of Glasgow opinions it may be mentioned that the peculiar feature of the issue department of the Bank of England, under the Act of 1844, is that it is regulated in a manner so inexorably exact as to render any sudden or erratic movements impossible, while as regards the alleged loss of a million sterling by Messrs. Matheson the report is utterly untrue. Messrs. Matheson never purchase or deal in produce on their own account. Their business, as far as the China trade is concerned, is strictly that of agents, and as such it is well known they represent Jardine, Matheson, and Co., of China, a firm composed of men whose wealth places their position beyond question. The Bank of England uniformly deals with money as traders deal with all other commodities, by demanding the market rate, and this can involve no peril to any one; but an idle report that 'it is said' by some unnamed parties that a leading house has lost a million sterling might work extensive ruin. The classes who invent these announcements consist mostly of small speculators in shares, who from their position are so ignorant of the comparative standing of the mercantile establishments of the country that they only know even by hearsay a few of the most eminent names, and use these for their purposes accordingly. Last autumn rumours of failures were daily circulated in the vicinity of the various Stock Exchanges with unexampled recklessness, but fortunately the firms selected were in nearly every instance of such stability that no person with respectable means of information was for a single instant in danger of being disquieted."

At a meeting in London on the 26th of the creditors, a statement was presented, showing uncovered liabilities for £752,588, and assets for £632,068. An adjournment till the 3rd of July was agreed to, in order to receive further accounts from Singapore and China. Meanwhile the business is to be carried on under the inspection of Mr. George May, of Messrs. May, Mathewson, and Co., of London, Mr. M. Connal, of the firm of W. Connal and Co., produce brokers, of Glasgow, and Mr. Anderson, the accountant, of Glasgow; and it was understood that the banks and other creditors in the United Kingdom will not send their bills abroad or take proceedings against the estate. Several creditors mentioned that if at the next meeting an offer of a composition be made, it would meet with favourable consideration.

MESSRS. BUCHANAN, HAMILTON, AND CO., OF GLASGOW; JARVIE, THORBURN, AND CO., OF SHANGHAI; AND HAMILTON, GRAY, AND CO., SINGAPORE.

The Bank of Hindustan will issue their report shortly, and hold their general meeting on the 15th May. It is expected that many of the absurd rumours which have been circulated lately as to the losses of this bank, and which have caused the fall in the price of the shares, will be dispelled, and that their profits will at least be found sufficient to cover the losses which have fallen to the lot of this bank, in common with all banks in the East India and China trade.

The report of the Commercial Bank Corporation of India and the East, presented yesterday, states that the net profits of the year 1864, after writing off all known bad debts, were £154,426, out of which a dividend and bonus for the first half of the year were paid to the shareholders of the bank in Bombay, amounting to £45,000, and a dividend has since been paid in London, at the rate of 10 per cent. per annum on the whole paid-up capital, as it stood on the 31st December, for the second half of the year, amounting to £39,925, leaving a balance of £69,501. A notice of the meeting will be found in another column.

The Asiatic Banking Corporation have issued their report to be presented on the 4th May. The net profits, after deducting all charges upon the current business, and providing for all bad and doubtful debts, amount to £70 439. This sum, it is proposed, shall be distributed in the following manner:—A dividend at the rate of 15 per. cent. per annum; a bonus of 10s. per share; £8,484 in liquidation of the whole of the preliminary expenses; £5,500 to be added to the reserve; and £6,454 to be carried to the credit of profit and loss account for the current year.

The meeting of the Oriental Bank Corporation was held on the 20th, and a report will be found in another column.

The biddings for £300,000 in bills on India were only £27,000 on Calcutta, and £3,500 on Madras. The minimum price was fixed at 1s. 11d. on Calcutta and Madras, and 1s. 11¼d. on Bombay. Tenders on Calcutta and Madras at the minimum will receive in full. On Bombay all the tenders were below the minimum. These terms show another reduction of more than 1 per cent., and indicate a rapid subsidence of the demand for means of remittance to India in return for produce.

Mr. T. W. Bradley, partly engaged in the China trade, who failed some months since, has passed his final examination. The dividend will be very small.

There are a few malcontents at the amalgamation of the Imperial Bank of China with the Bank of Hindustan, who "talk" of proceedings, but considering the state of trade during the past six months, we think the amalgamation was a benefit to the China Bank shareholders.

Now that the shareholders in India and China banks are expecting a bad time of it, by losses in advances against produce, &c., they are looking after the smaller things. The following has been published; and it will be well for bank officers to reply to it through our columns:—

Being a bank shareholder myself, and therefore interested in their sound management, it has been a source of much regret to me to hear of abuses existing in some of the largest and most influential banking establishments connected with the East, which nothing but a direct appeal from the fountain head (I mean the proprietary) will ever eradicate. I allude to those malpractices, winked at, if not openly permitted by the directors, by which bank officers are benefited at the expense of shareholders. To give a few instances. It is well known that all over India and China the officers of chartered and other banks are in the habit of pocketing upon their purchases of *sight* drafts on London the rate of exchange granted to the public on *six months'* sight paper; in other words, they put the establishments they serve to the loss of six months' London discount on such transactions, amounting at present to about 2½ per cent., but to nearly 5 per cent. when the Bank of England rate reaches 9 per cent. per annum, as it did last year. I cannot see the justice of thus mulcting the proprietors, particularly as European Bank officers in the East are very handsomely paid (in most cases ridiculously higher than their services are worth), besides participating every few years in liberal bonuses allowed in no other profession. I understand the pretence is, that this privilege is permitted on *family remittances* only, but you must allow that such a licence is dangerous and easily overstepped. Every day's experience of mankind proves that we are naturally liable to err, and that, where self-interest is concerned, people are inclined to benefit themselves at the expense of others if they are made their own arbiters.

Then, again, I have learnt that it is a commom practice in some banks to allow their officers the six months' deposit rate of interest on their *current* accounts—a difference of about 4 per cent. per annum against the bank! Why such a rule should exist is just as unaccountable as the preceding one, and betrays great weakness, if not something more. Instead of bank officers drawing a higher rate of interest than that allowed to the public, I submit that they should not be permitted to keep accounts at all with the establishments they serve. Both the Oriental and Chartered Mercantile Banks, it is well known, have lost large sums recently through frauds committed upon them by their ledger-keepers and clerks, by means of false entries made in their individual current deposit accounts. No greater door to fraud can be imagined than the permission to bank employés to keep such accounts; and the banks, therefore, that would prohibit their officers of every grade from doing so will put themselves in a secure position and avoid a dangerous and ill-guarded source of loss.

The meeting of the Chartered Bank of India, Australia, and China took place on the 12th. The net profit for the year amounts to £104,827, which is increased to £117,888 by the addition of £13,061 brought forward from the previous twelve months. A report of the meeting will be found in another column.

The amount of bullion by the P. and O. Company's steamer *Pera*, from Southampton on the 20th inst., was:—In gold, to Madras, £373. In silver, to Hong Kong, £15,154; to Shanghai, £500. Total, in gold, £373; in silver, £15,654.

ARTICLES OF IMPORT.

TEA.—The Tea market has strengthened during the past fortnight, and there is a general inquiry for all good to fine Teas, prices for which show an upward tendency. For export there has been more doing in Green, of China growth, and Japan Uncoloured for shipment to Canada, and advices from New York of the cessation of hostilities between the Federal and Confederate States has led to some inquiry to-day, but no actual business has resulted. In red leaf there is nothing fresh in the grades up to common, but a good demand exists for inferior to good flavory up to 1s. 1d. per lb., and the supply on offer is considerably reduced. Kaisow kinds from 1s. 2d. to 1s. 6d. per lb. have been more inquired for, but the sales have not been large; medium to fine Kaisow as well as finest have been little dealt in. In black leaf all grades show ¼d. per lb. advance, but transactions are limited, as most importers hold for a further rise. In Souchong the demand is for the better qualities. In Oolong there is nothing new to advise. Scented Teas have been in but little request; the supply to arrive is very small, whilst the stock is also considerably under that of late years. Green: The quantity offering is much smaller than for some time past, and there has been more doing for export and home purposes; an advance of 1d. per lb has been paid for good to medium Young Hyson and Gunpowder. Some extensive sales have transpired in Uncoloured Japan kinds, prices for which are a shade higher.

Digitized by Google

SILK.—The prospects of the European silk crop are, at present, not of the most encouraging nature; still, any decisive opinion would be premature. The backwardness of the past season, followed by sudden and great heat, whilst stimulating the hatching process, must act unfavourably on the grubs. In the south of France, we have complaints of the re-appearance of the *maladie des vers de soie*. An unusually large quantity of ova has been imported, but a considerable per centage is, as usual, worthless. The mulberry trees in France as well as Italy show signs of being, to some extent affected; this however, is not the case in Greece, where the chief anxiety is directed to the possible vitiation of the ova. Spain is the most forward country, but growers there are not free from doubt as to whether a more than average yield will be obtained. But whatever the amount of the European silk crop, the virtual cessation of the United States war must create such a demand for our silk fabrics as will, probably carry prices for raw silk higher than the present quotations, which are acted on by an extremely limited stock. The quotations will be found in our "Latest."

COTTON.—There was an improved demand in the London market during the business week ending the 21st inst, and though the news of the evacuation of Richmond caused the market to open at a reduction of ½d. per lb., the decline was soon recovered, and in some instances an advance of ⅛d. was obtained. As compared with the preceding week, Bengal, China, Japan, Smyrna, and Greek closed about ⅛d. per lb. higher. The sales during the week were 180 bales China, at 6d. to 8d. for mid. fair to fully fair; and 450 bales Japan 7⅞d. to 8¼d., fully fair to good fair. The stock in London of China and Japan on the 20th April was 16,549 bales, against 26,823 bales same date last year. Total stock in London 120 258 bales, against 96,011 bales in 1864. Cotton afl at to Europe on the 21st April—China, 36,885 bales, against 74 981 last year; of Japan, 64 bales, against 6,476 last year. On Saturday, the 22nd, there was a good business done at extreme prices, with, in some instances, a slight advance on the quotations of the day before. 180 bales of Japan sold at 8¾d. to 9d. fully fair to good fair. The news of General Lee's surrender to the Federals produced no material alteration in price on the 24th. Business was transacted at full, and in some instances rather higher rates. 210 bales Japan went off at 9d., fully fair to good fair. At Liverpool, at the close of the week ending the 21st, China and Japan were ¼d. to ½d. cheaper in the better qualities, but finished without change from the preceding in "fair" and under. Prices advanced on Saturday, the 22nd, ¼d. to ½d., and on Monday, the 24th, the business opened with a good inquiry at prices fully up to Saturday's quotations, and for some description ¼d. advance was paid. The total stock in Liverpool on the 21st was 574,494 bales, against 414.460 last year.

SUGAR.—Former rates have been realised. This present week the demand has sensibly increased, and some large sales of Manila have been concluded at 25s. to 29s. Last week, by private contract, a sale was reported of 2,500 bags Siam, fine yellow and white, at 32s. 6d. to 36s.

COFFEE.—The market is very firm, with a better inquiry. Colonial descriptions continue in request, and 400 casks, 255 barrels and bags Plantation Ceylon in public sale have been taken off with readiness at an advance of fully 6d. per cwt., fine ordinary to low middling, 78s. to 82s., middling to good middling, 83s. to 87s.; and 130 casks, 2,114 bags Native were principally sold, also at fully previous rates, good ordinary, 66s. 6d. to 67s. 6d., common and small, 65s. to 65s. 6d., the remainder being bought in at higher prices; privately, business to the extent of about 300 casks has been done at 66s. to 67s. Mocha: 788 packages at auction were chiefly bought in, the small part sold being fair long berry at 94s. 6d. to 95s., good short berry, 101s. to 102s. 150 bags Malabar (pickings) were withdrawn.

RICE.—Held for enhanced rates on the 24th, and business restricted in consequence. Last week there was an increasing demand for soft grain descriptions, the better qualities, which are rather scarce, being more particularly sought after, and for these an advance of 3d. to 6d. per cwt. was paid, but the total transactions on the spot did not exceed 30,000 bags, as follows:—Middling to fine Nakrenzie, 9s. 3d. to 10s.; common, 8s. 7½d.; fine Rangoon, 10s. 3d.; Bassein, 9s.; and white Bengal, 12s. 7½d. to 15s.

CAMPHOR.—China has been very active, with daily sales, attended with an ultimate advance of 10s. per cwt., and the market remains very firm: Japan very scarce. Only 66 chests China sea damaged at auction, sold at £5. 12s. 6d. Quotations for China, £6 to £6. 5s.; Japan, £6. 5s. to £6. 10s.

CARDAMOMS—Are again, and sensibly dearer; 10 cases Malabar at auction sold at 5s. 5d. to 5s. 6d. per lb. for middling, and up to 7s. per lb. realised privately for fine in limited quantities; 33 bags Ceylon sold at 3s. 5d. to 3s. 10d. for middling to good.

CASSIA LIGNEA.—Quiet, with very moderate business, on former terms; no auctions. Buds: Limited business done privately, at £10. 15s. per cwt. for good.

CINNAMON.—The quarterly sales on the 24th did not go off favourably; 1st sorts were very flat at a decline of 2d. to 4d. per lb.; 2nd declined 2d. to 3d.; and 3rd and 4th went at par to 2d. per lb. lower. 2,410 bales offered, and about two-thirds sold, viz.: 533 bales 1st, at 1s. 4d. to 2s. 4d., with superior at 2s. 8d. per lb.; 1,095 bales 2nd at 1s. 3d. to 2s. 2d.; 543 bales 3rd, 1s. 3d. to 1s. 9d.; and 239 bales 4th and Jungle, 10d. to 1s. 4d. Of 140 bales Tellicherry, only 2 bales 3rd sold at 1s. 2d.

COCOA NUT OIL.—This market has been very firm, but not very active; in the moderate amount of business accomplished an advance of 10s. per ton has been realised. 114 casks Cochin, 17 casks Ceylon, and 103 casks Sydney at auction.

DRUGS.—Cubebs: Flat, and little doing; 90 bags at auction retired. Dragon's Blood: Good quality scarce, and wanted; other sorts still neglected; only one case at auction, and that retired. Galangal Root: Nothing of any moment doing. Rhubarb: Active and dearer, and considering the smallness of the stock, a large business done; the average advance is about 1s. per lb. Quotation of Dutch trimmed, 8s. to 10s.; common flat, 3s. 6d. to 8s. 6d.; round, 3s. 3d. to 8s. 3d.

GUMS.—Benjamin: Very firm; 99 cases Siam at auction sold at £45 to £51 per cwt. for 1st quality; £33 to £40 per cwt. for 2nd quality; £27 to £31 per cwt. for 3rd quality; £20 to £23 dark in block; and £17 to £18. 10s. dust in block: and of 39 cases Sumatra, half sold at £12 to £13. 10s. per cwt. fair to good 2nd quality, more or less false packed. Damar: Continues quiet; and 35 cases at auction, were all retired. Gamboge: Steady, only 5 cases at auction, sold at £10 per cwt. for fair pipe. and £6. 15s. to £6. 17s. 6d. ordinary broken.

GUTTA PERCHA.—Very quiet, with little if any trade. India Rubber: Auctions confined to 150 bags Assam, sold at 8¾d. to 9½d. per lb. for good lump, being very cheap; privately there is inquiry, but at low prices. About 10 tons very good Penang sold at 1s. 1¾d.

HEMP (MANILA).—Of 748 bales at auction, only a few bales damaged sold. A little more inquiry for the article has sprung up as we write.

HORNS.—Firm: Auctions confined to 3 tons Penang Buffalo, sold at 42s. to 42s. 6d. per cwt. or 4 lbs. average.

JAPAN WAX.—Steady, with moderate business.

OILS.—Anniseed: As much as 1s. per lb. dearer, very large business accompanying the advance, and the market remains buoyant. Cajaputa: Firm; 6 cases sold at auction at 2½d. per oz. Cassia: Very quiet; 20 cases at auction retired, and little, if any, sold privately. Cinnamon: Firm; 3 cases at auction sold at 3s. 1d. per oz. for fine.

SAGO.—Remains flat; 270 boxes at auction all retired.

SHELLAC.—Has not experienced any further general decline: of 455 packages at auction rather more than half sold: Orange and Livery Orange at £5 to £5. 10s. per cwt.; Garnet £5. 2s. 6d.; Button £5. 10s. to £6 good to fine; Native £4. 5s. to £4. 15s.; and Block and Blocky £4. 15s. to £5. There is very fair inquiry privately for export at corresponding rates.

SPICES.—Cloves: Steady; 399 bags Zanzibar at auction sold at 3½d. to 3¼d. per lb. for middling to good. Mace: Remains scarce; 17 cases Penang at auction sold at 11d. to 1s. 4d. per lb., for ordinary red to fair reddish. Nutmegs: Steady; 21 cases Penang at auction sold at 11d. to 1s. 8d. per lb. for ordinary small to good medium.

PEPPER.—Black: Had been very dull, but quite recently has shown symptoms of renewed activity. 399 bags Singapore at auction sold at 3¾d. per lb.; but of 854 bags Penang, a few only sold at 3¼d. Hitherto but little has been done privately. White: Very quiet, 150 bags Penang at auction retired.

TERRA JAPONICA.—Cutch, Pegue: Continues very quiet; and 362 bags at auction, all retired; private transactions very small. Gambier: Had been very quiet, and was rather lower, but quite recently has improved; demand more general and active, and prices firmer. Of 1,432 bales at auction, about half sold at 21s. 6d. to 21s. 9d. per cwt. for middling.

MISCELLANEOUS.—Galls: Turkey still offering freely, but without success; Japan steady; of 157 boxes Japan at auction, one-third sold at 56s. to 60s. per cwt. for fair to good. Musk: Scarce, firm, and wanted; only 3 caddies at auction, and those retired. Rattans: Nothing of any consequence doing. Sapanwood: Siam rather dearer, and 39 tons fine at auction sold at £13. 10s. to £13. 15s. per ton; Manila flat; 39 tons all retired; good quality inquired for. Mother-o'-Pearl Shells: Not any business of importance doing. Soy: Remains firm, with inquiry; 12 casks at auction retired at 4s. per gallon. Star Anniseeds: Only 4 cases at auction, sold at £6. 10s. per cwt. Sticklac, Siam: Nothing of consequence doing.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7. 5s.; nail rod, £8. 15s. to £9; hoops, £9. 15s. to £10; sheets, single, £10. 15s. to £11; Staffordshire bars, £8. 15s.; rails, £6. 10s. to £7.

STEEL.—Swedish keg, £15.

COPPER.—Sheet and Sheathing, £94 to £96 per ton; yellow metal, 8d. to 8¼d. per lb.

TIN.—95s. to 96s. for block; 96s. to 97s. for bar. Tin plates, best charcoal, I.C., 28s. to 29s.

LEAD, &c.—English pig, £19. 15s. to £20; W.B., £21. 10s.; shot patent, £23; sheet, £20. 15s.; spelter, £20. 10s. to £20. 15s.; zinc, English sheet, £24 to £24. 10s.; quicksilver, £8.

The following is from the Circular of Messrs. French and Smith:—There is more activity in Scotch Pig Iron, also in Tin and Spelter. In other metals there is nothing to notice.

EXPORT OF BULLION TO CHINA, &c.

COLOMBO, London to Ceylon, Feb. 24, 24 S., 83 E. (dismasted).

FREIGHTS AND CHARTERS.

Very little business has been done in outward freights during the past week, rates, however, keep firm. In homeward charters business is still restricted, and with the exception of a few vessels having been placed from Java, nothing of importance has been done.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 20s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 30s. weight or measurement. To Bankok: 60s. weight or measurement. To Ceylon: 40s. weight, 25s. measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £31 and £1. 10s. For Shanghai: £40 and £1. 16s. For Manila: £1. 12s. 6d. For Batavia: £23. For Singapore: £25 and £1. 3s. 0d. For Galle: £26 and £1. 3s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty have engaged freight in the Cambalu for the conveyance of 70 tons naval provisions, &c., from the river Thames to Hong Hong

CASUALTIES.

The Labrador, Williams, from Cardiff, for Manila, put back to Cardiff, April 1, after having been in collision: she had her port mizen rigging carried away, chain plates torn out, and her stanchions, &c., broken.

The Disraeli, from Liverpool for Galle, which was spoken 7th March in lat. 12 S., lon. 31 W., reported having three hands laid up with small-pox.

The Christian Matthias, Lord, from New York for Shanghai, put into Rio Janeiro, March 19, leaky.

The Marie, Thin, from Singapore, which arrived at Bordeaux April 19, had experienced heavy weather, during which she strained and made water, but the pumps were able to keep her free. She also lost one of her foresails.

The Marie, Vincendean, from Hong Kong, which arrived at Bordeaux, April 20, had also experienced heavy weather and made water, but the pumps were always able to keep her free.

The Colombo, from London for Ceylon, was spoken, Feb. 24, in lat. 24 S., long. 83 E., dismasted.

MISCELLANEOUS.

At ST. COMMERCIAL BANK CORPORATION of INDIA and the EAST.

At the FIRST ORDINARY GENERAL MEETING of the Shareholders of this Bank, held at the London Tavern on WEDNESDAY, the 26th of April,

JOHN JAMES LOWNDES, Esq., in the Chair,

The following resolutions were carried unanimously:—

It was moved by the Chairman, seconded by Mr. Thornton,—

"That the Report as read be received and adopted."

It was moved by the Chairman, seconded by Mr. Diggles,—

"That J. Campbell, Henry Durance Cartwright, J. J. Cater, F. Chapman, J. J. Lowndes, Alfred Middleton, Robert Ryrie, and Edward Thornton, Esquires, who go out of office in pursuance of the terms of the deed of settlement, be re-elected Directors for the current year."

It was moved by the Chairman, and seconded by Mr. Leggatt,—

"That John Ball and Robert Strong, Esquires, be re-elected Auditors for the ensuing year, and that their remuneration be fixed at 100 guineas each."

A vote of thanks to the Chairman and Directors was unanimously adopted.

Extracted from the Minutes,

D. ALLARDICE, Secretary.

COMMERCIAL BANK CORPORATION OF INDIA AND THE EAST.

At the FIRST ORDINARY GENERAL MEETING of the Shareholders of this Bank, held at the LONDON TAVERN, on WEDNESDAY, the 26th of April,

JOHN JAMES LOWNDES, Esq., in the Chair,

THE FOLLOWING REPORT AND BALANCE-SHEET WERE READ BY THE SECRETARY:—

The Royal Charter incorporating the Bank having passed the Great Seal on 19th February, 1864, the Directors took immediate steps to carry out the arrangements made with the Commercial Bank of India.

The allotment of Shares was made on the 22nd April, 1864, in accordance with the terms of the prospectus previously issued; and the Calls on these Shares have, with some trifling exceptions, been since paid.

The amount received up to the 31st December last in respect of the New Capital was £355,590, and of the Premiums on Shares allotted in England, £91,282. 10s.

It was not until the 11th November that all the requirements of the Lords of the Treasury could be complied with; but on that day the requisite certificate was obtained, and business was commenced at the Head Office, under the Charter, on 21st of the same month.

On the 1st January, 1865, the business of the Commercial Bank of India was transferred, at all the branches, to the Commercial Bank Corporation; and the former bank now exists only for the purpose of liquidation.

The assets and liabilities of the Commercial Bank of India have been taken over exactly as they stood on 31st December last.

The Capital of that Bank was	£500,000	0 0
The New Capital, when fully paid up, will be ...	500,000	0 0
Making the total Capital of the Corporation ...	£1,000,000	0 0
The net Profits of the year 1864, after writing off all known bad debts up to 31st December, were ...	£154,426 11	4
A Dividend and Bonus for the first half of the year were paid to the Shareholders of the Commercial Bank of India in Bombay, amounting to £45,000 0 0		
And a Dividend has since been paid in London at the rate of 10 per cent. per annum on the whole Paid-up Capital as it stood on the 31st December, for the second half of the year, amounting to... ... 39,925 0 0		
	84,925	0 0
Leaving balance	£69,501 11	4

The Directors regret to report that several failures have taken place since the commencement of the present year, involving losses which, in the unsettled state of the Produce Markets, it is not easy to estimate accurately; but they have deemed it prudent to carry forward the entire balance, after paying the above Dividends as a provision for them, in the hope that such a course will, under the circumstances, meet the approval of the Shareholders.

The Reserve Fund of the Commercial Bank of India, transferred on the 1st of January, amounted to ...	£73,301	0 0
And the Premiums on Shares allotted in London already stated £91,282 10 0		
Amount outstanding on the 31st Dec. ... 4,717 10 0		
	96,000	0 0
Making the Reserve Fund of the Corporation	£169,301	0 0

In addition to which a sum of £16,703. 17s. 7d. has been transferred to the Corporation by the Commercial Bank of India, being the balance standing to the credit of the Insurance Account.

An Agency in Singapore had been decided upon by the Commercial Bank of India in the beginning of last year, and this Agency was established in November last.

The Directors have had under their consideration the acquisition of suitable premises for the Bank. In the meantime they have, at a moderate expense, so far improved the present accommodation as to be enabled to await, without inconvenience, a favourable opportunity of securing more commodious premises.

In pursuance of the terms of the Deed of Settlement, the Directors, viz.:—John Campbell, Henry Durance Cartwright, J. J. Cater, F. Chapman, J. J. Lowndes, Alfred Middleton, Robert Ryrie, and Edward Thornton, Esqs., go out of office; but, being qualified, offer themselves for re-election.

The Auditors, Robert Strong and John Ball, Esqs., also offer themselves for re-appointment; and their remuneration will be fixed by the meeting.

The Directors regret that, owing to the delay which has occurred in getting the Balance-sheet and Accounts from abroad (which has been purely of an exceptional character and will not recur), they have been unable to lay this Report before the Shareholders at an earlier period.

By order of the Court,
D. ALLARDICE, Secretary.

MORELL THEOBALD, Esq.

REPORT,

Presented to the First General Meeting of Shareholders, held at the London Tavern, Bishopsgate-street, on Thursday, the 20th day of April, 1865.

The Directors, in presenting the Statement of the Accounts to the 31st December, 1864, embracing the transactions of the Company from its commencement to that date (a period of eight months only), have much pleasure in congratulating the Shareholders on the satisfactory progress of the business of the Company.

The Accounts, which have been examined and certified by the Auditors, show that, after having paid office charges and other expenses, losses in the Fire Department, and all adjusted claims for losses, averages, and returns in the Marine Department, there is a balance on income account of £59,719. 16s. 6d. This sum, less 10 per cent. deducted as stated in the Balance-Sheet, will be carried forward to the account for 1865.

The Directors report with much satisfaction the acquisition of the business of the Oriental and General Marine Insurance Company, a Company which had attained a position of considerable importance in the City.

The Auditors, Messrs. Johnstone, Cooper, Wintle, and Co., and E. H. Galsworthy, Esq., retire from office in conformity with the Articles of Association, but, being eligible, offer themselves for re-election.

The Shareholders will be called upon to determine the remuneration of the Auditors.

The Shareholders will also be called upon to alter the 5th and 14th Sections of the 96th Clause of the Company's Articles of Association, in order to prohibit the loan, advance, or investment of any part of the Company's funds, upon or in the Shares of the Company, and to alter the Articles of Association for the purpose of empowering the Directors, with the sanction of general meetings, to declare interim dividends from time to time.

In conclusion, the Directors would remind the Shareholders that they may, by their individual exertions, materially extend the operations of the Company, and trust that no opportunity for doing so will be lost by them.

The following is now the complete list of the Company's agents abroad:—

CALCUTTA	GRANT, SMITH, & Co.
BOMBAY	RITCHIE, STEUART, & Co.
MADRAS	BAINBRIDGE, BYARD, GAIR, & Co.
SINGAPORE	CUMMING, BEAVER, & Co.
HONG KONG	JOHNSON & Co.
SHANGHAI	JOHNSON & Co.

TUCKER AND SON'S

IMPROVED

ENAMELLED PUNKAH TABLE LAMPS.

THE celebrity which TUCKER AND SON'S LAMPS have acquired in the East for burning *steadily* under the Punkah or in side draughts, and *brilliantly* with any of the *coarse native oils*, renders eulogy unnecessary; but having been enabled, by increased facilities of manufacture, very considerably to *reduce the prices* of the above favourite (but hitherto expensive) description of their lamps, T. and Son beg to notify the fact to the Eastern public.

They are elegant and durable, are finished in exact imitation of many beautiful stones and marbles, such as Malachite, Lapis Lazuli, Serpentine, Sienna, Brocatella, Jasper, &c., and are not affected by heat, damp, friction, or insects; oil, spirits, or acids accidentally spilled. The enamel surface is so inseparable from the base (block slate, proverbial for its strength) that it cannot be removed except by an edged tool. It *requires* simply *dusting*, but if rubbed hard, it only adds a gloss to its appearance—at all times cool and agreeable.

After ten years' constant use and handling, these lamps are none the worse for wear.

Malachite (green), Serpentine (brown), or Lapis Lazuli (blue), are most recommended.

Table Lamp complete, with engraved glasses, as sketch, 72s.

A Plainer Lamp, without the Corinthian capital, 50s. complete.

Either pattern, with plain frosted glasses, 7s. 6d. each less.

*** *The above Lamps are supplied to burn Petroleum or Rock Oil also.*

Orders can be sent through any merchant or Agent, or, if accompanied ya remittance, direct to

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury of all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot is 12, RUE RICHER, PARIS.

Sold Retail.—London: Joreau, Hannay. New York: Fougera, Gaudelet, Milhau. Gibraltar: Patron and Danilowich. Malta: Dr. Pirotti, Bugeja, Magri, and Rolando, Esperanza. Alexandria: Bellamore, Galette, Perinie, Bombay Framjee Nesserwanjee and Co. Singapore: Martin and Little. Batavia: L. Platon and Co. Macao J. D. Freita.

R. L. SOUTHERN AND Co.,

MERCHANTS AND AGENTS,

6, MINCING-LANE, E.C., LONDON.

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SEYMER'S BOTTLE PACKINGS AND COOLERS

Price 7½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C. Sole Manufacturer.

COWASJEE DINSHAW,

Close to the Landing Place Depot of

EUROPEAN, CHINA, AND INDIAN WORK.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists' Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty, and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S OINTMENT AND PILLS.—EFFECTUAL AID.—In the sad hours of sickness it is cheering to know that a remedy does exist, and that it can be procured at a little cost. Holloway's Ointment and Pills are always useful in relieving pain, in reducing inflammations, and regulating disordered actions. They never can be misapplied, nor can they under any circumstances cause mischief. They are a blessing to the rich when tormented by indigestion, gout, skin diseases, &c., and a precious boon to the poor when struck down by illness. Holloway's medicines should be in the possession of all soldiers, sailors, and emigrants, who will then be in a position to ease pain and cure disease when medical assistance cannot be obtained.

At a MEETING of the SHAREHOLDERS of this Company, held on THURSDAY, April 20, 1865, at One o'clock P.M., the Right Honourable JAMES STUART WORTLEY, Governor, in the Chair,

It was proposed, seconded, and carried unanimously—

"That the Balance-sheet and Report be and are hereby approved, confirmed, and adopted."

It was also proposed, seconded, and carried unanimously,—

"That the best thanks of this meeting are due, and are hereby given, to the Governor, Deputy-Governors, and Directors, for the care and attention they have given to the interests of the shareholders, and for the extremely satisfactory results which have arisen therefrom."

It was also proposed, seconded, and carried unanimously,—

"That the cordial thanks of this Meeting are due and are hereby offered to Albert Grant, Esq., the Managing Director, for the talent and untiring energy displayed by him in the administration of the affairs of the company."

It was farther proposed, seconded, and carried unanimously,—

"That the thanks of this Meeting be given to Alfred Lowe, Esq., Secretary, for his unvarying courtesy and attention, and to him and the other Officers of the Company, for their industry and zeal during the past half-year." By order of the Court of Directors,

J. STUART WORTLEY, Governor.
ALFRED LOWE, Secretary.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The British schooner *Wild Wave*, arrived at Hong Kong, reports having left Yokohama on the 11th March. She made the passage in nine days, during which time she experienced principally strong north-east winds. Everything was quiet in Yokohama up to the time of her departure. The British barque *Maggie M'Lean* left for Hong Kong two days prior to the departure of the *Wild Wave*. She saw the American barque *Benefactress*, from New York, at anchor in the Ly-ee-moon Passage.

An official notification from Mr. Marcus Flowers, then Acting Consul, dated Feb. 22, announces that Mr. L. Fletcher has been nominated Her Majesty's Acting Vice-Consul at Kanagawa.

A meeting was convened on the 23rd February by the Sanitary Committee for the purpose of placing their accounts before the public. These accounts showed a balance in hand of $158, no levy having been made for the month of January. The committee felt that it would be impossible long to continue to collect more voluntary assessments, now that the 20 per cent. was agreed to be deducted by the Japanese Government, and they naturally desired the opinion of the community as to what they thought best to be done. It appeared that the total amount of assessments actually paid was $2,634.38—about 10 per cent. on the ground-rent. The accounts were received and adopted, and the committee were requested to retain office for one month longer, with power to collect the assessment for the month of January, thus completing the twelve months. Mr. Rickerby observed that the returns of the Sanitary Committee clearly showed that the 20 per cent. of the land rentals agreed to be given up by the Japanese Government would not be sufficient to meet the requirement. A vote of thanks to the Sanitary Committee for their past services was carried by acclamation, and the meeting separated.

As stated in the last number of the *London and China Telegraph*, the notion of a new port being opened met with no enthusiastic reception from the Yokohama merchants. The *Japan Herald* remarks:—

There was a time when the news of the opening of any large port in Japan would have created an immense sensation; but that time has now passed. Our merchants have lately had sufficient time and opportunity to form very good opinions of the actual value of Japanese trade. They now know, almost exactly, what the country can produce and what are its wants that have to be supplied; and taking this as a criterion of the utmost that can be done in Japan, they feel satisfied that there are already more hands at work and more capital on hand than required for the amount of business. As a proof of this we have only to refer to the state of our silk market during the last few months, when the large amount of surplus capital caused so great a competition as to drive prices 20 per cent. above the highest points ever known before. Taking as an axiom that the prosperity of any trade consists in the benefits derived from it being in excess of the expenses necessarily incurred in its development, we may say that the question of the advisability of opening a new port in Japan resolves itself into this—Will it increase the trade of Japan sufficiently to make it worth the while of our merchants to establish new houses or open agencies therein? This is, of course, for our merchants to answer, but taking into consideration the experience they have already had of the capital introduced into the country being more than sufficient for the exigencies of trade, it may be inferred that if the opening of any new port be not preceded by radical reforms in the method of trading at present allowed by the Japanese Government, it will be rather prejudicial to commercial interests than otherwise.

Japan is but a small country. Its resources are not like those of China, almost unlimited; and the whole amount of business it could do with foreigners, under the present condition of its trade, would amount to but little more than what is now done in the ports of Yokohama, Nagasaki, and Hakodadi. If trade were really free, if Japanese merchants were at full liberty to deal with foreigners, there is no doubt that produce would come forward in larger quantities than hitherto, and that our import market would enter into a stage of progressive development which we hope would become considerable; but under our present relations with the Japanese merchants a great many new ports might be opened without sufficiently affecting the total of our imports and exports.

The most sanguine of our merchants will scarcely admit that Japan can export more than 30,000 bales of silk in the year; and if this amount be divided between two or three ports instead of remaining the exclusive share of Yokohama, whence 25,000 bales were exported two years ago, the profits derived from the silk trade would be reduced by halves or thirds. The same argument applies to other articles of export and import, with the sole exception perhaps of tea, the exportation of which article would possibly be increased by the opening of a new port nearer than Yokohama to the principal tea growing countries.

But if our trade with Japan is limited (and we are sorry to say it is very limited) the expenses incurred in transacting business seem to be almost without limit. In spite of the continual dulness of business, and consequently a continous diminishing of profits, expenses have steadily increased, and have at last attained to such a pitch that Yokohama, but a

Digitized by Google

few years ago considered to be one of the cheapest places in the East, may now be looked upon as an unhappy rival of Shanghai, which has for some time enjoyed the unenviable reputation of being one of the most expensive places in the world. The business done in Yokohama at present is so small that our merchants look upon themselves as exceptionally fortunate if they are able to clear their expenses, and we doubt if the most fortunate would be enabled to maintain two establishments if by so doing they did not considerably increase their expenses.

We are of opinion that, under the present condition of trade, business cannot be greatly increased, and in order to make the opening of a new port desirable, our diplomatic representatives should come forward and take advantage of present opportunity to abolish the abuses that, although sanctioned by time, yet do the greatest harm to our commercial interests. By acting thus they would gain the gratitude of their countrymen, and leave Japan with the well-deserved reputation of having considered the general welfare of the community before their personal interests.

The Garrison Winter Races took place on the 22nd Feb. The day was a lovely one, and almost all the ladies of the settlement, and indeed the greater part of the foreign community, assembled to witness the sport. A commodious stand had been erected, and every provision made by the persevering stewards to insure the comfort and convenience of their visitors. Capt. Parry (Royal Marines) officiated as judge, Lieut. Poyntz as starter, Lieut. Harris (20th) as clerk of the course, and Lieut. Wood (R.A.) as secretary. The winners were Dr. Hensman's (20th) Sayonara; Mr. Bond's (R.E.) Pluck; Major Wray's (R.E.) Black Bob; Mr. Goldsmith's (20th) Satsuma; Capt. Blount's (20th) Ugly; Mr. Smythe's (20th) Falling Star; and Mr. Peter's (Royal Marines) Pericles.

Tenders have been requested, for the supply of meat, vegetables, and other requisites, for the supply of Her Majesty's troops at Yokohama, for six months, from the 1st April.

CHINA.

SHANGHAI.

The P. and O. mail of the 26th January arrived out on the 16th March. The dates are now down to the 20th.

At the cotton auction held by Messrs. Woodward and Co., the first four lots of 200 bales each, "good clean," were sold respectively at Tls. 16.4, Tls. 16.2, Tls. 16.2, and Tls. 16.3 per picul. A lot comprising fifty-five bales "Shanghai good" brought Tls. 15.1.

Messrs. Wheelock and Co. sold about 1,045 tons coal ex *Adelina*, by public auction, at the rate of Tls. 5.20 per ton.

The *North China Herald* says:—Of the three Yangtze ports thrown open to foreign trade by the treaty of Tien-tsin, Chinkeang has hitherto proved least worthy of the attention of our merchants. Its situation is less favourable than that of either Kiukiang or Hankow, and it has laboured under the additional disadvantage of proximity to districts held by the rebels. In the olden times it was a city of no small importance, on account of its favourable strategic position at the junction of the Grand Canal with the Yangtze. The city was crowded with inhabitants, and in the suburbs, we are told, there was 'so great a throng of people that one could scarcely squeeze through them.' The Taipings, however, have changed all this. The Chinese city was well-nigh destroyed during its occupation by them and its subsequent recapture by the Imperialists; and the neighbouring country has several times been the scene of encounters between the hostile parties. Devastation and ruin have, of course, been the result; the country has been laid waste, and the creeks have become choked. Thus situated, Chinkeang could hardly be expected to thrive. But the day is at hand when an improvement may be looked for in this picture; and although it is not likely ever to rival its sister riverine ports, a great improvement in its trade may be expected. The native authorities are working energetically to clear the channel of the Grand Canal, which had become choked during the rebel occupation, in this neighbourhood; and a vast through traffic is anticipated, so soon as the periodical rising in the river occurs. It remains to be seen whether the central position which Chinkeang will then enjoy will not in some degree compensate for its other disadvantages of situation. The tea crops of a province will not flow into it as into Kiukiang and Hankow; but it will be the natural depot for goods arriving by the Grand Canal for the foreign market, and for the foreign goods which Chinese may purchase for export along that stream into the interior. During the year 1863, the imports at Chinkeang amounted only to 4,567 tls., and the exports only to 690 tls.; but it must be remembered that communication with the South was then almost entirely precluded by the rebels. During 1864 a gratifying improvement took place; but the current year will be the first in which a fair opportunity will have occurred of testing its value as a port of communication with the interior. Besides copper cash, cotton and silk were the only noteworthy objects of export during 1863, and in the former of these a considerable increase took place last year, which will be again surpassed in 1865. In anticipation of the increased traffic which may fairly be looked for, the Chinkeang Municipal Council contemplate, we are glad to learn, the construction of a pier alongside of which steamers can moor for the purpose of loading and discharging cargo. The danger to cargo-boats in crossing from the steamers to the shore, during the heavy sea which not unfrequently prevails in the Yangtze, is great; and the construction of a jetty which may enable vessels to discharge directly into godowns on the shore, will be a valuable boon. In the days when the Foreign Settlement was a floating one, the measure was comparatively unnecessary, for hulks furnished godown as well as dwelling accommodation. But the concession has at length been marked out, and foreign buildings have been commenced on it, which will no doubt increase and multiply as trade developes. A custom-house, too, is being erected on shore, in supersession of the hulk which at present answers that purpose, and to it all goods will have to be brought for examination, instead of to the floating establishment which now lies so conveniently near to discharging vessels. We sincerely trust that the contemplated scheme may be carried out, and that the two hundred steamers which on an average usually discharge cargo at the port, will soon have more convenient accommodation than the open river for the purpose. The cost will, of course, be considerable, but the advantage, in expeditious discharge of cargo and avoidance of risk, will fully compensate for the outlay. And there is the additional advantage that, as the wharf will be clearly municipal property, wharfage dues can hardly be refused, and are not likely to be evaded.

The following items are from the *North China Daily News*:—

The troops sent down from the camps at Soochow, or at least a large detachment of them, are said to have arrived at Fa-wha, the former station of Kingsley's battalion. Here they will wait until steamers are obtained to transport them to Amoy. On their way down country they are accused of having committed cruel ravages on the country people, in order to supply the want of adequate provisions. As might have been anticipated, they were marched out of their camps without any of the necessaries of life, and the cravings of nature had to be supplied by a total disregard to the rights of property in the villages through which they passed. Thus their advance from Soochow seemed rather the march of an enemy over hostile ground than the peaceful conduct of troops destined for service upon their own soil. The odium of such outrages rests, of course, with the officials, for we could not expect even the most highly disciplined army to abstain from violence were the daily wants of the men left unsupplied. Such conduct betrays a policy even more short-sighted than we usually have to stigmatise in the Chinese. It teaches the peaceable inhabitants to regard their so-called defenders with the same unutterable fear and dislike as they would naturally exhibit towards an invading army. The rebellion has indeed taught the Chinese nothing. We have here another instance of the carelessness with which the Imperial authorities themselves sow the seeds of disaffection, and lead the minds of the people to look forward to any change, as of necessity heralding a happier state of things. Security for life and property is as dear to the Chinese mind as it is to the European, but the apathy of the former renders it safer to trifle with his privileges than it would be to attack the rights of foreign nations. There must, however, be a limit even to Chinese endurance, and such circumstances as we have just related will go far to induce the villagers to hail the advent of the rebels as a deliverance from the yoke which oppresses them. However mistaken they may be in their expectations, such will naturally be their opinion until sad experience teaches them that a Government, whether Imperial or rebel, affords little or no protection to its non-combatant subjects.

We have been informed that the arrest of the Shanghai Hien by the French Municipal police has had at least one tragic result. The Chinese linguist, Wang, whose misrepresentations to the magistrate, on the one hand, and to the police on the other, are said to have caused the difficulty which ended in the outrage upon the dignity of the Hien, was beheaded on the 11th or 12th inst. It would seem that a full report of the proceedings was forwarded to the Futai, and by his order the only person concerned in the affair, over whom the native tribunals could exercise jurisdic-

Digitized by Google

of their subjects to the robbers who disturb the peace of our frontier.

On the 17th February, in the middle of the night, four French and three Cochin Chinese sailors were sent in a boat in pursuit of some malefactors, and when in the Great Vaico, in front of the highest part called the Great Trees, an alligator rose and placed his forepaws on the gunwale. The frightened Cochin Chinese jumped into the water and swam for the shore; and the Europeans by their brusque movements upset the boat. One of the last, a sailor named Buttez, managed to lay hold of the branch of a tree which overhung the water and thought himself in safety. He had not been there many minutes, up to his middle in water, when he felt an alligator seize him by the thigh and try to drag him down; he called for aid, and defended himself as well as he could with his other leg, and succeeded in driving his enemy off. He gained the mud and managed to drag himself to higher ground, when he was perceived by one of his companions and the three Annamites, and all five managed to regain their ship, after scrambling through the jungle for nearly an hour. The wounds of Buttez are severe, but not dangerous, but his two unfortunate comrades, Launay and Morin, have not been recovered. This accident has caused a profound sensation; and it has no precedent in the annals of the French expedition.

On the 22nd February Mgr. Dupond was consecrated Bishop of Ayoth *in partibus* by Mgr. Miche, and nominated *vicar apostolic* of the Mission to Siam. The Governor, accompanied by his aide-de-camp, some Europeans, and a great number of Annamites, were present at the ceremony. Mgr. Dupond succeeds the late Mgr. Pallegois, Bishop of Mallos.

STRAITS OF MALACCA.

SINGAPORE.

Our newspapers are to the 1st April. The London mail of the 27th February was due on the 2nd of April. By the *Clan Alpine*, from Calcutta, telegraphic advices from London had been received to the 17th March.

The *Straits Times* acknowledges the receipt from the Government of the Budget estimates of 1865-66. The revenue is estimated at Rs. 2,114,676, and the disbursements at Rs. 2,258,468. "It will be perceived (remarks our contemporary) that, including the estimate of expenditure on public works, and the approximate cost of military, but excluding the support of convicts, the expenditure will exceed the revenue by about £14,000. But these are approximations only, and it is more than likely that while the revenue will exceed the amount set down, the expenditure will fall short of it." The estimated charge for the military exceeds by about £12,000 the amount actually spent last year; but our contemporary has been informed that the estimate of the requirements includes the cost of the troops stationed at Labuan, as the local treasury has to make the necessary advances on their account, although the amount is afterwards received from the Home Government.

At the meeting of the municipal council on the 15th of March, a letter was read from Mr. H. P. Stephenson, chairman of the Singapore Gas Company, requesting that the commissioners would reconsider the last alterations and amendments to the draft of the proposed Gas Act, more especially with reference to the penalty, not exceeding $1,000 per diem, on the company, should they fail to make gas enough to supply their regular customers. After consideration, the commissioners determined to adhere to their last revision of the proposed Act.

H.M.S. *Adventure* had arrived from Hong Kong with his Royal Highness the Duke of Brabant on board, on his way to Galle. The hired transport *Caroline Coventry* had arrived from Hong Kong with a detachment of the 2nd Belooch regt. on board. The American steamer *Woosung*, from Boston, with dates to the 11th November, anchored in the roads on the 22nd March.

Captain Risdon, of the barque *Constance*, arrived from Batavia on the 19th March, reports having seen, about eight miles south-west of the Horsburgh Light-house, a large vessel of about eight or nine hundred tons, apparently water-logged; the foremast and mainmast were gone, only the mizenmast standing. No one appeared to be on board. It is probable that the vessel would drift in towards Rhio Straits.

Twelve European seamen belonging to the British ship *Sebastopol* were charged before the Marine Magistrate, on the 20th March, with refusal to proceed in the ship. The men still persisting in their refusal, imprisonment for twelve weeks in the House of Correction, with hard labour, was inflicted on each.

The barque *Zephyr*, Captain Poyer, from Cardiff with coals, reports having sprung her foremast, and will have to repair.

The brig *Henrietta*, arrived on the 29th March, spoke the Hamburg barque *Johann Olaffa*, in Banca Strait, on the 14th, 198 days out from Newcastle, bound to Singapore, and wished to be reported.

PENANG.

The Chinese settlers have again been disturbing the public quiet by their feuds. The *Gazette* of the 18th March says:—

For the last few days there has been a disturbance between the To Peh Kong and the Chin-Chin Kongsi. It has been chiefly confined to the Bali Pulo district, but there have also been occasional outbreaks among their members in town. It will be recollected that some time ago the two societies fell out, and some of the Chin-Chins, in order to send their produce to town and to secure the same from being molested by the To Peh Kongs, engaged neutral Ghi Hin boats to convey the same from Bali Pulo to town. But the To Peh Kongs considering this an interference on the part of the Ghi Hins, began to attack the Ghi Hins; and hence the origin of the late quarrel and riots between the Ghi Hins and the To Peh Kongs. Now however that this has been settled, the To Peh Kongs have once more turned their attention to the Chin Chins. On Tuesday last some Chin Chins sent their produce from the country to the China Street ghaut instead of to the Ujong Passir, where the produce is usually sent, in order to avoid any contact with the To Peh Kongs, who always congregate in large numbers in the latter place. But the caution of the Chin Chins availed them nought, for while they were landing their goods they were attacked by a party of the To Peh Kongs and robbed of the greater portion of them. It will be imperative on the part of the Government to timely interfere in this as yet petty quarrel, in order to prevent such outbreaks and disturbances as we have lately witnessed. The To Peh Kongs are a bold and determined set of men, and will stop short of little in order to wreak their vengeance on their weaker brethren or to satiate their fury on a helpless rival.

A circular, agreeing to hold a half holiday on the Saturday afternoons, has been signed by all the mercantile firms.

MALACCA.

The weather had been very dry; no rain scarcely for weeks, and the paddy-fields and fruit-trees were suffering from severe drought. Within a few days there had been a few welcome showers of rain, and the country was already improving in appearance.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

LOFTUS—On the 24th March, at River Valley-road, Singapore, the wife of Capt. J. A. Loftus, of a son.

TENNENT—On the 11th March, at Shanghai, the wife of Dr. C. Emersen Tennent, of a daughter, stillborn.

MARRIAGES.

IVACHINZOFF—SMART.—On the 21st March, at St. John's Cathedral, Hong Kong, by the Rev. J. J. Irwin, D.D., Colonial Chaplain, William Ivachinzoff, of H.I.R.M. corvette Saghalien, to Lottie Maria, daughter of Captain Smart, of the American ship Lottie Maria.

MACKINTOSH—WINKWORTH.—On the 21st March, at Hong Kong, John S. Mackintosh, of Shanghai, son of the late Rev. Lachlan Mackintosh, of Edinburgh, to Jessie, youngest daughter of Thomas Winkworth, of Canonbury, London.

REMEDIOS—ALVES.—On the 17th March, at the Roman Catholic Cathedral, by the Rev. Pe. Favini, Silvano Antonio dos Remedios, of Messrs. Dent and Co., eldest son of the late Ignacio A. dos Remedios, to Anna Joaquina, third daughter of the late Jose Miguel Alves, Macao.

WALLACE—MISTER.—On the 29th March, at St. Andrew's Church, Singapore, Major John Duncan Campbell Wallace, to Sophia Elizabeth, daughter of the late Edward Taylor Mister, Esq., of Carmarthen, South Wales.

DEATHS.

COSTREJEAN—On the 18th March, at the Shanghai Hospital, Clement Costrejean, native of Auvergne, France, aged 28 years.

FARR—On the 18th March, at the Civil Hospital, Hong Kong, William Henry Farr, aged 21 years.

HARDING—On the 24th March, at Harpersville, Hong Kong, Susannah, the beloved wife of William Harding, aged 38 years.

M'DONALD—On the 17th March, at the Seaman's Hospital, Hong Kong, Thomas M'Donald, late barman at the Stag Hotel, Queen's-road.

STRACEY—On the 21st March, at Hong Kong, Frederick Stracey, seaman, late of the ship Albertine.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents. and is divided into decimal parts of ten.

SHIPPING INTELLIGENCE.

ARRIVALS.

At HONG KONG.—From London: March 17, Bengal; 18, Milbrook; 21, Young Lochinvar. From Swansea: 22, Flora, Ann Holzberg. From Glasgow: 22, Spanker. From Dartmouth: 23, Lydia Hilton. From New York: 21, Venus and Benefactress.

At SHANGHAI.—From Liverpool: March 9, Dunkeld. From New York: 16, Volunteer.

DEPARTURES.

From HONG KONG.—None.

From SHANGHAI.—For London: March 17, Grenadier. For Liverpool: 14, John Nicholson; 16, Queensbury.

DISMISSAL OF PRINCE KUNG.

A telegram has been received via Siberia announcing the dismissal of Prince Kung from all his important offices at Peking. It is probable that the next mail may bring us some particulars in reference to this important event.

The *Catharine Apcar*, the second of a proposed line of screw steamers for the India and China trade, will leave the Tyne on the 10th inst. for Calcutta. Her length is 240 feet, beam 34 feet, depth of hold 18 feet, tonnage 1,500, and 160-horse power nominal. The first vessel of this line, the *T. A. Gibb*, has already left for the same destination.

Literature.

We noticed, a short time since, the new daily paper, called the *Pall Mall Gazette*, and we are now called upon to mention several others which are announced as shortly forthcoming:—The *Monitor* is a Conservative review of politics, literature, science, and art, and will be published every Wednesday.—The *Fortnightly Review* is, by public rumour, associated with the name of Mr. CHARLES DICKENS, and is, we believe, to be published by Messrs. Chapman and Hall.—The *Londoner* is the title of a new morning paper published on the 1st May. It will be based on the plan of the celebrated *Gazette des Etrangers* now issued daily in Paris.—A weekly paper called the *Correspondent* will also be issued on the first Saturday in May. It is intended as a medium for publishing the correspondence of the public.—The *Chinese Advertiser* is announced to be published on the 3rd and 19th of each month, as a medium for advertisements in English and Chinese. It is projected by the proprietors of the "Chinese Repository."

PETROLEUM—ITS FORTUNES.

Whenever the history of the Petroleum trade is written, it is certain to contain among its annals more romantic incidents, more cases of individuals who have passed from poverty to almost boundless wealth, more instances of those who have parted with their wealth for a 30th or a 60th share in an oil well spouting bountifully, and which has run dry in a fortnight and left them beggared, than will be afforded by the traditions of any other trade or venture. The South Sea bubble, John Law's Mississippi scheme, or modern railway manias afford no manner of parallel to the perpetual change and barter, to the wealth squandered and easily won, in the muddy "changes" of Oil Creek and Cherry Run. Even the excitement of the "fresh diggings" of California, or the "new rushes" of Australia, afford but a faint example of what is done daily in the oil country of Pennsylvania. In the gold districts the prizes are few—so few, indeed, as to make the average earnings at "new rushes" lower than the average earnings of Australian labourers, and no one ever yet heard of a digger clearing his £200,000, £300,000, or even £500,000 from successful mining. Yet such instances, though not common, are still far from rare in the oil districts of Pennsylvania. No romance that has yet been written gives such extravagant illustrations of sudden fortunes as can be almost weekly proved from the records of these oil wells.

The green, foul-smelling liquid which exuded over the poor farms of Oil Creek and Cherry Run, which was known in by-gone days to the Indians only as a cure for rheumatism, and lately to the Americans as characterising places were a stench was to be avoided, is now sought after with an avidity to which new rushes or well-known gold-bearing reefs afford no comparison. The Egbert Farm, the Sherman, Maple Shade, Colwell, Ferrall, Jersey, Keystone, and Coquette wells have each their history of gigantic loss or profit to those who once owned this poor "half-scratched" land, as the thin farms are called in Pennsylvania. In some cases the owners have resolutely held on to their property, and with an outlay of $2,000 have realized $2,000,000 in a few months. Others have parted with the right of working wells for as little as $400, and a 30th share in the yield of such cheaply acquired property has since been sold for $30,000. In some cases the yield has been so sudden and prodigious as to spout up with a roar like escaping steam for more than 50 feet into the air, and there being no means of meeting this great efflux of the valuable liquid, it has at last, after vain efforts to stop its rush or to collect it in ponds, been allowed to flow wastefully away for days, and even weeks, till the supply has ceased as suddenly as it began. Under the depression of price produced by such a tremendous increase in the supply of oil, the value of the oil itself has been as low as half the value of the barrel which contained it; in some cases so low as not to pay the trouble of collecting it, even though flowing on the ground in streams. We believe, indeed, that the price of crude petroleum has at one time ruled as low as a dollar the barrel in Oil City, and even then the demand was checked from a fear that there could be no market for it. How far such a supposition was warranted may be guessed from the fact that though petroleum has been but four years an article of commerce, it has already assumed the second place among the exports from the States, and now ranks next to breadstuffs. In 1860 scarcely any was ex-

Digitized by Google

ported; last year the exports amounted to 32,000,000 gallons, while the domestic consumption in America was even greater. As yet, certainly, the limit of its usefulness has not been reached. The pure oil is coming into general use from its cheapness as an illuminator. The secret of extracting its gas with greater ease, and at less expense than coal-gas has been discovered and is being put in practice in America. The solid residuum from the refining process which eliminates the gas gives paraffin candles. As a lubricator for wheels and machinery generally the heavier qualities are in demand. Paint oils and varnish are obtained from it, and the benzine is used as a substitute for turpentine. Some of the most beautiful and durable colours now worn are obtained from the waste petroleum after refining, and after the separation of the naphtha it has been found a valuable substitute for pit oil in tanning, and produces a better and stronger quality of leather. So, then, this green, ill-smelling liquid, to which poor Pennsylvanian farmers could scarcely allude in decorous terms from its presence having spoilt their salt wells, has now become the main source of wealth to the State, and is likely to prove even more productive than it has ever yet been, for the demand for it seems as boundless as the supply.

Pennsylvania, however, is far from being the only part of the world where oil wells have been discovered, or where they are believed on good authority to exist. The Crimea, it is stated by Americans who have examined it to ascertain the truth of the reports of its oil-bearing qualities, is likely to yield immense quantities on the skirts of its semi-mountainous interior. Canada, too, possesses oil wells, and many in the Upper Province have been worked with enormous profit while they lasted, and every indication which smell and discoloured water can afford shows that petroleum may be found in large quantities among the dense forests which cover the eastern shores of Lake Huron. But in one most important particular the oil wells of Canada differ from those of Pennsylvania. The former seldom yield oil for long; the latter, whether the flow ceases and they have to be pumped, or the pumping is useless and they have to be forced by air pressure, still always yield oil. The cases where oil wells in Pennsylvania have "given out" may easily be accounted for by the fact of the avidity with which every foot of land in the vicinity of an oil field is bought up, and the rival shafts sunk so deep as to tap and drain away the original source of supply in other directions. The short supply of the Canadian oil wells as compared with those in the States may possibly be explained by the geological fact of a deficiency, except at Pictou, in Nova Scotia, in the coal formation, to which, whether rightly or wrongly, the presence of petroleum is mainly attributed.

Though the methods by which it is professed to discover oil in Western Pennsylvania are almost endless, from the divining rod even to charms and oil-smellers, yet the *modus operandi* when once the site is determined on is nearly the same in all cases. Over the spot chosen a timber framework is erected about 10 ft. square by 40 ft. high, and strongly bolted together. A grooved wheel or pulley hangs at the top, and a windlass and crank are at the base. A few feet from the derrick a small steam-engine is stationed, and covered with a rough board shanty. A pitman-rod connects the crank of the engine with one end of a large wooden "engine-bob," as it is called in some of our mining districts, placed midway between the engine and derrick, the beam being pivoted on its centre about 12 ft. from the ground. A rope, attached to the end of the beam nearest the derrick, passes over the pulley already mentioned and terminates over the intended hole. A cast-iron pipe, from 4½ in. to 5 in. in diameter, is driven into the surface ground, length following length until the rock is reached. The earth having been removed from the interior of the pipe, the actual process of boring or drilling is commenced. Two huge links of iron, called "jars," are attached to the end of the rope. A long and heavy iron-pipe is fixed to the lower link, and in the end of this is screwed the drill, or punch, a chisel-shaped piece of hardened steel about 3 in. in diameter and 2 ft. to 3 ft. long. When all is ready, the drill and its heavy attachments are lowered into the tube, and the engine is set in motion. With every elevation of the end of the beam the drill strikes the rock, the heavy links of the "jars" sliding into each other, and preventing a jerking strain on the rope. The rock as it is pounded mixes in a pulverised condition with the water constantly dropping into the hole, and after a short time the drill is hoisted out and the "sand-pump" dropped into the hole. This is a copper tube about 5 ft. long, and smaller than the drill, having a valve in the lower end opening inwards, which, when the tube is dropped into the hole, the slimy fluid enters and is hoisted out. As the drill is chisel-shaped, the hole made by it would not be round, so a contrivance is resorted to in order to secure that end, which is accomplished in part by the borer, who sits on a seat above the hole, holding a handle fixed to the rope, and giving the latter a half twist at every blow. When the drilling is accomplished, another tool, called a "reamer," is inserted, which makes the hole round and moderately smooth. When the hole gets down to the point where the first reliable indications of oil are reached, the contents of the sand-pumps are carefully examined. The principal features of the geological formation of the Pennsylvania oil region are three strata of sandstone, with intervening strata of soapstone and shale. Indications of oil are found in the first and second sandstone, but the principal deposit is found in the third layer, at depths varying from 300 to 800 feet. Should no oil be found in the third sandstone, the attempt is abandoned.

The well having been bored to the required depth, it is tubed by an iron pipe with a valve at the lower end being run down the whole depth of the hole, the necessary length being obtained by screwing the joints together. As soon as tubed, and sometimes before, the oil and gas should it be a "flowing well," rush out with great force and considerable noise. A pipe is connected with the upper part of the tube, and the oil is conducted into an immense vat, holding from 500 to 1,200 barrels. The gas escapes into the air. If the oil should not flow, a pump-box, with a sucker-rod of wood, is inserted in the tube and connected with the "beam" of the engine. In many instances oil, gas, and water are all pumped up together, and are separated by a simple contrivance. The mingled fluids and gas are pumped into a small barrel. The oil and water fall to the bottom of the barrel, and run off by a pipe near the bottom into the large vat, where another separation takes place, the greater specific gravity of the water causing it to sink to the bottom. The gas escapes by a small pipe at the top of the barrel, and is conducted into the furnace of the engine, where it burns with a fierce and steady flame, frequently dispensing with the use of other fuel.

In some cases, as we have said, the sudden yield of oil has been so much beyond all calculation that the fortunate borers have been obliged to allow thousands upon thousands of gallons to flow away. One of these springs, after flowing away for weeks, has since yielded a clear profit of $1,500,000 on the original outlay of $2,500 to "strike" the oil. This, however, though a conspicuous instance of the waste of oil, is far from being a very conspicuous evidence of the yield of profit which some of these great wells have afforded. Captain Funk, the commander of a small lumber flat, cleared from one well £500,000 sterling in a few months, and invested this sum so judiciously in other oil lands that the amount of the wealth he bequeathed at his death soon after is still unknown, and is commonly reported to be incalculable. Not long before his death a young man at the Creek in search of employment was engaged by Captain Funk as a clerk at a moderate salary. Being well pleased with the manner in which his duties were performed, Captain Funk gave him an interest in a well he was then sinking. The well was a success, and the young man sold out his interest for $100,000. Another young man, not 21, was employed at waggoning oil on the Creek. In part payment of his services he took a sixth interest in a well then sinking. The well "struck oil," and at once the young man sold out his property for $150,000, with a part of which money he purchased a large farm in Minnesota. Everything at Oil Creek and Cheery Run was of course done at first in the roughest fashion. There were no railways, and the oil had to be got away by land or water anyhow, and at a prodigious waste of the commodity. But it was so cheap at Oil Creek and so dear at Pittsburg, that one cargo escaping out of five sent down the Alleghany river paid well, and at first at this rate of loss and gain the trade went on. Now, however, there is every appliance of barrels and tank-barges to save the oil, and a branch of the Atlantic and Great Western Railway runs right through the heart of the oil district. By this line all the oil is brought to market and from this enormous and constantly increasing source of traffic alone the Atlantic and Great Western promises to be the richest paying line in America, a fact which is not without interest for the English, considering that nine-tenths of its capital is owned in this country. Before the construction of the railroad the oil was floated down in open tank-boats or on rafts over the shallow rapids of the Alleghany into Pittsburg. When the stream was low a dam was built above the locality of the wells, and, at an appointed time, the dam was cut and the boats swept down to the river by the freshet. When the first flowing wells were astonishing the people on the Creek by the unexpected yield of oil, and puzzling them with the question what to do with it, to the want of barrels in sufficient number was added the want of flat boats to convey the filled barrels to market. All sorts of devices were resorted to. The barrels were launched into the stream and lashed together in a huge raft, on which were placed planks enough to support a rude cabin for the raftsman. Where there were more flat boards than barrels, the sides of the boat were made as tight as possible, and the stream of crude oil turned into the boat itself, filling it to the edge. The opening of the dam and the consequent freshet sometimes caused great confusion and loss among the boats and rafts, owing, perhaps, to the carelessness of a few boatmen. Ill-secured boats went plunging and smashing among rafts, barrels, and boats. Barrels of oil were sent careering wildly down stream on their own account. Flat boats filled with oil in bulk were stove in, and the oil escaped into the stream. The latest of the great freshet disasters, which occurred in December, 1862, occasioned a loss of 50,000 barrels of oil. But water disasters are as nothing to the fearful mischief caused by fires in the oil regions. The whole oil region is like a vast magazine of gunpowder, and the flowing wells are as so many open casks of powder; They are even more dangereus, for, while gunpowder only explodes when in immediate contact with fire, an oil well will sometimes take fire from a cigar many yards distant. The oil from a flowing well is accompanied by an exceedingly inflammable gas, which pervades the air for several yards around. At many of the wells a notice warns the visitor that smoking is strictly prohibited in the neighbourhood, and more care is taken in enforcing the rule than at some powder mills. But, in spite of all precautions, accidents will happen. Sometimes the lighted cigar of a careless visitor, or the pipe of a thick-headed labourer is the cause. Sometimes the gas suddenly rushes up from a well that has just struck oil, and, taking fire from the engine furnace, wraps everything in flames, shooting up a column of fire and smoke 100ft. in height.

When the burning-well happened to be near the Creek, which has often been the case, a new danger threatened. The boats, loaded with oil, took fire, and, burning their lines, went adrift down the stream. As they passed the tank-boats filled with oil in bulk the flames spread to them with the rapidity of lightning; a single flash, and the whole boat was in flames. The burning boats continued in their course of devastation, setting fire to everything they touched on their route. The bursting of tanks covered the stream with oil, which took fire, and added to the terrific grandeur of the scene. A great fire of this kind occurred rather more than a year ago, when blazing boats came down the creeks, and, plunging among a large fleet of loaded boats at Old City, set them all on fire, and the whole blazing mass swept down the Alleghany, burning the Franklin-bridge as they passed, and spreading terror for miles along the river.

Water has no effect on burning petroleum. To extinguish a burning well the only means discovered is to play on it with steam from the boilers of a neighbouring engine, or to heap the mouth of the hole with earth. To accomplish the latter is a work of great difficulty and danger, for the heat thrown out by burning petroleum is intense. For this reason a flowing well that takes fire frequently burns for many days before the fire can be extinguished. It is only the crude petroleum, however, which gives off this explosive gas; the refined oil is never dangerous. In a recent discussion at the United Service Institution, the Duke of Somerset expressed a confident hope that the time was not far distant when Her Majesty's ships would be able to use petroleum as fuel instead of steam coal. Such a change means nothing less than that a steam frigate, which now carries ten days' steam coal, costing say £1,000, would then be able from its portability to carry twenty days' fuel in petroleum, costing £500.

The London & China Telegraph.

LONDON, THURSDAY, MAY 4, 1865.

THE REDUCTION OF THE TEA DUTIES.

THE allotment by Mr. GLADSTONE of £1,868,000 out of the estimated surplus for 1865-66 of £4,031,000 to the reducing the tea duty by one-half, whilst confessedly a boon to the labouring classes, affords opportune relief to the trade by aiding in the moving off of excessive stocks of low priced teas. The rise in all descriptions that has taken place since the announcement of the Budget is not, however, to be exclusively credited to the remission, for to this both China and United States advices have conspired; the former as indicating a curtailment in shipments, and the latter an active demand for the descriptions that lay heaviest on our hands,—Green teas and Oolongs. Prices had previously receded so far that only the slightest stimulant was required for their reanimation, and the markets had already exhibited this tendency. The bidding in of lots at what were generally deemed extravagant valuations, showed the firmness of holders; and large purchases made by leading speculators, who are suspected of having been initiated into the secret of the forthcoming Budget —with what truth we will not pretend to say—aided in maintaining the advance; still, to most importers so large a reduction was, to say the least, unanticipated. The arguments which led to a remission of 5d. per lb., in the last financial year, were supposed already to have spent their main force; but in Mr. GLADSTONE'S mind it appears they were only awaiting opportunity to gain their due momentum, the rate of increase in the consumption of tea being accelerated in the degree that it is cheapened to the mass of the population. Independently of this reduction, the character of the advices received and the extent of the exports, the fact that we are close upon the period when demand will begin to overtake delivery, has added its influence.

That Mr. GLADSTONE should so effectually have rescued himself from the strife of barley to give the benefit of a reduction of 20 per cent. on the long price of tea is certainly creditable to his discretion and independence, refusing, as he did, to abandon the significancy and *efficacy* of the present reduction by frittering away a portion of its cost to less general interests. The reduction from 1s. to 6d. was a matter of justice, and a proof of financial foresight; but we must yield expression to the unnecessary individual injustice by which it is accompanied, not so much through giving immediate effect to it, as in not allowing a retrospective action to the measure so far as concerns teas released from bond and still held in original packages. On the 1st inst., the CHANCELLOR of the EXCHEQUER took advantage of an unguarded inquiry as to the application of the remission to "stocks in hand" to deny its practicability, as it would involve an inquiry unknown to our usages; but there are records of duties paid, and all such packages as importers could vouch for as being still held by them or others from them, and released within a given period, might reasonably have experienced the benefit of the remission. The grace of the gift has thus been marred by the manner of the giving. If this plan were judged undesirable, the giving immediate effect to the resolution should not have been urged so warmly on the Committee of the House.

As to the future of the home market, much confessedly depends on reduced consignments, or rather the course taken by buyers in China; for teas of fine quality, properly cured and up to the standard, realise high prices; whereas deliveries of teas late, weak, and out of condition, cannot have other than a depressing influence. The warnings we have given to China shippers, the advices sent out by London houses to their agents, and the experience derived from bills drawn against tea discounted by the banks, which, when realised, failed to net the first cost, have had their effect; but there is still the liability to too sanguine expectations, and it is impossible to weed out the adventurers concerned in overtrading, or speculators who seek merely to take advantage of the rate of exchange to make good their losses by shipping produce. Early increased consumption in this country, *as the direct effect of the remission*, cannot be largely calculated upon, the rise of prices (and these are still advancing), counteracting to a sensible extent that advantage; whilst as to the rise, the influences operating on it through the American and Continental markets, are at once so exceptional and yet likely to be so permanent, that a fair prospect presents itself of present quotations being well maintained, and without undergoing that speedy revulsion which followed on the advance of prices which the former reduction of the tea duty occasioned.

The data for determining the effect of remission of duty on tea, on the consumption of that article in the United Kingdom, are partly provided by past experience; but the actual fact that it is now more than ever brought within reach of the masses, and that labourers are prosperous and trade good, adds a new condition to be taken into account. Mr. GLADSTONE is too fond of analogies not to have reverted in thought, as he schemed this item of the Budget, to the effect of a similarly proportionate reduction in 1746, when an abatement of the tea duty from 4s. to 2s. per lb. resulted in an undiminished revenue from that article; a period, however, too remote for carrying out the analogy. A further reduction in 1784 stimulated consumption almost in a similar ratio. On coming to the present century we find the reduced duties of 1835 creating a consumption of 44,000,000 instead of 33,000,000 pounds, whilst the increase in 1840-41 caused an actual decline in collected duties from the amount reached five years previously. The enlightened legislation of Sir ROBERT PEEL in 1842 revived the receipts, and the deliveries of this article have doubled within the last twenty years. It would require the consumption by every individual in the United Kingdom above ten years of age of 8½lbs. of sugar per annum to make good the sacrifice in favour of tea for the present financial year. This allowance, after all, would be but moderate. In 1863, when the census gave 22,640,000 adults, the average consumption was but 3¾lbs. per head per annum; the proportion arithmetically allotted to the working classes being 2¾lbs., and to those higher in the social scale from that point up to 10lbs. per annum. For ourselves, looking to the general condition of the country, we have every confidence in a rapid augmentation of consumption. In a more general view, this remission must be regarded as fraught with numerous collateral benefits. On the Continent, where all fiscal changes are regarded with intense interest, the realisation of the calculations of the CHANCELLOR of the EXCHEQUER must aid in disseminating that doctrine of pure political economy under which specific Customs tariffs judiciously diminished may be shown to yield eventually, directly or indirectly, a larger and increasing revenue. The United States during the past year took but half its accustomed supply, and notwithstanding a differential duty in favour of tea brought direct from the country of production, must mainly recuperate its stocks from our own deliveries. Russia and Prussia, too are improving customers.

THROUGH OVERLAND RAILWAY ROUTE TO CANTON.

THE late enthusiastic inauguration of the meeting of the two seas on the Isthmus of Suez—the prelude of the expenditure of time and money up to a point that will make a ship canal a reality, is calculated to revive in their full force those financial and commercial considerations and political arguments which exist in favour of a through railway route to Calcutta, with an extension to Canton.* The project of a Euphrates Valley Railway, to connect the Bay of Antioch with steamers on the Euphrates, or to be continued eight hundred miles to Bussorah, engaged the attention of the Board of Trade twenty-three years since, and £20,000, furnished by Parliamentary vote, was expended on the survey of the earlier section. The feasibility of a railway was never doubted. The Euphrates Valley was the actual route of our postal transit to and from India, even before the colossal wooden seaman surmounted the first India House. Down to the year 1815 it was thus made available, the distance

* The credit for the original projection and elaboration of the scheme of a Calais, Constantinople, Calcutta, and Canton Railway, must be accorded to Mr. William Pare, of the Seville Iron Works, Dublin, the line to Calcutta being conceived and planned in 1842, and the extension to Canton at a somewhat subsequent date. Sir R. M. Stephenson is already engaged on a projected line from Calcutta to Canton.

tion, was arrested, tried, condemned, and summarily executed. If in truth the linguist was guilty of the charge laid against him, we cannot regret the fate, however appalling, which has overtaken him. So much depends on the integrity of an interpreter, that any dereliction in duty should be severely punished. This lesson will no doubt become widely known, and will afford a salutary warning to the natives who are employed in those foreign consulates where a qualified European interpreter is not provided. To Chinese are the most important negotiations entrusted, the correspondence is left altogether in their hands to represent as they like, and the Consuls are mere puppets in the hands of men for whose character, and even for whose knowledge of the niceties of the Chinese language, they possess no guarantee. For these reasons the execution of Wang is an event upon which we may congratulate ourselves, as its terrors will take a long time to wear away from the minds of men in his position.

We understand that the following figures afford an approximation to the results of the census of foreigners :—

English Settlement :—	
Males	990
Females	75
Children	40
Total	1,105
Hong-que :—	
Males	750
Females	70
Children	45
Total	865
Pootung :—	
Males	48
Females	4
Children	6
Total	58
Grand Total of Foreigners	2,028

A report has been issued, by the direction of R. C. Antrobus, Esq. (commanding Shanghai Volunteers), of the present existing rules of the corps, and suggesting sundry improvements. A permanent recruiting committee is strongly recommended, as well as an extraordinary meeting of the corps to discuss the state of the standing orders. The committee reports that the proficiency in drill is far from satisfactory, and that it is desirable to place all the members under elementary instruction. A knowledge of guard and patrol duty is mentioned as especially requisite to the efficiency of a Volunteer Corps, as also is regular attendance on the part of those advanced from squad-drill to parading with the battalion. The question of a Volunteer Club is also mooted, and strongly approved of as tending to promote friendship among the different members of the corps ; and it is suggested that members of one corps should be considered casual members of all other companies throughout China and Japan, and be entitled to fall-in with them during their drill. The following detail is given as being, in their opinion, the strength and organisation of a permanent Volunteer establishment, such as Shanghai can adequately maintain, and which the position of affairs demands :—

Cavalry.—One Troop	50 Men.
Artillery.—A Battery (or Company)	75 „
Engineers.—A Skeleton Company	25 „
Rifles.—4 Companies	300 „
Grand Total, ...	450 Men.

The formation of a band is strongly urged, and the report concludes by setting forth the advantages of, and the necessity for, a permanent and efficient force. The Committee consisted of Messrs. P. Maclean, J. Markham, Francis A. Groom, and R. F. Gould.

KIU-KIANG.

A correspondent at Kiu-kiang informs us of the dulness prevailing at that port. The weather has lately been so unseasonable, that the training for the races and all other outdoor amusements have come to a standstill. An amateur theatrical company, composed of the tidewaiters and municipal and consular constables, have devoted themselves to dispelling the *ennui* which weighs on the spirits of the foreign residents. On the evening of the 11th inst., the following pieces were put on the stage :—"A Desperate Game," and Tom Taylor's farce, "A Blighted Being." We have received no criticism on the performance, but the actors are said to act very fairly as a body. A large force of braves has been sent into the neighbourhood, and, as usual, there has been a slight disturbance. Nothing, however, of any importance had occurred up to the date of our advices.

HONG KONG.

The P. O. mail of 10th Feb. arrived out on the 25th March. The dates are down to the morning of the 26th.

The following on the "Celestial Cup," is from the *Evening Mail* :—

We have much pleasure in drawing attention to a specimen of native silversmiths' work now on view at Mr. D. Lapraik's. Our readers are aware that, a short time ago, many old members and friends of the London Scottish Volunteers subscribed for a challenge cup to be competed for by members of that corps and to be designated "The Celestial Cup." In order to give the proposed prize an appearance suited to the place of its origin, the ornamentation and workmanship are entirely Chinese, the outline and conformation of the cup being after the present English manner. The "Celestial Cup" is two feet high from the bottom of the pedicle to the apex of the lid. The body of the vessel is well proportioned as regards breadth and depth, and has a rich, massive appearance, rendered still more effective by the addition of two dragon handles. The lid is a very fine piece of workmanship, displaying good castings of several dragons in that state of confused animation which pervades all Chinese designs, and seems to mark their furthest reach of fancy in metallic modelling as in alto relief. The rampant attitudes of the intermingled reptiles are managed so as to bring the general outline of the lid to a proper apex, while about the base native vegetation, in which the lotus flower is most prominent, has been appropriately introduced. The body of the vase has, for its external decorations, the usual quaint-looking fighting figures in relief, the perspective being that of the willow-pattern school displayed in perfection. The military tactics which the Chinese artist thus hands down to posterity will doubtless serve to remind the members of the London Scottish Corps of the vast strides that have been made in warfare since the period illustrated on the "Celestial Cup,"—the same era of which traces are preserved in the fights at Donnybrook Fair. Though the larger portion of the space has been devoted to military evolutions, as befits the purpose for which the prize is presented, there are other representations of Chinese life and manners given in the same quaint style. The handles are very finely wrought, and show that in delineating the lizard tribe the Chinese decidedly excel. The bowl is supported by a cluster of bamboos, the canes and leaves being well executed, and gracefully disposed to answer their purpose in the general design. They form, we think, the most attractive feature of the work, and, as well as the lid and handles, the most elaborately wrought. The bamboo, we need scarcely mention, is everything with the Chinese,—food, clothing, furniture, and utensils of labour. It should never be absent in any artistic design intended to wear a national aspect, and there are few works of art in the precious metals where it may not, as in the present case, be most suitably introduced.

Having thus paid a proper tribute to the cunning workmanship of the Chinese craftsman, it only remains for us to mention that the "Celestial Cup" will be sent to England and forwarded to Lord Elcho by the next out-going mail. The terms of competition have been left to his lordship, but it is understood that it can only become the property of the competitor who wins it for two consecutive years.

This is, we suppose, the first prize ever sent to England by any colony ; and the "China Cup," lately subscribed for, or begun to be subscribed for at Shanghai and in Hong Kong, will in all likelihood, be the second. The latter, we doubt not, will be equally welcomed by our crack shots at home, and both will do honour to the Volunteer spirit which marks Englishmen, even in the most distant colonies.

We must not omit to notice the inscription, with the wreath encircling it. The former, which is neatly engraved, indicates the origin and destination of the gift ; the latter, the nationality of the givers and receivers, it being formed of such flowers as the heather, the "forget-me-not," and the wild rose, with the thistle as a central gem ; over the latter paws the rampant Scottish lion, and a scroll is legible with the motto upon it of "Wha daur meddle wi' me !" which is a good Doric rendering of the old legend, "Nemo me impune lacessit."

The value of the "Celestial Cup" is about five hundred dollars, and the number of subscribers amounts to sixty. After being on view at Mr. D. Lapraik's during to-morrow, it

will, we believe, be exposed at the club, previously to being packed up for transmission by the P. and O. Company.

His Royal Highness the Duc de Brabant left Hong Kong on his way home, via Galle, in Her Majesty's ship *Adventure*. We understand that H.R.H. had received telegrams from Europe informing him of the serious illness of his father, and requiring his immediate return, consequently he has been obliged to defer his projected visit to the North and Japan.

The following is the circulation of the banks :—

Oriental	$798,795.
Chartered Mercantile	$788,270.
Chartered Bank of India	$602,132.
Agra	$452,891.

Tenders have been invited for the erection of the City Hall, and a premium of $1,000 offered for the best design.

The building will be required to comprise the following accomodation :—

In One Wing—A Theatre, capable of containing 500 spectators, independently of the gallery. The width of the proscenium and the depth of the stage to be not less than 28 and 35 feet respectively.

On the Basement Floor—Servants' rooms and kitchens.

On the Ground Floor—Entrance-hall, secretary's room, cloak-room.

On the First Floor—The St. Andrew's-hall with orchestra, banqueting-hall, retiring-rooms.

N.B.—It is considered desirable that the St. Andrew's-hall, or banqueting-hall, should communicate with the dress-circle of the theatre.

On either Floor—An apartment for the Chamber of Commerce.

A public library, calculated to afford space for 10,000 volumes, and for the museum of the South China branch of the Royal Asiatic Society.

The following report on the Post-office appeared in the Hong Kong *Gazette*, and will be found interesting :—

General Post-office, Hong Kong, Feb. 22, 1865.

Sir,—I do myself the honour to report, for the information of his Excellency the Governor, that the revenue which accrued from this department to the colonial Government, during the year 1864, amounted to $86,341.11, being an increase of $17,581.2 on the revenue for the year 1863, $35,208.36 on the revenue of 1862, and $51,021.57 on the revenue of 1861, which shows the steady and continued prosperity of the office.

The expenditure for the year 1864, so far as the same has been defrayed by the colony, amounts to $24,431.5, or $3,215.63 in excess of the expenditure of the year 1863, and this is accounted for by the continued increase in the gratuities paid to masters of vessels, under the 12th clause of the Post-office Ordinance, for the conveyance of ship mails; the employment of an additional sorter, and the increased expenditure at the Packet Agencies at the Ports in China and Japan.

The amount of Imperial revenue which was collected in Hong Kong, and remitted to the General Post-office in London during the year 1864, was £26,067. 11s., being an increase of £1,981. 6s. on the revenue of 1863. £7,504. 9s. 3d. on the revenue of 1862, and £15,809. 7s. 9½d. on the revenue of 1861.

In the cases of both the Imperial and Colonial revenue I consider the increases to have arisen from the additions which have been made to commerce at the various ports in China and Japan, and also to the addition to the mercantile and banking population of Hong Kong.

The total revenue of the Hong Kong Post-office for the year 1864, amounts to $21,1465.35, or a total excess over the previous years' revenue of $27,091.26.

From August last the business of the department has been carried on in a portion of the Supreme Court House, and pending the completion of the new Post-office, now in course of erection, these temporary offices will be sufficient for the requirements of the department. I fully anticipate, however, that in the new building I shall be able to give the public increased facilities, and I hope to make many improvements in the efficiency of the office.

During the past year the mails sent and received by the French line of packets have increased in some small degree.

The compulsory use of Colonial postage stamps in the payment of postages in Hong Kong, and also at the ports, has met with complete success; and although great opposition was made to the measure at the outset, it is now, I believe, admitted on all sides to have advantages over the old system of payments in money, and so far as the department and its agencies are concerned, the introduction and use of stamps has been found an improvement.

The illegal transmission of correspondence by the great firms still continues; and it has been observed that although some of the houses who have important agencies at Shanghai seldom receive their correspondence arriving by the British Contract Packets through the post, yet in many cases their correspondence sent from and to the same place by the French Mail Packets passes through the Post-office; and I submit that this fact goes to show that greater attention is paid to the regulations and law which prohibits the transmission of general correspondence outside the mails, on board the Messageries Imperiales steamers, than is given to the subject on board the vessels of the Peninsular and Oriental Steam Navigation Company, which are under contract to Her Majesty's Government for the conveyance of mails, and who are prohibited under that contract from carrying letters otherwise than in the mails, excepting of course such letters as are exempt by law, but notwithstanding, the vessels of this company never make a trip to or from the northern ports under contract, or otherwise, without illegally conveying correspondence; and although I have taken every means in my power to prevent the continuance of the system, which injures the revenue and gives advantages to those who adopt it, over those who adopt the legal method of sending their correspondence, I regret to say that my attempts have been unsuccessful.

The accounts of the department still grow in intricacy, and I am unable to recommend any change which would work advantageously in the system of keeping them, except it be to adopt a similar system to that which I believe prevails with the Australian Colonies, or some of them, and that is for the colony to retain all the revenue collected here, the Imperial Post-office acting in like manner with that collected in London, and for the colony to contribute annually, say £20,000, or some other fair fixed sum which might be arranged, to the General Post-office in London. A system of this kind would much lessen the work of the bookkeeper and the bulk of the accounts here, and I think be more satisfactory to the department, the local Government, and the Imperial Post-office; and if such an arrangement is entertained by the authorities in London, a simple system of accounts might easily be adopted to suit all parties concerned.—I am, Sir, your most obedient servant, F. W. MITCHELL, Postmaster-General.

The Hon. W. T. Mercer, Esq., Colonial Secretary, Hong Kong.

SIAM.

BANGKOK.

His Majesty the King of Siam reads his *Siam Times*, and will have justice done in cases where his newspaper points to offenders. Judgment has been given in the case of Amdeng P'lap *v.* Nai P'in. The latter was charged by the complainant with abduction and cruelty. The case was sent by the tribunals at Chantabun to Bangkok for trial, and in that capital judgment was given against Nai P'in. The particulars of the case were published in the journal named, and thus reached the notice of His Majesty, who issued a peremptory order for Nai P'in's appearance before the superior tribunals in Bangkok. The facts were proved, and it was decreed that Nai P'in should receive sixty lashes, be subjected for three days to the fire, *i.e.* sit on an iron tripod over burning embers, pay a fine of twenty-four catties, 1,920 ticals, and suffer imprisonment. The sentence has not yet been executed, and will be deferred till his Excellency Chow Phya Phraklang returns from Laconchasri. He may have some influence in modifying its execution. "It is more than probable (remarks our Siamese contemporary) that Amdeng P'lap's grievance would never have been redressed had it not been published. We do not say this to induce others to pursue the same course in petty affairs, but where there is a real wrong and grievous hardship which the victims thereof have reason to think will not meet with due attention from the appointed tribunals, our columns are open to them, and even in Siam we think there are few hardy enough to brave public condemnation and reprobation."

The Siamese gunboat which went to look after the Captain of the *Fah Kee* has returned. She brought from Chumpaun the two Chinese left there by the mate, and from Patchu the European who from illness was obliged to remain behind. The long-boat of the *Fah Kee* has also been brought on to Bangkok. Nothing has, as yet, transpired respecting the second mate who strayed on shore this side of Singora.

His Majesty the Supreme King of Siam has appointed Mr. A. Markwald Consul for Siam in Berlin, and Mr. P. W. Auchincloss Consul for Siam at Batavia.

Mr. Paul Lessler has been appointed Prussian Consul for Siam. By the treaty between Prussia and Siam, the citizens of the following German States will come under the protection of the Prussian Consul :—Prussia, Batavia, Saxony, Hanover, Wurtemburg, Baden, Electoral Hesse, Grandducal Hesse, Saxe Weimar Eisenach, Saxe Meiningen, Saxe Altenburg, Saxe Coburg Gotha, Schwarzburg, Rudolstadt, Schwarzburg Sondershausen, the Elder Branch of Reuss, the Younger Branch of Reuss, Brunswick, Oldenburg, Nassau, Free Town of Frankfort, Grand Duchies of Mecklenburg Schwerin, and the Grand Duchies of Mecklenburg Strelitz.

It is reported that in digging about the ruins of an old temple at Ayudhia, an image of Budh was found. The image is about 3 feet high. It is a composition of copper and gold, and the metal is said to be worth 8 ticals for every tical's weight. The image is being burnished, to be in a suitable state for presentation to the King. It is said that some jewels and some old silver coins were likewise found.

The first marriage ever performed between a British subject and a Siamese, with a regular Consular license, has taken place at Bangkok. The bridegroom was a compositor in the office of the *Siam Times*.

COCHIN CHINA.

SAIGON.

Lieutenant Chevalier, aide-de-camp to the Governor, who went to Huć in the *Cosmao*, has returned to Saigon after having accomplished with success the mission with which he was entrusted. If the results correspond to the promise of the Annamite Government, we may hope, remarks the *Courier du Saigon*, to see an end put to the assistance rendered by some

D. NICHOLSON AND CO.,

SILK MERCERS TO THE QUEEN,

50 to 52, ST. PAUL'S CHURCHYARD, LONDON.

ESTABLISHED TWENTY-FIVE YEARS.

IMPORTANT TO LADIES IN INDIA.

OWING to increased facilities offered by the General Post Office, D. NICHOLSON and CO. now undertak to forward to India, "Post Free," packages of Patterns containing upwards of 200 pieces of Silk, each piece 3½ inches by 2½ inches square, representing every colour, pattern, and quality of Silk now fashionable in London and Paris, from 1s. 6d. to 10s. per yard. A similar assortment may be had of Muslins, Grenadines, and every kind of Dress Fabric; also Prints, Calicos, Linens, Woollen Cloths, Doeskins, &c., &c.; in short, every description of Linen and Woollen Goods which can be represented by patterns. Each pattern is marked the width and price per yard or dress; so that no misunderstanding can possibly arise; and correspondents are able to ensure having the exact goods they order by retaining a portion of the pattern of each article they require.

D. N. and CO. have been induced to adopt this course from the fact that the Post-Office authorities have reduced the rate for patterns, and also that during their business with India for the past twenty-five years, correspondents have continually expressed a wish to have patterns or samples of the goods they required sent them for selection. From the great expense of postage it has been practically impossible until now to send a sufficient variety to be worthy of the name of an assortment. This difficulty is now removed, and ladies in India may have almost as much variety to select from as though they were buying in D. N. and CO.'s London warehouse.

D. NICHOLSON and CO.'s Trade List or Price Current gratis and post free.

D. N. and CO. invite the attention of their Foreign and Colonial Correspondents to their Trade List just published, which contains sixty pages of matter, comprising full particulars of every description of Silks, Woollen Goods, Muslins, Calicos, Prints, Ladies' Underclothing, Baby Linen, Mantles, Shawls, Men's and Boys' Clothing, Linens, Blankets, Carpets, Hosiery, Gloves, Ribbons, Lace, Haberdashery, Jewellery, &c., &c. Also numbers and widths of Ribbons, Tapes, &c., and sizes in Gloves and Hosiery; in short, all necessary information for ordering this class of goods from D. N. and Co.'s House in London.

Correspondents desiring the above Patterns or Price List are requested to enclose a London reference or the value of 10s. English. This charge is not demanded as an equivalent for the patterns, although they cost much more, but simply as a guarantee of the *bona fides* of the writer, and will be allowed in any order that may ensue.

D. NICHOLSON AND CO., Silk, Woollen, and Manchester Warehousemen, Wholesale and Retail, 50, 51 and 52, St. Paul's Churchyard, London.

ESTABLISHED TWENTY-FIVE YEARS.

BANKERS:—MESSRS. MARTIN AND CO., 68, Lombard-street.

JOHN DRAPER,

WHOLESALE STATIONER, PRINTER, AND MANUFACTURER OF ACCOUNT BOOKS.

STATIONERY WAREHOUSE, No. 5, PRINTING OFFICES, No. 6, LITTLE TOWER-STREET, LONDON, E.C.

JOHN DRAPER, WHOLESALE STATIONER, 5 & 6, LITTLE TOWER STREET, E.C.

Agent for Milner's Patent Resisting Fire-Proof Safes.

IMPORTANT

TO PERSONS RESIDING IN HOT CLIMATES

ASH'S PATENT "PISTON" FREEZING MACHINE AND WINE COOLER is the FIRST REALLY EFFECTIVE APPARATUS for TROPICAL CLIMATES.

It will produce PURE BLOCK ICE, FREEZE and MOULD DESSERT ICES, and ICE WINES in any temperature. It is remarkably simple, will not corrode or get out of order, and can be worked (with or without Ice) by the most ignorant servant. The Freezing Salts employed are indigenous to most hot climates, easily and cheaply obtained. A *bonâ fide* Receipt for preparing them given with each Machine. It is not too much to say that the "Piston" Freezing Machine is rapidly becoming indispensable to all European residents in India and China.

PRICES:—For 1 Bottle, 1 Block of Ice, 1 Dessert Ice £4 0 0
For 2 Bottles, 2 Blocks of Ice, 2 Dessert Ices 6 10 0
For 4 Bottles, 4 Blocks of Ice, 4 Dessert Ices 11 5 0

If without fittings (merely as Wine Coolers):

For 1 Bottle £2 0 0
For 2 Bottles 3 0 0
For 4 Bottles 4 5 0

When Dessert Ices are never required, these Wine Coolers can be fitted with BLOCK ICE MOULDS, at 30s. for each Mould so fitted.

SOLE MANUFACTURER:

GEORGE SIMPSON, 315, OXFORD STREET, LONDON.

Orders enclosing remittance can be sent direct, or through Messrs. H. FOGG & Co., Shanghai.

Digitized by Google

from London to Bussorah being accomplished in 30 days, and thence by fast-sailing schooners to Bombay in 12 days more. The Syrian disturbances, involving the intervention of France, have been regarded as having prevented the British Government from giving effect by a guarantee to the scheme of a Euphrates Valley Railway; but the continued reticence of successive cabinets since 1857 must be taken as indicating a conviction of the insufficiency of either a line from Antioch connecting with river steamers, or its continuance to Bussorah, to answer present requirements, as involving several transhipments. Commerce is best diverted by lessening the number of intervening agencies. The proposed through route contemplates the extension of the line of railway from Vienna to Basiasch to the Bosphorous, the road crossing by a tubular bridge, thence to Alexandretta on the Mediterranean, and by the Euphrates Valley and the northern shore of the Persian Gulf to Kurrachee. Here it would presently unite with lines completed or in progress, connecting it on the one hand with Bombay and on the other with Calcutta, whence the route would lie through Burmah and the intervening Chinese provinces to Canton. One-fourth of the route from London to Calcutta is already built in Europe, and one-half the distance from Bombay to Calcutta completed. With such a choice of way, few engineering difficulties need be encountered, whilst continuous and available labour could at all points be relied upon. We do not disguise from ourselves the enormous cost of the undertaking; but commanding, as this railway must, a fair proportion of the trade between Europe and the Far East—say one-fourth of the whole aggregate—creating as well as developing resources along its route, and constituting the grand stem of numerous offshoots, we are satisfied that the required capital would be forthcoming on the provision of a Government guarantee of 5 per cent. on capital account; this account to include maintenance of way, and the Imperial guarantee to be supplemented by another of 1½ per cent. by the Indian Government. That Government contributes a moderate annual sum already to the promotion of intercourse with China, and could hardly be said to have a secondary interest in a through route which would stamp a new value on the railways of India, increase its actual trade, and augment its powers of competition in European markets. A legitimate basis of calculation is afforded by the Indian railways in operation. Of the guarantee on the lines of £13,000,000, upwards of £2,500,000 have been paid back, half this amount between May, 1863, and May, 1864. The success of those lines is no longer problematical, and each succeeding year places them in a better position, accruing profits augmenting rapidly in the ratio of their extension. The local trade of a through railway route, even in Central Asia, would be enormous. Whilst in Syria it would lead to a large investment of European capital in intertropical products, it would, as it proceeded, effect communications from Bushire with Bokhara and Herat, and stimulate whole Asiatic populations, who only need a motive to exertion to produce any required amount of indigo, spices, cotton, and other productions.

The materials of exchange between China, India, and Europe are especially suited for railway conveyance, a consideration only second to that of the value of time. Numerous minor articles, too, would thus find their way into imports and exports. The effect of such a railway on the inland trade of China, regarded as subsidiary to foreign trade, can hardly be exaggerated. Passing over an immense region of country, and tapping innumerable rivers and canals, it would prove of infinite service in breaking up those combinations among China merchants and dealers that now harass our transactions, and would afford us rare facilities for disposing of our goods. The extension to Canton is necessary, if only to improve the advantages in our power. The effect of the present overland route on our trade is but a slight token of the results to be anticipated from a line of unbroken railway communication from Ostend to Canton. Besides extending the profits of the foreign trade carried on by China beyond the immediate vicinity of the existing treaty ports, it would enlarge China dealings with neighbouring islands, and secure for conveyance a large proportion of the products of Java, Manila, and Borneo, in addition to considerable quantities of tea, silk and other products of Japan. The estimate we have given as to the proportion of through transit trade refers only to merchandise; this through line, so far as it linked existing lines, would have the monopoly of the conveyance of the precious metals and the revenue derivable from a conterminous telegraphic line. The additional supply of raw products thus secured would alone compensate for the cost in a national point of view, for it is in the manufacture of these our chief profits are obtained. And not only would trade be rapidly augmented, but better regulated. A week to Calcutta! Ten days to Canton! What a triumph would this be; and it is a triumph within our reach. A constantly extending trade is the very atmosphere and life of all commercial nations; and, looking to our improving relations with China, a railway scheme which will make that country the terminus of European and Indian lines, must be accounted full of promise. The financial nucleus of the company to undertake the work may be found among those who have interested themselves in the Euphrates Valley Railway; but a through overland route would excite from the first infinitely greater interest, commanding the attention of the whole monetary world. The political reasons that should influence the Government to furnish the required guarantee are of the first magnitude. The secured territorial position of France on the Isthmus of Suez enables her to dominate at will over the commerce of the Red Sea, and to confront us on our path to India. The Turkish question continues of far greater moment than is commonly supposed, and if this through railway would solve none of the problems that there present themselves, it would at least avert impending dangers; giving as it would to Turkey the means of financial and industrial resurrection. We would gain the advantage of protecting more securely an important portion of our Indian frontier, and with the strategic basis thus provided, could not fail to realise the apprehensions expressed years since in the *Revue Contemporaine* by the Count DE WARREN, and to maintain an ascendancy of political influence and commercial power which no possible combinations could weaken.

BOARD OF TRADE RETURNS.

The Board of Trade Returns for the month and three months ended the 31st March may be regarded on the whole as favourable, although there are no changes calling for any special remark. The total declared value of exports for the month of March is £13,770,154 against £13,555,674 in 1864 and £10,217,473 in 1863, which is an increase over the former period of £214,480 and over the latter of £3,552,681. For the three months of the present year the total is £35,635,707; in 1864 it was £36,667,381, and in 1863 £27,561,204, which shows a decrease of £1,031,674 as compared with 1864, but an increase of £8,074,503 as contrasted with 1863. The most important variations exhibited in the present returns are, as respects exports, an increase in the articles of alkali, beer and ale, coals and culm, cotton manufactures, earthenware, hardware and cutlery, linen manufactures, machinery and seed oil; but a decline in cotton yarn, haberdashery and millinery, linen yarn, metals, thrown silk, silk manufactures, woollen and worsted yarns, and woollen manufactures. As regards imports, an increase is shown in raw cotton, guano, tanned hides, tallow, wool, cocoa, coffee, spirits, sugar, and tobacco. On the other hand, there has been a decline in flax, leather manufactures, flaxseed and linseed, raw silk, woollen manufactures, tea, and wine. The trade to and from the Far East, as far as distinctively exhibited in these returns, is represented by the following figures:—

EXPORTS TO CHINA AND HONG KONG.

	For the Month ended 31st March. 1863.	1864	1865.
Cotton yarn	60,800 ..	63,042 ..	263,990 lbs.
Cotton manufactures ..	5,007,244 ..	8,437,906 ..	11,569,177 yds.
Worsted stuffs	1,120,902 ..	1,231,482 ..	1,175,182 ,,
Woollen and worsted cloths	245,959 ..	110,969 ..	143,092 ,,
Lead	2,413 ..	549 ..	50 tons
	Value for the Three Months ended 31st March.		
Cotton yarn	£19,560 ..	£56,591 ..	£53,316
Cotton manufactures ..	163,600 ..	386,967 ..	547,523
Worsted stuffs	127,053 ..	192,859 ..	243,968
Woollen and worsted cloths.	73,423 ..	67,185 ..	62,098
Lead	92,026 ..	33,609 ..	15,191

The quantity of Cotton Manufactures exported to other ports and countries of the Far East during the month of March, and the value for the first three months of the present year, are thus returned:—

	Quantity for the Month ended 31st March. 1863.	1864.	1865.
Ceylon	746,534 ..	1,181,614 ..	1,592,521 yds.
Singapore	848,288 ..	3,080,464 ..	7,344,557 ,,
Java	507,720 ..	1,857,213 ..	3,213,562 ,,
Philippine Islands ..	— ..	2,402,362 ..	462,620 ,,
	Value for the Three Months ended 31st March.		
Ceylon	£33,532 ..	£159,148 ..	£74,072
Singapore	60,987 ..	276,231 ..	316,590
Java	32,444 ..	173,059 ..	149,981
Philippine Islands ..	37,400 ..	162,159 ..	189,201

Digitized by Google

Of Cotton Yarn 199,200 lbs. was forwarded to Singapore in the month of March, and 33,192 lbs. to Ceylon; the value of the export, for the three months ended 31st March being—to Singapore, £43,934; and to Ceylon, £3,450.

IMPORTS.

Of Raw Cotton the import is smaller for the month of March, both from China and British India, as compared with last year:—

Quantity for the month ended 31st March.

	1863.	1864.	1865.
British India.. ..	122,676 ..	225,383 ..	218,506 cwts.
China	19,635 ..	76,488 ..	60,494 „

For the Three Months ended 31st March

British India.. ..	387,701 ..	459,028 ..	404,610 „
China	26,951 ..	105,476 ..	106,146 „

Value for the Two Months ended 28th February.

British India.. ..	£2,022,469 ..	£2,252,206 ..	£1,261,003
China	49,505 ..	265,905 ..	269,858

Of unrefined Sugar, the quantity imported from Java and the Philippine Islands, in the month ended 31st March, was 12,093 cwt. of the 3rd quality, and 130,900 of the 4th quality. The quantity for the three months of the three years, and the value for the first two months:—

Quantity for the Three Months ended 31st March.

	1863.	1864.	1865.
Of all qualities (cwts.)	269,862 ..	23,650 ..	213,880

Value for the Two Months ended 28th February.

Of all qualities	£92,428 ..	£10,843 ..	£72,261

Of Hemp the import from the Philippine Island in the month of March was 40,507 cwt., and the quantity and value for the three years is given thus:—

	1863.	1864.	1865.
Quantity to 31st March (cwts.)..	59,516 ..	3,008 ..	76,083
Value to 28th February.. ..	£22,235 ..	— ..	£41,250

Of Coffee, the importation from Ceylon for the month of March was 6,168,032 lbs., and the quantity and value for the three years as follows:—

	1863.	1864.	1865.
Quantity to 31st March (lbs.) ..	11,136,422 ..	8,012,292 ..	9,553,501
Value to 28th February.. ..	£224,397 ..	£165,777 ..	£117,887

These Returns furnish also the Declared Value of the British and Irish Produce and Manufactures exported from the United Kingdom for the two months ended the 28th February. The ports and countries of the Far East are debited with the following amounts:—

To	1863.	1864.	1865.
China (exclusive of Hong Kong)..	£191,292 ..	£359,993 ..	£493,137
Hong Kong	123,287 ..	186,654 ..	161,655
Singapore and the Eastern Straits .	84,739 ..	280,110 ..	264,609
Ceylon	59,899 ..	181,117 ..	81,408
Netherlands India	30,283 ..	173,521 ..	98,729
Philippine Islands	61,029 ..	131,542 ..	260,327
Japan	13,467 ..	39,872 ..	59,812

Underwriter (Marine Department).
PHILIP SECRETAN, Esq.

Manager (Fire Department).
MORELL THEOBALD, Esq.

REPORT,

Presented to the First General Meeting of Shareholders, held at the London Tavern, Bishopsgate-street, on Thursday, the 20th day of April, 1865.

The Directors, in presenting the Statement of the Accounts to the 31st December, 1864, embracing the transactions of the Company from its commencement to that date (a period of eight months only), have much pleasure in congratulating the Shareholders on the satisfactory progress of the business of the Company.

The Accounts, which have been examined and certified by the Auditors, show that, after having paid office charges and other expenses, losses in the Fire Department, and all adjusted claims for losses, averages, and returns in the Marine Department, there is a balance on income account of £59,719. 16s. 6d. This sum, less 10 per cent. deducted as stated in the Balance-Sheet, will be carried forward to the account for 1865.

The Directors report with much satisfaction the acquisition of the business of the Oriental and General Marine Insurance Company, a Company which had attained a position of considerable importance in the City.

The Auditors, Messrs. Johnstone, Cooper, Wintle, and Co., and E. H. Galsworthy, Esq., retire from office in conformity with the Articles of Association, but, being eligible, offer themselves for re-election.

The Shareholders will be called upon to determine the remuneration of the Auditors.

The Shareholders will also be called upon to alter the 5th and 14th Sections of the 96th Clause of the Company's Articles of Association, in order to prohibit the loan, advance, or investment of any part of the Company's funds, upon or in the Shares of the Company, and to alter the Articles of Association for the purpose of empowering the Directors, with the sanction of general meetings, to declare interim dividends from time to time.

In conclusion, the Directors would remind the Shareholders that they may, by their individual exertions, materially extend the operations of the Company, and trust that no opportunity for doing so will be lost by them.

The following is now the complete list of the Company's agents abroad:—

CALCUTTA	GRANT, SMITH, & Co.
BOMBAY	RITCHIE, STEUART, & Co.
MADRAS	BAINBRIDGE, BYARD, GAIR, & Co.
SINGAPORE	CUMMING, BEAVER, & Co.
HONG KONG	JOHNSON & Co.
SHANGHAI	JOHNSON & Co.
YOKOHAMA	DE CONINGH & Co.

By order,
JOHN SCOTT, Secretary.

IMPORTANT ANNOUNCEMENT

JOSEPH GILLOTT,

Metallic Pen Maker to the Queen,

BEGS to inform the Commercial World Scholastic Institutions, and the Public generally that, by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions, which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street, New York; and 37, Gracechurch-street, London.

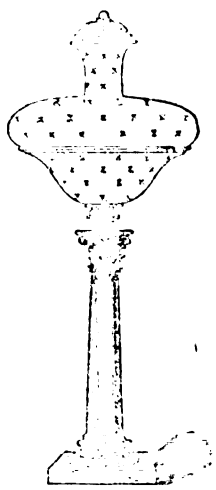
TUCKER AND SON'S

IMPROVED

ENAMELLED PUNKAH TABLE LAMPS.



THE celebrity which TUCKER AND SON'S LAMPS have acquired in the East for burning *steadily* under the Punkah or in side draughts, and *brilliantly* with any of the *coarse native oils*, renders eulogy unnecessary; but having been enabled, by increased facilities of manufacture, very considerably to *reduce the prices* of the above favourite (but hitherto expensive) description of their lamps, and Son beg to notify the fact to the Eastern public.

They are elegant and durable, are finished in exact imitation of many beautiful stones and marbles, such as Malachite, Lapis Lazuli, Serpentine, Sienna, Brocatella, Jasper, &c., and are not affected by heat, damp, friction, or insects; oil, spirits, or acids accidentally spilled. The enamel surface is so inseparable from the base (block slate, proverbial for its strength) that it cannot be removed except by an edged tool. It *requires* simply *dusting*, but if rubbed hard, it only adds a gloss to its appearance—at all times cool and agreeable.

After ten years' constant use and handling, these lamps are none the worse for wear.

Malachite (green), Serpentine (brown), or Lapis Lazuli (blue), are most re commended.

Table Lamp complete, with engraved glasses, as sketch, 72s.

A Plainer Lamp, without the Corinthian capital, 50s. complete.

Either pattern, with plain frosted glasses, 7s. 6d. each less.

*** *The above Lamps are supplied to burn Petroleum or Rock Oil also.*

Orders can be sent through any merchant or Agent, or, if accompanied y a remittance, direct to

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, 12, THREE KING-COURT, LOMBARD-STREET, LONDON, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co's Toilet Vinegar, Inexhaustible Salts, Aromatic Vinegar, Aromatic Eau de Cologne.

JOHN GOSNELL and Co.'s Prince of Wales Perfume.

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

JOHN GOSNELL and Co.'s La Noblesse Perfume.

JOHN GOSNELL and Co.'s La Noblesse Pomade.

JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists' Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co's Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle half bottles, 10s 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty, and by Special Appointment to H R.H. the Princess of Wales, London.

HOLLOWAY'S OINTMENT.—Bad legs, wounds, ulcers, and all descriptions of sores are cured by the proper and diligent use of this inestimable preparation. To attempt to cure bad legs by plastering the edges of the wound together is a folly, for should the skin unite, a boggy diseased condition remains underneath, to break out with tenfold fury in a few days. The only rational and successful treatment, as indicated by nature, is to reduce the inflammation in and about the wound, to soothe the neighbouring nerves, to cool the heated blood as it courses along its vessels, and so render the thin, watery, ichorous discharge consistent and healthy. Holloway's Pills should be taken at the same time to purify the blood and expel the obnoxious humour from the system.

From Marseilles, June 12.—To Ceylon: Dr. and Mrs. Charsley. From Suez.—To Hong Kong: Mr. C. Arnemann.

Per P. and O. steamer from Marseilles, June 28.—To Singapore: Mr. John Ross.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Dates hence are to the 18th March. The London mail of the 10th January arrived out on the 7th March.

The reported intention of the Japanese Government to open the port of Hiogo had received an official denial in a correspondence between the United States Minister and the Gorogio, which had been communicated by that Minister to his Consul in the following terms :—

THE U.S.A. MINISTER TO THE U.S.A. CONSUL.

"Sir,—Rumours of the intention of the Japanese Government to open Hiogo in advance of the time fixed by treaty having obtained currency and even credit, in consequence of the appointment of custom officials to that port who are now connected with the Custom-houses at the open ports, I addressed a letter to the Ministers for Foreign Affairs in reference thereto. While saying that I discredited those rumours because well assured that so important a measure would not be taken unless the Ministers of the Treaty Powers were consulted on the subject, or at least at an early day apprised of such intention, I pointed out that uncertainty always proved injurious to trade, and that I therefore felt it to be my duty to ask what purpose they had in view in making such appointments, so that I might have it in my power to remove uneasiness. I now enclose a copy of the reply of the Ministers. You will please cause this letter, and also the letter of the Ministers for Foreign Affairs, to be published for the information of the citizens of the United States.

THE JAPANESE FOREIGN SECRETARIES TO THE U.S.A. MINISTER.

"We received and understood your letter No. 16 of the 16th February, informing us that you heard a report that our Government has the intention shortly to open the Port of Hiogo. As the said port is in the vicinity of Kioto, the key (throat) as it were to the Western Provinces, it cannot be left uncared for at present, in view of the various internal difficulties existing, wherefore a governor has been appointed to maintain order at that place. When the time fixed for the opening of that port shall arrive, according to the stipulation of the treaty regarding it, the Ministers of the Treaty Powers will, as a matter of course, be consulted; it is, therefore, desirable that you will now cause uncertainty on this subject to be removed. Which we have to state with respect and esteem.

"(Signed MIDAMO IDSUMI NO KAMI.
SUWA JUBA NO KAMI."

A report which had arisen that the French Legation was endeavouring to obtain a concession of the monopoly of the silk trade has been emphatically denied by the Consul-general in the following terms :—"The report is entirely devoid of foundation. So far from any step having ever been made, either directly or indirectly, tending to obtain such a monopoly, the French Legation would consider this or any other particular concession in favour of any nation whatsoever, as a radical infringement of the treaties."

The *Japan Herald* hopes that the Yokohama community will at last be enabled to effect some sort of organisation for the government of their municipal affairs. A public meeting of the land-renters was held on the 7th March, in the court-room of the British Consulate, when Mr Kingdon, as chairman of the former meetings, and convener of the present, was called to the chair, when a scheme put forward by Mr. Piquet was adopted with sundry amendments, till the definitive wording of it was as follows :—

1. That the general municipal committee of Yokohama be composed for a term of one year of eleven English, five Americans, four French, two Dutch, two Prussians, one Portuguese, one Swiss total twenty-six; and that a majority of members form a quorum for business.
2. That the council be authorised to form a code of rules and regulations for the government of the settlement.
3. That the council be empowered to appoint an executive committee of not less than three of their number to superintend the execution of the municipal ordinances.
4. That municipal regulations shall be voted for by a majority of the general municipal committee.
5. That the municipal council shall publish a quarterly account of the expenditure of the municipal funds.
6. That Mr. Piquet and Mr. Schoyer be deputed to inform the Consuls of the proceedings at this meeting, and to request the Consuls to proceed to elect the members of the council from their respective nationalities.

Mr. W. Curtis gives notice, under date of March 1, that he has admitted Mr. Gustave Glackmeyer a partner in his business as proprietor of the Commercial Hotel.

CHINA.

PEKING.

The Mongol Prince Seng-kolin-sin is still fighting in Honan province. He recently reported a victory over long-haired rebels in that province. He is one of those princes who are nearly allied to the Imperial family. When a boy he fancied the monastic life, and spent two years habited as a Lama in a large monastery in Peking. The death of his father, who bore the title of Prince before him, recalled him to his family and to political life, and, on the outbreak of the rebellion in 1852, he was sent into the field against the Taipings. He has continued ever since at the head of an army, which is chiefly supported from the feudal complements of men and contributions of silver of Mongol tribes.

The Taipings being now nearly exterminated, the Government is erecting temples to the manes of soldiers and generals killed in battle in various cities and provinces. Upwards of thirty thousand Mantchus perished at Nanking. To die at the taking of a city, to throw one's self into a well on the approach of the enemy, to continue at one's post till cut down by a ruthless soldiery, are virtuous deeds which the Emperor rejoices to reward with an ancestral fane, an image, and sacrificial offerings.

The following despatch has been published in the China papers, addressed to the Consul at Tien-t-in :—

PEKING, March 2, 1865.

SIR,—In despatch dated January 7th, 1864, Sir F. Bruce instructed Mr. Gibson to issue no passports without previously submitting the names of the applicants to Peking, with exception of such as might be applied for by officers in civil, military, or naval services of Her Majesty, and the partners in large mercantile firms.

I do not find that in any subsequent despatch Sir Frederick Bruce rescinded the instructions above quoted, and I have to direct you to observe that they are still in force.

It came to my knowledge a few days ago, that, about the middle of last month, two foreigners, being British subjects, had, according to the statement of the Lama in charge, forced their way into certain premises, into which he had refused them admittance, breaking or removing the padlock by which the door of the entrance was secured. The identity of the parties having been established by the Chinese who acted as their guide, and who corroborated the statement that there had been some collision between them and the people of the temple in question, the Lama in charge was further interrogated; and then affirmed, not only that the acts of violence above charged had been committed, but that he himself had been twice struck on the back of the head with a whip.

The parties had left Peking on the morning of the day on which the above evidence was obtained, but I recalled them by summons to make answer to the charge of trespass with violence, and they yesterday appeared before me. The two witnesses, however, so completely modified their original statements regarding the trespass that it was impossible, by their evidence as taken before me, to convict the accused of having entered premises in a manner deserving of punishment, and, as regards the assault, although the Lama did still affirm that one of the two foreigners had threatened him with his whip, he professed himself unable to say which of the two. They were consequently discharged, but with an admonition regarding acts of violence or intimidation.

The fact that the testimony on which I issued the summons was not given against the accused with any willingness, either by their guide, who was the servant of their hosts, or by the Lama, who, as the receiver of fees for admittance into premises closed to the public, was alarmed lest he should be compromised with his own authorities, forbids my believing that the first story told by these witnesses was utterly without foundation; and I think it desirable that the junior members of the British community should be reminded that the inmates of any building in China, even though they should have been in the habit of admitting strangers as visitors, have a perfect right to discontinue the practice whenever it may seem to them good.

There are several places in this capital, as in all others, that are not open to the public, but the keepers of which, as is the usage elsewhere, have been ready enough to show them to visitors for a fee. That they arbitrarily raise their tariff from time to time, or that they show themselves on occasions as little disposed to oblige as other people who believe the game to be in their own hands, I have no doubt. But the precedents supplied by their departure from their orders in particular instances, no matter how numerous these may have been, are of no authority. We cannot demand admittance into this temple or that enclosure because some one else has been, even recently, admitted, and that we are still less justified in attempts to extort a concession of the kind such as, were the sides changed, we should indignantly resent as violations of law and treaty, it is scarcely necessary to demonstrate.

I wish attention to be drawn to this question of right of way or visit, more especially in Peking, because, in the first place, there is no act that can be made matter of complaint that has not, here, a greater political significance than elsewhere, and, secondly, I had received but a short time before the occurrence to which I have referred at the beginning of this despatch, a formal complaint from the Chinese Government that the guardians of places not open to the public were frequently overborne by foreigners whom, in conformity with their instructions, they endeavoured to exclude. I requested in my reply, that any British subject committing such an irregularity as that described should be at once taken into custody and forwarded to this Legation.

You will be so good as to have a copy of the rule laid down by Sir Frederick Bruce hung up in the office of the British Consulate, and you will take steps to ensure publicity to the contents of this despatch.

(Signed) THOMAS FRANCIS WADE.

TIEN-TSIN.

From Tien-tsin we learn that several steamers had arrived in the Peiho, namely, the *Ying-tsze-tei*, *Promise*, *Yeddo*, *Gerard*, *Sir Harry Parkes*, *Glengyle*, *Nanzing*, and a few sailing vessels. Mongol hordes continue to ravage the country in the neighbourhood of Jehol. Trade is reported dull, the markets being even more depressed than usual.

SHANGHAI.

The following is from the *Recorder* :—

The great study of the Chinese sages and rulers, from time immemorial, has been how their country might be tranquillised. This is the great end of their most highly-revered classics; and for this consummation their best minds have laboured for more than two thousand years. It is not, then, to be wondered at that their magistrates should give earnest heed to carrying out those principles which were no small part of their earliest education, and the study of their more mature years—a failure in which must be considered by their men of reflection as the failure of a lifetime. Taking this view of the case, we may easily perceive why the magistracy of the empire is so particularly watchful over the incipient stages of popular disorder; observing, as they necessarily do, the germs which, when developed, must lead to the destruction of the visionary fabric of political perfection which they have reared for themselves. We have been led to these remarks from the perusal of a communication recently addressed by the Shanghai District Magistrate Wang to the foreign Consuls of Shanghai, representing to them that there is an objectionable element in our settlement here, which needs to be looked after lest it sap the foundations of time-honoured propriety, and introduce anarchical confusion, if not into society in general—which may, perhaps, be considered as too elevated to be affected by its pernicious influence, yet into the ranks of common life, and, rendering unsafe the tenure of magisterial authority, bring about a repetition of scenes which many of us have unfortunately witnessed even at Shanghai, without proceeding to Suchan or to Nanking. The element to which we allude has among us been denominated "the rowdy element." It consists partly of persons unwilling to submit either to moral or political restraint; and it has received many accessions undoubtedly from persons who unfortunately have been drawn hither under the erroneous impression that temporal prosperity must inevitably attend them. Persons of this class are certainly deserving commiseration from every one in whose bosom compassion dwells; while they should be as beacons to deter others from entering a land where their prospect of obtaining even a livelihood is of the most precarious character. But the class of foreigners to which the district magistrate calls attention is a class both of black men and white, who become the leaders of the bolder among the ninth class of Chinese, furnishing to them physical power and courage, in which they are lacking. The reason stated by the district magistrate for calling on the Consular authorities to assist him in suppressing this class, is that during the last four months no less than nine robberies have taken place in the vicinity of Shanghai, in which foreigners and Chinese have been concerned. He specifies to the effect that :—

1. On the 5th day of the 10th moon (3rd Nov., 1864), foreigners and Chinese in concert committed a robbery at the house of a Chinese named Cheu-shui, living outside the great East gate. His wife was wounded by them, and one of the foreigners was arrested and sent to the French Consulate.

2. On the 8th of November, three foreigners and several Ningpo men committed a robbery in the grocery of Chau-meu-yune, near the joss house. On this occasion clothes and money were stolen.

3. On the 20th of December, six foreigners, with several Chinese, broke the doors of Shun-tsing-ching's money changing shop, and stole clothing, dollars, and silver. This party was armed.

4. On the 20th December, five or six foreigners, with Chinese, stole gold and silver ornaments from Shun-wun-kyang's, at Pootung, near the old ferry.

5. January 21st, 1865, at night, several black and white foreigners led Chinese who committed a robbery, stole cash, dollars, and clothing from Chang-hoh-kee's distillery, north of Hongque.

6. February 11th, at Pootung, four foreigners and some forty Chinese stole silver, dollars, and clothing from Hoo-hyi-fu.

7. February 12th, three foreigners and two Chinese robbed a small mandarin's boat, on the way to Sungkyang.

8. February 19th, at night, outside little East gate, some Cantonese in foreign clothing, with foreigners, committed a robbery.

9. February 24th, two foreigners and two Ningpo men, in a small boat, robbed an oil-boat.

A formidable list, our readers will say, and no marvel that the district magistrate should write to the foreign Consuls, stating—"That Shanghai, being an open commercial port near the sea, becomes a gathering-place for people of all sorts, collected from the four cardinal points, and good and bad

Digitized by Google

are intermingled. Chinese and foreign vagabonds consorting together, are constantly committing thefts and robberies; and inasmuch as foreign vagabonds neither esteem nor fear the Chinese magistrates; and Chinese vagabonds, relying on the example and daring of foreigners, are bold to disobey the laws; therefore the district magistrate now selects nine cases in which foreigners and Chinese were together concerned in thefts and robberies. Seeing how detrimental this state of things must be to the well-being of the Settlement, the Consuls are requested to take some measures for convincing these people of their errors, and by making a few examples induce a general reformation."

The Consuls of the treaty Powers will, we feel assured, perform their part; and our object in presenting the matter to our readers is mainly for the purpose of calling their attention to the manner in which the Chinese reason; and to show, that notwithstanding the native magistrates when they go abroad have a numerous retinue and much that is meretricious, yet, when at their yamuns, they have such an amount of practical business to perform as might well terrify any man who loves a life of ease or dissipation.

We have heard that recently it became the duty of one of our resident Consuls to represent to the Tautai that the unbecoming occupants of some houses in certain neighbourhoods had made it necessary to require either that they should keep within doors, so as not to be offensive to respectable people who were under the necessity of passing by their dwellings, or to remove from the vicinity. The Tautai, in reply said:—

"The Tautai finds that the hearts of people are very easily led astray by the seductive influences of lewd women from a distance and by the fascinations of native women of loose character; the unwise are thus led away by the current, and, drowned in forgetfulness, return not to their homes. The lighter evil proceeding from this is, that their means are squandered in dissipation; the heavier is, that they abandon their families and throw away their lives. At their habitations vagabonds collect together, and they draw a revenue from the gambler's winnings. Murders and robberies proceed not unfrequently from these sources; and if we do not suppress them, how can we expect peace and security? In addition to issuing a proclamation, the Tautai will call upon the district magistrate and the Defence Committee to consult together, and act in suppressing them."

The *Friend of China* publishes the following items:—Col. Kirkham was engaged recently by the Footai, we hear, at a salary of six hundred taels per month, to take the adjutant-generalship of some eight thousand Chinese soldiers, under the military command of Kwo Sun-ling, the worthy with whom Rohde acted in a command altogether distinct from Gordon's. One of the conditions attendant on the gallant Kirkham's engagement, however, ran that he should obtain the consent of the British Consul, not only to his own re-enlistment in the Imperial service, but to that, also, of a few other foreigners; and as that consent the Consul would not give, Colonel Kirkham's services cannot be availed of unless he charters the *Garland*, shortly expected, and so transports himself and his friends to the scene where bullets are said to be as plentiful as leaves in summer. Meantime the troops await transport, and it affords us some satisfaction to learn that the following British vessels have been engaged at four dollars per head to carry the men away; the great fear while the rabble (and we do not expect they are much better) are so near to our foreign quarter being that they might be induced, in the absence of those proper rations which the official paper tells us the Imperialists do not give, to make a dash at mercantile treasuries some fine night, and give those residents who are not asleep an untold amount of trouble and anxiety. Ten days are allowed to load and discharge the vessels mentioned, viz., the *Shooey-leen*, *Dumbarton Annette*, *Viola*, *Chanticleer* and the ship *Polmaise*.

Among our list of shipping arrivals will be noticed the name of the *Gingat Simaro*, Japanese steamer, from Nagasaki. This is the vessel erstwhile known as the British clipper *Lancefield*, and at one time reported destroyed in the Straits of Simonski. How she came here is a story in itself, and this is the way it has been told to us. She was out of sight of the Japanese coast, and did not know which way to reach it—whither bound, full of men, we are not advised. The American steamer *Monitor* caught sight of her in this predicament, and, under the kind care of the master of that vessel, she came to China, whence she will not depart till certain claims for salvage are duly liquidated.

The following items are from the *North China Herald*:—

During the past week the weather has been fine, and the temperature has risen considerably, giving indications of the speedy approach of summer. There has been no lack of amusement in the foreign settlements at Shanghai since our last issue, in consequence of the appearance upon the Lyceum boards of the Volunteer Amateurs and Lewis' Dramatic Company. The former opened the season on the 21st inst., on which occasion the pieces "Time Tries All," and "To Paris and Back for £5," were put on the stage. It is needless for us to descant here upon the merits and talents of the company; suffice it to say that their efforts were rewarded by the unbounded satisfaction expressed by the audience. On the 23rd inst. our old friends the Australian Dramatic Company made their first appearance this season. The performance commenced with the three-act comedy "The Serious Family," which was followed by Planche's extravaganza, "The Invisible Prince." Both pieces were well rendered, and the company acted throughout without with their usual skill and self-possession.

From Ningpo we learn that the rebellion in Fuh-kien has caused a considerable decrease in the number of rowdies at and about that port. They have no doubt gone southward to swell the ranks of the Tsze-wang. The Chinese are apprehensive of the rebels proceeding northward, and place very little reliance on the forces of the mandarins.

The tenth regular meeting of the North China branch of the Royal Asiatic Society was held in the Shanghai Library on Friday, the 10th of March. Sir Harry S. Parkes, president, in the chair. Present: Sir H. S. Parkes, president; G. F. Seward, Esq., and Dr. Henderson, vice-presidents; Rev. C. H. Butcher, Drs. Johnston, Lamprey, Robson, Collins, and Meyer; Messrs. Lynill, Alabaster, Noetzli, Kingsmill, Forbes, Canny, Hanbury, Dunn, R. A. Jamieson, Probst, Whitfield, R. C. Brown, Turner, P. Maclean, J. M. L. Brown, &c.

The minutes of the last meeting were read and confirmed. The acceptance of the office of Treasurer by Mr. Lynill in lieu of Mr. Carnie, resigned, was announced.

The several members proposed at the last meeting were duly elected.

The following gentlemen were proposed for election as members of the society:—

Proposed by Sir H. S. Parkes, seconded by Rev. C. H. Butcher: Dr. Meyer.

Proposed by Sir. H. S. Parkes, seconded by Dr. Henderson: Capt. Blakiston, A. Howell, Esq.

Proposed by G. F. Seward, Esq., seconded by Sir H. S. Parkes: George Basil Dixwell, Esq., G. H. C. Salter, Esq.

Proposed by F. B Forbes, Esq., seconded by G. F. Seward, Esq.: Francis P. Knight, Esq.

Proposed by T. W. Kingsmill, Esq., seconded by R. C. Brown, Esq.: Captain Castilla.

A paper on the "Remains of Ancient Cambodia," by Dr Bastian, was read by the President. The author described the early history of Cambodia, which in ancient times was the seat of an advanced civilisation. He also gave an interesting account of the Ruins of Nakor-wat, illustrated by tracings of drawings made on the spot.

The President having made some remarks on the paper, Mr. Kingsmill, in proposing a warm vote of thanks to Dr. Bastian, drew attention to the ethnological interest of the country and to its mineral resources and remarkable deposits of gold.

Mr. Dunn suggested that some member of the society should furnish a paper on these topics.

Dr. Henderson seconded the motion of Mr. Kingsmill, which was carried unanimously.

"Notes on China Grass as a partial Substitute for Cotton," by R. Jarvie, Esq., was then read, illustrated by specimens furnished by that gentleman. A discussion then arose in which Messrs. Dunn, Hanbury and others took part. At the suggestion of the President, Mr. Dunn promised to present the society with specimens of the different varieties of grass grown in China. After a vote of thanks to Mr. Jarvie the meeting separated.

HANKOW.

The following is a brief account of the Spring Race Meeting at that port, which took place on 17th and 18th March:—

FIRST DAY.
March 17th, 1865.

1. Trial Stakes,	won by..	..	Red Deer.
2. Kiukiang Cup	„ ..	..	Meteor.
3. Ladies' Purse	„ ..	..	Caution.
4. Hankow Plate	„ ..	..	Widdie.
5. Compradores' Gift	„ ..	..	Pat.

Digitized by Google

6. Hankow Derby	„	.. ..	Oxygen, late Inheritor.
7. Farewell Cup	„	.. ..	Caution.
8. Chaasze Cup	„	.. ..	Forlorn Hope.

SECOND DAY.

March 18th.

1. Hopeful Plate	won by	.. ..	Caution.
2. Visitors' Plate	„	.. ..	Cheviot.
3. Challenge Cup	„	.. ..	Meteor.
4. Hap-hazard Stakes	„	.. ..	Burnt Out.
5. Kathay Vase	„	.. ..	Forlorn Hope.
6. Try-again Stakes	„	.. ..	Cut Off.
7. Great Wall Scurry	„	.. ..	Meteor.
8. Mantchoo Race (China Scramble)			Safety Valve.

AMOY.

The rebels in Fohkien (says the *Recorder*), it may be inferred, have by no means fully relinquished their ideas of conquest. They seem to know the times and seasons when they may best execute their projects in regard to any given locality. They do not undertake a northern invasion in winter, nor care for an advance into southern territory in summer. The instruction received by the Kan-wang from his teachers in foreign affairs has been disseminated freely among the rebel leaders, and they now are well aware of the value of seaports. Should they succeed in acquiring a port in the south of Fohkien, and one in the north of Kwangtung, they will then be in a position, not only to dispute "the Empire of the sea" with the present Government of China, but to destroy the native coasting trade in junks, which now extends from the Straits of Malacca on the south to the Russian possessions on the north. The people of Fohkien have always manifested more inclination towards a seafaring life than those of any other province. They have more of that hardihood necessary to successful navigation according to their crude method than other Chinese, and they will readily be acknowledged to be the least scrupulous as to how acquisitions are made. Can it be, therefore, that the eyes of the rebel chiefs are not already on the beautiful Island of Formosa? If not, why seek for a seaport in such close proximity to Taiwan? Well do they know the value of the commerce of that island; and the possession of seaports in Fohkien will give them, ere long, the control of that commerce. Crude material for the manufacture of ammunition will no longer be scantily supplied, and then, perhaps, will the present Government of China find the rebels accomplishing what the French writers feared the English contemplated many years ago, that is, obtaining possession of Formosa, and thereby getting the control of the coasting trade of China, which would undoubtedly be at the mercy of any powerful organisation having their head-quarters in that locality. At no very remote period regarded by the Chinese Government as nothing more than a waste domain of the Empire, it acquired importance so soon as the Dutch settled upon it, and its present supplies of coal, salt, sulphur, rice, fruits and vegetables of all kinds, with its sugar and tea, would at once make a prize too great to be overlooked. Situated from the province of Fohkien at only a day's sail for a junk, the rebels would then become so powerful as to defy the Chinese Government, and therefore we would advise those concerned to look well at once to its defences, and thus prevent an acquisition being made where their maritime strength might prove inadequate to dispossess them.

HONG KONG.

The following items are from the *China Mail* of March 30:—"The past week has been remarkable for unusual changes in temperature, the thermometer during two days showing a difference of over twenty degrees—from 76 to 55, and even 54. Some rain has likewise fallen, with a passing thunderstorm the other day of about half an-hour's duration. The occurrences of the week are neither numerous nor very important; they chiefly concern the doings of the horde of pirates and burglars which infest the colony and adjacent waters. Both departments of their nefarious trade are being carried on with increased vigour and defiant bearing; and an instance of each is recorded in our daily issue vying in all these qualities with their previous efforts. A case of piracy is reported just outside the Ly-ee-moon, in which a whole junk's crew, numbering some eighty men, were murdered by the crews of two piratical craft. Strange to say, the crime was discovered only by mere chance, from the information of a little boy whom the ruffians had saved from the general massacre, and who was accompanying them from Macao to this in the *Feiseen*. Some seven or eight of the scoundrels have been apprehended."

"On Monday last, at three o'clock in the afternoon, in broad daylight, Dr. Kane, one of our most respected residents, was attacked, robbed, and left for dead. The injuries he has received are very serious, but we believe not dangerous. The property of which he was robbed was his watch and chain; and we now learn that Assistant Superintendent Jarman, on entering a Taipingshan lodging-house in search of the property in question, was accidentally pushed from an elevated doorway, and falling into the street received some injuries on the side and shoulder. Add to all this, the fact that a policeman was stabbed the other day while attempting to secure three ruffians, and the state of the colony may in some measure be guessed at."

"At the meeting of the Victoria Library and Reading Room, the impossibility of its continuing to exist under its present constitution was fully demonstrated by the accounts of the year. A committee was appointed to consider and report on the best means of carrying on the institution."

"The Hong Kong Debating Society has been opened with an address from the President, H. E. the Acting Governor, on the pithy text of 'What to say, and how to say it.' The telegrams received *via* the Persian Gulf were only twenty-one days from London, and conveyed very important news from America. One of them ran as follows:—'Wilmington taken—Charleston taken—Beauregard dead—Panic in Liverpool—Cotton down to one shilling.'"

"A shooting match between half-a-dozen of the H.K.V.R. Artillery and a like number of the rifles came off on Tuesday, when the latter made their account straight with the former by proving the victors, as the Artillery did on the last occasion of the kind."

"Among the passengers homewards by this mail steamer is the Hon. Mr. Smale, H.M.'s Attorney-General for Hong Kong. He has discharged the duties of his office during the last four years with great energy and ability, and now goes home on leave of absence. Judge Ball (of the Summary Jurisdiction Court) will act in his absence."

At a meeting of the Hong Kong and Shanghai Banking Company, the reports which had spread, accusing the committee of holding shares to realise at a premium, were satisfactorily disposed of. The following is the report of the directors:—

GENTLEMEN,—In accordance with their notice dated 14th instant, the directors have now to report to you on the state of the company's affairs at the present time.

CAPITAL.—The 20,000 shares of $250 each constituting the subscribed capital of the company, were finally allotted by the provisional committee in December last, with the exception of 2,000 shares sent to Bombay in compliance with very large applications from that quarter; the shares are almost entirely held by residents in China and Japan, and the list of shareholders therefore comprises a very large constituency in the trading interests of these countries.

The first call of $25 per share was due on the 1st of January, and promptly paid. The second call of $100 falls due on the 31st current, and it is not anticipated that any further calls will be necessary for at least two years.

BUSINESS.—The directors have secured the services of efficient officers for carrying on the work of the company.

In the three weeks which have elapsed since the Hong Kong office was opened for the transaction of banking business a large number of current accounts have been intrusted to the bank, representing more considerable balances than the directors anticipated in such an early stage of operations.

The head office in Hong Kong is the only one as yet opened, but the Shanghai branch will be prepared to transact business in a few days, and agencies at the other ports in China, as also in Japan and India, are in course of arrangement.

The directors have been fortunate in obtaining the assistance of two gentlemen of the best mercantile standing in London in negotiating the interests of the bank in that quarter, and the directors expect to hear by next mail that the agency of the Bank has been undertaken by one of the first banking establishments in London.

Bank notes will be issued as soon as they are received from England, the orders having been sent for them four months ago; considering the interest of every proprietor in the circulation of these notes a considerable issue may be reasonably anticipated.

INCORPORATION.—The Provisional Committee took the earliest opportunity of applying to his Excellency the Governor for a charter on behalf of the bank. The application was most favourably received, and in December last his Excellency addressed the Home Government for instructions with a view to framing a special ordinance incorporating the bank. The directors therefore anticipate no unnecessary delay in this measure being carried out. FRANCIS CHOMLEY, Chairman.

SIAM.

The Siamese had, just before the departure of the mail, been celebrating one of their new years—of which they have two, a lunar and a solar. The lunar new year comes first, and commences on the 27th March. The solar new year commences on the 12th of April. Both are alike observed. The gambling laws being suspended for the time, the first thing done by the Siamese is generally to get together, bet, and try their skill

Digitized by Google

in games of chance. Feasting and making presents constitute a part of their pastimes, but there is much more of the former than of the latter. On the day of worship there is a more than usual turn-out, and the priests come in for a share of the good things. The New Year's dinner at the Royal Palace consisted of one consul, one assistant to a consul, one student interpreter, the harbour master and inspector of customs. The consular gentlemen had a table by themselves.

Mr. Ruthven, the second mate of the schooner *Fah-Kee*, who was left on shore down the west coast by the captain, in the month of November last, has arrived in Bangkok, by a junk from Lekon, a place this side of Singora. Mr. Ruthven states: —"The same day that my companions left me, I found a native village. I returned, accompanied by some natives, to the place where I had left the boat, but I found she had gone. There was a piece of paper nailed to a tree, informing me that the boat had put to sea to endeavour to procure food. The food and fruit which I had brought with me from the village I lived on for three days, when, despairing of the boat's return, I went back to the village. I subsequently fell ill of fever and ague; and after a period of forty-five days I began to recover. The natives were very kind to me, and eventually got me a passage on a junk bound to Bangkok. There was $8,000 in specie on board the *Fah-Kee*; it was between the cabin and the lazarette, and unless the vessel worked very much, could not fall out."

Advices from Bangplasoi inform us (states the *Siam Times*) that a European of rank, who at one time held an official position at Bangkok, has been there on an excursion. He was accompanied by native women and several boatmen. The native officials at Bangplasoi furnished him with food and paid him every attention. He rewarded their hospitality and courtesy by going forth on raiding expeditions accompanied by his women and boatmen. They shot the fowls of the villagers, took their rice, fish and vegetables, and set fire to two houses. The Bangplasoi authorities, getting weary of this sort of thing, sent the man and his followers to Bangkok. We trust his Consul will make an example of this person. If this be not done and we publish the name, nation and condition of this violater of the laws of courtesy and of the land, so that the natives need not think that such disgraceful proceedings are sanctioned by the foreign community here, it will be only doing our duty. This man has been here too long. He is educated and cannot plead ignorance in extenuation of his outrages.

In consequence of the Government demand for bricks to build pagodas, the price has nearly doubled within a month or so past. Building material of every kind is very dear, and labour expensive.

We recently made a tour up the Menam Chow Phya (observes the *Siam Times*), into the principal grain-bearing districts of the kingdom. It was a delightful change and an interesting excursion, but the cheerful countenances, and many happy gatherings around the village threshing floors, which we have been accustomed to see in the months of February and March, were wanting. Rice fields in low places yielded bountifully, and some rather high fields in particular localities gave half a crop or so. The grain in all places visited was full and very handsome, but taking the average, the crop was only about a quarter one. It was very gratifying to see the rice-farmers in all the villages carefully laying away seed-rice for the coming season. On inquiry it was generally stated that rice crops rarely ever failed more than one season at a time; our own observation during a residence of over twenty years goes to confirm this statement. The want of rain is not only felt in the rice crop but also in the supply of fish. There are few countries where fish is so abundant as in Siam. They multiply and, as the extensive valleys bordering on the river overflow, scatter themselves abroad, feast and fatten among the rice fields. When there is an excess of rain, or the people do not plant their rice in season for it to grow the proper height before the floods, it is sometimes submerged and the fish eat it up. Some years great complaints are made on account of loss sustained by the ravages of the fish. But this loss is more or less made up by the abundance of large fat fish, which the people catch in great quantities at the close of the rains. So few of the rice fields were overflown the past season, that river fish is very scarce and high. In fact, the scarcity of fish was as much or more complained of than rice.

The following is of some interest, looking at the recent extraordinary advance in the price of camphor:—

There seems every reason to believe that camphor may, at no very distant period, form one of the staple products of Siam. It seems pretty clear that the west coast is admirably adapted for the cultivation of the plant affording it. The following from the pen of Mr. E. O'Reiley, of British Burmah, is worthy of note at the present time:—"The most common weed which springs up after the fires of the new clearings in the jungle, is that which produces the camphor. Of its abundance it is scarcely necessary to remark that it is, next to grass, in excess of all other spontaneous vegetable life, and with proper appliances in the manufacture of the salt (its property) might be rendered useful as an article of commerce."

JAVA AND NETHERLANDS INDIA.

BUITENZORG.

The rice fields are looking beautiful. The reaping has commenced everywhere, but through heavy rains millions of walangs (a kind of grasshopper) and other insects have done considerable damage to the reaping crops.

RESIDENCE BANKA.

February, 1865.—Everywhere they are busy with the rice crop, which will be very favourable at every place in the districts of Dgeboes and Soengoeshan. At Dgeboes the paddy fields had suffered not only from the heat but also from the destructive insects, while at Soengoeshan the product from a great number of fields was totally lost on account of the dry weather. The people are busy in repairing the water works of several mines which were damaged by the flood in January.

BILLITON.

On account of the dryness, accompanied with northern winds, the rice culture has suffered so much that the crop will not be sufficient for consumption. During the dry weather they are taking the opportunity of repairing the damages caused by the flood. There are now 70 mines in working order. There was exported 733 piculs and 56 ctys tin from the Biliton Society. By the great demand for rice in the market, the prices have risen to f.13 per picul, and imports are soon expected.

PALEMBANG.

Notwithstanding the continuous rain in the lower and upper regency, the rice plant looks very favourable. The trade of the chief place is stationary. The trade in cotton (kapas) is much pressed, as the holders of this article demand high prices for it. The trial of the cultivation of the oil palm tree near Mocara Enem has favourable prospects; several trees have already dropped their fruits.

LAMPONG.

During the commencement of February, the weather was very dry, in the regencies of Sepocti and Boemi Agong; so much so, that it was feared that the crops would fail; however, in the latter part of this month the rain commenced to fall, which made a favourable and great change. The rice plant now promises everywhere a good crop.

STRAITS OF MALACCA.

SINGAPORE.

Our dates hence are to the 8th April. The London mail of the 27th February arrived out on the 3rd April.

We have had fine, but very sultry weather lately (reports the *Overland Free Press*), with some few occasional heavy showers. The cholera has in great measure subsided, although it may and does linger about the lower part of the town, where the drains &c., are allowed to pollute the atmosphere. If there had not formerly existed such a mania for cutting down, and burning, and destroying all the lofty trees from the hills, as if people desired to convert the neighbourhood of the town into one vast bleaching ground, the place might have retained its reputation of being favoured by having at least one genial shower of rain within every twenty-four hours, as in early days of the colony. That fact may be found recorded to the credit of the place in General Geographies of years ago. Lofty trees on hilly ground are well-known to attract rain, and retain moisture; in fact, acting as refrigerators to the land. Lofty trees contribute to health in the tropics, although brush-wood and jungle generally do not. Every effort should be made to cultivate and encourage trees of lofty growth on hilly ground, to prevent it from becoming arid, desert, and reflective of heat merely. In founding all colonies within the tropics, particular regulations or enactment, should be made and enforced to secure large and lofty trees throughout the settlements from spoliation or destruction.

Digitized by Google

When once these refrigerative friends to colonists have been removed, a whole century would not fully repair the evil, although every effort might be made to that effect.

The transport *Shakespeare* arrived on the 29th March from China with the right wing of the 2nd Beloochees on board, *en route* to Bombay. Some of the men were accompanied by their wives and families, and these, as well as a few of the unmarried men, had young Chinese girls with them. The latter fact led to an amusing incident. It appears a story was spread among the Chinese that the Local Government intended to deprive the Beloochees of the children and dispose of them at the Court House by public auction to the highest bidder. Consequently, on Monday a great number of Chinese visited the above building, with a view to make a few purchases. They were much disappointed on learning that the rumour was false. The Chinese girls, having been some time with them, had quite learnt to love the Beloochees. The greatest reproach to them is to call them Chinese.

We observe by the proceedings of the municipal commissioners, at their meeting on the 3rd inst., that the commissioner of police objects to a reduction of the force, on the grounds that the town is extensive, and the ordinary duties his men have to perform occupy them twelve hours out of the twenty-four. The Governor accepts the report as satisfactory, and so the matters rests for the present. Mr. Dunman, with his report, puts in a memorandum showing an increase to the population of 14,133 Chinese during the past year.

An Englishman named West was committed for trial by the sitting magistrate, on the 5th April, on a charge of having fraudulent possession of a gold watch and chain worth 50 dols., which were stolen from the Neptune Tavern in July last. On the same day a man named Campbell was sent to the House of Correction for six months for fraudulent possession of a silver watch valued at 15 dollars, which was stolen from the steward of H.M.S. *Perseus*, about two months ago. There are at present a number of Europeans at Singapore of disreputable character, and it is supposed that some of the robberies lately perpetrated have been the result of their handywork.

PENANG.

An important decision has been given by the Recorder, Sir Benson Maxwell, in reference to the law of property under a Mahomedan marriage. The *Gazette* observes, "It is, in reality, an act of judicial legislation, and when carried out in its just and logical consequences, must place the institution of the family among the Mahomedans, Chinese, Hindus, and other Asiatic societies which, with the exception of the small sect of Christians, make up our population, upon a stronger and better defined legal basis than it has hitherto occupied." The petition in the case alleged that the plaintiff, being seised and possessed of real and personal property, married the defendant some years ago. The latter was without property; his occupation in life was that of a police peon. He left the police shortly after his marriage, and until about a year ago he lived with his wife, and upon her property. A year ago he got possession of her title deeds, gold ornaments, and money, divorced her, and turned her out of his house. In answer, the defendant alleged that the ornaments had been purchased by him, that the money which he had taken was his own, and had never been his wife's, and he denied the divorce and expulsion. The object of the suit was to recover the property taken, and for this purpose that the defendant might be declared a trustees for the plaintiff.

The Recorder said that he had no doubt upon the facts of the case; and, after examining the conflicting statements of the parties, he held that those of the plaintiff were substantially true, and those of the defendent unworthy of credit; except as to the subject of divorce, as to which, he said, it was unnecessary to express any opinion. He proceeded, then, to observe that the legal question which was raised by the petition was one to which he had often given consideration before this suit. According to the Mahometan law and Mahometan usage, marriage was a contract dissoluble at the will and pleasure of the husband, and dissoluble by himself. He had but to pronounce the word and the marriage was at an end. On the other hand, the Mahometan law threw its protection over the wife, leaving her in full possession of all her property, rights and ability to contract. To call such precarious unions by the same name as our own marriages was, perhaps, to give one name to two different things (see Lord Brougham's judgment in Warrender v. Warrender 2 Cl. and F. 448). But still, that the Mahometan marriage was a good marriage in the eye of our law seemed incontestable; at all events it could not be contested here, without bastardising the mass of the population. And the validity of the divorce was equally incontestable. A resumption of co-habitation without re-marriage would be against the Mahometan law and religion, and it could not be enforced by our courts. The question which then arose was whether the marital rights of a husband over his wife's property were the same in Mahometan marriages as in the indissoluble, or virtually indissoluble marriages of Christians. If they were, a Malay, under the combined operation of his own religious law, and of the law of the settlement, was able to strip a woman of all her personal property, and after the birth of a child to keep her real estate, also, for his life, and at the same time to turn her out into the street penniless, absolving himself by the same step from liability for her ante-nuptial debts. If such consequences were the logical result of such a state of law, there were assuredly grounds for pausing before holding that the law was so. It seemed to him that it might be that the Mahometan marriage was a good marriage as regarded its essential character, sanctioning and legalising the union of the man and woman, and legitimising their offspring, and yet not be that species of marriage to which the legal incidents as to property, rights and disabilities attached. Or it might be that if the husband was at liberty to dissolve his marriage, he became impliedly bound, on exercising that power, to restore his wife, as regarded her property and rights, to the position or condition in which she was before the marriage, or (what would be the same thing) to place her in the position in which she would be under the Mahometan law, upon the divorce. It was not, however, necessary in the present case, to determine whether any of these views were well founded; for if the property and rights of the Mahometan wife vested in her husband in the same manner as those of a Christian wife, at law, there would yet be good ground for holding that the man in whom such property and rights became vested by virtue of a contract which he was at liberty to rescind at his pleasure, impliedly undertook to hold them as a trustee for the benefit of his wife, in equity, in the same manner and to the same extent as the Mahometan law gave them, or left them to her, on her entering into the Mahometan contract of marriage. Implied contracts and implied trusts were not strange either at law or in equity. In equity, if one bought and paid for an estate in the name of a stranger, or conveyed to him without consideration, the latter held it as a trustee for him, or as the expression was, there was a resulting trust in his favour. When freehold land was purchased by partners for partnership purposes, though at law they might be joint tenants of it, equity impressed the property with the character of personalty. When a husband died without having obtained administration to his wife, her administrator was in equity a trustee for his personal representative. In these and a multitude of other cases, implied trusts were raised to obviate injustice and meet the presumed wishes of the parties or what would have manifestly been their wishes if the question had occurred to them. The Recorder thought that the same principle might be applied to cases like the present. In any view of the case, however, whether the wife's property remained her own at law, unaffected by the common law rules which gave the husband certain rights over it in Christian marriages, which was perhaps the true view, or whether the husband was under an implied contract or an implied trust, it seemed to him (the Recorder) that the plaintiff was entitled to the relief prayed in her petition. He would therefore order the defendant to deliver up the ornaments and money to his wife, in the same manner as he (the Recorder) would have ordered him to do so if they had been settled to her separate use, and for her own personal enjoyment, and he should restrain him by injunction from receiving the rents and profits or otherwise intermeddling with the real estate of the plaintiff.

Two Chinese Nakodahs had been brought up before the magistrate, charged by Inspector Gasper, under the Act 41 of 1850, with having brought and landed in the settlement two diseased paupers. The charge was proved against them, and they were each fined $100, the full extent authorised by the Act.

We learn from Perak that the Rajah, the Jang-de-per-Tuan, died of cholera a few days ago. It appears that this disease is still raging in the native states. In the north of Province Wellesley, where there was a few weeks ago a good deal of

Digitized by Google

this disease, we believe it is abating. In Kedah it is still bad, and many of the natives with their whole families are coming across to the British territory in the hope of escaping it. A good deal of the sickness in the North and in Kedah is said to have been caused by the bad quality of the drinking water.

Some time ago we had the satisfaction (says the *Gazette*) of recording the success of the efforts of Colonel Man and his able and zealous assistant Mr. Plunket, to deprive the Mahomedan clubs (*jumaha*) of much of the mischievous power and prestige which they had previously possessed. The local government set itself earnestly against those associations, detached from them many of the wealthy and influential Mahomedans in town, induced the Pangulus and other leading Malays to proccure the suppression of severalof the branches in the country, and brought the parent societies into disrepute. But they still exist, and we regret to say that the old system of forcible proselytism which used to prevail in Penang has been revived in the province, and that these societies are every night becoming bolder and more domineering there. Of the despotic sway which the heads exercise over the members, some evidence was given during the last criminal session. A Kling cartman had neglected to attend the funeral of a member of his club. He was summoned before the head and the elders and fined five dollars, which he refused to pay, and on this they excommunicated him. The effect of this was, that as far as the influence of the club extended, he was debarred from going to the mosque, and no one would associate or deal with him.

Notice is given that Mr. Charles Blackman is authorised to to sign the firm of Lorraign, Gillespie, and Co., per procuration, from the date of the 16th March.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ARNOULD—On the 4th May, at Shirley, near Southampton, the wife of Henry Arnould, Esq., of Hong Kong, of a daughter.

DUMONT—ROUSSEL.—On the 24th March, at H.N.M.'s Consulate, Shanghai, Mons. A. J. Dumont, Secretaire percepteur de la Municipalite Francais, a native of Brussels, to Mademoiselle N. M. Roussel, of Valleraugue, France.

DUNDAS—On the 6th May, at South Cottages, Herne Bay, the wife of Robert T. Dundas Esq., Commander P. and O. Company, of a daughter.

HULEAT—On the 8th May, at Heston, near Hounslow, the wife of the Rev. Hugh Huleatt, Chaplain to the Forces, of a daughter.

KEPPELL On the 4th May, at 40, Connaught-square, the wife of Vice-Admiral Hon. Sir Henry Keppel, K.C.B., of a daughter.

SICHEL—On the 1st May, at 25, Prince's-gardens, Hyde-park, the wife of Michael Sichel, Esq., of a daughter.

WALKI SHAW—On the 26th April, at 2, Upper Hyde-park-gardens, the wife of W. Walkinshaw, Esq., of China, of a daughter.

MARRIAGES.

ANGIER—LARKIN.—On the 4th May, at Hadlow Church, by the Rev. — Moneypenny, assisted by the Rev. — Courtenay, Dr George Augustus Angier, of Chestnut House, Tunbridge, eldest surviving son of J. H. Angier, Esq., surgeon, Ipswich, Suffolk, to Ellen, young st daughter of John Larkin, Esq., of Hadlow-place, Hadlow, Kent.

FRASER—ONNEN.—On the 30th March, at Sourabaya, Java, William Thomson Fraser, Esq., second son of John M. Fraser, Esq., of 17, Mincing lane, London, to Anna, eldest daughter of Dr. Onnen, of Sourabaya.

REISS—POTTER.—On the 27th April, at the parish church, Eccles, by the Rev H. A. Morgan, M.A., Fellow and Tutor of Jesus College, Cambridge, assisted by the Rev. J. P. Pitcairn, M.A., vicar of Eccles, James Edward, eldest son of the late Leopold Reiss, Esq., of Broom House, Eccles, to Jane Frances, eldest daughter of Harold Potter, Esq., Green Bank, Pendleton.

WRIGHT—MANSELL.—On the 27th April, at St. Barnabas, Kensington, by the Rev. W. W Edwards, B.A., and the Rev. Dr. Hessey, incumbent, Herbert Montague Wright, Esq., of Addison-gardens, South Kensington, and of Nagasaki, to Elizabeth Mary, eldest daughter of Joseph Mansell, Esq., of Addison-road, Kensington, and Red Lion-square. No cards.

DEATHS.

CRACROFT—On the 21st March, on the passage from Havre to London, Walter Sewell Cracroft, formerly of the H.E.I. Company's Penang Civil Service, aged 70.

MIDDLETON—At sea, on the voyage from Hong Kong to Calcutta, John Middleton, Esq., for many years merchant of the latter place, aged 58.

WEBSTER—On the morning of the 22nd March, on board the British ship Resolute, in the port of Shanghai, Horace Webster, junr., late of New York City, aged 35 years.

WHITE On the 4th May, very suddenly, at his residence, East Point House, Vanbrugh Park, Blackheath, deeply lamented by his bereaved wife and a large circle of sorrowing friends, Thomas B. White, Esq. (late of China), in his 47th year.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—CANTON.—During the early part of the fortnight one chop, a third crop Oopack, was settled at 23.8 taels, and later a reaction set in, and 16 chops were settled during the next three days; they may all be classed common to fair Oonams, and many possess both strength and quality; they have been settled throughout at from 17.5 to 21.5 tls., and certainly such low prices as the teamen have been induced to accept have not been seen in Canton for many seasons; the comparative worth of them with the home market, however, shows them to rule 1d. to 2d. over advices of the 26th January mail, and now the mail of the 10th February makes them even higher. It is reported that teamen have all lost heavily, but they had become tired out by waiting so long for any offers that could in any way reimburse them. Thus during the fortnight 17 chops have been taken, leaving our present stock 6 chops. A few musters of the Canton new season's new-make Congou and Gunpowder have been shown, but prices have not yet been settled.

AMOY.—Settlements of Oolong consist of 680 half-chests at $17.50 to 18, and of Ankois 500 half chests at $13 to 14.50, prices showing no noticeable change; these have mostly been made for the Danish brig Friedrich, which vessel has been chartered to load for New York at £2 per ton of 40 feet. Stock of Oolong, 4,300 half-chests.

FOOCHOW.—Small settlements of Congou have taken place during the st fortnight at about previous rates. The stock is reduced to four chops, two of which are Foochow packed. Oolongs: The few settlements which have taken place have been at slightly easier rates. The season may be said to be over at this port. The following are the settlements of the fortnight:—Congous: 1,380 chests and 575 half-chests at 7 t. 2 m. to 12 t. for dust and broken leaf, and 16½ to 18 tls. for inferior flavory. Pekoe: 565 chests at 16 to 19 tls. for common. Oolong: 2,380 half-chests at 10 to 12 tls. for inferior to common cargo. Scented Teas; 640 boxes at 14½ tls.

SHANGHAI—Black: 5 chops have been settled, 1,230 chests and 1,842 half-chests. Oonam and Ningchow, at tls. 14 to 24½ per picul. Reshipments, 331 half-chests. Stock, 8 chops, consisting of 1,203 chests and 3 100 half-chests; 5 chops in Chinese, the remainder in foreign hands. Market stationary. Green: A large business has been transacted in Fychow and Moyune, chiefly for America, the settlements for the fortnight being 43,607 hf. ch., at 25 to 35 tls. per picul, and 2 small chops Shanghai packed at 29 tls. per picul. The reshipments are 9 chops Fychow and Moyune, 4,647 hf. ch., and 2 chops Pingsuey, 368 hf. ch., and 680 boxes. The total stock is 95 chops:—81 chops Fychow and Moyune, 24,952 hf. ch. in the hands of the Chinese, and 13,678 hf. ch. belonging to foreigners; 13 chops Shanghai packed, 4,833 hf. ch., and 2,508 boxes, in Chinese hands; 1 chop Japan, 1,900 hf. ch., in foreign hands; and 180 packages Japan leaf tea. The market is a shade higher and the demand good, but supplies are likely to continue heavy for some time to come.

HANKOW.—Only one chop of very common has been settled during the last fortnight at tls. 14.50, making the total settlements for the season 728 chops, and leaving a stock on the market of only 3 chops of coarse common kind. Quotations are quite nominal.

KIUKIANG.—Green Teas: Over 11,000 packages had been settled during the fortnight at a reduction varying from 1 to 4 taels on previous quotations. Teamen were continuing to ship largely to Shanghai, 16,000 more packages having gone forward on native account, reducing the stock on the market to 121,000 half-chests, from which the fine teas, of which the supply is small, were being rapidly selected. Quotations were, Moyune, finest to finest, tls. 28 to 32; common to medium, tls. 23 to 27 per picul. Fychow, medium to fair, tls. 22 to 25; common, tls, 20 to 22 per picul.

YOKOHAMA.—Some slight increase of activity has been apparent. In prices we have not much change to report; common teas we must quote $0.50 to 1.00 higher, but other descriptions remain as they were last quoted, the native teamen being as firm as ever in their demands for the finer sorts.

RAW SILK.—SHANGHAI.—Since last report 200 bales, chiefly medium to inferior descriptions of Tsatlees and Tysaams, have been settled at extreme prices, say taels 450 to 480 per picul for No. 4 and 5 Tsatlees, and for No. 3 and 4 Taysaams Tls. 400 to 450 per picul. Owing to the small transactions it is impossible to give any quotations. Prices remain firm and dangerously high. About 150 to 200 bales having been received from the interior there is little alteration to notice in the unsold stock. 300 bales, all medium to coarse silk, fine qualities continue very scarce. The transactions of the fortnight are estimated at 200 bales, against 570 bales corresponding fortnight of last season, and 1,350 bales the season before. The present stock is reduced to 200 to 300 bales, against 4,000 bales same period last season, and 2,000 the season before.

YOKOHAMA.—We have had an active business this fortnight, especially since the receipt of the 10th of January mail from Europe. 1,000 bales altogether have been settled, at gradually stiffening prices, resulting in an advance of about $20 on previous quotations. The total settlements to date amount to 11,900 bales, against 13,700 same time last season. The unsold stock on the market is small, but moderate arrivals from the country may be daily looked for. Mybash and Sinchu: Best parcels offering, 700 to 720; medium, 670 to 690.

DRUGS, &c.—CANTON.—Cassia Lignea: There are neither sales nor supplies to be reported. The first arrivals of the new crop are expected by the end of April, but in the meantime some of the old stock still held on speculation may be brought to market. Cassia Buds: The stock of 45 pls. is offered at $51. China Galls: In consequence of more extensive supplies from the interior, the rate for this article is somewhat easier and settlements for native consumption are reported at $16. Vermilion: Same as last quoted, say $38.50 per box of 50 catties. Musk: Another small chop of good quality, all that was left on the market, was taken for export at high rates, and fresh supplies are not expected to arrive for several months to come, owing to the continued success of the Taiping movement in the interior. Rhubarb: The low quality offered at high rates is further neglected. Galangal: Holders evince anxiety to part with their stocks, but even the lowest rates do not tempt buyers at the present moment. Essential Oils: Neither supplies, stock, nor settlements.

CAMPHOR.—HONG KONG.—1,240 piculs have arrived from Formosa since the issue of last report and the whole sold at $18.20 to 18.30 per picul packed. Stock on hand very small.

RAW COTTON.

HONG KONG.—Owing to unfavourable reports received by successive mails, and communicated by late telegrams from London, shippers have retired from the market, and rates have fallen $2 to $3 on last quotations. The local demand appears to be supplied, and dealers are averse to augmenting their stocks under present circumstances, as they see pretty clearly that foreigners are not likely again to enter the market. Supplies continue small, but rates tend down nevertheless.

SHANGHAI.—Continued unfavourable advices have kept foreigners out of the market, and rates have fallen to 15 to 15½ taels, below which holders refuse to part with their stocks. As the stock in the hands of native manufacturers is very small, rates will not be altogether influenced by the course of the Liverpool market, and it is probable that shipments from India will regulate matters.

NINGPO.—Last purchases for Shanghai were made at $28.35 for the best quality. Since the receipt of unfavourable intelligence from England buyers have retired altogether. Holders are firm in demanding $27 to 28 for good to fine Yoo-you.

YOKOHAMA.—No business whatever has been done in this staple since our last report. Stocks on the market have been exceedingly light and of inferior quality.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From Amsterdam: March 13, Minister.

At SHANGHAI.—From London: March 17, Grenadier; 20, Min; 22 (via Melbourne), Ethiopian. From Liverpool: 9, Dunkeld. From Shields: 23, Minnie. From Bremen: 18, Andreas. From New York: 16, Volunteer.

At FOOCHOW.—None.

At HONG KONG.—From London: March 15, Belted Will; 17, Milbrook; 21, Young Lochinvar (via Plymouth); 17, Bengal. From Glasgow: 22, Spanker. From Sunderland: 23, Lydia Hilton. From Swansea: 22, Holzberg and Flora. From New York: 21, Venus and Benefactress.

At SINGAPORE.—From Newcastle: April 2, Johanna Oluffa. From Sunderland: March 30, Asia. From Hamburg: March 30, Saturnus (str.), Nordstern. From Boston: March 22, Woosung (str.).

At PENANG.—From Bremen: April 5, Serene.

DEPARTURES.

From YOKOHAMA.—For London: March 6, Gabalvu.

From SHANGHAI.—For Liverpool: March 14, John Nicholson; 16, Queensbury; 23, Her Majesty; 24, Stuart Wortley.

From FOOCHOW.—For London: March 23, Maiden Queen.

From HONG KONG and CANTON.—None.

From SINGAPORE.—For London: April 4, British Crown. For Falmouth: March 28, Carl Julius. For Liverpool: March 23, Springwood.

From PENANG.—For London: March 20, Dunmore; April 10, Devonvale. For Boston: March 20, Rocket.

VESSELS LOADING.

At YOKOHAMA.—For London: Mirage.

At SHANGHAI.—For London: Antipodes, Vanguard. For Liverpool: Lalla Rookh, Wm. Melhuish, Woosung, Agamemnon. For New York: Resolute, Canvas Back, Egmont, John Normary, Marion.

At FOOCHOW.—None.

At HONG KONG and CANTON.—For London: Banda, Philippine, Corriemulzie, Broadwater, Sovereign of India. For Liverpool: Vanda.

At MANILA.—For New York: Malay and Marmion. For Boston: California.

At SINGAPORE.—For London: British Crown, Silver Cloud, Conference. For Liverpool: Veloz. For Falmouth: Melissa.

At PENANG.—For London: Caroline, Britannia.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—March 13, Louisa Collet, from Havre to Saigon; 14, Waalstroom, from Amsterdam to Japan; City of Aberdeen, London to Hong Kong.

From UNITED STATES to CHINA, &c.—March 15, Syren, from Boston to Shanghai.

From CHINA, &c., to ENGLAND and CONTINENT.—March 4, Madura, Manila to Falmouth; 5, Spirit of Trade, Shanghai to Liverpool; 10, Sharpshooter, Singapore to Liverpool; 12, Agnes Holt, from Japan to London; 15, George Henrich, Singapore to Falmouth; 18, Stag, Shanghai to London; 21, Beatrice, Shanghai to London.

From CHINA, &c., to UNITED STATES.—March 17, Diana, Hong Kong to New York; 23, Fenella, Shanghai to New York.

FREIGHTS AND CHARTERS.

YOKOHAMA.—To London: Cotton and tea, £3 to £3. 10s. per ton; silk. £4 to £4. 10s. per ton of 50 cubic feet, nom.

SHANGHAI.—To London and Liverpool: Cotton, £2. 10s.; tea, £2. 15s. to £3. To New York: Tea, £2. 10s. per ton of 40 feet.

FOOCHOW.—To London: £2 per ton.

HONG KONG and CANTON.—To London: £3 per ton of 50 cubic feet.

At SINGAPORE.—There is but little demand for vessels to load home. The rates are for dead weight, £2; and for light freight, £2. 10s. To Rangoon and back, 30 cents.

At PENANG.—For London: The Britannia, now loading, has nearly a full cargo engaged at £3. 5s. per ton for dead weight, £3. 10s. light freight, £4 measurement, and 4d. per gallon rum; the Bremen ship Caroline, 860 tons register, has been placed on the berth at 5s. per ton reduction on the above rates.

COMMERCIAL POSTSCRIPT.

The meeting of the Bank of Hindustan held at the London Tavern, was of rather a stormy nature. The Chairman, however, Mr. Daniell gave such full explanations, that eventually the report was adopted. On the proposal to re-elect the retiring directors considerable discussion took place, and, finally, Deane J. Hoare, Esq., was rejected.

ARRIVALS NOT INCLUDED IN THE TABLES.—May 13, at Falmouth, from Maulmain, King of the Seas; 7, at Cadiz, from Manila, Elisa; 14, at Deal, from Ceylon, Calphurnia.

DEPARTURES.—May 8, from Newcastle for Java, Maria Elise; 11, from Cardiff for Manila, Johannes Lodewyk; 10, from Shields for Batavia, Batavia.

SPOKEN.—Sydney Eggers, China to London, May 5, 49 N., 13 W.; Eastern Chief, Shanghai to Montreal, March 13, 31 S., 13 E.; Ercilla (Spanish barque), Manila to Corunna, 120 days out, April 27, 35 N., 30 W.; Caledonia (?) (barque), from Colombo, May 7, 48 N., 8 W.; Johann Frederich (Russian schooner), bound to China, May 11, 5 N., 3 E.

LAID ON.—At London, for Colombo and Cochin: Eaglet.

BAPTIST MISSIONARY SOCIETY.—Several of the religious societies of London have been holding their usual May meetings, but none have been better attended than that of the Baptist Missionary Society, presided over by Sir Morton Peto, M.P. After reading the financial report, and expressing his pleasure at the very large gathering around him, the honourable baronet went on to relate some anecdotes of the former meeting, mentioning, amongst others, the case of a Chinese convert, a priest of the creed of Confucius, who had expressed his astonishment on learning that the English people had enjoyed the knowledge of Christianity for 1,400 years, and had not communicated it to the people of China. He proceeded to dwell upon the solemn object of the present meeting, and alluded in terms of strong censure to the proceedings of a former meeting, the repetition of which would, he said, drive the laity away from them. He said that the labours of the Baptists in relation to this society had not at all been commensurate with their power and resources. He contrasted what was done in the little principality of Wales, where a quarter of a million of money was expended in chapels alone. To be sure, £14,000 had been spent in India; but, when they remembered how the progress of civilisation had opened up that country to them within the last ten years, they would see that they had done little indeed. Again, there had been a great awakening in Norway and Sweden, and the truth of the Gospel had penetrated into Russia. In that country some of their brethren were suffering persecution. Lord Russell had been induced to interfere on their behalf, and he was going with others, as a deputation, to appeal to the Czar. He then referred to a recent meeting of the Anthropological Society, and quoted some remarks of Captain Burton to the effect that the labours of the missionaries were disastrous in Africa, only promoting the misery and degradation of the natives, whose only real hope was in Mahometanism. Captain Burton was consul for England, and he seemed, by his words, to be a Mahometan; but, as treasurer of that society, he (the chairman) declared that Captain Burton's statement had no foundation in truth, and he challenged him to a public discussion of the subject on that platform.

WESLEYAN MISSIONS TO CHINA.—On the 29th of April the annual meeting in connection with these missions took place at the London Tavern, the Lord Mayor presiding. In opening the proceedings his lordship, adverting to the allegation that those who most anxiously interested themselves in foreign missions were apt to neglect their duty in "looking at home," observed that those whose names were most conspicuously associated with missionary enterprise abroad were the foremost in their endeavours to diffuse its blessings in this country. A report was read stating that the agents of the missions, including teachers, colporteurs, tract distributors, &c., carried on their operations, among other places, at Canton, Fatschan, Poonan, Hankow, and other parts of China. In some instances, it was stated, conversions had been effected, but in others the disciples of Confucius actually gambled in the places erected for Christian worship. There was, the report said, a great necessity for further pecuniary support. The proceedings terminated with a collection.

IN RE SIR J. A. DOUGLAS.—The bankrupt, Sir Joseph Abraham Douglas, Knight, who was described as of 2, Apsley-cottages, Downes-street, New Peckham, Commander R.N., and a prisoner for debt in Horsemonger-lane Gaol, applied to pass his examination and for an order of discharge. The debts are returned at £194, of which the unsecured creditors represent £73 only; there are no available assets. The bankrupt stated that he was entitled as a retired staff-commander in the navy to an allowance of 5s. per day as half-pay; also to an out-pension of £50 per annum from Greenwich Hospital for wounds and public services. He also considered himself entitled to a very considerable sum from Her Majesty's Government by way of compensation for services rendered and losses suffered in the public service in China in the years 1839 and 1840, when he protected at his own expense British lives and property there. Mr. Aldridge appeared on behalf of the official assignee, Mr. Denny for the bankrupt, and Mr. Sargood for a creditor. Mr. Denny asked for an adjournment of three months, in order to enable the bankrupt to pay his creditors. He said his client was a very aged and infirm person, who had seen a good deal of service. In answer to Mr. Sargood, the bankrupt said that he had already received £4,760 from the Government for services rendered, and he had a further claim which was still pending. The last communication he received from Government was unfavourable in its terms. With the assistance of friends he hoped to satisfy all claims upon him. The Court granted the application for a three months' adjournment.—Adjourned accordingly.

SUBSIDIES TO POSTAL SERVICES.

Subjoined is a statement of the sums to be paid for ocean postal subsidies during the current financial year, compared with those of the past year. The total is £841,867, showing a reduction of £18,409, which is attributable to the circumstance of the cessation of the Galway subsidy, being more than sufficient to cover some small additions in the West Indian, Pacific, and East Indian services:—

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, May 7.

In spite of the opposition of the trade, the Second Chamber of the States General voted yesterday the Bill confirming the International Treaty about the Sugar Duties. Only eight members of the fifty-two present voted against the Bill. Tomorrow the law about the excise of the sugar will be brought into discussion.

In a former letter I told you that I was of opinion the Bill for abolishing the stamp duty on newspapers on the 1st July would be deferred. My apprehension is confirmed. The Minister has communicated that the date is now fixed for the 1st January, 1866, because the stamps necessary for the trade cannot be made in the short delay of eight weeks! (You see that the Minister has no great opinion of the Dutch lithographers.) The general opinion now is, that before the 31st December some other motive will be found for a fresh delay, and so the Bill will be deferred *ad kalendas Græcas*.

On the 18th the First Chamber will meet again to vote several Bills that have passed the Second Chamber.

The Indian tariff, as it is proposed by Mr. Fransen van de Putte, our Minister for the Colonial Department, induced severe criticism from the daily press and the several periodicals. Only the *Nieuwe Rotterdamsche Courant* took the Bill under its protection, and insisted that it should be brought on the table as soon as Parliament should meet, because it might be possible that we should lose the advantages of the commercial treaty with France if the discussion were delayed. The *Arnheinsche Courant* says, on the contrary, that if we must buy these advantages at such a price, we certainly pay too dear for them. This paper calls the Bill an anti-Liberal production of a Liberal Government, and a "blunder" of the Minister.

Mr. Fransen van de Putte has now answered all these cavils. To conceive the question correctly, he says, it is necessary to bear in mind that the Indian tariff has two aims in view—first, to tax the products which are manufactured here and sent out to the Indies at a much lower quotation than the same articles when sent out from any other country, so that Dutch industry will be protected; second, to tax some products which are exported from India to Holland much lower than when they are exported to any other country. Cotton, woollen, and linen goods will be charged with an import duty of 10 per cent. when they are accompanied by a Dutch certificate of origin; but when this is not the case, they will have to pay 20 per cent. Sailcloth and rope may be imported from Holland free of duty, while it will have to pay 5 per cent. when imported from elsewhere. Iron manufactures in foreign countries will be charged with 20 per cent., and when it is manufactured here with only 10 per cent. As to the exports—Indigo will be charged with 10 cents when it is destined for Holland, and with 15 cents when it is shipped for elsewhere; with coffee the difference is 6 per cent. and 9 per cent., sugar, nil and 3 per cent.; tin, f.3.50 and f.5. Certainly this cannot be deemed Liberal legislation; but, says the Minister, "the position of things forces me to forsake the principles of free trade." His only intention was to take the first step to give the first impulse for a Liberal tariff. But he could not at once abolish that protection with which our industry had been favoured for many years. The protection for our navigation in India will be totally abolished, and foreign vessels will in future have the same rights as the Dutch.

At the election at Arnhem Mr. J.P. P. van Zuylen van Nyeveldt was duly elected Member of Parliament with 916 votes. The Liberal candidate, Mr. Henny, received only 601 votes.

An election must also take place in the district of Haarlem, for which Mr. J. J. van Mulken, being appointed general-major, was obliged to send his resignation.

COMMERCIAL.

COFFEE.—Our market is in a calm but firm condition, waiting for the auction of the Netherlands Trading Company on the 17th, when 85.200 b. of all descriptions will be offered. Since my last report the private transactions consisted of 3,206 b. Padang, ex Bulgersteyn, at 43½ to 47 c.; 2,300 b. Java, ex Hogendorp, at 43¾ c.; 3,400 b. Java, ex Joan, at 43½ to 44 c. The deliveries of the Trading Company amounted in the month of April to 73,339 bags, so that since the 1st Jan. 17,771 bags were delivered more than in the same period of 1864. General stock, 538,500 bags, against 471,400 bags. On the 1st the private unsold stock here consisted of 6,237 b. Java, 2,686 b. Padang, and 624 b. Macassar; and at Amsterdam, 13,100 b. Java, 4,500 b. Padang, and 200 b. Macassar. Imported since, 6,400 pie. Padang, and 8,198 b. Java.

SUGAR.—The market is in a very firm condition, with an important business. About 15,000 kr. were sold at 1f. to 1½f. above the prices of March. The Trading Company announces the auction of 72.200 kr. on the 23rd. The unsold stock of the Trading Company amounted to 117,850 kr., against 96,184 kr. in 1864. The private stock consisted o 50,600. kr.

RICE.—5,534 b. table, ex President van Rychevorsel, were sold at 11f., except 780 b. prima quality, at 14f., besides 10,600 b. Bassein, ex General Havelock, at 6¾f. Stock 35,000 b., against 75,700 b. in 1864.

SPICES.—Still flat. Nutmegs, No. 1, 70 to 71 c.; Mace, 64 c.; at this quotation there was some demand, so that holders declined to operate under 65c.

STOCK OF THE TRADING COMPANY.

Nutmegs	2,940	casks	against	1,286	in	1864.
Mace	816	„	„	714	„	„
Cloves	1,612	„	„	—	„	„
Cinnamon	1,614	fard.	„	1,378	„	„
Pepper	1,619	bags	„	—	„	„

TOBACCO.—In Java leaves a fair business was done. By inscription and by auction 17,369 p. were sold, the most of common quality and damaged. Manila, with a good demand for consumption, but nothing is done for speculation or export. The news that 40 mille quintals tobacco were burnt there had no influence upon the market. But confidence in this article is lost. Stock, 8,826 p. Java, 5,397 p. Manila.

*A deduction of £37,554 from the contract payment of £172,914 was made last year for proportion to be paid by the colonies.

Digitized by Google

DRUGS.—In the auction of the Netherlands Trading Company, the following was sold:—276 ch. and 66 b. Japan Tree Wax, at f.34.50 to f.40.25, per 50 lb.; 1,089 Japan Camphor, at f.74½ to f.82½, per ½ lb; 90,920 lb. Gutta Percha, imported from Macassar at f.1.65½ to f.1.81½ per ½ lb.; 36,000 lb. imported from Sumatra at f.80 to f.1.45 per ½ lb.; 164 p. Getah Pantoong at 6½ to 11½ c.; 606 Coll. Gummi Elasticum at f.80.50 to f.81.75 per 50 lb.; 12 ch. Getah Gitang, at f.52.50 to f.57 per 50 lb.; 597 p. Cassia Vera at 28 to 32 c. per ½lb.; 2 b. Pengha War-Yambie, at f.6.55 per ½ lb.; 96 ch. Cocoa Nut Soap at f.1.10½ to f.1.20 per ½ lb.

INDIGO.—In waiting for the auctions nothing was transacted, the market however remained in a firm condition. The 4,433 ½ ch. offered at sale were paid with 320 to 720 c. The 335 ch. offered thereafter were paid with 10 to 20 c. lower. The buyers were much animated, and in particular for good and fine qualities. In private hands nothing is disposable.

JAVA COCHINEAL.—The 80 ch. offered at public sale were sold at 170 to 225 c. The prices were 15 to 30 c. higher than those paid at the last auction.

VANILLA.—On the 17th 70 lb. Bourbon will be offered at public sale.

MANILA HEMP.—With some demand, at unaltered prices.

HIDES.—Sold at inscription 357 p., E.I. ex Brederode (damaged) at 34 c. No other transactions took place because nothing is imported. The stock now is reduced to 475 p., salted B. A., 400 p. dr. do., 1,738 p. dr., West Indian; 1,274 p. Java Ox, and 13,556 p. Java Buffalo.

ARRACK.—38 casks Batavia ex Frederic Warren were sold, and 58 casks Sourabaya ex Golden Eagle at secret prices. The article is dull.

TEA.—The public auction of the Netherlands Trading Company has given the following results:—

	Chests.			Sold at
Java Boei	625/4	——	——	50 to 87 c.
„ Congo Boei	163/4	——	——	61 „ 81
„ Congo	5,017/4	4/8	213/12	70 „ 110
„ Pecco Congo	22/4	——	——	101 „ —
„ Kempoei	105/4	——	——	96 „ 100
„ Pecco Kempoei	18/4	——	86/12	115 „ 123
„ Souchon	4,519/4	——	251/12	76 „ 129
„ Pecco Souchon	109/4	——	——	114 „ 124
„ Pecco	1,538/4	——	495/12	87 „ 291
„ Schin	229/4	——	——	38 „ 83
„ Thunkay	1,707/4	——	——	45 „ 104
„ Hysant	1,091/4	——	——	56 „ 126
„ Uxim	2/4	——	407/12	67 „ 120
„ Joosjes (G.B.)	——	27/8	167/12	102 „ 150
„ Joosjes (F.B.)	——	3/8	49/12	25 „ 144

Besides the quantities retired in the auctions of 20th April and 12th October, 1864, consisting in

Java, 59/4 Congo Boei	51 to 55 c.
„ 51/4 Congo	70 „ —
„ 69/4 Souchou	86 „ 88
„ 58/4 Pouchon	67 „ 74
„ 206/4 Pecco	110 „ 118
„ 30/12 Pecco Kempoei	118 „ 125

All was sold. The private auction of Java tea went off as follows:—Boey 65 c., Congo, 71 to 74 c., Souchon, 76 to 79 c., Pecco, 116 to 118 c., Toukay, 46 to 47 c., Schin, 34 to 35 c., Hysant, 106 to 112 c., Uxim, 86 to 87 c., Joosjes g.b. 126 to 127 c. The China Congo was retired at 125 c. Since these auctions there was some demand for several qualities, but all seemed to be disposed of. Buyers declined to pay an advance, they will, however, soon be forced to do so, as the English market rose 1d. to 1½d. Stock, 6,550 chests against 8,400 chests in 1864.

COTTON.—With more demand, the transactions consisted in 3,000 to 4,000 b. East Indian and Japan for export. The China cotton sold in auction was paid with 98 c.

TIN (BANCA).—The market is very steady, but in consequence of the American news the prices were reduced from 60½f. to 59f. At this quotation some hundreds of blocks were sold. Private stock, 42,390 blocks; stock of the Trading Company, 163,201 blocks. Delivered since the last auction, 137,881 blocks.

COPPER.—A fair business was done in Droutheimer at 57f.

MONEY.—After important fluctuations in consequence of the American news, the market now is calm. Rate of discount at the Bank: Bills, 3½ per cent.; acceptances, 4. Open market, 3½ per cent. National Debt, Two-and-a-Half per Cents., 62; Three per Cents., 72½; Four per Cents., 95 15-16ths; Trading Company, 144½; Dutch Rhenish Railway (shares), 273; Central Railway Company, 119; Expl. Co.'s State Railway, 92. 'Change: London, 3 months, f.11.69; 2 months, f.11.73½; short f.11.81: Paris, 3 months, f.46.52; 2 months, f.46.66; short, f.47 05; Hamburg, 3 months, f.34.95; 2 months, f.35; short, f.35.15; Berlin, short, f.172.50.

EXPORTS TO JAVA FROM THE 11TH TO THE 30TH APRIL.—Coals, 1,516,165 lbs.; iron (bar bolt), 24,750 lbs.; railway bars, 759,500 lbs.; copper 28,700f. and 70,673 lbs.; zinc, 1,200f. and 25,004 lbs.; guns, 514 pieces, cotton (plain and coloured), 1 064,643 yards; woollens, 8,600f. and 2,101 yards; beer, 67,310 litres; brandy, 5,471 litres; Geneva, 93,888 litres; wine, 48,782 litres; oils, 18.514 litres; paints, 13.320 lbs.; sail-cloth, 2,050f. and 174 pieces; rope, 900 lbs.; coal-tar, 98,500 litres; earthenware, 3,660f.; glass 6,742f.; candles, 2.800f.; butter, 24.914 lbs.; perfumery 861 lbs.; cakes, 9.605 lbs. madapollams, 31,375 yards; drillings, 60,750 yards; chocolate, 290 lbs.; flour, 16,480 lbs.; millinery, 800f; mercery, 9,320f.; yarns (cotton), 16,500f.; vinegar, 13,771 litres; musical instruments, 2,240; confectionery, 1,970f.; silverworks, 17.200f.; opium, 4.0 0 lbs.; drugs, 2,875f.; books, 1,472 lbs.; paper, 8,984f., 1,300 lbs. and 196 reams; provisions, 3,480f.; beef, 73,176 lbs.; hams, 8,868 lbs.; cheese, 2.921 lbs.

SHIPPING.—ARRIVALS.—April 24, at Texel, from Batavia, Bernard nd Agnes; 25. Jacob Roggeveen, from Batavia; Aristides, from Banjoewangie; 26, Thomas Mitchell, from Samarang, Maria, from Batavia; May 4, at Brouwershaven, from Batavia, Doelwyk; from Padang, Jan Daniel; from Banjoewangie, Hugo Grotius; 5, from Banjoewangie, Geertruida Maria; from Samarang, Oceanus; at Texel, from Banjoewangie, Telanak, Urman, and Constance; from Padang, Tjielingsie and Nordstern.

DEPARTURES.—April 24, from Brouwershaven to Batavia, Twee Cornelissen; 25, to Samarang, Ida Elizabeth; to Sourabaya, Huydecoper; 27, from Hellevoet to Batavia, Copernicus; 28, from Hellevoet to Singapore, Albrecht Beyling; 29, from Brouwershaven to Batavia Dagaraad; from Texel to Batavia, Mentor; 30, from Brouwershaven to Batavia, Lichtstraal; from Texel to Batavia, India Packet, Maria Veronica; to Samarang, Estafette; May 1, from Texel to Batavia, Koning Willem III., Kandanghauer (returned since, much damaged), Koophandel; 5, from Brouwershaven for Melbourne, Ægedia and Paulina; for Batavia, Nieuwland; from Texel for Japan, Julie; from Zierikzee for Batavia, Vooruit.

FREIGHTS.—Quotations of Messrs. Fauchey and de Vletter, shipbrokers, Rotterdam:—For Batavia: Kortenaer, 973 tons, Grootmeester Nationaal 755, Kosmopoliet 753, G. K. Graaf van Hogendorp 754, Noach 892, Mary and Hillegonda 754, Ternate 747, Joan 688, Koffyboom 1,280 —18f to 20f. For Batavia and Sourabaya: Cortgene, 752 tons—18f. to 20f. for B., 25f. to 30f. for S. For Batavia and Samarang: Cornelis Anthonie, 644 tons—20f. for B., 25f. for S. For Macassar: Macassar, 328 tons—45f. For Samarang: Hendrika, 667 tons, Landbouw 725, Henriette Gerardina Susanne 575, Onrust 808 25f. to 30f. For Sourabaya: Antonia Petronella 711 tons —25f. to 30f.; all per last of 2,000 ks., or 120 cubic feet Amsterdam and 15 per cent. For Melbourne (H.B): Kanagawa, 1,216 tons, 40s. to 45s. and 5 per cent. For Singapore and Hong Kong: Sophia Amalia, 319 tons, Mary Goddard, 312 tons - 30s. for S. 40s. for H., and 15 per cent. For Singapore: Neerlands Vlag, 30s. to 35s. and 15 per cent.; all per ton of 1,000 ks., or 50 cubic feet English.

LOADING.—At Amsterdam: For Kanagawa and Decima, Bantam; Batavia; for Padang, Brouwershaven, Excelsior; for Macassar, Elizabeth and Jacoba; for Batavia, Krimpenerwaard; for Batavia and Samarang, Anthony van Hoboken; for Batavia and Sourabaya, Loevesteyn, Amsterdam, Nicolaas Witsen, Louise; for Samarang, Maria Regina, Mathilde, den Elshout; for Sourabaya, Petronella, Quintet, Staatraad van der Houven, Jacoba Cornelia, Nederland and Oranje, Senior, Bellatrix; for Singapore and Hong Kong, Bernard and Agnes.

PASSENGERS OUTWARD.

To Java, per Dageraad, Captain Duinker, Mr. Koelman and family; per Koning Willem II., Captain Besseling, Mr. Bounin; per Lichtstraal, Captain Wierikx, Mr. C. F. Huisdens and family; L Kuyk and family; Mrs. Hildebrandther Meer; per India Packet, Captain Diepering, Mrs. Berger and family, Miss Gheleyns, Neuhaus; per Kandanghauer, Captain Zeelt, Mrs. Nierop and daughter, Mr. Lightenberg and family, Mr. Boulet and family, Mr. Klaus and family, Mr. van Eldik and family, Messrs. Annokkee, Graat Langeveld, and Tegel.

PASSENGERS INWARD.

From Java, per Jacob Roggeveen, Messrs. Bruins van Rosenburg and family, Anten and family, Haastert and family, Hubeck and family, Mrs. Strauss and three children; per Bernard and Agnes, Captain Ordeman, Messrs. Harreveld, van Santen, van Moerkerken, van der Heyden, Misses van Gheyn and Ordeman; per Doelwyk, Captain Hoefman, Mr. Margadant and family, Mr. Imminck and family; per Geertruida Maria, Captain Ligny, Mr. Roem and family, Mr. F. Cartz; per Azia, Captain Molenaar, Mr. C. G. Heiligers and family; per Telenak, Captain Popken, Mr. J. M. de Bruin and family, H. Spoelder, R. Hissink, Frees van Nahuis, G. van Bitlotz.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

MAY 7.

Vice-Admiral Steen-Bille, of the Danish Royal Navy, formerly Minister for the Marine at Copenhagen, who was sent last year on a special mission to China to exchange the ratifications of the Treaty of Commerce and Navigation concluded on the 13th of July, 1863, by the special Ambassador, Colonel Raasloff, between the King of Denmark and the Emperor of China, has just published in the Danish language a detailed and interesting account of his mission and experiences, under the simple title of "My Voyage to China in 1864." Some twenty years ago the gallant Admiral, when only a captain and in command of the *Galatea* frigate, in which he circumnavigated the globe on a scientific expedition, published a highly interesting and valuable description of his voyage, which was not only favourably received by the public, and is considered a standard work in his own country, but was translated into German, and made a great sensation at the time in Germany.

Orders have been given by the Austrian Naval Minister to the Central Board of Administration for the Navy to draw up and prepare, in conjunction with the Chamber of Commerce at Trieste, drafts of treaties between Austria and the Governments of China, Siam, and Japan respectively, and to send them in to the Minister by the end of this month. The mercantile department of the Chamber of Commerce and Industry at Trieste has responded with great alacrity to the invitation, and nominated two of its most clear-headed and experienced members to take part in the deliberations. In a short time I shall probably be enabled to give your readers further particulars on this interesting subject.

The accounts received of the result of the annual fair at Irbit are encouraging. Manufactures, tea, pel-

Digitized by Google

tries, dried fruits and wine, all fetched satisfactory prices, and were in good demand. Sixteen thousand chests of tea were brought to market from Kiachta, and sold at 84 to 85 roubles for ordinary qualities, 95 to 120 r. for better descriptions, and 130 to 180 r. per chest for flowery teas. Of common brick tea, 4,000 chests were sold at 44 to 45 r., and 1,000 chests of black ditto at 38 r. Jakutzk sables fetched 800 to 1,200 roubles per sack; Amoor, ditto, 400 to 450 r., Ermine skins 60 copecks, squirrels 18, martens 13 cop., red foxes 4 roubles, white foxes 3 r., wolf, 2 to 3 r., and hares 5 cop. each.

For some time past there have been large arrivals of Jews at Nicolayefsk, at the mouth of the Amoor. They come by sea from California, and speak fluently the Russian language, which shows that at some time or other they must have lived in some part of the Russian dominions. By means of their natural sagacity and acuteness, probably sharpened by their residence in California, they have already absorbed a large portion of the wholesale, and nearly all the retail trade of the place, and are amassing large fortunes.

The Senate of Hamburg has appointed M. Th. Weber, of Apia, on the Island of Upolu, to be Consul in the groups of the Navigators, the Tonga, and the Feejee Islands.

Upwards of fifty Schleswig-Holstein vessels trading to distant countries have placed themselves under Prussian protection, and wear the Prussian flag; — under the Austrian flag none.

COMMERCIAL.

COFFEE.—There has been a lively demand for this berry, and the business would have been considerably larger, if there were a better assortment of the finer qualities. A good deal was taken on speculation. Sales of the fortnight 33,000 bags.

SUGAR.—Market rather firmer, and raw 4 Sch. Bco. higher. Refined, steady and in favour; sales since last mail 22,000 loaves of fine Melis.

RICE.—A fair amount of business done, and a rise established in all descriptions of cleaned grain. The only sale of rough was 6,000 bags of Java per Cecilie at prices that did not transpire.

SPICES.—Cassia Lignea a shade lower; 6,000 chests sold at 8¾ Sch. Bco. There is more inquiry for Pepper, but hitherto no alteration in values.

DRUGS.—Refined Camphor follows slowly the late advance in raw, and 18 Sch. Bco. are now willingly paid. There is an improved demand for Star Anniseed, and prices have risen, the last purchase being made at 15¼ Sch. Bco.

TEA.—Market firm, and all descriptions from 1 to 2 Sch. Bco. higher. Among the dealings were 550 chests of Oopack ex Kestner, 435 do Congo, and 74 do. Pekoe ex Persia, together with 1,000 chests of Congo, Souchong, Tonkay, Hyson, and Young Hyson, ex warehouse.

SPELTER.—As holders are more inclined to do business, and willing to accept easier terms, the following sales have taken place: 1,000 centners, ex warehouse at 13 mks. 11 Sch. Bco.; 4,000 do. per June and July, at 13.12.; 5,000 do. for June, at 13.5.; 3,000 do ex warehouse, at 13.8.; 2,000 do. afloat at 13.7.; 1,000 do. for arrival, at 13.8., and 1,500 do. for delivery in July, at 13.9. The imports to end of April, were 39,000 centners, against 201,000 do. last year at same period. Present stock 40,000 centners, against 23,000 do. last year.

DISCOUNT 3¼ per cent.

SHIPPING.—Sailed from Cuxhaven, Galatea, to Hong Kong.

RECEPTION OF SIR F. BRUCE AT WASHINGTON.

The reception of Sir Frederick Bruce by President Johnson augurs well for our future relations with the United States. It was a formal act, but it was accompanied with cordial expressions on both sides, which divested it of formality and justify us in regarding it as a fresh earnest of amity between the two Anglo-Saxon nations. The occasion was singularly favourable to the exchange of those kindly feelings which, in spite of temporary misunderstandings, have never been extinguished. For the first time since the great civil war broke out, we have been enabled, without any sacrifice of principle, to show an unqualified sympathy with the American people. The tragical end of President Lincoln, in the very hour of triumph, and when he had earned by his moderate counsels the respect of this country, has been the means of bringing us face to face under the influence of a common sentiment. It has gone far to break down the ice of reserve and suspicion which embittered every difference of opinion on subjects that had already divided America against herself, enabling us to appreciate the devotion of the Northerners to a cause which they believed to be high and holy, and the Northerners to recognize the true nature of the motives which dictated our neutrality. If this only had been the effect of Mr. Lincoln's murder, he would not have died in vain.

It was in this spirit that Sir F. Bruce spoke in presenting his credentials, and it was in this spirit, as we hasten to acknowledge, that President Johnson replied to him. The first duty of the new Minister was, of course, to offer condolences on the death of the late President, with whom he was to have had his first interview on the previous Saturday. Sir Frederick assured Mr. Johnson with perfect truth that the event would call forth an unanimous burst of horror throughout Great Britain. He then proceeded to express Her Majesty's earnest desire to maintain friendly intercourse with the United States, and her "hearty good wishes for their peace, prosperity, and welfare." He declared, on behalf of his Sovereign, whose letter to Mrs. Lincoln *will* touch the Americans more than any official declaration, that she had *nothing* more at heart than to remain on the most amicable terms with the Federal Government, and pledged himself to carry out this intention to the utmost of his ability. President Johnson not only accepted these assurances most graciously, but entered somewhat fully into the principles which should govern the two nations in their dealings with each other. He pointed out that Great Britain and the United States are "exposed to frequent occasions of misunderstanding" by the very fact that their mercantile connections are so intimate, their territories in one direction conterminous, their language the same, and their laws similar. Hence the need of greater "mutual forbearance." If we look, says the President, to the numerous sources of discord engendered by these circumstances, we might be tempted to despair of peace, or at least of permanent goodwill, between two such rivals. If, on the other hand, we look to their common heritage of freedom, to the "principles of civil rights and constitutional liberty" established throughout their dominions, we might be led to expect an identity of policy, if not an intimate alliance. Experience shows that neither attitude is inevitable, but if Great Britain and the United States must pursue respectively an independent course, they may at least continue to be good friends. "Each is charged with the development of the progress and liberty of a considerable portion of the American race. Each, in its sphere, is subjected to difficulties and trials not participated in by the other. The interests of civilisation and humanity require that the two should be friends. I have always known, and accepted it as a fact honourable to both countries, that the Queen of England is a sincere and honest well-wisher to the United States. I have been equally frank and explicit in the opinion that the friendship of the United States towards Great Britain is enjoined by all the considerations of interest and sentiment affecting the character of both."

Naval and Military.

The Serpent, 4, 200-horse power, Commander Bullock, fitting at Sheerness for surveying service on the coast of Japan, is nearly ready for sea, and has received the whole of her stores, &c., on board.

Major Wray, R.E., now in Japan, will most probably be placed in command of the works at Weymouth and Portland.

The Tartar, screw corvette, Capt. John M. Hayes, has arrived at Spithead from China, after having been nearly five years in commission. On passing the Royal residence at Osborne she saluted Her Majesty, and on anchoring at Spithead she exchanged salutes with the Victory, flagship of the Commander-in-Chief, Admiral Sir M. Seymour, K.C.B. The Sprightly, steam tender, proceeded to Spithead to disembark the naval invalids and the crew of the Racehorse, recently lost in the China Seas.

Viscountess Templetown, the wife of Lieut.-Gen. Viscount Templetown, C.B., Commander of the Forces in the West of England, presented new colours to the 1st Battalion of the 6th Regiment, stationed at Devonport. The presentation took place in the park. The regimental colour bears in the centre the figure of an antelope and the title of the regiment, the 6th Royal 1st Warwickshire, encircled by the rose, thistle, and shamrock, and surmounted by a crown. On the borders are the words "Roleia, Corunna, Pyrenees, Orthes, Vimiera, Vittoria, Nivelle, Peninsula, and Niagara." After being placed in charge of the two ensigns, Hebeller and Granville, their reception was acknowledged in warm terms by Lieut.-Col. Lowe, C.B. During the proceedings Viscount Templetown, in addressing the men, stated that within the last hundred years the 6th Regiment had seen duty in all quarters of the globe. The old colours were then borne to the rear by Ensigns Crisp and Morton; they were presented to the regiment at Poonah by the wife of the Brigadier in 1833.

Her Majesty's fourteen-gun floating battery Trusty, 1,539 tons and 150-horse power, which has encumbered the fitting basin at Woolwich during the past ten years, has been taken up to the "breaking-up yard" at Charlton, to be disposed of for fire-wood. Her engines during that period have been in charge of a chief engineer and assistant constantly kept on the books of the Fisgard for that purpose.

Captain Roderick Dew, C.B., an officer who highly distinguished himself in China (says the *Army and Navy Gazette*) will, it is reported be shortly nominated to the command of the Bellerophon. It is, we believe, the intention of the Admiralty that this highly important experimental ship shall be at sea before the close of the year.

Parliamentary Intelligence.

HOUSE OF COMMONS.

CHINESE AFFAIRS.

(May 2.) Col. SYKES asked the Under-Secretary of State for Foreign Affairs whether further papers respecting proceedings in China would be laid upon the table of the House; whether the Consul at Amoy had reported his visit to the Taiping chief at Chang-chow, and with what results; and whether information had reached the Foreign Office of the reported revolt of the Imperialist troops in the cities of Hang-chow and Chang-chow, with the rumoured connivance of Tsing-kwo-fan, the ante-Foreign Minister of State.—Mr. LAYARD said there were no papers of sufficient importance to lay upon the table. They were aware from his last despatch that it was the intention of the Consul at Amoy to pay a visit to the Taiping chief in question, but his report on that subject had not as yet been received. No information had reached the Foreign Office respecting the reported revolt of the Imperialist troops in the cities referred to by the hon. and gallant member.

SINGAPORE.

(4th.) Lord STANLEY asked the Secretary of State for India whether it was his intention to brink in a Bill, during the present Session, for the transfer of Singapore, Malacca, and Penang from the Indian to the Colonial Administration. – Sir C. Wood said he could not positively answer the question of the noble lord. It was quite certain that the Indian Government were willing to meet the wishes of the Home Government. He had written to the Colonial Government requesting them to state whether they were willing for the transfer of these places, but he had not yet got any reply.—[This is simply official reticence.]

The London & China Telegraph.

LONDON, MONDAY, MAY 15, 1865.

PRINCE KUNG.

"PRINCE KUNG has been dismissed from all his functions. "The Ministry for Foreign Affairs has been entrusted to OUEN "SIONG and his colleagues." Such are the contents of a telegram dated Peking, April 3, which was received in London on the 27th of the same month, by way of Siberia and St. Petersburg. Our latest advices by the overland mail from the Chinese capital are only up to January 26. At that date we learn that Prince KUNG was despatched to perform the necessary rites at the tomb of his cousin, and an uncle of the EMPEROR; but the EMPRESS Dowager, who is chief Regent, demanded that his juvenile MAJESTY should proceed in *propria persona*, and perform the rites over the deceased, consequently, a Mandarin was sent to prepare the way for him. It appears that this functionary's office is to warn all the people on the route that the sacred person of his Celestial MAJESTY will pass that way, and woe be to those whose profane eyes look upon him, they must bow their heads to the dust as the *cortege* passes. Moreover, should any object appear in the way obnoxious to the sacred presence, to disturb his thoughts intent upon the shrine of his ancestors, it must be removed. It so happened that on the very roadside where the EMPEROR would pass there is a French Roman Catholic chapel, surmounted by a cross. Now this emblem of Christianity is a thing obnoxious in the eyes of all followers of the "Tao-lee," or whatever kind of religion CONFUCIUS or KONG-FOO-TSZE enjoins upon Celestial Monarchs. Consequently he requested the padré who officiates at this chapel to remove the cross during the time the EMPEROR would be engaged in the ceremony. The priest referred the matter to the French Minister, at Peking, who decidedly objected to its removal, ordering that it should be left alone, but adding that the Chinese might remove it if they thought fit. Apparently this would have been a step that might bring the French bayonets once more to the gates of Peking. and it was let alone. Accordingly, on the passing of the EMPEROR and his train, the obnoxious emblem reared its crozier form in full glory, while the attendant priest stood at the door of the chapel to see the procession pass. In his report to the Minister, stating that no one attempted to remove the cross, or otherwise insult their religion or himself, he adds that he caught a glimpse of the juvenile MONARCH, describing him as a "nice-looking little fellow." These details, of what at first appeared as a trifling circumstance, we have given as it is just possible it has some connection with the dismissal of Prince KUNG. It is well known that he has strong foreign sympathies, or if not that, such a conciliatory policy towards foreigners, probably from a dread of their warlike power, that on all occasions where he has been consulted to treat with their representatives his policy was to extend rather than contract their privileges in China, in religion as well as commerce. It was through his advocacy that his colleagues allowed the French to restore their Roman Catholic Propagation of the Faith to the same *status* that it enjoyed in the palmy days of the Emperor KANG-HI, before they were driven from the empire. As he was Minister for Foreign Affairs, this case of the cross in all likelihood was submitted to him; and the threatening hint of the French Envoy, "that the Chinese might remove the cross if "they thought fit," discussed by him and his colleagues when acting upon his foreign proclivities and caution, thought it best to let the cross alone. Of course this would be represented to the EMPRESS Dowager, who is a woman of most determined and even masculine mind, who may have considered it an insult to the State. She is not the mother of the youthful monarch, and never had any children, but his mother and herself are sole Regents, and possess all authority, even to dismiss Prince KUNG, who it is a mistake to suppose was a Prince Regent. He only administered the foreign affairs. At the same time WEN-SEANG, the Prime Minister, had no control over him. This power of dismissal lay entirely in the hands of the two Empresses Dowager, which it would appear from the above telegram they have exercised, and deprived the best friend foreigners had at the Court of Peking of all his functions. Be the cause what it may that has led to this, the removal of that Prince from his high post is a matter for the serious consideration of all foreign Powers who have representatives at Peking. Now that the Taiping war may be said to have ended, so far to the assistance of English and French forces were necessary as quell the rebellion, no doubt the old feeling of antipathy to foreigners is revived, and the exclusive policy of the Government once more in the ascendant. It only wants just such a circumstance as we have related to fan this latent heat into a flame. The Western politician may smile at such a trifling event leading to serious consequences, but we know that those events that led to the *coup d'etat* in which this bold EMPRESS Dowager played such a prominent part, were of a nature similar to this. In the accusations against SOOSHUN and the delinquent Ministers it was held as a heinous crime that the former had sat in the Emperor HIEN FUNG'S vacant throne, while he was dying at Zehol. Also, that other Ministers had moved about the Imperial palace without due regard to the sacred apartments of the EMPEROR. In her eyes these were the most serious charges that led to their decapitation and strangulation. In like manner this affair of the cross may have been construed into an insult against Imperial MAJESTY, that in her opinion could only be wiped out by the condign punishment of the French priest, and razing the chapel and cross to the ground, or some equally prompt physical chastisement according to the Chinese bamboo code of laws. Such a course no doubt would be objected to by Prince KUNG, and hence his dismissal, with the transfer of his functions, as the telegram reports, to "OUEN SIONG and his colleagues." For the information of those unacquainted with the jumble into which foreigners have turned their alphabetic orthography of Chinese names, this is the French mode of spelling the name of the Prime Minister, which is written in English WEN-SEANG. This Minister is an able man, but one who cannot be trusted in dealing with questions of foreign policy. He is strongly imbued with Chinese official tergiversation, as amusingly described by Capt. SHERARD OSBORN in his account of an interview between Mr. LAY and him, together with other members of the Cabinet, when discussing the Anglo-Chinese fleet question. As the notes of that gallant officer give some description of the Prime Minister and his colleagues, it is interesting to quote an extract or two as showing what manner of men these are to whose tender mercies foreigners and foreign policy is now committed.

"WEN-SEANG is an intelligent, energetic-looking man, with a "sinister cast in his eye, and a cruel mouth; richly clad, but with-"out the slightest ostentation; had dirty nails, and was constantly "using either a pipe or a snuff-bottle; he looked a refined Yeh. "SIEH made a reputation and a fortune by Europeans, and "now, Chinaman like, is devoting it in Peking to thwarting us, "and insulting all the Embassies. He has been introduced "to the Board as a 'queller of barbarians.' There is something "in his manner which insults you and irritates you." "WEN-"SEANG, the Prime Minister of China, made an admission of "a very remarkable character. Mr. LAY directly afterwards "repeated it, with the argument, 'As you admit so and so, "of course such and such is the case.' WEN slowly raised his "eyebrows and exclaimed, 'Who said so?' 'Why you did, "your Excellency.' 'Oh no, I never said any such thing,' is "the cool disavowal, and as he turns to his *confreres* his head "is again enveloped in smoke. 'No one said so,' at once "asserts SIEH. 'Oh, of course not, how could any one have "thought of saying so?' is the chorus of all the old story-"tellers together, and the wag of the Board makes some apt "quotation from the classics which gets up a laugh, and the "Board may be said to retire amidst general 'hear, hears!'" We shall look forward with interest to the detailed accounts of Prince KUNG'S dismissal, and the foreign policy of this group of worthies in the Ministry.

Digitized by Google

Since the foregoing was written a second telegram has appeared, announcing that "The Ministerial crisis in this city is at an end; Prince KUNG resuming his official position as Prime Minister." It is dated Peking, April 13—ten days later than the previous announcement—purporting to have come by direct overland telegraph from Point de Galle, and was despatched from thence at 4.55 P.M. on the 1st of May, arriving in London on the 7th—the quickest despatch yet attained by the new telegraph route. How it reached that point of departure we are at a loss to understand. It could not have come by way of Shanghai, as the latest date from there is April 9, and from Canton April 15, allowing only two days from Peking, a distance by road of not less than 1,500 miles, which the Chinese pony-express takes a fortnight and longer to accomplish. Under these circumstances we are of opinion that there is some mistake, and that the telegram came *via* Siberia and St. Petersburg. Accepting its authenticity, and that of the important intelligence conveyed, it is most satisfactory, and we await with further interest the details of this Ministerial crisis.

SILK IN FRANCE.

THE silk trade is in great distress in France. It appears that there is a quarter of a million of people occupied in the rearing, spinning, and weaving of silk, that the failure of the worms is general, and that there is no hope of a supply from any part of the world but the Far East. The disease which has attacked the worms, and which is believed to be both contagious and hereditary in the insects, is rapidly spreading to every district in France in which silk is produced, and has committed great ravages in Spain and Italy, and is said to have diminished the quantity of silk to one-half of the amount produced before the appearance of the disease. In 1853 the total was nearly sixty millions of pounds in weight; in 1856 it had fallen to about sixteen millions; and since that time it has ranged between twenty and thirty millions. So great has been the effect in the department of the Drome, that the produce of the worm farms has fallen from sixteen or eighteen millions of francs per annum to two or three millions. The subject has occupied the Government and the scientific world for years, but no remedy seems to be found either in the importation of the ordinary silkworm's eggs or in the acclimatisation of new species of worms, such as those which feed on the oak and on the Japan varnish tree.

The importation of the silkworm's eggs has, during the last five years, been enormous. The value of the imports was £536,304 in 1860; about half that in each of the two following years; £419,796 in 1863; but only £176,724 last year. It does not appear why a supply so much demanded should have fallen off, but it is the rule in France that when anything presses urgently, individual exertion always gives way before Governmental action, and therefore we are not surprised to be told that the whole importation of eggs this year has been due to the Imperial Government, which sent out orders to its consular agents in Japan to purchase and send home a thousand cases of this precious seed. This large import reached Marseilles in the *Mœris* on the first day of January, and the eggs were disposed of by auction through the agency of the Acclimatisation Society between Lyons and Montpelier. Now comes a strange and unexplained part of the story. Speculation stepped in, and purchasers from Italy bought up nearly the whole of the imported seed, not only from merchants, but even out of the hands of silk farmers themselves, at a premium of a few francs on the original price, so that the whole, or nearly the whole, of the benefit to be derived from the importation by the French Government of so large a quantity of seed is said to have fallen to the share of Italy. Why was this? Are the Italians so much superior in matters of business that they were thus able to snatch the meat while their less shrewd neighbours were satisfied with the shadow of a few francs in hand? Has the disease taken such deep root in France and rendered the silk farmers so hopeless that they do not care to try their fortune again, at any rate for the present? or have they become so impoverished that the small premium was a temptation which they could not resist?

One thing is pretty certain, namely, that as French-produced silk has fallen to one-half of the former amount, there must be a larger demand for the foreign material as soon as business shall have recovered itself from the effect of the American struggle and European crises, and this may be worthy of consideration. It has always been a sore point with the French that England should be the chief dealer in such matters as Cashmere shawls, and more especially raw silk. The writer of the commercial article in the *Presse* of last week says:—"Why "is Lyons not the grand *entrepot* for the silk of Asia, and "Paris that of the Cashmeres of Lahore? Is it not strange "that the raw material which Lyons requires for her work, "and the precious tissues of which Paris requires seven-"eights, should, before reaching their destination, make a long "stay in the London Docks?" The estimate of the proportion which Paris takes of Indian shawls and other Eastern productions is doubtless enormously exaggerated, but this does not affect the value of the query, the answer to which must come from French merchants and capitalists, who will, perhaps, explain how it is that when silkworm's eggs are wanted, the rich Lyonese do not take care that the silk districts are supplied with them without the intervention of Government; and, further, how it is that when the seed is placed in the hands that are said to be idle for want of it, it should be parted with for a few francs premium. Our duty is only to point out the facts as stated, and to leave poor speculation, who is believed to be such a mischief-maker in one way, to compensate by different conduct in another. In spite of all complaints, however, the silk trade in France presents a very respectable appearance still. The Douane has just issued the account of imports and exports for the first quarter of the present year, from which we find that the silk imports amounted to nearly three millions sterling, and the exports to more than that sum.

CEYLON COFFEE IN THE LONDON MARKET.

THE reduction of the tea duty will naturally excite inquiry in Ceylon as to its probable effect on the consumption of coffee in the United Kingdom. Many of our tea dealers have expressed the opinion—without, as we conceive, due consideration, that cheaper tea will lessen the use of coffee. It will be found, however, that the greatest tea drinkers are also the greatest coffee drinkers, and so downwards, the sedative qualities of the leaf provoking an alternating appetite for the more exhilirating beverage from the berry. As the use of tea extends downwards, displacing, to a certain extent, poisonous spirituous decoctions, it cannot but react in favour of coffee. Concurrently, indeed, with the low prices of tea during the past season, a decrease is exhibited in the home consumption of coffee as compared with the same period last year; but this decrease has not been confined to coffee, tea has shared in it; and on analysing the character of this decline we find it to lie wholly with the better descriptions of Ceylon importations, and attributable to the comparatively high prices demanded by holders, the demand for other coffee, both colonial and foreign, having actually augmented. In the three months ending March 31st, the consumption of Ceylon coffee reached 5,230,508 lbs., against 6,501,257 lbs. in the same period last year, whilst the consumption of coffee from other countries advanced from 2,052,600 lbs. to 3,047,267 lbs. The total decline in the home consumption in the seventeen weeks ending the 29th ult., as compared with the corresponding time in 1864, was 731 tons, whilst the decline in tea was 2,299,736 lbs. The last month, however, showed a large improvement in our export trade, and this has gone far to diminish the late excess of stock as compared with last year. The demand that has sprung up in the United States, in addition to more continental and colonial exports, adds to the firmness of holders, induces lightness in public sales notwithstanding the high prices realised by the small parcels of Plantation and Native Ceylon brought forward, and compels those whose immediate wants must be met to give extreme value; this, too, despite heavy deliveries and the cargoes now nearing our port. Latterly expectations as to the extent of the United States demand have been moderated, but there is no doubt requirements will be considerable. Last year the United States took from Rio only 11,082 bags more than in 1861. Whatever relief is thus given to our present stock, colonial and foreign, will have a marked effect on prices. This stock on the 29th April amounted to 8,955 tons against 8,282 tons at the same time in 1864, an excess by no means large. Mr. GLADSTONE has credited our tea dealers with being able, when occasion serves, "to act as one man;" yet the taunt implied has little force in it, for with increased competition in production of colonial and foreign produce—a competition stimulated by London capital—it obviously becomes increasingly difficult to bolster up prices. What Ceylon cultivators most require is the power to obtain advances on more reasonable terms than those which existing monetary agencies are inclined to supply, together with certain modifications in the arrange-

Digitized by Google

ments attending the payment of interest and instalments by consignments. From indications now presenting themselves, we are satisfied that this colony will not have long to wait for a material reduction in the ruling rates of interest, together with financial organisations, specially and peculiarly adapted to her wants.

THE COLONIAL NAVAL DEFENCE ACT.

THE Act "to make better provision for the naval defence of the colonies" is another important step in that new system of administering the affairs of our dependencies, which began by endowing them with powers for self-government. Now, after having for some time past been warning them that they must in future contribute a proportion of the cost incurred for their protection against foreign foes or native disturbers, the Imperial Executive is pointing out the means, and conferring on them the capacity, for compelling flying squadrons and marauding privateers to respect their ports and shores, even at the critical juncture, sure every now and then to occur, when no pennant of the Royal Navy is at hand to succour. The more distant the colony the more valuable will be the new ever-present protection contemplated by the Act passed on the 7th April of the present session, which is to be legally and officially known as "The Colonial Naval Defence Act." The preamble sets forth the expediency of enabling the several colonial possessions of Her MAJESTY to make better provision for naval defence, and for that end to provide and man vessels of war, and to raise a volunteer force, which is to form part of the Royal Naval Reserve established in Britain under the Act of Parliament of 1859. To effect the object thus enunciated, the Legislative authority of any colony is empowered, with the approval of Her MAJESTY in Council, to make provision for maintaining a vessel or vessels of war; for raising and maintaining seamen and others bound to serve in such vessel; for raising and maintaining a body of volunteers bound to general service in the Royal Navy on emergency, and, if so directed by the Legislative authority, to serve in any such vessel as before mentioned; for appointing commissioned, warrant, and other officers to serve with any such men ashore or afloat, or for obtaining from the Admiralty the services of officers and men of the Royal Navy; for enforcing good order and discipline among those men and officers, and for subjecting them to all enactments and regulations in force for the discipline of the Royal Navy. All this is to be done at the expense of the colony; and that point is further ensured by a special clause providing that nothing done under the Act shall impose any charge on the revenues of the United Kingdom without express provision made by Parliament for meeting that charge. Volunteers raised under this Act are to form part of the Royal Naval Reserve, but to be subject exclusively to the provisions made by the Legislative authority of the colony. Her MAJESTY may authorise the Admiralty to issue to any officer of the Royal Navy volunteering for the purpose a special commission for service under the Act; and may also authorise the department to accept any offer made by the Government of a colony to place their vessel of war, with the men and officers, at the disposal of Her MAJESTY; and, when accepted, such vessel and men and officers are to all intents to be deemed a portion of the Royal Navy. So, also, the whole or any part of the volunteers referred to above may be placed at the disposal of Her MAJESTY for service in the navy; and the Admiralty may appoint any officer of the rank of captain in the navy, or of a higher rank, to exercise any power conferred on the Admiralty under the Act. Finally, nothing in the Act is to take away or abridge any power vested in or exerciseable by the Legislature or Government of any colony.

We have been thus particular in condensing the powers created by the Act, because we hold it certain that in any future war the whole of the Colonies will be prompt to avail themselves of the security it will afford to their seaboard and their intercolonial traffic. The Confederate cruisers have taught the world how great the mischief that may be inflicted by an active rover. Yet one gunboat armed with a single gun of the large calibre now brought into use would have a vast effect in enforcing caution on these predatory pests. Moreover, the capability of obtaining from the Admiralty the services of officers and men belonging to the navy for manning a vessel equipped by a colony is a wise and farsighted provision, since it will enable a small staff of both to be engaged, who will be constantly at hand to drill in the best fashion whatever numbers the public spirit of the Legislature and the population may rally to the service either as volunteers or as part of the Royal Naval Reserve. The success that has attended the creation of the last-named force in the mother-country will, we are confident, be renewed in her far-off dependencies. Men and officers of the commercial marine, altogether employed in the intercolonial trade, or identified with a particular colony by a long series of voyages out and home, will be proud to enrol themselves among the recognised defenders of the commerce by which they have thriven, and of the flag that is endeared to them by the glories of its history as well as from having been the ensign that has waved over them through the successes and the perils of their own lives. The Volunteer Rifles of England soon had their counterparts in every spot in either hemisphere that acknowledged Queen VICTORIA'S sway; and the Royal Naval Reserve will, in like manner, soon have launched their vessels in every sea and river that brings commerce and fertility to her colonial empire.

THE NEW COURT FOR CHINA.

SIR EDMUND HORNBY, the newly-appointed Judge for China, will proceed to Shanghai by the mail of the 10th June, accompanied by Mr. C. W. GOODWIN, Assistant Judge, and Mr. JOHN FRASER, as Law Secretary. The following is the official announcement from the *London Gazette*:—

The Queen has been graciously pleased to appoint Sir Edmund Hornby, Knight, late Judge of the Supreme Consular Court at Constantinople, to be Judge of the Supreme Court for China and Japan; Charles Wycliffe Goodwin, Esq., to be Assistant-Judge of the Supreme Court for China and Japan; and John Fraser, Esq., to be Law Secretary and Registrar of the Supreme Court for China and Japan.

COLONEL NEALE, C.B., late *Charge d'Affaires* in Japan, has been appointed Secretary to the Legation at Athens.

MR. W. H. READ, who leaves by next mail for Singapore, had an interview with the Secretary of State for the Colonies.

COCHIN-CHINA.

A PARIS correspondent of the *Indépendance Belge* says that a *senatus-consulte* will shortly issue declaring Cochin-China a French colony. In the first place, this announcement is rather vague in its terms, and, in the second, the journal in question is peculiarly fortunate in its discovery of mares' nests. Its correspondents have, however, frequently put forth what looked very much like Ministerial feelers, and its statements have sometimes been erroneous only from their being prematurely published.

Admiral de la Grandière has been looking up documents relating to manners, customs, and literature of the Cambogians, the religion of Buddha, and other subjects. A mission sent to Houdon with that object succeeded in discovering a number of manuscripts written in Cambogian characters, and treating of the war with China, of marriage and the duties of husband and wife, of the precepts of Buddhism, of crimes and punishments, and also a number of tragic and comic plays. These documents were sent to the Minister of Marine, who has handed them over to the Academy of Inscriptions and Belles Lettres.

FOREIGN OFFICE, MAY 11.—The Queen has been graciously pleased to appoint Francis Gerhard Myburgh, Esq., now Her Majesty's Consul at Nagasaki, to be Her Majesty's Consul at Kanagawa; Francis Howard Vyse, Esq., now Her Majesty's Consul at Hakodadi, to be Her Majesty's Consul at Nagasaki; and Abel A. J. Gower, Esq., to be Her Majesty's Consul at Hakodadi.

CURIOSITIES OF THE FAR EAST.—Chinese and Japanese objects of art continue to be in demand and to fetch good prices in Paris. A remarkable collection of artistic furniture and curiosities, the property of the late Prince de Beauveau, took place the other day. Amongst the former was a beautiful secretaire, presented by the unfortunate Marie Antoinette to one of the ladies of her court, which sold for 60,000 francs. At the same sale, two vases in old Japan porcelain, decorated with landscapes and figures, about two feet high, fetched 9,650 francs (£386), and two small vases in old China ware, 1,040 francs (£41. 12s.).

Literature.

Le Langage, son Histoire, ses Lois: Applications Utiles de ces Lois. Par le Comte D'ESCAYRAC DE LAUTURE. Paris: Librairie du Magasin Pittoresque. (Language, its History, its Laws: Useful Applications of those Laws. By Count D'Escayrac de Lauture.)—The origin and history of the languages of the earth belong to a class of subjects, more numerous than might be supposed, which experience has shown to possess a bewildering fascination for those that are once tempted to enter on their investigation. The vast mass of very curious information the inquirer is sure to accumulate, the singular coincidences and unexpected similarities that turn up, and the excitement constant on the expectation that the long sought for clue has at last been discovered, exercise such a power over the mind that hardly ever is the man who starts on this voyage of discovery

Digitized by Google

contented to forego its prosecution so long as health and intellect are vigorous. The Count de Lauture admits that the subject has already occupied him several years, and all that he now professes to do is "to sum up the little that he has up to this time been able to comprehend, to mark a stage, and to formulate the principles that must guide him in his further researches." The more important of these principles are as follows :—There exists between certain ideas and certain sounds, or certain modifications of one same sound, an affinity that determines the choice of first words and first forms, and that never ceases to affect the language by its influence. To be understood, the primitive language must have been accompanied by gestures and intonations, and have multiplied the sounds representative of one same idea. Radical monosyllables may be the general types of certain classes of ideas, but there is nothing to prove that they were antecedent to longer words. In several languages, at least, they may be looked on as a relatively modern conception of the grammarians. The fundamental or instinctive portion of a language is, with slight differences, due to diversity of race, climate, and circumstances common to all mankind. The subsequent, or consequent and conventional, portion of the language is more special to each people. Each people possesses a stock of its own, more or less considerable as to quantity. The author continues :—

Tribes and peoples, in commingling, mingle their vocabularies and their grammatical forms, altering their aspect and their sense; sometimes one idiom is almost entirely substituted for another. The idiom of the strongest, the most numerous, and above all of the most civilised people dominates in the medley; but the grammatical processes will be adopted from the grammar that is most simple, and will be the more simplified the more idioms and the more peoples go to form the medley. Civilisation results from commerce and the commingling of men: hybrid and allied languages, therefore, characterise civilised peoples; the groups of them that may be formed will be more natural and more extended as belonging to those fractions of the human race most developed; every idiom, in short, is more simple and more analytical in proportion as its formation is more hybrid and its use more diffused. Language is a phenomenon of natural order, obeying simple laws, that govern the mind of man; different languages are merely the forms and phases of those laws; all allied in some common points, all separated by their peculiar features, mixed in variable proportions and without reference to any affinity of the races speaking them, their being grouped into families is convenient to the mind; true in a very general sense, it absolutely ceases to be so when we penetrate into detail, or are bent on clearly defining limits that nature has not laid down. In an exact and philosophic point of view, we are, therefore, not to regard languages as mothers, sisters, or daughters, the one of the other, but as allied, and more or less modified one by the other. The comparison and juxtaposition of idioms can furnish no conclusive proof of the parentage or birthplace of the people speaking them. The study of language shows how language is formed, and what laws it obeys; it does not demonstrate that all mankind descended from a single pair, nor any more does it demonstrate the contrary.

Count de Lauture is evidently satisfied to carry on his investigations in the old-fashioned way, collecting an immense mass of facts before any theory is ventured upon. "A Dr. Schmidt deduced the whole Latin language from a single vowel. There is no foolery to which some specious support might not be afforded; but criticism, always on the watch, ought to register facts only when they are constant, and to express itself only in general terms when the detail is inaccessible or not yet thoroughly investigated. This is particularly the case with etymologies—that is, with the relations that link our own vocabulary to more ancient ones. In a general acceptation, we must acknowledge that such relations exist; in each particular case, on the contrary, our first inclination should be to doubt." In this cautious spirit the author brings together the fruits of his travel and his inquiries. The Chinese language, as might be conjectured, from his residence in that country and the time and labour he has in former works devoted to "The Flowery Land," is continually appealed to for illustration and comparison. A specimen moreover is given of a new mode of writing Chinese, which is applicable to all languages, and would form a universal handwriting easily intelligible by comparatively illiterate persons. There is also given a plate of a system of telegraphy adapted to the Chinese language, which may be found serviceable some day when the wires stretch from India still onwards to the Far East. Meanwhile those who take an interest in the subject of this thin quarto will be delighted with the immense quantity of facts so clearly and ably placed at their service by the Count de Lauture.

Monetary and Commercial.

The duty on tea has been reduced to 6d., which was to take effect on the 6th inst., but owing to remonstrances from the trade the Chancellor of the Exchequer has agreed to defer it until the 1st June. This reduction has not improved the prices so much as anticipated, owing to the immense stocks. Shippers in China will do well to confine their purchases to the better qualities, not only to avoid loss, but to induce the Chinese to bestow more care in the manipulation of the leaf. It will be manifest that with the reduction of the duty the finer sorts will be more in demand than ever, and it is of the last importance that less of what is termed here by the trade as "rubbish" should be exported. The losses of the past two years should be sufficient warning for all operators.

The biddings for bills on India, which were offered to the usual extent of £300,000, took place at the Bank of England, but only £44,500 was taken, the proportions allotted being to Calcutta £32,500, and to Madras £12,000. The minimum price was as before—on Calcutta and Madras 1s. 11d., and on Bombay 1s. 11¼d. Tenders on Calcutta and Madras at the minimum will receive in full. On Bombay all the tenders were below the minimum. This result, which shows a further rapid diminution in the demand for means of remittance to the East, is understood to have been anticipated, but it appears that, the India Council not requiring at present any additional funds, it was deemed unnecessary to lower the terms.

The following is from the report of the directors of the Chartered Mercantile Bank of India, London, and China, to be submitted at the annual meeting on the 16th of May :—

After providing for all bad and doubtful debts, and defraying expense of management at all points, the net profit amounts to £126,082. 1s. 1d., to which has to be added a sum of £75,831. 11s. 2d. undivided profit brought forward from the preceding year, making a total of £201,913. 12s. 3d. Out of the above total £136,153. 5s. has been paid in two half-yearly dividends, making together 20 per cent. on the paid up capital of the bank. The unappropriated balance of £65,760. 7s. 3d. is carried forward to the profit and loss account of the current year. The last instalment of £12. 10s. per share, due 2nd of January last, upon the ten thousand new shares issued the 1st of December, 1863, has been paid. The Newera Ellia and Tuticorin agencies have been closed, the results not answering expectations, and for a similar reason the Mauritius branch will be closed at the end of the current year.

Mr. George Palmer Robinson and Mr. Thomas Stenhouse having resigned their seats in the direction of the bank, the shareholders will have to elect two new directors. Mr. James Murray Robertson, one of the auditors, and Mr. Ellis James Gilman, of the firm of Messrs. Ashton and Co., London, offer themselves as candidates for the vacant seats, and the court have much satisfaction in recommending them to the shareholders for election; an adjourned general meeting will be held for the purpose.

The shareholders will have to appoint auditors for the current year. Mr. James Joseph Mackenzie, late of the firm of Messrs. Dent and Co., China, having consented to act, the directors recommend him to you for appointment in conjunction with the present auditor, Mr. J. Smith, Mr. James Murray Robertson retiring, in consequence of his being a candidate for one of the vacancies in the direction.

At the meeting of the Asiatic Bank on the 4th inst., the report of the directors, which will be found in another column, recommending a dividend equal to 20 per cent. per annum, was agreed to, and a vote of thanks passed to the directors and officers of the bank.

A meeting of the creditors of Messrs. James Marshall and Sons, cotton spinners, of Stockport, has been held at Manchester, when the total liabilities were stated at £280,000, and the assets at £200,000. An offer of a composition of 12s. 6d. in the pound was submitted for consideration.

At the meeting of the shareholders of the Bank of Hindustan, to be held on the 15th (this day), the report to be presented states that—

The net profits of the year, after defraying all expenses and providing for losses, amount to £15,893. 12s. 11d., including a balance of £827. 11s. 1d. brought forward from the accounts of the previous year, out of which the sum of £14,746. 5s. has already been paid as an interim dividend on the 20th August last, leaving a balance of £1,147. 7s. 11d., which it is proposed to carry forward. The directors have to express their regret that the operations of this company during the past year have not exhibited a more profitable result; but taking into consideration the comparatively recent formation of the bank, and the gradual extension of the branches abroad, the peculiarly disorganised condition of commercial affairs in the latter part of the year 1864, and the existence of a state of things specially calculated to embarrass the successful working of the branches, it must be a source of satisfaction that the transactions of the year have resulted in a profit, that a solid footing has been acquired by the bank, and its business and connections further extended. The causes which acted prejudicially to the welfare of the bank were of a peculiar and exceptional character. They have now ceased to exist. The operations of the present year have shown decided progress and satisfactory results, and it is therefore evident that the temporary interruption to the successful operations of the bank was caused by circumstances which were beyond the control of the directors. The total amount of capital in this bank on the 31st December, 1864, was £586,237, and on the 29th ult it amounted to £720,444. The directors have the pleasure to report that notwithstanding a variety of adverse circumstances, the calls have, on the whole, been remarkably well met. The reserve fund of the bank amounts at present to £92,900. In July last the Colombo branch, with its sub-branches at Kandy and Point de Galle, were opened. The progress of the establishments, although extending over a period of

Digitized by Google

scarcely six months, is satisfactory. The directors have also to announce that in February last a branch was opened at Yokohama.

The amount of bullion by the P. and O. Company's steamer *Nyanza*, on the 4th inst., from Southampton, was:—In gold to Madras, £140. In silver, to Hong Kong, £19,943. Total, in gold, £140; in silver, £19,943.

ARTICLES OF IMPORT.

TEA.—The Tea market the past month has undergone various changes; during the first half a firm tone prevailed, with strengthening prices, aided by considerable purchases on speculation; on 27th ult. a statement appeared in a leader of the *Times* of the likelihood of a reduction in the duty, which, on the evening of that day, was confirmed by the Chancellor of the Exchequer giving a further impetus to the market, with an advance on most classes of Black to the extent of 1½d. to 2d. per lb. Within the past few days a reaction has set in and a portion of the late advance has been lost in the few sales made; but importers are firm, and, taking the position of the trade in all its bearings, there are good grounds for all medium to fine teas maintaining present if not advanced rates, as our supplies till next October will be much under our requirements, and mostly of low and undesirable kinds. There has been no export demand for the Continent, but some parcels of good common to fair Oolong and a few Greens have been sent to New York; to Canada demand has ceased. The deliveries for the month are 10,100,000 lbs., making—Home Consumption for London, from 1st January to 30th April, 1865, 18,464,000: for 1864, 19,167,000; export from do., 1865, 8,500,000; for 1864, 9,539,000; sent coastwise from do., 1865, 11,100,000; for 1864, 12,056,000; total for 1865, 38,064,000; for 1864, 40,762,000. Black: There have been but few transactions in the grades up to common, and prices do not show more than ½d. per lb. advance. The inferior to good flavory have commanded considerable attention and large sales have transpired at an advance of 1½d. to 2d. per lb., and there are now but few of clean quality under 11½d. per lb. Kaisow kinds have also been largely dealt in, closing at 1½d. per lb. above the rates of last month; medium to fine as well as finest Kaisow is scarce, particularly the former grade, and recourse is had to the imitation made from Tayshan leaf, medium qualities of which are 1d. per lb. better; common still remains out of favour and prices are quite nominal. In Amoy red leafs there has scarcely been a transaction during the late activity, but prices are nominally 1½d per lb. higher, there being few if any sellers under 1s. per lb. There has been a brisk trade in black leaf of the fair to good useful grades at an advance of 1½d. per lb.; medium to fine have also had their full share of attention, the latter grade selling at 2d. per lb. advance, as the supply is getting very limited; in finest only a few sales have been made at 1d. per lb. advance. In Souchong we do not hear of much having been done. Oolong of the good common grades have commanded more notice for shipment to New York. Scented Tea: both Canton Orange Pekoe and Caper have been almost neglected, and prices show no material change. Foo-Chow make of Orange Pekoe has been moderately dealt in at a slight advance for grades up to 2s. 2d. per lb. In Caper there is nothing new to advise. Green: There has been more inquiry, but the supply offering is very small, as no arrivals either of Fychow or Moyune have reached this; prices for good to fine young Hyson and Gunpowder are 1d. to 2d. per lb higher on last month's rates. Stock: Of black on 30th April, in London, 89,964 lbs.; Green, 11,342 lbs.; the total stock of the United Kingdom being about 112,000,000, against 105,000,000 in 1864.

SILK.—There is no improvement in the position or prospects of the Silk Trade. Reduced stocks and very small arrivals have led to a further rise in prices, but all else is unsatisfactory, and not the least so are the prospects for the coming season. It is too early to speak with confidence as to the probable result of the new crop in Europe, and it may be it will be less miserable than present feelings induce people to fear; but no one is sanguine enough to anticipate any material improvement upon last season. In the meantime consumption both here and on the Continent is accommodating itself to the exhausted character of the supply and the deliveries have fallen back to the lowest point of later years.

COTTON.—There was a fair demand on the spot throughout last week, from both Exporters and the Home trade, and some speculative inquiry for parcels to arrive. Quotations remained without change from the week previous. The London Cotton Broker's Association report the following sales of cotton from the Far East during the week ending Friday the 5th:—30 bales of China, fair, at 8¼d.; 570 bales Japan, barely fair to good fair at 8¾d. to 9½d. The stock of China and Japan in London on the 4th May was 14,449 bales, against 25,581 at same date last year; the total stock in London being 108,497 bales, against 87,938 last year. The principal excess is in Madras, of which there is in London 22,440 bales more than in 1864. Of China and Japan the stock afloat to London and Japan on the 5th May, was 23,446 bales China and 65 bales Japan, against 94,441 bales of the former, and 6,476 bales of the latter at the same date in 1864. At Liverpool, China and Japan continued in fair demand during the week ending the 5th, and generally full prices were paid. The total stock in Liverpool on the 5th of May was 537,000 bales, against 357,926 last year. Arrivals at Liverpool during the week, from Hong Kong, James Vinnicombe, 3,930 bales; from Shanghai, Ariadne, 5,400 bales, Coringa, 5,132, Ann Helen, 7,904 bales, Roodic, 4,149 bales. There was a good demand at Liverpool on Monday, the 8th, and Egyptians are quoted ¼d., Surats ¼d., and American ¼d. to ½d. per lb. dearer.

SUGAR.—The market has evinced less general animation since our last, but prices on the whole have been firmly supported, and in floating cargoes a large business has been done at advanced rates. At public sales were brought forward 3,372 bags Manila, about half superior yellow grainy, Muscovado sort, which were held firmly and brought in at 36s. 6d. to 37s. 6d., the rest being sold at and since, viz., low yellow Muscovado, 31s. 6d., and strong Brown Clayed, 30s. 6d. to 31s. By private contract 12,000 bags Clayed Manila went at 29s. 6d. to 30s. The market closed for the week with a quiet tone.

COFFEE.—General steadiness prevails in the Colonial market, and previous rates continue to be well sustained. Only a trifling quantity Plantation Ceylon has been offered by auction, which brought firm prices, and privately, several small parcels have been sold on similar terms. 240 casks, 1,115 bags Native were held for some advance, and only a small part was taken, small, 65s. 6d. to 66s., good ordinary, 68s. to 68s. 6d.

RICE.—The demand has been fairly maintained, and sales of 60,000 bags have been effected at fully last week's prices, Bassein 9s. to 9s. 6d., ordinary Nakrenzie and Moulmein 8s. 7½d. to 8s. 9d., Rangoon at 9s. 1½d to 9s. 3d. for ordinary, and 10s. 3d. for fine; also white Bengal at 12s. 6d. to 13s. 6d., and pinky Madras at 11s. to 11s. 9d. At public sale, 682 bags cargo Bengal were sold at full rates, middling to good 10s. to 11s. 6d.; 4,009 bags white were withdrawn above the value.

CARDAMOMS.—Firm: 10 cases Malabar at auction retired: and of 33 bags Madras, two sold at 3s. per lb. for middling lean: limited business privately at full prices.

CAMPHOR.—Again 2s. 6d. to 5s. per cwt. dearer, and business to a fair extent done privately up to £6. 10s. per cwt. for China; and the market remains firm, though quiet.

CASSIA LIGNEA.—Is 2s. to 3s. per cwt. dearer, with improved trade demand; 209 boxes at auction sold at 79s. to 82s. per cwt. for second to 1st piles, of ordinary quality. Buds: Nothing of any consequence doing.

CINNAMON (CEYLON).—We quote 1st sort 1s. 4d. to 2s. 4d. per lb.; 2nd, 1s. 3d. to 2s. 2d.; 3rd, 1s. 3d. to 1s. 9d.; and 4th and Jungle 10d. to 1s. 4d. Market quiet.

COCOA NUT OIL.—This market has been steady, but quiet; no change in value, and transactions small. 40 casks Cochin, 204 casks Ceylon, and 37 casks Sydney at auction.

DRUGS.—Cubebs: Continue flat, with little doing: 50 bags at auction retired. Dragon's Blood and Galangal Root: Nothing of any moment doing in either of those drugs. Rhubarb: Transactions—sales and re-sales—have been large, and prices are generally considerably

Digitized by Google

higher; only 37 chests at auction, and but five sold, at 6s. 6d. to 6s. 8d. per lb. for fair round, and 3s. 9d. ordinary.

GUMS.—Benjamin: In Siam nothing doing: Sumatra quiet, and rather lower; and of 90 cases at auction. only a few sold at £13 per cwt. for good 2nd quality, false packed; £6. 15s. middling 3rd; and £2. 7s. 6d. ordinary 4th. Damer: Continues quiet, and without business of interest. Gamboge: Quiet, as before: 9 cases at auction, retired.

GUTTA PERCHA.—Very quiet, with little trade.

HEMP (MANILA).—This market shows improvement: very good business accomplished privately, and prices 10s. per ton higher: 662 bales damaged at auction, all sold at very full value.

HORNS.—Firm; auctions confined to 7 tons Madras Buffalo horns sold at 29s. 6d. to 30s. per cwt. for 2½ lbs. average.

INDIA RUBBER.—Market very quiet, with scarcely any trade; 174 packages Singapore at auction, all retired.

JAPAN WAX.—Quiet: 40 boxes at auction all retired.

OILS.—Anniseed:—Had advanced to 7s. 6d. per lb. with moderate operations, but has latterly become quiet, and receded to 7s. 3d. Cassia: Fair business has been done at the previous value of 8s. 3d. per lb., but recently the Oil has become quiet, with sellers rather than buyers at that price. Cinnamon, and Mace and Nutmegs: Nothing of any importance doing in either of these Oils.

SAGO.—Steady; 503 boxes at auction sold at 19s. to 19s. 6d. per cwt. for good small. Flour: Is rather dearer; moderate business having been done privately at 14s. 6d. to 14s. 9d. per cwt. for good.

SHELLAC.—Quiet, and prices generally in favour of the buyer; of 1,362 packages at auction about half sold: Orange at £5. 2s. 6d. to £5. 12s. 6d. per cwt.; Garnet, £5. 5s. to £5. 7s. 6d.; Liver, £4. 10s.; Button, £3. 17s. 6d. to £5. 10s.; Native, £4. 5s. to £4. 15s.; Block and Blocky, £3. 5s. to £4. 15s. Private business reduced.

SPICES.—Cloves: Not any change, in the absence of business of any interest. Mace: Steady; of 15 cases Penang at auction, two-thirds sold at 1s. 2d. to 1s. 6d. per lb. for middling to good reddish. Nutmegs; Firm; 59 cases Penang at auction sold at 3s. 4d. to 3s. 7d. per lb. for good to very good bold, and 1s. to 1s. 7d. middling small to fair medium.

PEPPER.—Black: Had been steady, but latterly has given way slightly in value. Of 685 bags Singapore at auction, one-third sold at 3⅞d. to 3¼d. per lb.; and of 3,274 bags Penang, two-thirds sold at 3d. to 3⅛d. White: Firm; of 246 bags Singapore, and 71 bags Penang at auction, half sold at 6d. to 6⅛d. per lb. for middling to good.

TERRA JAPONICA.—Cutch, Pegue: Steady; and of 6,281 bags at auction, two-thirds found buyers at 24s. 6d. to 25s. 6d. per cwt. for fair to good. Gambier: Firm, and geneally dearer, with good private trade, chiefly at 21s. 9d. to 23s. per cwt. on the spot, and 22s. to 22s. 6d. for arrival. 1,537 bales at auction, all retired.

TIN.—This market remained firm and active for some days subsequently to our last, and good business was done in Straits, including sales for arrival up to £98 per ton, but latterly the metal has become quiet, and the value of good Straits is £93 cash.

TOBACCO.—The Spanish Government, it is said, finding no buyers in Manila, are making heavy shipments to Lisbon, and this policy may eventually act favourably for holders; very few transactions to note. Manila Segars and Cheroots: Continental markets continue to supply the consumption of this country, we paying them the profit that ought by rights to go through the usual channels of commerce here; by latest advices 140 cases are in reality to be shipped direct to London. Java: A large sale has taken place on the continent of this growth, but nothing suitable for the English market could be obtained; there has been a fair demand for coloury lots, but at lower prices. Japan: Supplies are wanted, but it is doubtful if shippers will find it worth while to continue their operations in this growth at the present rates. Prices—Manila Cheroots and Segars, 8s. to 9s. 3d. per lb.; Manila Leaf, 7d. to 3s.; Japan, 4d. to 7d.; Java, 6d. to 1s. 0½d.

MISCELLANEOUS.—Galls: Nothing of importance doing in Turkey; China and Japan flat; the latter cheaper. 105 cases China at auction, retired at 70s. per cwt., and 54 cases Japan sold at 54s. to 54s. 6d. for fair. Musk: Remains scarce and firm. Rattans: In demand, and rather dearer; 10,925 bundles Singapore and 2,598 bundles Penang at auction sold at 3s. 4d. to 6s. per 100. Sapanwood: Not any business of consequence doing. Mother-o'-Pearl Shells: Steady; 50 cases Manila sold at auction at £5. 7s. 6d. to £5. 10s. per cwt. Soy: Remains firm, with inquiry, but very little trade. Star Anniseeds: Very scarce, and much wanted; nothing doing. Sticklac (Siam): Flat; of 465 cases at auction, very few sold at 46s. per cwt. for fair small. Tortoise-shell: Auctions have combined 19 chests Sydney, one-third sold at 9s. to 12s. 6d. per lb. for pickings to inferior in sorts; and 12 cases Singapore, one sold at 9s. 6d. per lb. Vermilion: Dull, and offering at a little less money.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7. 15s. to £8; nail rod, £8. 10s. to £9; hoops, £9. 15s. to £10. 10s.; sheets, single, £10. 15s. to £11; Staffordshire bars, £8. 15s.; rails, £6. 12s. 6d. to £7.

STEEL.—Swedish keg, £15.

COPPER.—Sheet and Sheathing, £95 to £97 per ton; yellow metal, 7¾d. to 8¼d. per lb.

TIN.—97s. for block; 98s. for bar. Tin plates, best charcoal, I.C., 28s. to 29s.

ELISABETH (Dut. brig), Hamburg to the Amoor, April 9, 5 N., 27 W.

FREIGHTS AND CHARTERS.

The last few days have brought numerous vessels into port, and although it was expected that the numerous arrivals would cause outward freights to give way, yet, in consequence of the prospect of an early suspension of hostilities in America, rates have been fully maintained, and for the leading ports still show an upward tendency. In homeward charters but little change has taken place; some inquiry, however, has been made for a few ships from Manila at 55s. per ton for sugar, and 65s. for hemp; also for small first-class vessels from Colombo at 75s. In coal freights there is a fair demand for vessels to the Chinese ports and Manila, and rates are well supported.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 20s. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 30s. weight or measurement. To Bankok: 60s. weight or measurement. To Ceylon: 40s. weight, 25s. measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £35 and £1. 10s. For Shanghai: £41 and £1. 16s. For Manila: £1. 12s. 6d. For Batavia: £23. For Singapore: £25 and £1. 1s. 0d. For Galle: £26 and £1. 5s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty having invited tenders for the conveyance of 142 tons naval stores and 800 hhds. porter from the River Thames to Hong Kong, have ordered the Violet to be surveyed for that purpose.

MISCELLANEOUS.

At ST. HELENA.—March 24, from Banjoewangie, Presto, Feckes, and sailed 25th for Amsterdam; 26, Franz and Elise, Niedfield, and sailed 27th for Amsterdam; 28, from Batavia, H. Liduina, Brink.

At TABLE BAY.—March 17, from Singapore; Edwin Fox, McLean.

At MAURITIUS.—March 18, Magnet, King, sailed for Singapore.

CASUALTIES.

The Guadaloupe (Spanish barque), Munoz, from Macao, &c., whilst entering the harbour at Havana, April 9, got into collision with the Minona (Swedish barque), bound thence for Falmouth. The latter vessel received some damage, and put back to be surveyed.

The Juanita, Atkinson, from Sunderland for Hong Kong, put into Falmouth, May 4, leaky.

The Kandanghauer (Dut. ship), Zeelt, from Nieuwe Diep for Batavia, ran aground on the Zuiderhaaks, May 1, but was got off and towed back to Nieuwe Diep, and would be surveyed.

The Fanny, of Hanover, Carlton, from Cardiff for Manila, was burnt previous to April 4, in lat. 1 N., 25 W., her coals having ignited; part of her crew were taken on board the Queen of the Bay, and the rest on board the Naval Brigade, which latter vessel reports that a portion are on board the Rosalie and the Lizzie Southard.

The Sharpshooter, from Singapore for Liverpool, put into Mauritius April — dismasted.

The Gentoo, from Liverpool for Valparaiso and Hong Kong, put into Queenstown May 11, leaky.

THOMAS CARDWELL, Esq. (Messrs. Thomas Cardwell and Co., and Cardwell, Parsons, and Co., Bombay).
CHARLES A. FEARON, Esq. (Messrs. Fearon and Co., late of Messrs. Augustine Heard and Co., China).

Auditors—J. E. COLEMAN, Esq., and H. E. BIRD, Esq., firm of Messrs. Coleman, Turquand, Youngs and CO.
General Manager.—ANTHONY MORRISON, Esq. | Acting Manager.—F. W. LAWRENCE, Esq.
Bankers.—THE BANK OF ENGLAND; THE LONDON JOINT-STOCK BANK.
Agents in Ireland.—THE NATIONAL BANK. | Agents in Scotland.—THE BRITISH LINEN COMPANY.
Brokers.—Messrs. FOSTER and BRAITHWAITE. | Solicitors—Messrs. FRESHFIELDS and NEWMAN.

FIRST REPORT OF THE COURT OF DIRECTORS TO THE SHAREHOLDERS.

The Court of Directors, in presenting their First Report and Balance-sheet, have great pleasure in congratulating their co-proprietors upon the position attained by the Bank during the brief period that has elapsed since the commencement of its operations.

The half-year for which the accounts are now rendered, and during which period a portion only of the existing branches of the Bank have been working, represents not only the least favourable season of the year in India, but has also been characterised by a severe monetary crisis in this country, which has necessitated the exercise of the utmost caution in conducting the business of the Bank, and a consequent restriction of its operations.

Notwithstanding these drawbacks, the net profits, after deducting all charges upon the current business of the Bank, and fully providing for all bad and doubtful debts, amount to £70,439. 4s. 8d.

This sum the Directors propose to distribute in the following manner, viz.:—

£37,500 0 0	by a Dividend at the rate of 15 per cent. per annum.
£12,500 0 0	by a Bonus of 10s. per Share, equal to 5 per cent. per annum, being together equal to 20 per cent. per annum on the paid-up capital on 31st December, to be paid to the proprietors free of income-tax.
£8,484 11 11	in liquidation of the whole of the Preliminary Expenses.
£5,500 0 0	to be added to the Reserve Fund, which, with the Premiums arising from the recent issue of new Shares, will then amount on 30th June next to £175,000; and the balance, say—
£6,454 12 9	they propose to carry to the credit of the Profit and Loss Account for the current year.

The Directors have further the pleasure to congratulate the shareholders upon the successful issue of the new Shares, both here and in India, which were all promptly taken up upon the terms specified in the circular addressed at the time to the original proprietors; the additional capital, though not required by any exigencies of the Bank, was deemed desirable to place it upon a footing suitable to its increasing business.

The Directors, whose term of office has now expired, being eligible for re-election, offer themselves accordingly, and they recommend the re-election of the present able professional auditors, and the election, in addition, of a non-professional auditor for the current year.

The Directors also recommend the Shareholders to authorise them to declare and pay such an interim Dividend half-yearly, for the current and future years, as they may deem desirable, pending the final adjustment of the accounts.

F. BOYKETT, Chairman.

4, Lombard-street, E.C., April 20, 1865.

F. W. LAWRENCE, Acting General Manager.
A. O. DAVIS, Acting Accountant.
F. BOYKETT, Chairman.
J. A. RUSSELL, WILLIAM MAITLAND, } Directors.

London, April 13th, 1865.—We have examined the several statements transmitted from the Managers of the several Branches, and also the Books in London upon which the above accounts have been framed, and hereby certify to their correctness, according to such books and statements, to 31st December, 1864.

JAS. EDW. COLEMAN, H. E. BIRD, } Auditors.

MINUTES of the FIRST ORDINARY GENERAL MEETING of the Shareholders, held at the Bank's Offices, No. 4, Lombard-street, on THURSDAY, the 4th day of May, 1865,

FRANCIS BOYKETT, Esq., in the Chair.

The Advertisements convening the Meeting and above Report of the Directors and General Balance-sheet, with Statement of the Profit and Loss Account, closed to the 31st December last, having been read, the following Resolutions were successively put, and carried unanimously, viz.:—

1. Proposed by the Chairman; seconded by J. A. Russell, Esq., "That the Report and Statement of Accounts now read be adopted."

2. Proposed by the Chairman; seconded by J. A. Russell, Esq., "That a dividend for the half-year ended 31st December last at the rate of 15 per cent. per annum, and an additional dividend by way of bonus of 5 per cent. per annum, be declared and paid accordingly, free of income-tax, and that the same be paid in London on and after the 6th instant."

3. Proposed by Gavin Steel, Esq.; seconded by F. Noad, Esq., "That the Directors be and are hereby empowered to declare and pay half-yearly such an interim dividend for the current and future years, as they may in their discretion see fit, pending the final adjustment of the accounts."

4. Proposed by Michael H. Scott, Esq.; seconded by John Cannon, Esq., "That the following gentlemen whose term of office has expired, be and they are hereby respectively re-elected Directors, viz.:—Francis Boykett, Esq., J. A. Russell, Esq., Thomas Cardwell, Esq., C. A. Fearon, Esq., William Maitland, Esq."

5. Proposed by T. H. Coles, Esq.; seconded by Jas. Parsons, Esq., "That J. E. Coleman and H. E. Bird, Esqrs., be respectively elected Auditors; that A. G. Milne, Esq., be elected an additional Auditor for the current year; and that the sum to be paid by way of remuneration to the Auditors for the past and current years shall be fixed and determined by the Court of Directors."

6. Proposed by John Parsons, Esq.; seconded by T. H. Coles, Esq., "That the cordial thanks of the Shareholders be rendered to the advisers and supporters of the Bank in Bombay, to whose zealous co-operation with the Directors and constant exertions on the Bank's behalf the success of the Bombay Agency is so greatly due."

7. Proposed by M. H. Scott, Esq.; seconded by Gavin Steel, Esq., "That the best thanks of the Shareholders be given to the Chairman and Directors for their able administration of the affairs of the Bank."

8. Proposed by the Chairman; seconded by J. A. Russell, Esq., "That the thanks of the Meeting be tendered to J. E. Coleman and H. E. Bird, Esqrs., for their able audit."

9. Proposed by the Chairman, seconded by J. A. Russell, Esq., "That the thanks of the Meeting be conveyed to the Agents, Managers, and other officers of the Bank, for their zealous services for the past half-year."

MORELL THEOBALD, Esq.

REPORT,

Presented to the First General Meeting of Shareholders, held at the London Tavern, Bishopsgate-street, on Thursday, the 20th day of April, 1865.

The Directors, in presenting the Statement of the Accounts to the 31st December, 1864, embracing the transactions of the Company from its commencement to that date (a period of eight months only), have much pleasure in congratulating the Shareholders on the satisfactory progress of the business of the Company.

The Accounts, which have been examined and certified by the Auditors, show that, after having paid office charges and other expenses, losses in the Fire Department, and all adjusted claims for losses, averages, and returns in the Marine Department, there is a balance on income account of £59,719. 16s. 6d. This sum, less 10 per cent. deducted as stated in the Balance-Sheet, will be carried forward to the account for 1865.

The Directors report with much satisfaction the acquisition of the business of the Oriental and General Marine Insurance Company, a Company which had attained a position of considerable importance in the City.

The Auditors, Messrs. Johnstone, Cooper, Wintle, and Co., and E. H. Galsworthy, Esq., retire from office in conformity with the Articles of Association, but, being eligible, offer themselves for re-election.

The Shareholders will be called upon to determine the remuneration of the Auditors.

The Shareholders will also be called upon to alter the 5th and 14th Sections of the 96th Clause of the Company's Articles of Association, in order to prohibit the loan, advance, or investment of any part of the Company's funds, upon or in the Shares of the Company, and to alter the Articles of Association for the purpose of empowering the Directors, with the sanction of general meetings, to declare interim dividends from time to time.

In conclusion, the Directors would remind the Shareholders that they may, by their individual exertions, materially extend the operations of the Company, and trust that no opportunity for doing so will be lost by them.

The following is now the complete list of the Company's agents abroad:—

CALCUTTA	GRANT, SMITH, & Co.
BOMBAY	RITCHIE, STEUART, & Co.
MADRAS	BAINBRIDGE, BYARD, GAIR, & Co.
SINGAPORE	CUMMING, BEAVER, & Co.
HONG KONG	JOHNSON & Co.
SHANGHAI	JOHNSON & Co.
YOKOHAMA	DE CONINGH & Co.

By order,
JOHN SCOTT, Secretary.

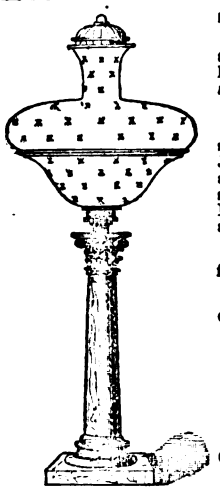
TUCKER AND SON'S

IMPROVED

ENAMELLED PUNKAH TABLE LAMPS.



THE celebrity which TUCKER AND SON'S LAMPS have acquired in the East for burning *steadily* under the Punkah or in side draughts, and *brilliantly* with any of the *coarse native oils*, renders eulogy unnecessary; but having been enabled, by increased facilities of manufacture, very considerably to *reduce the prices* of the above favourite (but hitherto expensive) description of their lamps, and Son beg to notify the fact to the Eastern public.

They are elegant and durable, are finished in exact imitation of many beautiful stones and marbles, such as Malachite, Lapis Lazuli, Serpentine, Sienna, Brocatella, Jasper, &c., and are not affected by heat, damp, friction, or insects; oil, spirits, or acids accidentally spilled. The enamel surface is so inseparable from the base (block slate, proverbial for its strength) that it cannot be removed except by an edged tool. It *requires* simply *dusting*, but if rubbed hard, it only adds a gloss to its appearance—at all times cool and agreeable.

After ten years' constant use and handling, these lamps are none the worse for wear.

Malachite (green), Serpentine (brown), or Lapis Lazuli (blue), are most recommended.

Table Lamp complete, with engraved glasses, as sketch, 72s.

A Plainer Lamp, without the Corinthian capital, 50s. complete.

Either pattern, with plain frosted glasses, 7s. 6d. each less.

*** *The above Lamps are supplied to burn Petroleum or Rock Oil also.*

Orders can be sent through any merchant or Agent, or, if accompanied by a remittance, direct to

JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle half bottles, 10s 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty, and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S PILLS.—ENJOYMENT OF LIFE.—When the blood is pure, its circulation perfect, and the nerves in good order, we are well. These Pills possess a marvellous power in securing these great secrets of health by purifying, regulating, and strengthening fluids and solids. Holloway's Pills can be confidently recommended to all persons suffering from disordered digestion or worried by nervous fancies or neuralgic pains. They correct acidity and heartburn, dispel sick headache, quicken the action of the liver, and act as alteratives and gentle aperients. The weak and delicate may take them without fear. Holloways Pills are eminently serviceable to invalids of irritable constitution, as they raise the action of every organ to its natural standard, and universally exercise a calming and sedative influence.

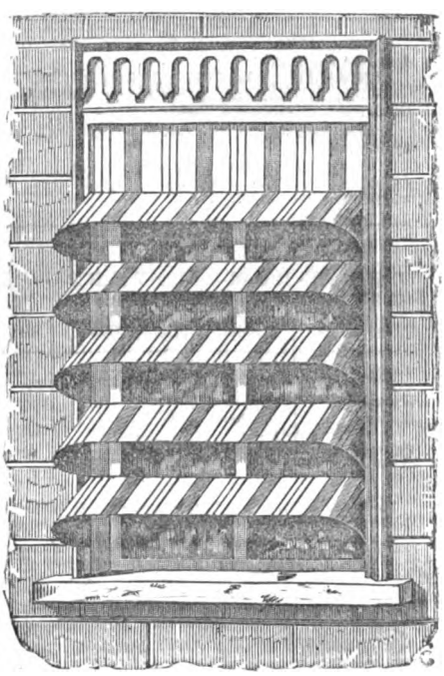
J. TYLOR AND SONS, WARWICK-LANE, NEWGATE-STREET, LONDON.

PATENT HELIO-SCENE SUNBLIND.



THIS very handsome SUN BLIND has the effect of keeping rooms cool in summer to an extent never before attained, for the very obvious reason that a double layer of cloth (by the overlapping of the hoods) is interposed between the sun and the window, whilst the wide open space between each hood favours a copious ventilation.

The blind is so light that a child can draw it up, and so simple in construction that it is impossible for it to get out of order. It is particularly valuable for windy situations, because of the peculiarly firm way in which it can be fixed, and also because the wind passing freely through it takes no effect upon it.

For tropical climates extra Linen Covers are provided, which, being merely laced on to the Blinds, can be readily removed for washing. In measuring for these Blinds, send the exact size of the opening OUTSIDE the window.

Price 2s. 9d. per square foot, complete in wooden frames the full size of the "reveal" or opening. The Linen Covers 1s. per square foot extra.

R. LOWTHER & CO.,
31, REGENT-STREET, LONDON.

N.B.—Ordinary Venetians and all descriptions of Sunblinds made and repaired.

Per P. and O. steamer from Marseilles, June 28.—To Singapore: Mr. John Ross.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Dates hence are to the 1st April. The London mail of the 26th January arrived out on the 24th March.

The attempt to form a Municipal Committee had again failed—the opposition coming (says the *Herald*) "from the very man from whom, of all others in the community (judging by his past invaluable services to it), we should have looked with the most perfect assurance for the heartiest and most consistent, as well as useful and intelligent aid—Mr. Von Brandt, the Prussian Consul." This gentleman abjured the plan given in the last issue of the *London and China Telegraph*, unless it was conceded that *one* Prussian subject should always be placed on the Executive Committee. This proposition was rejected by the land-renters, who came to the determination, "That the resolutions arrived at by the last meeting should be adhered to; and that the existing Sanitary Committee receive power to add to their number, and be requested to continue giving their services to the public as heretofore; and it is further resolved that the Consular Board be respectfully requested to pay over to the said committee the 20 per cent. arising from ground-rent, and that they are empowered to keep the streets in repair, to drain the settlement, and remove obstructions from the streets."

It is quite clear (remarks our contemporary) that both these resolutions cannot be carried out, and we imagine that the latter, being the less troublesome to the public, will be the first essayed. If this should be found impracticable, as we imagine it will, there will then be the other resolution—to follow the scheme unanimously agreed upon at the last meeting—to fall back upon. The way to give practical effect to this is to get all the Consuls who are willing to do so to invite their respective nationalities to return their delegates as agreed upon, who might then at once proceed to work. If the Prussian Consul should decline to do this, and it not being done should refuse to hand over the Prussian proportion of the 20 per cent. returned by the Japanese, the Council would then have to work without the assistance of the Prussian delegates, with some decrease of anticipated funds, but yet, we conceive, deprived of but little of the ability of well working which might at any time been looked for.

It was mentioned in our last number that a statement that the French Legation had been endeavouring to obtain a concession of the monopoly of the Silk trade, had been officially contradicted by the Consul-General. The *Japan Herald* gives the following as the result of its inquiries on the subject:—

"It appears that on the 9th of December last, M. A. Behic, the French Minister of Commerce, addressed to the Chamber of Commerce of Lyons a letter, the chief purport of which may be thus rendered:—

It appears that the splendour of their establishments and the amplitude of means displayed by the great English and American firms, who, so to speak, monopolise the trade of China, is not so much the result of a vain ostentation as of clever tactics to drive off competition. In the eyes of the natives, as well as of the foreign community, the commercial credit is measured by the magnitude of the expenditure. It follows that, under such difficult conditions of success, French merchants have been hitherto deterred from establishing themselves in that country. . . . But when individual endeavours prove unavailing, association, conceived and carried out upon a large scale, would be certain of success. Too heavy to be borne by one single firm, the expenditure might be reduced

Digitized by Google

to inconsiderable proportions for the constituents of one vast establishment. . . . French importers of silk might agree upon the selection of a small number of agents, who instead of representing individual purchasers would receive and execute the orders of the silk trade of France. I am aware that such a scheme can receive no immediate realisation, but I attach the greatest importance to its being thoroughly examined in your department, and I shall be happy to be informed of the observations which shall have sprung from a discussion thereon.

"From the above it appears that the French Minister suggests a scheme to reconcile what seems to be abnormal, viz., the disproportion between the quantity of China and Japan silks actually consumed by, and that directly imported into, France. However, he acknowledges his information upon the subject to be imperfect, and he urges upon a competent body, the Chamber of Commerce of Lyons, the necessity of studying the question and of reporting to him. If, as is likely to be the case, the merchants composing the Chamber of Commerce of Lyons be well informed, their answer to the Minister cannot be doubtful. They will tell him that in China and in Japan silk is bought for cash, and that the importance of the business of any given firm depends, not on the luxury they display in the eyes of the natives, but on the amount of the capital placed at its disposal by its constituents at home. The French commerce in China and in Japan is established upon the same principles as the English or American commerce, and it will increase by the same means —free-trade, the development of institutions, credit at home, and time. It seems to us that the rumour of the strange monopoly of the export of silk, which we referred to at commencement, may have been an exaggeration of a well-known and open fact—the shipment made last year of a certain quantity of silk-worms' eggs by the French Legation to the Society of Acclimatisation of Paris; that an erroneous interpretation of the above document has contributed to accredit it, and that gossip has done the rest."

The men-of-war in harbour were—English: Severn, Conqueror, Rattler, Leopard, Barossa, Osprey, Bouncer, Havoc, Kestrel; French: Dupleix, Kien Chan; United States: Jamestown; Dutch: Metalen Kruis; Russian: Bongatyr.

Mr. A. A. Pearson, assistant paymaster of the *Leopard*, has deserted, he previously having forged the captain's endorsements, and it is feared his defalcations will amount to a considerable sum.

HAKODADI.

At a quarter to five in the afternoon of the 13th February the tranquillity of our community (writes a correspondent) was disturbed by the report of fire. This time the doomed building was the British Consulate. At first huge volumes of smoke were seen to ascend from the back premises, and then the flames broke out in such fury that, during the ten minutes that elapsed before any of the foreign community could reach the scene of disaster, the right wing, which is occupied by Mr. Enslie, H.B.M.'s Acting Consul, and situated upwards of seventy feet from the place where the fire originated, was in flames. No hopes of preserving the building could be at any moment entertained, and every effort was given to the saving of the archives. These efforts were successful, but all else fell a sacrifice to the flames. Every one now did his utmost to save the adjoining Russian Consulate, but, owing to a strong westerly wind which prevailed during the first part of the conflagration, the flames spread with such astounding rapidity as to render all efforts quite unavailing. The Russian Consul's house and those of Dr. Zalesky, Captain Kostereff, and Mr. Tswilkoff were entirely consumed. The three latter gentlemen succeeded in saving the greater part of their effects. The members of the British Consulate, and Mr. Goskavitch, H.I.R.M.'s Consul, were not so fortunate, almost the whole of their property being totally destroyed. Mr. Acting British Consul Enslie has endeavoured to collect both foreign and Japanese statements regarding the circumstances under which this fire took place. Mr. Goskavitch appears to have been the only foreigner present during the earlier part of the conflagration. When first seen by him it was raging in the court-yard verandah (Russian side). The Governor seems of opinion that it originated in a room occupied by one of Captain Vyse's servants. All must sympathise with those who have suffered by this deplorable affair. Mr. Goskavitch's loss, however, claims a particular regret. That gentleman has not only lost all his personal property, but also an extremely valuable Japanese and Chinese library, and a fine collection of shells, ferns, &c.

CHINA.

SHANGHAI.

The P. and O. mail of Feb. 10 arrived out on the 31st March, and the French mail of Feb. 17 on the 5th April: The dates are now down to the morning of Sunday, the 9th April. Telegrams from London up to March 4 had been received announcing the failure of Messrs. Fletcher and Co., and the depressed state of the tea and cotton markets. This caused very great depression throughout the settlement. The stoppage of Messrs. Lindsay and Co. is not recorded in the papers. Messrs. Wheelock and Co., auctioneers, stopped on the 6th April.

The British Consular Court has been occupied by two important cases, viz., the Queen *v.* Baynton (resistance offered to the Customs' authorities at Ningpo, and breach of treaty), in which the prisoner was on the first charge sentenced to six months' imprisonment, to date from the first day of his confinement; but with respect to the second no additional penalty was inflicted, in consideration of the five months' compulsory detention in Shanghai to which the prisoner had been subjected, over and above the aforesaid term of confinement; and that of the *Fire Dart v.* the *Emperor* (collision), the decision in which was given in favour of the defendants, with costs. The Court held that the master of the *Fire Dart* was in fault in porting his helm to avoid the *Emperor*, and that he should subsequently have stopped and reversed his engines, which he omitted to do.

An inquiry has been held before John Markham, Esq., H.B.M. Vice-Consul, into the circumstances attending the suicide of Daniel MacGregor, master mariner, captain of the British ship *Dunkeld*. The evidence of the chief officer, the steward, and the third mate of the *Dunkeld* was taken. From the depositions of these witnesses it appeared that the deceased was habitually a sober man, and that everything went on as usual until the arrival of the mail before last, when on receipt of his home letters he became unusually reserved, and seemed to have something weighing on his mind. On the 25th, at 8 A.M., he was found dead in his cabin, having committed suicide by firing a revolver through his head. The evidence of T. Barclay, Esq., M.D., was taken. He considered that the deceased inflicted with his own hand the wound which caused his death. He must have inserted the muzzle of the revolver into his mouth and fired it off. The finding of the Court was as follows:—

"The Court having weighed the foregoing evidence and viewed the body of the late Daniel McGregor, is of opinion that the deceased met with his death from a gun-shot wound inflicted by his own hand while he was in a state of temporary insanity."

The river has been under supervision since our last, and we are happy to say that the wreck of the *General Meslin* has been in a great measure removed. She is now completely smashed, and the only difficulty that remains to be overcome lies in the large quantity of coal which is covered with mud, and is nearly as solid as rock. Now that the weather has become somewhat milder, Chinese divers have set to work at it, and will after a few days clear away the last trace of the wreck.

On the 28th and 29th of March, the steamers and sailing vessels chartered by the Imperial Government for the transport of troops to Fukien province, left the river. Colonel Kirkham accompanied the head-quarters as military adviser, and will, it is to be hoped, organise a disciplined contingent, before the campaign in Fukien is opened. Indeed without foreign assistance the Imperialists will have no chance of making head against the efficient troops which the rebels possess, and which, under the active superintendence of efficient foreign officers, are every day becoming more perfect in European drill. The Chinese steamer *Confucius* is to be detached for service on the coast of Fukien.

CARRIAGE ROAD TO WOOSUNG.

A subscription list for the construction of a carriage-road to Woosung is being carried round to the different houses in Shanghai. There is little doubt that it will be quickly filled, and that the residents, persuaded of the advantages which Woosung presents as a summer sanitarium, will give their unanimous support to a project which will secure to them an easy mode of availing of that superfluous ozone which is now the undisputed property of the few foreigners who live at the mouth of the Wongpoo. At present the only means of gaining a whiff of the sea breeze is to undertake a tedious trip in a house-boat, or a still more tedious ride along bridle-paths through the paddy-fields. In the former case wind and tide must be consulted, and in the

Digitized by Google

latter fine weather is indispensable to the comfort and safety of the equestrian. A good carriage road to Woosung would be a boon to every foreigner in Shanghai, for the rides and drives at present frequented are somewhat monotonous, and in wet weather occasionally impassable. Whether the railway scheme prove a success or not the road will certainly be eagerly availed of. Nor would one project interfere with the other, as the railway would be used principally for business purposes, and the road for pleasure. The direction in which the proposed new road should run is deserving of consideration. If carried along the river bank, it would be far longer than it need be if run straight across country via Kungwang. It would certainly be more picturesque, and (at high water) more pleasant, but the cost would exceed what need be expended if the more direct route were adopted. Besides the objection on the score of length, expense and necessary delay in the completion of such an undertaking, the inland route would be free from the annoyances which windy weather would cause on a road along the river bank. The drives which are taken now have this drawback, that they are generally objectless. But while Woosung would be brought within easy driving distance, everyone who undertook the trip would either have a house to put up at, or might if he so pleased rest and refresh himself at the hotel which will no doubt soon be established. The design itself requires no recommendation at our hands; the mode of carrying it out need alone concern us, and for the reasons stated above we would give our verdict in favour of the inland route, as combining cheapness with utility. While speaking of the means of conveyance between Shanghai and Woosung, we would refer to the railway scheme, which is at present under consideration in England. The difficulties which attend the opening of a line of rail in England have no place in China. No Act of Parliament is required, and we are at a loss to discover how, if the line passed through foreign property exclusively, the Chinese authorities could interfere to prevent its formation. If we are rightly informed, the left bank of the Wongpoo for some distance inland is, from Shanghai to Woosung, almost altogether owned by foreigners. Assuming this to be the case, the river bank might, for want of better, be chosen as the railway route, while the military road sketched out by Colonel Gordon would prove in every respect superior as an ordinary carriage-road.

The steamer *Lancefield*, which lately arrived at Shanghai from Japan, has been purchased by Messrs. Russell and Co. (price not named). She is under charter to convey Imperial troops to Amoy.

An inquest has been held on board the s.s. *Annette*, on the body of the chief engineer, who died of suffocation owing to his having slept in a small cabin with a coal stove. C. Alabaster, Esq., Acting Vice-Consul, presided, and a verdict was returned in accordance with the facts above mentioned.

Colonel Yonge, of H.M. 67th regiment, in the darkness of the night made a false step, and was precipitated into the channel of the river. The mud fortunately was soft, and a shaking was the only result.

The Australian company of Mr. Lewis have brought their season to a close. The entertainments have been excessively varied, and were produced with much spirit.

The Fychow Giant, who has been waiting to settle a dispute with his showmen, is now on his way to England, and will shortly arrive in the *Vanguard*. Rumour says a dwarf of 30 inches high may accompany him.

HANKOW.

A duel has been fought at this port which recalls the days of Midshipman Easy. Two foreigners of a class unfortunately too numerous in our settlements in China, had a quarrel, which it was agreed to settle in the manner usual among gentlemen in the last century. Fowling-pieces were the weapons selected, the distance ten paces; but the seconds with praiseworthy foresight substituted rags for bullets. Even under these favourable circumstances one of the combatants had his eye knocked out, and was further unfortunate in attracting the notice of of H.B.M. Consul, who deported him from Hankow.

KIU-KIANG.

A landrenters' meeting was held here on the 23rd March. We have now had a very large body of disorderly braves here, for nearly a week, *en route* to the scene of the Mahomedan rebellion (wherever that may be). These soldiers commenced by taking away nearly the whole of our grand stand and racing stables, wooden and mat erections. They have since amused themselves by breaking the glass in our lamp posts, smashing windows, &c., and they attempted to take away from the concession a cast-iron lamp-post in the middle of the day. Fortunately our police inspector came to the rescue and saved it. We have escaped so far without any serious disturbance. We hope these ruffians will soon leave. We cannot keep them out of the concession, as they have smashed our locks and bars to the gates. The gunboat *Hardy* is here, so that we feel there is some protection in case a row takes place.

NINGPO.

The correspondent of the *North China Mail* gives the following items:—

"On the evening of the 22nd March two coolies, carrying a large Ningpo basket, covered over at the top with some household effects, were escorted as far as the new bridge of boats by a foreigner, who, after looking very carefully around, bade them proceed and return homewards. The Chinese officials send spies about in all sorts of costumes, and following divers avocations. It was probably one of these who, being in the employ of the Inland Custom-house, had watched the foregoing, and with excited suspicions followed the coolies before referred to as far as the house of one Mou Sheng, a Fuh-kien opium broker. Into this house they entered and deposited their load, which, on examination by the Custom-house official, was found to consist of, amongst other things, a chest of opium. Bribery was resorted to, but the official firmly withstood it and seized the smuggled drug. On the 23rd a circular, of which I subjoin a translation, was sent to all the foreign hongs here on the subject. It emanates from the Yan-yan-dziu-dzao-dju:—

"The Inspectorate of Opium, Silk, and Tea issues a notification:—

2nd moon, 26th day (23rd March).

Yesterday evening a seizure was made of a large bamboo chest of opium marked with the Mou Sheng stamp. The owners of the chest are unknown. The head of the Yushun foreign hong with his compradore informed us of the fraud. The fine provided in these cases must certainly be imposed.

"It will be observed that the head of the Yushun hong (a name by-the-bye which does not figure in the latest edition of the *China Directory*) went to the yamun the same morning, together with his compradore, to vindicate the offence. The merchants of Ningpo had agreed to collect for H. E. the Taotai the inland duty on opium, for which they in turn were allowed the handsome commission of three taels per chest. They bound themselves, however, to pay a fine of one thousand taels of Canton sycee, if at any time they should be caught evading or trying to evade this duty; the opium was, furthermore, confiscated. It is stated in the enclosed circular that the old custom, namely, the fine just referred to, will be strictly enforced, and merchants are requested to take warning thereby. But there is another point I have yet to notice. Sellers evading this inland tax are enabled to, and do sometimes, render account-sales of opium to their constituents at a higher rate than that ruling in the market. Of course their business increases in consequence, and houses of longer standing and greater repectability, who are above such practices, are the sufferers. It is only natural that opium merchants at Hong Kong and Shanghai should send their drug to those who usually render them the highest prices for it, little suspecting perhaps the system which enables them to do so."

Admiral Kuper left Tinghae on the 26th of March. During his stay at Ningpo he inspected the Anglo-Chinese contingent, and expressed himself gratified with their efficiency.

Advices from Chinkeang, this riverine port, indicate the great activity on the part of the local authorities in the work of clearing the Grand Canal, which had become choked during the rebel occupation of the province. A large through traffic is anticipated, so soon as the work is completed.

W. H. Fittock, Esq., the Consul at this place, held an inquest on the 5th of April, on the body of George Henry Warland, a shipmaster, who was recently commander of the British schooner *Pearl*. It was proved in evidence that the unfortunate deceased had been a short time previously summarily dismissed from his ship for misconduct, and, this preying heavily upon his mind, he put an end to his life by blowing out his brains. The jury returned a verdict of "Temporary Insanity," and his remains were buried in the cemetery

HONG KONG.

The mail of 27th Feb. arrived out on the 10th April. The dates are down to the 15th.

The *Government Gazette* gives a copy of an ordinance for pre-

Digitized by Google

serving neutrality with the American States. The revenue and expenditure of the colony are also published. The following were given as the Bank returns for April:—

Oriental Bank	$772,683
Chartered Mercantile Bank	788,054
Chartered Bank	580,787
Agra	437,709

St. Paul's College was burglarously entered on the 9th April, between 6 and 7 o'clock, when all the inmates were at service. The time was too well chosen to have been the result of chance, and affords an illustration of the correct information obtained by thieves. A pain of glass was cut out, and an entrance effected through the door, whence the burglar proceeded upstairs, and having ransacked the rooms, was descending, when he met a coolie, who, instead of grappling with him, merely shouted for aid. The rascal ran for his life, and managed to escape with his booty, with the exception of a dressing case which he dropped in his hurry. Among the valuables stolen are 30 dollars in money and a watch; nor has, as yet, any clue been discovered at all likely to lead to the recovery of the property, or the detection of the thief.

The following report is from the *Daily Press*:—

A meeting of the Legislative Council was held on 30th March. The following members were present:—His Excellency the Acting Governor, the Hons. Acting Colonial Secretary, Chief Justice, Attorney General, Colonial Treasurer, Judge of Summary Jurisdiction, Auditor General, and Jas. Whittall, F. Chomley, and T. Sutherland, Esqrs.

The minutes of the last meeting were read and confirmed The Acting Governor then read a letter from the Right Rev. Bishop Smith, resigning his appointment of Bishop of Victoria, and thanking the Council for their liberality in granting him a pension.

His Excellency next read a despatch from the Secretary of State for the Colonies, enclosing a letter from Mr. Cleverly, resigning his post of Surveyor-General of Hong Kong, and applying for a pension. Mr. Cleverly stated in his letter that his health had greatly suffered from the effects of the climate, and constant exposure to the sun while fulfilling his arduous duties, which duties he stated had been faithfully performed; he had received very inadequate assistance in carrying out the various engineering works of the colony. In addition to this, he enclosed certificates from three eminent medical gentlemen, certifying that his health was so much impared by climate and exposure, that he must not resume his duties in Hong Kong.

Sir Hercules Robinson had received this despatch before leaving, and had endorsed it with a note to the effect that he was of opinion that Mr. Cleverly was not entitled to any extra consideration, indeed, he was doubtful whether he could receive a pension, as he had embarked in private practice. The Council ordered Mr. Cleverly's name to be put on the pension list.

Mr. Whittall's protest against the "Companies' Ordinance" was then read to the Council; it is as follows:—

PROTEST AGAINST THE LIMITED LIABILITY ORDINANCE.

In accordance with the powers conferred upon the members of the Legislative Council by the fifteenth rule of Council, I now protest on the following grounds against the re-introduction and enactment of the Ordinance for the incorporation, regulation, and winding-up of trading companies and other associations:—

1st. That the said ordinance having been negatived by a majority of the Council on the 2nd ultimo, its re-introduction on the 23rd idem was precluded by the twenty-fourth rule of Council.

2nd. That the said ordinance was with unnecessary haste passed through a second reading on the 23rd ultimo, in a manner opposed to the spirit of the rule of Council providing for the progress of ordinances.

3rd. That the Hon. Mr. Chomley, the Hon. the Attorney-General, and the Hon. Chief Justice, reversed on the 23rd ultimo the votes recorded by them on the 2nd idem, not on account of any belief upon their parts that the said ordinance will benefit this colony, but, as they stated, because of their disinclination not to comply with the expressed wish of a portion of its inhabitants that the principle of limited liability embodied in the said ordinance might become law.

4th. That the memorial in favour of the law of limited liability of shareholders in joint-stock companies enacted by the said ordinance, laid before his Excellency the Governor by the Hong Kong General Chamber of Commerce, was not signed by all of the most important members of that body, so displaying a difference of opinion on the subject in the chamber. I would further point out that the memorial to the same effect also addressed to his Excellency the Governor by the residents of this colony was signed by but 293 individuals, of whom 110 are of Asiatic extraction, whereas the jury list comprises 553 names, of which not more than 19 are included in that category. These circumstances conclusively maintain, in my view, that the principle of limited liability is not universally desired in Hong Kong.

5th. That I believe the law of limited liability of shareholders in joint-stock companies enacted by the said ordinance, to be in no wise required in this colony, and to be calculated to injure instead of to promote its commercial interests. Hong Kong neither produces nor manufactures, and by reason of the nature of its soil, and of its expensive conditions of life is never likely to do either the one or the other; it is in fact no more than a mercantile depot. The advocates of the ordinance I am opposing do not even pretend it to have been enacted with a view to the development of any industrial enterprises whatever; and at the risk of being accused of begging the question, do I maintain it to be unnecessary to demonstrate how non-essential are its provisions to the construction of any undertakings partaking of the nature of public works. I protest against the said ordinance, therefore, because the powers and privileges of limited liability which it confers upon this community can find no other outlet than the encouragement of unsound speculation on the basis of schemes, which cannot be, for the most part, better than illusory, inasmuch as no legitimate scope for the combination of capital exists in this colony. That communities in this part of the world are not less ready than those elsewhere to plunge into reckless speculation, is a truth in evidence of which I adduce the occurrences which have taken place at Shanghai since the year 1859. Few will attempt to deny that since that date the legitimate commerce of that port has been at times hampered, and at times unduly inflated by the consequences of fallacious speculation in land, and other enterprises of an equally imaginative character, I protest against the "Companies Ordnance" because it can lead to no other results than the encouragement of speculation, as unhappy and disastrous as has for some years past prevailed in the North of China.

6th. That having regard to the situation and commercial conditions of Hong Kong, it is to be assumed that companies which may be formed under the ordinance would not confine their operations within the limits of the colony, but would mainly depend for success upon the other channels of trade. The question must therefore arise as to whether the liability of shareholders would be limited in respect of transactions entered into by the companies through their branches or agents at the open ports of China. If their liability should prove not to be limited in respect of such transactions, then the objects of the ordinance will be frustrated; but if the contrary should prove the case, then a wide door will be open for the perpetration of gigantic frauds by bubble companies upon native merchants in China utterly ignorant of the existence and effect of the ordinance, and out of reach of the means which it provides for ascertaining the financial condition of such companies. Those evil consequences are not unlikely to result looking at the experience of limited liability in England; they would soon shake the large confidence which native merchants have hitherto reposed in our commercial integrity; they would lead to interminable litigation in the mixed tribunals provided for the settlement of claims between the British and Chinese in the treaty ports, and possibly to diplomatic interference and embarrassments.

7th. That the privilege of limited liability might easily and expeditiously be conferred by special ordinances of the Colonial Legislature upon such companies as offer fair guarantees of respectibility and good faith; and the public of Hong Kong therefore may without the ordinance in question enjoy all the advantages which its advocates attribute to it and at the same time be protected from such schemes as have in England brought discredit on the name of limited liability.

These are the reasons which have prompted me to oppose the "Companies Ordinance;" and the same grounds induce me to protest against the putting of the said ordinance in force before its confirmation by the Home Government shall have been received in the colony.

Hong Kong 11th March, 1865.

Mr. Sutherland said that he did not see how Mr. Whittall could assert positively that those members of the Chamber of Commerce who had not signed the petition presented by that body, were opposed to the ordinance. It was not to say because there were many persons who had not signed the petition of the mercantile community that those persons were necessarily opposed to limited liability being legalised here. Nearly all the large firms had signed the petition in its favour, which showed that the mercantile community desired it.

Mr. Rennie thought that no member had a right to reflect on the votes of other members.

The Acting Governor said that the re-introduction of the measure was not during its discussion, and the reason it was re-introduced was to correct an error. There was no law in force in Shanghai having control over mercantile speculations, which showed how much an ordinance of this kind, the object of which was to control them here, was to be desired. He understood that Mr. Whittall's object was to have the protest read to the Council and then forwarded to the Home Government.

The Chief Justice said that, with regard to his having changed his vote, he could only say, as he had before explained to the Council, that he had deferred to the opinion of the members of the Chamber of Commerce as a fair exponent of the ideas of the mercantile community on the matter.

Mr. Whittall felt assured that if the community could be polled on the subject, it would be found that a very large proportion concurred in the opinions expressed in his protest. He held in his hand at that time a letter signed by some of the oldest firms in China thanking him for the steps he had taken in the matter. The protest was ordered to lie on the table.

His Excellency in moving the second reading of the "Supplementary Estimates for 1864" ordinance, said that the delay in their publication was occasioned by the Crown Agents' returns up to the 31st of December having to be first obtained. It appeared that the estimated expenditure for 1864 was $620,000,

Digitized by Google

which sum was voted by the Council in July 1863, at which time the mint had not been determined on. The actual expenditure was found to have been $763,000, or $143,000 over the amount estimated.

His Excellency said that the treasurer's accounts had been received, and the revenue and expenditure for 1864 would be published.

The Judge of Summary Jurisdiction said that with regard to the two ordinances which were read a first time at a former meeting of the Council,—the first "An Ordinance to consolidate the Ordinances relating to Criminal Procedure,"—the second "An Ordinance to consolidate the Ordinances relating to offences against the person,"—he thought they should be treated in the same way as the Limited Liability Ordinance.

The Chief Justice: How, protested against? (Laughter.)

The Judge of Summary Jurisdiction: Oh dear no; I think they should be referred to a committee.—The Council agreed to this suggestion, and the Chief Justice, the Judge of Summary Jurisdiction, and the Acting Colonial Secretary were elected to form the committee. An amended "Neutrality Ordinance" was then read a first time, after which the Council adjourned *sine die*.

Among the departures by the mail steamer leaving for England is that of Mr. S. B. Rawling, of the Royal Engineers' Department. He has been seven years in the colony, during three of which his services have, by permission from the War-office, been given to the Colonial Government, in order that he might personally carry out the plans for supplying Hong Kong with water, for which work he had produced the most approved designs. During those years he has also established a very large and ever-increasing private practice as architect and surveyor, and has been immediately concerned in nearly all the extensive building improvements and works of public ultility in this colony. His departure will be felt as a temporary loss in business circles, where he was constantly appealed to and universally trusted in matters requiring arbitration. We should hope, however, there is some likelihood of Mr. Rawling returning to his present sphere of usefulness; nor will his absence for a year or two be quite a loss to the colony, as various important works and plans now on foot here will benefit by his personal attention to them in England, where we trust he will be warmly welcomed by all interested in the development of Hong Kong.

Mr. John Lamont, whose name has so long been well known in connection with the Aberdeen Docks, also leaves for England by the present mail steamer. He is one of the oldest residents in the East; and in the two fine dry granite docks at Aberdeen (8 miles from Victoria) he leaves behind him an enduring monument.

A steamer called the *Pootung* has been taken by the Chinese authorities, and will probably be confiscated, her offence being that of furnishing firearms to the rebels. The port at which such cargoes are landed is Tongsang, and one or two vessels have cleared themselves by these smuggling ventures, which are rather in favour at present among that class of ship captains who would rather smuggle than not. The *Pootung* left this port on the 19th March, with a cargo of sundries for Fuhchau, and was taken in the port of Amoy on the 25th on the charge of supplying the rebels. If we are rightly informed, the trade is rather better than blockade-running; and if the *Pootung* has made a few successful ventures, the owners may afford to let her go. It appears that she did not belong to Messrs. Jardine, Matheson and Co., by whom she was dispatched hence; she had been the property of Mr. Whittall, head-partner of that firm in Hong Kong, and by him sold to another firm here, but not transferred.

Several changes occur in the civil service, and may be briefly noted as follows. Mr. Alexander is appointed a Provisional Member of the Executive and Legislative Councils; and Mr. Masson, who retains his own duties likewise, is now Acting Registrar of the Supreme Court. The Hon. H. J. Ball acts as Attorney-General during the absence of the Hon. Mr. Smale; and Mr. Whyte, while continuing his own duties as well, is to act as Judge of the Court of Summary Jurisdiction. In the place of Lieutenant Williams, R.E., Lieutenant Lyster, of the same corps, has been appointed resident civil engineer at Kowloong. Two changes fall to be made from Mr. Power's departure on leave, viz., Mr. Chagas acts as First Clerk in the Surveyor-General's office, and Mr. Gerrard, of the Registrar-General's office, is appointed Marriage Registrar.

SIAM.

A gentleman who has been travelling in the district of Kyouk Aung, on the Burman frontiers, near the Three Pagodas, and adjoining the source of one of the tributaries to the Menam, thus describes the mineral wealth of that section of the country:—

"I was fortunate enough to discover several deposits of rich ore of antimony, and traced the existence of lead and sulphuret of copper. I ascertained that numerous sites of valuable metallic deposits are known to the Karens, who, until placed within the security of British protection, would not be induced to reveal their several localities."

The gold-fever, that periodical epidemic of this country, has again broken out, reports the *Siam Times*. To those who heretofore have been attacked with it, it has proved more fatal than the yellow fever, or Java. This is not said to discourage enterprise; on the contrary we would be happy to see the mineral wealth of this country more fully developed than at present. Gold, copper, tin, antimony and plumbago, exist in great abundance; but the mines can only be efficiently and securely worked by capitalists with proper machinery, and by Chinese, African, or Indian—not by European or American labourers. Of the various parties who at various times have set forth in search of the precious metal, the majority, we regret to say, have found but disease and death. Still, however, there is no insurmountable reason why foreign prospectors may not set forth to the supposed gold bearing districts in the dry season. Should these be successful they could return to Bangkok and secure a license to mine in the district or locality discovered by them, and the government would grant such license under the terms of the Prussian treaty. To carry on mining with safety, the jungle should be cleared for some distance around the seat of operations, and good houses built in which European overseers could reside in all seasons. To do all this would require a large capital; but there is no doubt that if a good lead or vein be discovered the requisite capital would soon be forthcoming, and the successful prospector be enabled to acquire much more wealth in the end, and at much less risk to his health, than by attempting to work his discovery by his own or hired muscular strength privately. The same remarks apply to copper or tin mining. There is abundant capital at present in China, Singapore, and Siam, to invest in good mining speculations. If, therefore, any should be taken off into the interior by the gold fever at present raging, should they be successful, their best plan will be to return to Bangkok immediately, and form a company for working their discovery. At the present moment, when merchants are seeking profitable outlets for their money, a *bona fide* discoverer of a paying mine will have no difficulty in obtaining the means of working it, in the most scientific mode, without any great risk to life or health.

STRAITS OF MALACCA.

SINGAPORE.

Dates are to the 22nd April. The London mail of the 10th March arrived out on the 13th April.

The present advices bring details of one of the most serious accidents that ever occurred in the settlement. Twenty-seven lives were lost by the explosion of the boiler of his Highness the Tumongong's steam ship *Gohore*. The following is the account of the matter given by the *Free Press*:—

For some days past preparations were being made on the above steamer to proceed round the Island of Singapore with the Governor and a party of gentlemen; and on Saturday last (April 15) the fires were lighted for the purpose of proceeding into the Roads, to wait until Monday morning. Steam was got up and began to roar off from the safety valve about half past two, when an attempt was made to start the engines. It would appear from all we have heard that there was only one European engineer on board; and while in the act of attempting to start the engines they got hot and destroyed the vacuum in the condenser, which rendered it extremely difficult to get the engines to go round. This appears to have occupied the engineer's sole attention for some considerable time, and various means seem to have been tried to cool the condenser and restore the vacuum. At this time a boat was lowered, and the engineer of the Dock Company, Mr. Bain, was sent for; and directly he got on board the explosion took place, hurling the unfortunate gentleman and the engineer of the steamer, Mr. Miller, on to the forward part of the port paddle-box, seriously injuring both. It is

Digitized by Google

more than probable that while the engineer was looking after the engines, the native firemen continued feeding the fires, and no attention having been paid to the quantity of water in the boiler, there is every reason to believe that it was reduced, until the tubes which the flames pass through became bare. When the deficiency of water was discovered, the donkey-engine, we presume, was set to work to pump cold water into the boiler, which coming in contact with the red-hot tubes would almost instantaneously create a mixture of steam and gas, which would increase the internal pressure to such an extent as to cause the shell of the boiler to burst, as it did about half-past three in the afternoon. It would appear that the after part of the boiler gave way first and was thrown into the sea. At the same moment the principal part of the same turned a half summersault towards the engines, turning the furnace doors towards the bottom of the ship; and the outer shell of the boiler seems to have parted at the bottom and stretched out like a piece of paper over the engines, breaking and damaging them to a considerable extent, hurling the funnel and steam chest at the same time on to the port paddle-box. The shell of the boiler lay stretched out with one end leaning partly on the port paddle-box, and the other end against the foremast, which we should guess to be about 15 or 16 feet above the main deck. The whole of the multitubular tubes were displaced and scattered about the ship, with the exception of two, which still remained attached to the forward tube plate. All the internal stays of the boiler, which were about $1\frac{1}{4}$ in. square, were carried away in various ways; some pulled in two with an apparent straight tensional strain, others stripped their screws, and some gave way at their connection joints. This terrible destruction occupied the space perhaps of not more than a second of time.

The following is a list of the persons killed by the accident:—

No. 1. Capt. Cleghorn, who was captain of the Dock Company's small tug-boat; went on board just before the accident took place, and appears to have been on the bridge looking down into the engine-room below, when a portion of the boiler struck him on the left cheek, making a large hole in it. We have no idea how far the body was thrown into the air, or from the vessel, but it was not until the next forenoon that the divers found it in connection with a piece of the boiler in the middle of the stream, with his arms folded and his legs a little bent, just as if he never altered his position from the time he leant over the rail of the gang-way.

No. 2. John Young, the gunner, was found quite dead, jammed on the staircase a little a-head of the engine-room in an upright position, as though in the act of making a determined effort to extricate himself; the body was severely scalded.

No. 3. Henry Sanders, the Dock Company's boiler-maker, who went on board to execute some kind of work; the body was very much scalded from head to foot, but we have not been able to ascertain what part of the vessel he was found in. He was buried on Monday evening.

And twenty natives. Messrs. Miller and Bain were afterwards added to the list of the dead. The Tumungong's brother, Tunku Abdulrahman, had a narrow escape. He was standing on deck on the starboard side nearly over the boiler, when the explosion took place, and was thrown down uninjured with the exception of a slight scratch on the wrist. He jumped up and sprung overboard and was picked up; several men who stood near him were killed. Two French doctors belonging to a ship lying close by came to the aid of the wounded men immediately, and remained there until assistance arrived from town.

An eye-witness who was standing in the verandah of the house in the yard of the Dock Company heard a noise, and on looking towards the steamer, saw the funnel suddenly jump out of its place into the air, followed by a shower of materials of every description, which went far above the height of the mast. On the boiler being torn away from the sea cocks, water began to enter the hull of the vessel, and she was in consequence hauled up on the bank to keep her from sinking. The steamer was lying off the Patent Slip and Dock Company's works.

The feud between the Tans has subsided, but to make up for the lull in that quarter, the quarrel between the Ghi Hoks and Hong Kahs, or Chinese Roman Catholics, which has been smouldering for some time, has again burst forth and the town is much disturbed in consequence. A street fight occurred on the 11th of April between the latter factions, in which a member of each was so severely wounded that they are since dead. On the 16th a party of Ghi Hok men entered the plantation of some members of the Ghi Hin Kongsi on the Bukit Timah Road and murdered two of the latter, and wounded one, in retaliation, we suppose, for the death of the Ghi Hok man. A warrant has been issued for the arrest of four men who were identified by a brother of one of the deceased, as forming a part of the band of murderers. The heads of the above secret societies have been appointed special constables by the Commissioner of Police, and are obliged to patrol the town with the regular police to maintain order. It is supposed that these gentlemen are getting heartily tired of the work, and are doing their best to restore peace among their refractory brethren.

H.M's. steamer *Rifleman*, Captain Ward, from North Danjer, with dates to the 5th April, anchored in the Roads on the 14th, with her screw shaft broken. H.M.'s *Perseus*, from Malacca, with the Honourable the Resident Councillor and Mrs. Burn on board, arrived on the 17th April. On the same day H.M.'s steamer *Adventure*, Captain Waddilove, arrived from Point de Galle, with dates to the 8th April. H.M.'s steam-frigate *Princess Royal*, Captain W. Gore Jones, from Trincomalee, arrived on the 19th April, bearing the flag of Rear-Admiral King. The Admiral came ashore about 6 P. M., when a salute of fifteen guns was fired.

The Spanish war steamer *Jorge Juan*, Captain Gonsales, arrived from Saigon on the 7th April to convey the Capitan General elect of the Philippines to Manila. His Excellency embarked on the 11th under a salute of seventeen guns.

PENANG.

On the 10th April the tenders for the excise farms were opened by Mr. Earl, acting for the Resident Councillor. For the opium farm there were two tenders, the highest, $6,550, offered by the present holder of the opium farm. For the spirit farm only one tender was made, $4,350; for the toddy and bhang farm there were five offers, the highest being $400. The successful tenders are the previous holders of the farms, so that there will be no change except a slightly increased rent. It was believed that a much higher rent might have been obtained had the Government followed its former course of putting these farms up to auction.

We have much pleasure (says the *Gazette*) in noting the great improvements which have lately been made in the roads in Province Wellesley under the able superintendence of Mr. Bennett, assisted by Mr. Baylis. In many places they contrast very favourably with our roads in Penang; and already, owing to the great facilities for transit along the road leading through Permatang Pow to the south, the traffic has been more than doubled. The bridges over small streams have also been repaired, and over larger streams new and more substantial ones are being erected. In the north of the Province, which district has hitherto been more destitute of good roads than other and more favoured localities, we are glad to learn that they are being as rapidly as possible put into a condition fitted for the increased traffic upon them, and now one can drive on a good road as far as the boundary pillar near the Muda. Such improvements as these will have the greatest effect in developing the resources of the Province.

We regret (says the same journal) to learn that the Mahomedan association under the leadership of Haji Ibrahim, of Tulo Ayer Tawar, to which we referred in our last issue, had been actually constituted at the time when we wrote. We are told that about 400 members were admitted last week, and that it was this society and not that at Tumbus which the Malays of Goar Kapa joined. We appear to have given offence to some of the Mahomedans by calling these associations "clubs," which they appear to identify with the Chinese word Kongsi. We used their own term *Jumaha* at the beginning of our article. We believe that it properly means "Congregation;" but Government very rightly objects to the formation of "congregations" numbering hundreds and even thousands, after the examples we have had of the manner in which associations, professedly religious, have been abused, and the tyranny which in one shape or another appears to be exercised by all Asiatic societies of the kind as soon as they become large and powerful.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

BUSH—On the 5th April, at Shanghai, the wife of Henry Edward Bush, of a son.

CAINE—On the 9th April, at Swatow, the wife of G. W. Caine, Esq., H.M. Consul, of a son.

CRAWFORD—On the 23rd May, at 2, Ladbroke-gardens, Notting-hill, the wife of Ninian Crawford, Esq., of Hong Kong, of a son.

MASON—On the 12th May, at Victoria-road, Kensington, the wife of D. K. Mason, Esq. late of Bangkok, of a daughter.

MONGAN—On the 20th March, at Tien-tsin, the wife of J. Mongan, Esq., H.B.M. Consul, of a son.

RYRIE—On the 4th April, at Hong Kong, the wife of P. Ryrie, Esq., of a daughter.

WATSON—On the 11th May, at Blackford House, Aberdeenshire, Mrs. J. P. Watson, of a son.

WULF—On the 17th May, at Walthamstow, Mrs. G. H. Wulf, of a son.

MARRIAGES.

LOUREIRO—WILDE.—On the 2nd April, at the Church of St. Saviour, Honque, by the Rev. C. H. Butcher, M.A., British Consular Chaplain, in the presence of H.M.F.M.'s Consul-General, Pedro Jose da Silva Loureiro, to Jessie, daughter of John Alfred, Wilde. No cards.

Digitized by Google

PEACOCK—WORTHINGTON.—On the 13th March, at St. John's Cathedral, by the Rev. Thos. Stringer, Mr. Thomas Peacock, to Mary Johnston Worthington, only daughter of the late John Worthington, solicitor, Manchester, England.

DEATHS.

AITKEN—On the 30th March, at Hankow, the infant son of Mr. and Mrs James Aitken aged 8½ months.

AHRENHOLDT—On the 30th March, on board the Danish brig Georg Andreas, Peter Heinrich Ahrenholdt, master, native of Flensburg, aged 53 years, killed by pirates.

BOWKER—On the 27th Dec., on his passage from China, John T. F. Bowker, Esq., editor of the Shanghai Recorder, and only son of the late Captain John Bowker, R.N., of Greenwich Hospital, aged 46.

CALDWELL—On the 5th April, at Canton, William David Caldwell, in his 22nd year.

CORTANZE—On the 7th April, at Shanghai, Charles de Cortanze, agent of the Messageries Imperiales Company, aged 37 years.

JARVIE—On the 21st May, at Milheugh, Blantyre, Margaret Jane, only daughter of John Jarvie, Esq., of Glasgow, aged 3 years and 4 months.

KOCH—On the 19th May, at Frankfort-on-the-Maine, Christian Koch, Esq., H.B.M.'s Consul, aged 29.

MARKOO—On the 13th April, at Hong Kong, Markoo, private Gun Lascar Company, aged 21 years and 8 months.

MACGREGOR—On the 26th March, at Shanghai, on board the ship Dunkeld, Daniel Macgregor, master.

SHELLEY—On the 14th May, aged 26, Harry Byam Shelley, late of the 31st Regt. M.L.I., second son of the late Adolphus E. Shelley, Esq., late of Hong Kong.

SCHARMBERG—On the 7th April, at Hong Kong, Carl Scharmberg, late captain of the Prussian schooner Volt Leur, aged 36 years.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—Notwithstanding the disastrous outturn of late shipments to England, the markets in China have been but little affected. The yield of Black teas is nearly exhausted, but late settlements by no means indicate the decline that might have been expected. Nor can it be said from present appearances that the opening of the markets for new teas will be much influenced by the heavy losses sustained of late by tea investments. The clipper ships are being got ready as usual—the banks seem to be replenishing their treasuries for the customary advances, and it is difficult to detect at present any symptoms of such a disinclination on the part of exporters to operate, as will bring the teamen to anything like reasonable terms. As for Green teas, a large business has been transacted during the fortnight, previous rates having been fully maintained.

CANTON.—Country Congou: Five chops Oonam have been settled during the fortnight at about same rates as those advised in the last, the stock, therefore, is now reduced to one chop. The new season Canton-made teas continued to be talked of, but it would be premature to report on any of the musters that have as yet been shown. The following are the settlements of the fortnight:—Country Congous, 5 chops, Oonam at tls., 17 to 19; Canton Congous, 1 chop, refined Congou at tls 16; Scented Orange Pekoe, none; Scented Caper, 235 boxes at tls. 24; Gunpowder, none; Young Hyson, none; Imperial, none; Hyson, none; Country Greens: Hyson, 393 half-chests at tls. 58 to 65.

FOOCHOW.—The only transactions in tea reported since the last report is: Congou: 240 half-chests at tls. 7 for leafy dust.

SHANGHAI.—Owing to the continued unsatisfactory advices received from the home market there has been no inducement to purchase Congous, and we have but little business to report. Two chops of common to fair black leaf have been taken at Tls. 15 to 20 (equal to 11d. to 1s. 2½d. per lb.), and the arrival of three chops from the river leaves us still with a stock of 3,500 chests. We quote, Ningchow and Oopacks: Medium to Good. None. Oonams: Medium to Good, Tls. 21 to 24. Fair Black leaf Tls. 16 to 20 per picul. Green Teas: There has again been a large business done for America at about previous rates; in some instances prices have been slightly easier, but the market closes firm, especially for fine kinds. The settlements have been chiefly composed of medium to good chops, and amount to 24,500 packages, say:—Common to fair Fychows at Tls. 21 to 29; and fair Moyunes, Tls. 30 to 37, proportion. Re-shipments have been 12,000 hf. chests, and the stock is estimated at 45,000 packages.

AMOY.—The previous small stock of Oolong has been further reduced to some 3,000 half-chests by settlements at about previous rates, while the same prices are asked for the small quantity remaining. No very reliable information has yet been received regarding the new crop teas, though the teamen confidently express little fear of interference in the transit through the country to this port. It is expected the first musters of Congou will arrive in five or six weeks hence, and that their quality will be better than last season, should the weather continue as favourable as at present.

HANKOW.—The tea season is closed, there being only one chop left in stock. Total settlements and shipments, 372,600 chests, or 37,337,300 lbs., against 362,200 chests, or 35,320,700 lbs., last year.

KIUKIANG.—Green Teas: Although 22,000 packages had been settled generally at former rates, and the Shanghai market has offered no higher inducement to shippers, the teamen have continued to transfer their stocks, upwards of 12,000 packages having gone forward during the fortnight on native account. Rates had remained the same. The presence in the port of large numbers of native troops had stopped all arrivals from the Poyang Lake, and the stock on the market was reduced to 83,000 packages. Quotations were:—Moyune: Fine to finest, Tls. 28 to 32; common to medium, Tls. 23 to 27 per picul. Fychow: Medium to fair, Tls. 23 to 25; Common, Tls. 21 to 22 per picul. Total settlements and shipments: 131,300 half-chests, or 7,671,500 lbs., against 208,600 half-chests, or 12,189,100 lbs. last year. Black Teas: In these there was again no business to report, and no change in quotations which remained. Ningchow: Common, Tls. 16. Hohow: Common, Tls. 12 per picul. Total settlements and shipments: 110,900 chests, or 9,675,800 lbs., against 111,200 chests, or 9,705,900 lbs. last year.

NAGASAKI.—The finer qualities are now beginning to get scarce, consequently holders are firm, at former high prices. About 7,000 bales of $8 to 18 per picul leaf have been purchased since the date of the last report, for shipment to Shanghai. New Season Tea expected to arrive in 60 days.

YOKOHAMA.—A fair business has been done during the past fortnight for the American markets, the high prices ruling prevent sales for shipment to England. Prices generally are easier, and for good medium to fine kinds a decline of half a dollar per picul may be noted. The settlements are about 1,600 piculs leaving a stock of about 2,000 as follows:—Common, 120 piculs; good do. 250; medium 850; good medium to fine 900; and finest 100 piculs. Quotations: Common, nominal $8,00 to 12,00; good, $14.50 to 17.00; medium, $19 to 23.00; good medium to fine $23.50 to 28.50; finest $33.00 to 38.00.

RAW SILK.—SHANGHAI.—There has been another very quiet fortnight, the transactions being estimated at not over 200 bales, chiefly comp sed of medium Tsatlee, say No. 3½ and 4½ at taels 468 to 480 per picul; and No. 2 and 3 Taysaam at taels 450 to 480 per picul. Prices are very firm, the absence of stock giving confidence to the dealers. The arrivals from the interior have again been very trifling, and the stock is now reduced to barely 100 to 200 bales, nearly all very inferior silks. The late advices from the Silk Country tend to prove the previous reports of the scarcity of this staple in the interior, and the very small arrivals may also be considered another proof of the truth of these accounts.

YOKOHAMA.—There has been a steady demand for all kinds of Silk since last report, and prices show a considerable advance on last quotations. It is not, however, expected that the extreme rates now ruling can long prevail, and must tend to check the demand. The settlements for the fortnight are 700 bales, making a total for the season of 12,650 bales, against 13,900 last year. Quotations are:—Mybash and Sinchu, best parcels offering, 740 to 752½; medium, 710 to 730; inferior, 680 to 690.

DRUGS (MACAO).—Cassia Lignea: Of 500 piculs, arrived during the fortnight, 300 piculs have been disposed of at $16.25. It seems that holders of the remaining stock are anxious to realise, as it is reported that a good many junks laden with this article are expected shortly. At present there are no orders of any importance in the market, and it is pretty certain that prices will be lower if larger supplies arrive. New crops Cassia is expected next month. Cassia Buds: Holders have submitted to a reduction in prices, in consequence of which 61 piculs found buyers at $46, leaving about 30 piculs on the market, which are held at $48, but as there is very little demand for the article holders no doubt have to yield. Cassia Oil: Is lower, and quoted $188, at which price 10 piculs changed hands. The stock is reported to be 50 piculs, which are offered at the rate named. Star Anniseed: A small supply of about 100 piculs new has come to market, of which 60 piculs found buyers for shipment North at the high price of $28. The remaining 50 piculs of the old crop are still offered at $24. Star Anniseed Oil: In consequence of more supplies, the rate for this article is somewhat easier, and settlements of 15 piculs for shipment to Manila are reported at £170. The stock is estimated at 35 piculs. China Galls: Still without stock, and nominal quotation $13.50 per picul. China Root: $2.60, and stock 1,800 piculs. Galangal: No change to notice; $1.75, with 2,000 piculs on the market. Vermilion: $34 per box of 900 packages, and $37 per box of 1,000 packages. Camphor (Hong Kong): No stock on hand; and no supplies arrived since the issue of last report.

RAW COTTON.

HONG KONG.—The stock is in few hands. The market after falling $2 to the depressing advices from England, rose $5 to 6 immediately after the departure of the last mail, to a good local demand. Second quality Shanghai was placed at $18—rates subsequently rose up to $24 to 25½ for Shanghai, $25 to 26 for Ningpo, and $27 to 28 for Japan, at which rates about 10,000 bags have been placed. The stock is estimated at 15,000 bags. Shipments to England have of course entirely ceased.

SHANGHAI.—The depressing advices brought by letters and telegrams, the latter advising a condition amounting almost to panic in Liverpool, have stopped all business in this staple. The progress of the Taiping rebels in the South has checked the local trade, and though holders are willing to accept Tls. 13 to 13.25 for fair Shanghai and Tls. 13.50 to 13.75 for good Kong-pek, buyers have been few and the trade done almost nil.

NINGPO.—The quotation is $28.40 per bale of 118 catties, at which there is no inquiry.

YOKOHAMA.—A few hundred bales of this staple have changed hands at from $28.50 to 29. Stock light.

CHINA IMPORTS.

COTTON YARN, &c.—The quotations for this article must be considered as purely nominal. There is no demand existing, and there have not been any sales effected during the past fortnight. Grey Shirtings: Prices of these goods remain pretty much as previously quoted, with sales during the fortnight to Chinese dealers of about 3,500 pieces. Some 5,000 pieces have also been reported as sold to foreign buyers. White Shirtings meet with hardly any inquiry, and the sales to be noted do not exceed 500 pieces; 150 pieces of damaged goods have also been moved off at auction. T-Cloths are in comparatively heavier stock at present than other goods of cotton manufacture, but the demand continues extremely limited, and the sales effected since the date of last circular amount to 1,500 pieces, exclusive of 400 pieces damaged disposed of by public sale. From Foochow we hear of sales of 1,200 pieces lbs. 7 goods at $3.40 per piece. The advices from Amoy show a slight improvement in that market for most of the staple articles of cotton manufacture imported. The following sales are advised:—Say 25 bales of Cotton Yarn, Nos. 16 to 24, at $237 per bale; 2,800 pieces Grey Shirting, at $4.55 to 5.78 for lbs. 7 to 8¼ goods; and about 300 pieces inferior Turkey Reds, at $3.50 to 3.60. American Drills: The market is quite bare of these goods, but another small sale of 325 pieces of English manufacture is reported at $6.20 per piece. White Spotted Shirtings, Dyed do., Brocades, White and Coloured: The only sale reported during the past fortnight as having been effected in this colony consists of 50 pieces of damaged White Spots sold by auction. Damasks: There are not any sales of these goods to report. Chintzes have not been in any inquiry. Handkerchiefs: There have not been any sales of these goods reported.

METALS.—Iron, Flat, &c.: Without material alteration to notice in most descriptions of iron, the amount of business transacted during the

Digitized by Google

fortnight has reached a moderate extent, and sales of all kinds are put at 2,500 piculs, while in Canton 900 piculs of Nail Rod have found buyers. Lead: Has met with but a trifling amount of inquiry in this colony, and prices remain unchanged, sales 550 piculs. In Canton the value of the article is slightly lower, with settlements of 2,000 piculs reported. Tin: 1,300 slabs have found buyers. Tin-Plates: 300 boxes have been purchased by Chinese, and 500 have been taken on foreign account. Steel: 160 tubs sold in Hong Kong, and 100 in Canton.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths: Have been in but little request, and sales are limited to 150 pieces Spanish Stripes, while 120 pieces of similar manufacture are reported as sold in Canton. Long Ells: The price of Scarlet again shows a slight improvement, and the transactions of the past fortnight are put at 2,500 pieces. Camlets are unchanged in value, and have met with but little inquiry, the settlements are put at 210 pieces. Lastings: Without sales. Blankets: These goods have been in fair demand, and sales of 1,500 pairs are reported.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Shanghai (per Tael.)	6 months sight.	6s. 2¼d. to 6s. 3d.	6s. 4d. to 6s. 5d.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From London, March 25, Dora.

At SHANGHAI.—From London, March 26, Garrawalt. From Newport, 25, Analysist. From Cardiff, 31, Abbotsford. From New York, April 4, Eva.

At HONG KONG.—From London, April 12, City of Aberdeen. From Newcastle, 11, Ettrick.

At MANILA.—From London, March 26, Tetuan. From Liverpool, 20, Maria y Vicenta.

At SINGAPORE.—From Liverpool, April 8, Harry Puddemsey. From Swansea, Earl Shaftesbury. From Boston, 13, Syren.

At BATAVIA.—From London, Skimmer of the Seas. From Glasgow, Mary Hamilton.

At BANGKOK.—From London, March 2, Costa Rica. From Cardiff, Hampton Court.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—For Liverpool: March 27, Agamemmon; for New York: 27, Resolute; April 3, John Norman.

From HONG KONG and CANTON.—For Portsmouth: April 11, Sovereign of India.

From MACAO.—For London: March 28, Ocean; April 1, Philippine; for Falmouth: March 31, Richard.

From MANILA.—For Falmouth: April 2, Aline; for New York: March 12, Malay; 23, Marmion; for Boston: 15, California.

From SINGAPORE.—For London: April 11, Conference; 20, Silver Cloud.

From PENANG.—None.

From BANGKOK.—None.

VESSELS LOADING.

At YOKOHAMA.—For London: Mirage.

At SHANGHAI.—For London: Antipodes, Vanguard, Cissy; for Liverpool: Lalla Rookh, Wm. Melhuish, Woosung; for New York: Canvass Buck, Egmont, Marion.

At FOOCHOW.—None.

At HONG KONG and CANTON.—For London: Bunda, Pak-wan, Broadwater; for Liverpool: Vanda; for New York: Pudel.

At MANILA.—For London: Osprey, Indian Albis; for Liverpool: Tewkesbury; for New York: Young America, Bavaria; for Boston: Wild Rover, Hazard.

At SINGAPORE.—For London: Elizabeth, Clarendon; for Liverpool: Veloz, Richard Cobden, William Dixon; for Bordeaux: Robur; for Bremen: Amazone.

At BATAVIA.—For Channel: Edward.

At PENANG.—For London: Britannia, Caroline.

At BANGKOK.—None.

FREIGHTS.

YOKOHAMA.—To London: Cotton and Tea, £3. to £3. 10s.; Silk £4. to £4. 10s. per ton of 50 cubic feet.

SHANGHAI.—The freight market continues dull, and no fresh charters have taken place. The vessels on the berth for London and Liverpool are loading at £2. 10s. to £2 15s. for Tea, and £2. 7s. 6d. to £2. 10s., for Cotton, and £2. 10s. for New York.

FOOCHOW.—No vessel loading.

HONG KONG and CANTON.—The circular of George Holmes gives the following settlements:—The Pak-wan, 795 tons, on the berth at Whampoa for London, £3 and £4 per ton, Burdwan 803 tons also on the berth at Whampoa; Pudel, 388, for New York at £2 per ton. Small vessels find ready employment for the north—for the southern ports no charters have been effected. Manila: Tonnage in harbour is plentiful. To London the rates are for unclayed sugar, £2. 15s.; Hemp, £3. 15s. To New York, $15

SINGAPORE.—Seeking vessels continue daily to arrive, and the demand for tonnage is but slight. Vessels are loading sugar at £1. 10s. per ton, and meast. goods at £2. 12s.

BATAVIA.—For the Continent a good deal of business has been done, but at low rates; an improvement is expected.

PENANG.—Nothing offering. The few vessels which have arrived, have left in ballast.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—March 24, Neville, Falmouth to Shanghai; 31, Mary Hamilton, Paradise, Newcastle to Hong Kong; April 1, Star of China, London to Shanghai; 2, Siam, Bremen (orders); 3, Laura, Hamburg to Singapore; Zanebar, Hamburg to Hong Kong; 4, Rudolph, Bremen to Hong Kong; William Chandler, Liverpool to Singapore; 5, Hollandia, Shields to Singapore; 6, Miranda, Antwerp to Hong Kong.

From UNITED STATES to CHINA, &c.—March 30, Surprise, New York to Shanghai; April 1, Henry Harbeck, Philadelphia to Shanghai.

From CHINA, &c., to ENGLAND and CONTINENT, &c.—March 25, Orinoco, Singapore to London; 30, California, Manila to Cork; 31, Springwood, Singapore to Liverpool; Gabalvu, Yokohama to London; Jacoba, Batavia to Newcastle; April 2, Don Hermano, Manila to Cardiff; 4, John Nicholson, Shanghai to Liverpool; 6, Queensbury, Shanghai to Liverpool.

From CHINA, &c., to UNITED STATES.—April 10, Marmion, Manila to New York.

CASUALTIES.

SHANGHAI.

The ship Analyst, which arrived at Shanghai on the 25th March, left Newport on the 24th of May, 1864, in command of Mr. James Crosby, jun., of Sutherland. She arrived at Batavia after a tedious passage (during which the crew suffered a good deal) in October last, and sailed for Shanghai soon after. It appears that after leaving Batavia the Analyst encountered the monsoons, which were against her all the way, blowing heavily the whole time with fearful seas. The ship had her bulwarks washed away and other damage done, and the master and crew were completely exhausted on reaching Shanghai.

COMMERCIAL POSTSCRIPT.

In reference to the failure of Messrs. Lindsay and Co., in China, noticed in another column, we understand that Mr. H. H. Lindsay has not received a telegram to that effect.

The London Cotton Brokers' Association report—At the public sales to-day (the 25th), 1,247 bales were offered, of which about one-half sold at rather easier rates; 152 bales China were bought in at 8d.; of 176 bales Japan, 148 bales bought in at 9¼d., remainder sold at 8½d. to 8¾d. Latest quotations:—China, middling fair, 8d.; fair, 8½d.; good fair, 9d. Japan, middling fair, 8¾d.; fair, 9¼d. to 9½d.; good fair, 9¾d. At Liverpool, also, prices were yesterday slightly in favour of buyers.

There were sales of Penang rum yesterday at 1s. 6d. per gallon.

QUARANTINE NOTICE.—LISBON, MAY 18.—By an order of the Board of Health, of May 15, in "Diario" of 16th, the ports of Macao, Hong Kong, and all the other ports of China, are declared free from cholera morbus.

ARRIVALS NOT INCLUDED IN THE TABLES.—May 23, at Brouwershaven, from Banjoewangie, Constantia; 5, at Havana, from Macao, Emma; 24, off Dungeness, from Batavia, Hendrika; 26, at Falmouth, from Maulmain, Mersey; off Falmouth, from Singapore, Charlotte Jane.

DEPARTURES.—May 23, from Sunderland, for Hong Kong, Hadassa; 18, from Rotterdam for Samarang, Hendrika; 23, from Cardiff for Manila, Langdale; 24, from Shields for Galle, Kohuya.

SPOKEN.—Tresling (ship), for Galle, March 28; Peterborough, London to Shanghai, April 13, 1 S., 28 W.; Bessie Stanton, Cardiff to Shanghai, April 21, 6 S. (?), 25 W.; Finzel (barque), for Shanghai, April 7, 1 S., 26 W.; Ville de St. Louis (French barque), Bordeaux to Hong Kong, April 9, 1 N., 25 W.; Macao (Hamburg barque), Java to Falmouth, 109 days out, May 13, 43 N., 28 W.; Noack (Dutch ship), Amsterdam to Batavia, 49 N., 9 W.; Europa (Dutch ship), Java to Amsterdam, 49 N., 7 W.

CASUALTIES.—Greenock, May 23, the Three Bells (ship), from Glasgow for Batavia, &c., whilst at anchor; May 19, in Gouroch Bay, had her jibboom carried away by collision with the Kent (ship), which was coming up in tow.

THE NORTHERN ASSAM TEA COMPANY.

An evidence of the increased enterprise excited to the cultivation o tea in India appears in the announcement of the Northern Assam Tea Company (Limited) of an increase of its capital to £400,000, to be provided by the issue of 25,000 (B) shares of £10 each, these shares to be entitled to a preferential dividend, so far as accruing profits from estates acquired from the Assam Company allow, of 10 per cent per annum, any excess being divisible between the A and B shares. The Northern Assam Tea Company has the advantage of having already worked most successfully and profitably its estates, which lie contiguous to the new acquisitions, thus allowing of their being placed under the same efficient management, an economical consideration of great importance. The purchase includes fine old indigenous gardens, of which 1,000 acres are already in cultivation, and the crop of tea for this season being included, early returns may be looked for. It is an important feature that grants for 10,000 acres adjoining the tea gardens have been secured, so that tea cultivation may be vastly extended. The annual yield of the indigenous plants on the new estates is estimated at from 4,000 to 5,000 chests. A late valuation of the property has placed it far above the purchase money. The efficiency of the management of the company, the fact of the estates being in a district most favourable to the culture, together with the financial and business standing of the directors, both here and in India, offer good security to investors.

INDIAN GRIEVANCES.—The plain truth about the grievances of Indian officers seems to have been told for the first time in the House of Lords on Monday evening. After the great Bengal Mutiny it was resolved to transfer the Administration of India to the Crown, and to convert the great armies of the old East India Company into armies of the Queen. At the same time a distinct and comprehensive promise was given that the officers of the Company's armies should be kept harmless as regarded their professional position, and should lose none of the advantages, allowances, or privileges to which they stood entitled. Now, the performance of that promise was almost an impossibility. Sir James Outram had predicted that the attempt to fulfil it would be vain, and that it would not be in the power of any Government to carry out effectually the scheme of amalgamation and yet keep faith with the officers of the Indian Army. This is precisely what has happened. The Indian officers declare themselves aggrieved, and bring their grievances before Parliament, appealing to the Parliamentary guarantee which they think has been violated. Ministers make the best defence they can, alleging, what is true enough, that they have endeavoured to satisfy everybody. But while Lord Dufferin could not really upset the case of the officers, Lord Cranworth and Lord Houghton hit the nail on the head by pointing out the impracticability of the promise. It was "enormous," said Lord Houghton; it was "most unfortunate," said Lord Cranworth. But, whatever it be, there it is. The pledge was given, and must now be observed. Besides, though this accounts for the difficulties of the case, we are at a loss to see how the embarrassment could have been avoided. It is all very well to say that Ministers should have left themselves "unfettered" in accomplishing so great a change without the offer of the guarantee now found so burdensome. Was it not simple justice to these Indian officers, who had done no wrong, to tell them that they should suffer no harm? Could any Minister have proposed to "subordinate private rights to a great public policy" without encountering immediate opposition? Was not the principle of compensation which we recognise in all cases peculiarly applicable to this case? After all, it is a question of compensation only, and, indeed, ultimately a question of money.

THE FRENCH TREATY WITH JAPAN.—The letter of a French correspondent at Yokohama states that the Japanese Government has resolved to give effect to one of the articles of the French Treaty, hitherto a dead letter, which provides for the formation, under Government auspices, of a corps of Japanese interpreters of the French language. By a recent decree the Japanese Ministry has directed Daimio Sakai-Hidano-Kami to choose a suitable site at Yokohama for the establishment of a French college, to be placed under the direction of M. l'Abbé Mermet de Cachon. Not only the Japanese officers who desire to be instructed in the French language and European science are to be admitted, but a certain number of the children of the Daimios are to be admitted as scholars. Among these is the son of the President of the Council of the Tycoon.

MR. E. H. POLLARD, barrister, Hong Kong, has been appointed a Q.C.

APPOINTMENTS.—Mr. H. P. M'Clatchie and Mr. M. J. O'Brien have been appointed Student Interpreters in China.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, May 15.

The Second Chamber has been for these four days debating the constitution for the West Indies. The discussion is very unimportant and tiresome, in consequence of the fact (Mr. Rochussen, M.P., avowed it himself) that none of the members knew much about these colonies. Without doubt the Bill will be voted with a large majority, so that the 650 electors of Surinam will soon have their Parliament and the full right of self-government. Some of the members were for the abandonment of these colonies, because they cost us every year several millions, and there is no chance that this state of things will improve. A large body of the members, however, rejected this idea.

Last Monday the Second Chamber voted (forty-four against six) the Bill fixing the sugar duties. Henceforward this article will furnish a revenue of 3,500,000f. (minimum) per year—1,500,000f. more than the present minimum. In 1840 sugar furnished only 46,000f. Is it to be wondered that the refiners are indignant? The Minister of the Finances would have preferred that no minimum was fixed, but an amendment was proposed, and voted by a majority of one member.

Mr. J. J. van Mulken was re-elected Member of Parliament for the district of Haarlem.

In a former letter I told you that the works of the canal from Amsterdam to the North Sea had been commenced. The company has had no great success. After their financial struggles they now have to contend with a strike. The thousand workmen refused to work unless they were paid at the rate of f.1.80 per day, instead of f.1.10. The managers were obliged to grant the demand.

Waterloo-day will be celebrated throughout our whole country with great festivities.

The beautiful collection of pictures of the late Baron van Brienen van de Groote Lindt, from the Hague, is now being sold in Paris. The sixty-four pictures sold in the two first days realised a sum of 1,394,660 francs.

COMMERCIAL.

COFFEE.—The market remains firm, but the transactions are insignificant, the trade being occupied inspecting the parcels to be offered in the forthcoming sale of the Trading Company. Only 5,000 to 6,000 bags Java, and 1,800 bags Padang were sold at different prices. Good ordinary is quoted 44 c.

SUGAR.—In the first days of last week a parcel of 1,000 kr. was sold at Amsterdam at 1f. to 1¼f. above March prices. Since, the market became inactive, because buyers decline to pay that rate, and sellers refuse to operate without an advance.

TEA.—Business was confined to the execution of a few small orders for consumption. Prices are very firm.

RICE.—Without transactions.

SPICES.—There has been no speculative inquiry since our last report, and scarcely any demand for export. Nutmegs, No. 1, 70c. to 72c.; Mace D 64c. to 65c.; Cloves, No. 2, 25c. to 26c.; Cinnamon, No. 4, 91c. to 92c.

TOBACCO (Java Leaves).—Several parcels arrived, but are not yet in the market. There was some demand at former rates.

COTTON.—The last few days the market was duller, in consequence of the peaceful news from America. The transactions consisted in 350 b. Java and Japan sorts.

HIDES.—The market has become flat, and parcels are offered at lower rates. There were sold 1,910 E.I., per Robertus Hendricus; 1,590 do., per Sylphide; and 369 Buffalo (dam.), ex Gysbreecht Karel Graaf van Hogendorp, at 20c.

INDIGO (Java).—The market remains in a very firm condition; 60 chests were sold at full auction prices, likewise 26 chests Manila.

COCHINEAL.—Holders decline to operate without an advance. Good first quality is not to be had beneath 225c.

RATTANS.—The several parcels which were offered could not be sold at lower rates.

HEMP.—Manila 61f.

BANCA TIN.—Only some hundred blocks were sold at 59½f. to ¾.

COCOA NUT OIL.—Without stock; prices not quoted.

MONEY.—The stock market is in a very calm condition, the prices are, since my last report, not much altered. Int. Debt. Two-and-a-Half per Cents., 61½; Three per Cents., 72½; Four per Cents., 95¼; Handelmaatschappy, 144⅜; Dutch Railway Company, Four-and-a-Half per Cents., 99¾; Four per Cents., 91½; Rhenish Railway shares f.271; Central Railway, 39 per cent.; shares do., f.270 (in much demand); North Sea Canal Company, Three per Cents., 77; East Indian Bank, 88; Discount Bank, 3½ per cent. for bills; 4 per cent. for acceptances; open market 3½ to 4 per cent. 'Change: London, 3 months, f.11.73; 2 months, f.11.76; short, f.11.86; Paris, 3 months, f.46.52; 2 months, f.46.66; short, f.47.05; Hamburg, 3 months, f.31.95; 2 months, f.35; short, f.35.10; Italy, 2 months, f.46; St. Petersburg, f.151.

SHIPPING—ARRIVALS.—May 5, at Texel, from Banjoewangie, Constance; 7, at Texel, from Batavia, Zwaan; from Banjoewangie, Nordstern; 11, at Brouwershaven, from Capetown, Gondora (with a part of the cargo of the Johannes, Captain Rademaker, from Batavia); 10, at Texel, from Batavia, H.M.'s str. Heldin; 11, at Hellevoet, from Banjoewangie, Augusta; at Texel, from Batavia, Alfred the Great, Chryseis; 12, A. R. Falck; 13, at Zierikzee, from Banjoewangie, Bilderdyk.

DEPARTURES.—May 6, from Texel, for Padang, Pauline, Constance, Eleonore; 7, from Texel, for Batavia, Vier Gezusters, Kandanghauer; for Japan, Julie; 10, from Hellevoet, for Macassar, Macassar; from Texel, for Sourabaya, Petronella; from Brouwershaven, for Batavia, Kortenaer, Grootmeester Nationaal; for Sourabaya, Antonia Petronella.

The Trading Company chartered the following ships to convey produce from Java to one of our ports:—G. K. Graaf van Hogendorp, Capt. E. W. Fabritius; Hoek van Holland, J. Bakker; Krimpen a/d. Lek, W. G. Rotgans; Burgemeester Hoffman, L. E. Graafthuis; Nooch, A. Lupcke; Jacobus, J. van der Tas; Jacob and Anna, M. C. Bonger; Elisabeth and Marie, P. Flens Jzn.; Stad Dockum, H. B. R. Jaski; Admiraal de Ruyter, T. T. Mollinger; Marie Elise, T. D. van Deursen; Stad Leyden, J. C. van de Poll; Mentor, H. W. Butenuth; Stad Enschede, S. W. F. Kretschmer; Hercules, J. F. Deterding; Abel Tasman, J. R. Rijken; Prinses Amalia, L. W. v. Rhijn v. Alkemade; Delft, L. van Geelkerken; Landbow, A. Sissingh; Patriarch Samhiri, G. G. Lion; Joan, C. Laseur; Vijf Vrienden, C. Johan.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, May 23.

After the constitution for Curacao was passed by forty-eight votes against three, Parliament opened the debate upon the Bill to abolish the communal excises. I need not tell you that much has already been said about this question, and it may be foreseen that the debates will last some days. Mr. van Zuylen opened the discussion from the Opposition benches. His speech was a veritable philippic against the Cabinet, and in particular against Mr. Betz. It seems that the Conservatives intend to fight a decisive battle on this ground, and, if possible, to defeat the Cabinet and master the position.

It is difficult to predict what will be the fate of the Bill. So much seems certain, that, if passed, it will only be by a very

Digitized by Google

small majority. If it should be rejected, the Minister Betz will be obliged to resign, as the measure—the first of his proposed financial reforms—was based upon the most prominent principle of his programme. But, even should this be the case, I do not see it inevitable that Mr. Thorbecke also would be obliged to resign, the rather that a Conservative Cabinet is an impossibility.

The First Chamber met on the 17th, and has till now been busy with an address of condolence to the King on the death of the Queen Dowager. To-morrow they will begin to discuss the medical laws.

The last mail brought us the news that the house of Césard and Co., at Batavia and Nantes, had suspended payment with very considerable liabilities. It is impossible to say the exact amount, because our papers maintain entire silence in regard to this rumour. The fact that foreign journals—and especially the Hamburg ones—named very exaggerated sums (forty to fifty million guilders) forced the *Handelsblad* to say that the house had been brought into difficulty, but that all was arranged, the firm having been formed into a company (limited). I give you the rumour as it is published here.

A concession has been granted to Messrs. Zwaan and van Heyningen for making a canal from Scheveningen—the well-known bathing-place, which is very much frequented in this tropical weather (therm. eighty-seven degrees Fahr.)—to the Hague. I think that the capital has been, or is to be, furnished by the English market.

To-morrow the great Government sugar auctions are to take place. A very large quantity of superior quality will be offered, as a good deal of what is to be sold falls within the standard types 19 and 20. The uncertainty in which our refiners and the trade are placed by the International Convention and the new Excise Bill, will cause them to hold back, as they fear they will not be able to refine and export such a large quantity of these high types.

Three of our Ministers, Betz, Fransen van de Putte, and Cremers, are made Commanders of the Order of the Netherlands Lion, in recompense for the sugar laws, voted, as I told you, some weeks ago.

COMMERCIAL.

COFFEE.—The result of the auction of the Trading Company held on the 17th was very satisfactory, and made a very good impression upon the market. The demand was so animated, that for all sorts ½ to 1c. above valuation was paid, for some numbers 2c. to 3c. was paid above the last auction prices. The private transactions were accordingly very important, and consisted in 3.400 b. Padang ex Daniel, at 44½c. to 45c.; 1,000 b. do. ex ditto, at 45½c.; 1,473 b. Africa ex Afrika, at 40c. to 45c.; 2.000 b. Java ex Doelwyk, at 44½c.; 1,615 b. Java ex Hugo Grotius, 277 b.; Java triage ex Bernard and Agnes at different prices; 5,800 b. Java ex Thomas Mitchell, 800 b. ditto ex Constance; 600 b. ex Leaping Water; 300 b. ditto ex Den Elshout; 1.200 b. ditto ex Azia, and 2,600 b. Java ex Argo, at 46½c. The market closes very firm, and without doubt an advance will be paid in the coming week, on the actual quotation.

SUGAR.—According to the advanced prices, several parcels were brought on the market; the sellers, however, declined to operate at a lower rate. The transactions, however, were very limited; and so here, as at Amsterdam, only 4,000 kranjangs were sold at ½f. to ¾f. above the March quotation. The quotation also lowered 1½ f. compared with that of two or three weeks ago.

TEA.—The market is firm but without transactions, only for the Java sorts, bought in the last auction, an advance is paid.

SPICES.—Dull. For Nutmegs there was some demand for export. Cloves very calm. Cinnamon, No. 3, 98 to 99 ct.; No. 4, 90 ct. Pepper, 20 to 20½ ct., with a very small stock in the second hand.

RICE.—The market is very active. The transactions consisted in 2.500 b. Java, ex Duke of Newcastle; 3,836 b. Java, ex Regina Maris and Taree Gezusters, at 8½f.; 3,177 b. Sourabaya, ex Sophia Koningin der Nederlanden.

TOBACCO.—There has been no speculative inquiry since our last report, and scarcely any demand for consumption. The market remains dull and inactive. The losses in the Manila kinds have been very heavy.

COTTON.—There is a fair demand for East Indian sorts, especially for Scinda, but there is no stock. On the 30th the Trading Company will sell at auction 700 b. Comptah, good middling valued at 40c.; 212 b. Tinneveily fair, 46c.; 165 b. do., middling fair, 42c.; 140 b. East Indian fair, 33c.; 36 b. do. (Sawginned) middling fair, 30c.; 30 b. China, middling fair, 42c.; 26 b. do. low middling, 25c.; 800 b. Japan, good fair, 59c.

HIDES.—In the past week arrived 2.800 ps. The transactions remain limited, only 200 ps. Buffalo ex Jan Daniel, 2,859 do. ex Oceanus, and 1,000 Ox ex do. were sold.

JAVA INDIGO.—The market remains very active, there is a good demand for the parcels bought in auction. Notwithstanding an advance is willingly paid, holders decline to operate. The stock in first hands is unimportant, and the quantity now on sea is likewise of no importance. The 14 ch. arrived per Oceanus are brought into the market; an advance of 25 cents. on the last auction prices, is asked for them.

BANCA TIN.—The market is inactive, sellers at 59f.; but buyers decline to give more than 58¾f.

COCOA NUT-OIL.—Very firm. Quotation 27½f.

CHINA CAMPHOR.—Some parcels are offered at a lower rate.

GUM DAMAR.—Is paid with 25½ cents.

RATTANS.—At the lower quotations there is some demand. 2,800 bundles, ex Duke of Newcastle, and 3,636, ex Aristides, were sold.

ARAK.—The market is very firm, and there is a good demand in the second-hand for export. The 50 cases ex Victoria were sold at higher prices.

MONEY.—The market for foreign securities is very heavy; home stock firm, but very calm. Dutch, Two-and-a-Half per Cents., 61 15-16ths; Three per Cents., 73; Four per Cents., 95 15-16ths; Netherl. Bank, 236 (a dividend was announced for the past year of 197f.).; Handelsmaatschappy, 144½ per cent.; Rhenish Railway Shares, 238f.; Central Railway, 33; Central Railway Oblig., 121f.; Company of Exploration of the State Railways, 92 per cent.; Indian Bank, 88; Indian Railway Company, 90.

DISCOUNT (BANK).—For Bills, 3½ per cent.; for acceptances, 4; open market, 3½.

'CHANGES.—London: 3 mo., 11.73f.; 2 mo., 11.77½f.; short, 11.86f. Paris: 3 mo., 46.52f.; 2 mo., 46.66f.; short, 47f. Antwerp: 3 mo., 46.45f.; short, 46.85f. Hambro': 3 mo., 34.87f.; 2 mo., 34.95f.; short, 35.10f.; Italy, 46f.

EXPORTS TO INDIA FROM THE 30TH OF APRIL TILL THE 9TH OF MAY.—Geneva, 149,184 litres; wine, 57,993 litres; beer, 54,011 litres; brandy, 8,955 litres; vinegar, 9,160 litres; butter, 27,522 lb.; cheese; 4,768 lb.; ham, 9,316 lb.; pork (salted), 9,896 lb.; salted meat, 55.479 lb.; confectionery and preserved vegetables, 39,618 lb.; cakes, 8.188 lb.; flour, 22,680 lb.; drillings, 14.650f. and 32,800 yards; cotton (manuf.), 1,679.631 yards, 13,971 lb., and 37,250f.; sarongs, 10.980 yards; yarns, 6,839 lb.; calicoes, 49,530 yards; yute coffee bags, 76 600 pkgs.; guns, 4 pkgs.; types, 1,350 lb.; writing-paper, 7.200f., and 1,300 lb., and 144 ream; coals, 2,231,895 lb.; coal-tar, 274,400 lb.; petroleum, 28,760 litres; turpentine, 4,400 litres; rope, 12,995 lb.; lineoil, 1,760 lb.; sail-cloth, 3.750f.; earthenware, 26,070f., and 10,140 lb.; glasswork, 11,183f.; window-glass, 4,000 lb.; soap, 22,250 lb.; ammunition, 2,300 lb.; chemicals, 706 lb.; segars, 2,645 lb.; perfumery, 5,016f.; chocolate, 151 lb.; pitch, 2,630 lb.; tar, 13.990 lb.; umbrellas, 4.250f.; mercery, 8.078 lb.; candles, 1,179 lb.; iron-bars and hoops, 304.001 lb.; zinc, 9,740 lb.; copper leaves, 22,737 lbs.; copper nails, 660 lb.; machinery, 169,001 lb.; needles, 334,000 pkgs.; steam fire-engine, 6,175f.; box steel-pens, 166f.; wool (manuf.), 19,050f., and 4,499 yards; silk (manuf.), 8,080f.

SHIPPING.—DEPARTURES.—May 14, from Hellevoet for Batavia, Henriette Gerardina Susanna; from Texel for Singapore, Anna; May 15, from Texel for Bombay, Tinnevelly; May 17, from Brouwershaven for Batavia, Noach; May 19, from Hellevoet for Batavia, Hendrika; May 20, from Brouwershaven for Batavia, Onrust; from Texel for Padang, Brouwershaven; for Samarang, den Elshout; for Batavia, Krimpenerwaard.

ARRIVALS.—May 14, at Texel from Batavia, Hendrika Geertruida; May 15, at do. from Banjoewangie, Alblasserwaard; May 16, at Texel from Samarang, Carl; from Banjoewangie, Jan van Brakel; from Sourabaya, Louise Kohn.

LOADING AT AMSTERDAM.—For Batavia and Sourabaya: Nicolaas Witsen, Louise, Loevesteyn; for Kanagawa and Decima: Bantam, Batavia; for Padang: Excelsior, Anna and Jeannette; Helena; for Samarang: Mathilde; for Sourabaya: Quintet, Staatsraad van der Houven.

FREIGHTS.—Quotations of Messrs. Fauchey and de Vletter, shipbrokers, Rotterdam:—For Batavia: Kosmopoliet, 753 tons, G. K. Graaf van Hogendorp 754, Mary and Hillegonda 754, Ternate 747, Joan 688, Koffyboom 1,280—18f. to 20f. For Batavia and Sourabaya: Corigene 752 tons—18f. to 20f. for B., 25f. to 30f. for S. For Batavia and Samarang: Cornelis Anthonie, 644 tons, Philips van Marnix, 1.516—18f. to 20f. for B., 25f. for S. For Samarang: Landbouw, 725 tons, Onrust 808—25f. to 30f.; all per last of 2,000 ks., or 120 cubic feet Amsterdam and 15 per cent. For Melbourne (H.B): Kanagawa 1.216 tons, 40s. to 45s. and 5 per cent. For Singapore and Hong Kong: Sophia Amalia, 319 tons, Mary Goddard, 312—30s. for S. 40s. for H., and 15 per cent. For Singapore: Neerlands Vlag, 30s. to 35s. and 15 per cent.; all per ton of 1,000 ks., or 40 cubic feet English.

PASSENGERS INWARD.

From Java: Per Bilderdyk, Captain Vieton, Messrs. de Corte, Westerberg, de Jonge Hr. B. Jansen, J. Janzen, and E. A. Klerks; per Alblas-erwaard, Captain Zack, Messrs. W. J. Suringa, C. W. van Oordt, and Miss C. A. van Meerten.

PASSENGERS OUTWARD.

To Batavia: Per Noach, Captain Lupcke, 1st Lieut. A. Bardok, E.I. Army, 2nd Lieuts. G. Tennissen and A. Hekmeyer, and 150 soldiers; per Krimpenerwaard, Captain Kluit, Messrs. H. F. Bleuge, J. W. Niftsz, F. J. Garman and H. C. Meyer.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

MAY 14.

Dr. Carl von Scherzer, who circumnavigated the globe with the Austrian "Novarra" expedition, has laid before the Government a serious proposal, and therefore not in accordance with his name—*Scherzer* means literally a *joker*—for taking possession of the Nicobar Islands and transforming them into an Austrian penal settlement. In the meantime the question has been mooted whether Austria is justified in taking possession of that group of islands, as she certainly cannot claim the honour of having discovered them, and previous possession may be pleaded by other nations. In the year 1846, Captain (now Admiral) Steen Bille, when on his scientific expedition round the world in the Danish frigate *Galatea*, formally took possession of the Nicobar Islands, having an area of thirty-four square German miles, in the name of His Majesty the King o

Digitized by Google

Denmark, and the natives were supplied with Danish flags, which they hoisted with great demonstrations of joy. But after a couple of years these flags were fetched away, and this act, it is argued, goes to prove that the Danes formally renounced all further claim to the possession of the group, and that it thus reverted to the Austrians, who, eighty-six years ago, had hoisted their flag there.

In the meantime the commission appointed to consider what stipulations ought to be inserted in the proposed treaties of commerce with China, Siam, and Japan, have been energetically diligent, and already sent into the Government projected drafts of the said treaties.

The Swiss Export Company has done such a good stroke of business last year through their agencies in China and Japan, that they are in a condition to declare a dividend of 22 per cent.; in addition to which, on the proposition of National Councillor Fierz and Director Ruegg-Blass, a donation of 50,000 frs. to the University of Zurich was unanimously agreed to by the shareholders at the late annual general meeting.

Letters from St. Petersburg state that telegrams in the French language may now be forwarded direct to Teheran at the rate of 5 roubles 96 copecks per twenty words. Telegrams may also be sent viâ Persia to any part of India, the charge to Calcutta being 19 roubles 65 copecks for twenty words, or as near as possible one rouble per word.

Major-General von Gerhard, who represented Russia at the late telegraph congress at Paris, is promoted to the rank of Lieut.-General, "in consideration of his distinguished services," and transferred from the Engineers to the newly created telegraph corps.

COMMERCIAL.

COFFEE.—There is no great alteration in this market to report. Inferior qualities are a trifle cheaper, and therefore much in request, whilst the better descriptions are getting rather scarce and command full values. Sales of the week, 17,000 bags.

SUGAR.—The improvement in Raw noticed last week continues with an active demand. Among the sales are 8,000 bags of brown Manila for delivery on arrival at 14 marks banco. Refined goods firmly held, with an average amount of sales.

RICE.—Clean grain is easily disposed of at steady prices. In rough nothing to report.

SPICES.—No sales by importers, and prices without alteration.

TEA.—Market calm, but remarkably firm. Among the sales of the week are 248 chests of Congou, per *Persia*, and 500 chests of Congou, Souchong, and Pecco, ex warehouse, as well as several small lots of green. Per *Conrad Henrich*, from Foochow direct, 5,350 chests of Congou, Kaisow Congou, Souchong, and Pecco, have just come to hand, but are not yet in the market.

SPELTER.—Considerable quantities having arrived from the interior, an animated business ensued at rising prices, and the following sales are reported:—

4,000	centners,	per May and June,	at 13	marks	12	Sch. Banco.
3,000	„	ex warehouse	13	„	11	„
500	„	W. H. loco	13	„	12	„

SHIPPING.—ARRIVED.—Conrad Henrich, from China; Susanne, from Singapore.

SAILED.—Bertha, to Hong Kong; Charlotte, to Singapore; Elisabea, to Shanghai.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

MAY 23.

Complaints are heard that at the Leipzig great Easter fair just concluded, business on the whole was in a depressed state. One of the principal articles for which this fair is justly celebrated is woollen cloth, great quantities of which are usually bought for the United States. But at present that field is hermetically closed, nor is it expected that it will ever regain its former importance because during the war a great impetus has been given to the woollen trade, and numerous cloth manufactories have sprung up in the Northern States, which, though they make mostly worthless stuff out of shoddy, it will be difficult for the Germans to compete with successfully, especially as long as the present tariff of high war-duties is enforced, which partake more of the nature of prohibition than protection.

But, on the other hand, it is satisfactory to be able to report that the German cloth manufacturers are seriously turning their attention to finding other outlets for their produce, and especially in the Far East, for which great facilities are now opened by the Prussian commercial treaties with China, Siam, and Japan. From the energy displayed by them in pushing this branch of trade, it even looks as if they were attempting to monopolise the field for that very important article of manufacture. Hitherto the Germans could never be persuaded to alter their old-fashioned jog-trot ways and adapt their machinery so as to turn out produce suited to the wants and tastes of their customers; but of late a great improvement has taken place in that respect, and a healthy and energetic competition has sprung up among them, likely to lead to most favourable results. They now manufacture their cloth not only of greater width than formerly, but they pay more attention to the assortment of the colours, so as to suit the taste of buyers in the Eastern markets.

Furs are another important article of trade at the fair of Leipzig, and the enormous extent of the transactions is but little known out of Germany. The following particulars of the business done in peltries at this last fair will give your readers some idea of this extensive branch of commerce. Two millions of American Bison skins changed hands, for which the prices paid were from 15 to 20 per cent. higher than last year. A hundred thousand Beaver skins were sold, fetching last year's prices to 15 per cent. advance, and 40,000 Red Foxes realised last year's values. Of Russian Furs, enormous quantities have been sold, mostly at an advance. Ischinsky Ermines fetched 26 to 28 dollars per 40 skins, and Jakutzk do. 18 to 20 dollars. Squirrels were in great demand, and the following sales are officially reported:—

12,000	Kolinsky ..	at 45 to 52	dollars	per	40 skins.
450,000	Sakamouoy	„ 22 „ 25	„		„
800,000	Lenskoy ..	„ 13 „ 14	„		„
350,000	Jakoutzk ..	„ 19 „ 22	„		„
250,000	Podgorowno	„ 16 „ 18	„		„

The Prussian steam corvette *Gazelle* has at length arrived at Danzig after an absence of three years in the East, and anchored in the roads. On the following day Admiral H R.H. Prince Adalbert came down from Berlin to inspect her, after which she was paid off and put out of commission for the present, as she must go into dock and undergo extensive repairs and a thorough overhauling.

Mr. Ferdinand Nissen, merchant at Ningpo, has been appointed Vice-consul for the King of Sweden and Norway at that port, under the Consulate-General of Shanghai.

Mr. Meyer, of Singapore, has been awarded the Hamburg Zoological Society's silver medal for this year.

Since the arrival of the last overland mail alarming reports are in circulation here of a Hamburg vessel, the *Georg Andreas*, belonging to Mr. Knauer, having been attacked by pirates in the China seas, the captain killed, the mate wounded, and a large part of the cargo on board (rice) stolen. The arrival of the next mail from China is anxiously expected, as it will either bring a confirmation or refutation of the report.

COMMERCIAL.

COFFEE.—The moderate stocks on hand and expected, together with the favourite result of the Dutch auction, have created more confidence and led to an animated business. As no doubt large shipments of this article will shortly be made to the United States from the producing countries, many of our large importers have withdrawn their samples from the market with the intention of looking on for a while. Sales of the week 12,000 bags.

SUGAR.—Raw market firm, and prices without alteration. Among the sales were 30,000 bags of clayed and unclayed Manila. In refined, the dealings were of limited extent at last week's currency.

RICE.—Cleaned descriptions continue in great demand, and a further advance is established. Nothing to say about rough grain.

SPICES.—Cassia Lignea is more in favour, and a fair amount of business has been done at full rates. Cardamoms attract more attention. The prices of Pepper are well supported.

TEA.—Market calm but very firm. Some hundred chests of Congo, Souchong, and Picco, have been taken for shipment to the north of Europe. Arrived per Welf from Canton, 700 packages of imperial and 300 ditto gunpowder.

SPELTER.—Still experiences an active demand at rising prices. Among the sales reported are 15,000 centners ex warehouse, at 14.2 to 14.8; 15.000 ditto afloat, at 14.4 to 14.8; 1,000 ditto per June and July, at 14.7; 7,000 ditto different periods of delivery, at 14.9; 2,000 ditto, W.H. in loco, 14.10; 1,000 ditto, afloat for arrival, 14.9.

DISCOUNT 3 per cent. Money plentiful.

SHIPPING.—Arrived: Carl Ritter from Canton; China from Zebu (Philippine Islands); Welf from Canton and Hong Kong; Carl from Singapore. Sailed: Picciola and Freya to Hong Kong.

LONDON, SATURDAY, MAY 27, 1865.

THE TYCOON'S LAST RESOLVE.

THE tidings that the TYCOON'S Government prefers paying a monied indemnity to granting further facilities to trade, can excite no surprise. Such an alternative should never have been presented, but, on the contrary, the requirements both on one side and the other should have been embodied in a positive and uncompromising demand. That we should have surrendered for so much silver, the opportunity of putting our trade on those waters on a more satisfactory basis, can now invoke only disappointment. What we demanded as an alternative was simply the practical concession of rights already guaranteed by treaty—the relief of a trade harassed by undue restrictions and Governmental exactions. This, rather than the mere acquisition of additional open ports, is what British merchants trading with Japan desire. Even as respects Hiogo, it is too apparent that the transfer thither of the Yokohama Custom House officials portends the establishment in its integrity of the same defensive and obstructive organisation elsewhere set up. It is even possible that Hiogo, from its vicinity to the great trading guilds, whose operations again are ruled by the Government of Yedo, would favour a yet more strict and harassing interference than that we now encounter; it being a prime political aim to control, not only the routes, but the supplies of trade. What is Hiogo to us unless we have free intercourse with the Western provinces, not only as buyers but sellers? In not compelling the fulfilment of at least the treaty rights in spirit as in letter, we have played with fatal facility into Japanese hands, thus appearing to endorse the plea that foreign trade, with rights given or promised to foreigners, really underlies present internal dissensions. We believe in nothing of the kind, although the foreign question has been made a watchword. There is presumptive evidence that the desire of more extended foreign intercourse which has taken root among the Daimios, capitalists, and merchants, is spreading downwards to meet and coalesce with the spirit of innovation. With the intrigues, rivalries, and jealousies of the Daimios, with combinations forming and re-forming among these feudal chieftains, with the constant interruption of those communications on which men have a right to reckon, and with production and prices artificially limite—dadded to a central despotism exercised by private will, not by external appeals—a tendency to disturbance must be considered the chronic condition of Japan. Why, then, seeing that this plea is a mere evasion—an endeavour to maintain official regulations that turn exchange into robbery—and that the changes brought about by foreign intercourse can do Japan no harm, neither working revolution nor destruction, has such deference been extended to the persistent violation of the rights of our own merchants, by an option given to keep or to withhold? With changes, political and industrial, ever present to the Japanese mind, why should our Government not set about, even now, and on treaty grounds, placing business on a more satisfactory footing? Present Japanese policy will be continued to the end unless resolutely opposed. Manifold and complicated political internal relations constitute no excuse for governmental oversight of mercantile interests. We have by the Simonoseki demonstration strengthened the power of a Government possessing no fixed determinate principles: is this power to be turned against us? No better occasion could have been presented for intervention, no more promising opportunity to set our own terms. The Foreign Office must now *make* its opportunity, taking its ground on treaty rights and the exigencies of trade. In liberating mercantile transactions from their present trammels, not only our own interests but those of Japan itself would be greatly advanced, and we should witness a further influx of foreign capital, or at least larger returns on that already invested. At present, so far as relates to foreign trade, the modes of exertion are impeded by so many obstacles of every kind that none of the resources of the country to this end can be depended upon beyond, given limits, designated by authority as efficient and certain. The dissatisfaction of the people, even of the trading and commercial Daimios, is easily explained, for the large investments of the Government itself in trade, seeking not only to control but to appropriate the profits in this foreign business, has a prejudicial effect upon quantity if not quality; whilst, so far as our merchants are concerned, profits are accompanied by disproportionate risks, and their calculations of supplies of indigenous products at paying prices arbitrarily overthrown. Silk is especially an article of growing demand, but the price even in Japan has hitherto augmented in proportion to the supply, showing that the rates ruling in Europe, and not local prices, constitute the measure of the demand. We trust the Gorogio will speedily discover that the present settlement does not foreclose mercantile claims. The choice made—the absence of even the slightest concession to trade—is calculated to increase mistrust. An incommensurate value is thus made to attach to the indemnity, and the new era which we had anticipated for trade with Japan indefinitely postponed. The Ministers of foreign Powers, our own amongst the number, manifestly erred in effecting the arrangements, and, as a consequence, mercantile interests have been sacrificed. A singularly clear light has thus been thrown on the merits of the much agitated question as to whether our Ambassadors should undertake commercial arrangements at all, or these be placed within the province of what is now the least efficient of our administrative offices—the Board of Trade—and not within the sphere of the Foreign Office.

SAN FRANCISCO AND CHINA TRADE.

The value of the trade between San Francisco and China may be stated at £32,000 per month, this sum not including a large amount of gold and silver bullion exported from San Francisco. Overstocked markets at that port frequently experience essential relief from this trade. The Sandwich Islands, too, are thus now beginning to find their account in the advantages of position they possess. Vessels put up for China are enabled to obtain full cargoes at San Francisco, as portions of these cargoes are landed at Honolulu, and there replaced by products commanding sale in China. As Honolulu is taken on the return voyage, a corresponding exchange is effected, the Sandwich Islands supplying sugar and other articles suitable for the Californian market. The bullion and coin shipped from California for China is not simply to redress any balance in trade, or make United States payments in the Far East, but is exported as an article of merchandise which will allow of a satisfactory profit on its disposal at current rates to banks, individual speculators and Chinese brokers. In many months the amount exported for this purpose exceeds nine times the value of the actual trade between San Francisco and Hong Kong; last month it reached £300,000.

CHARTERED MERCANTILE BANK OF INDIA, LONDON, AND CHINA.

The seventh ordinary annual meeting of the shareholders was held within the banking-house of the corporation, 52, Threadneedle-street, London, on Tuesday, the 16th of May, 1865. The meeting being constituted, the proceedings at the sixth ordinary annual meeting of the shareholders of the corporation were read, confirmed, and the following resolution, proposed by the CHAIRMAN, and seconded by D. LARNACH, Esq., agreed to:—

1. "That the record of the proceedings at the sixth annual meeting, as now read, be signed by the chairman and sealed with the seal of the corporation."

The directors' report and general balance-sheet for the year ended 31st December, 1864, copies of which had been in the hands of the shareholders eighteen days previous to the meeting, were considered as read.

The CHAIRMAN, in moving the adoption of the report, said that, as compared with the same period last year, there was a total increase in the liabilities of £900,000, which was represented by the additional capital created, and the addition made to the reserve fund. In the current accounts and fixed deposits there was an increase of £700,000, which he thought was a satisfactory evidence of the progress of the bank. The

Digitized by Google

bills payable stood nearly at the same amount as last year. On the other side of the account there was in the coin, bullion, cash at bankers', and money at call, an increase of a million and-a-half sterling, to the effect of which he would presently advert. He was sorry not to have a more satisfactory account to present, but it must be borne in mind that the period through which they had just passed had been one of great trouble, anxiety, and reverses. It would be idle to attempt to conceal the fact that they had had heavy losses; but they were of an exceptional character, and such as were not likely to occur again. They must not, therefore, draw from the results of the past half-year any conclusions unfavourable to the future. They had had, during the same period, to contend with heavy mercantile failures, from some of which they had suffered; and besides, there had been the difficulty of the continuous high rate of money, which bore very heavily on this bank; and, again, there was the necessity of increasing their reserves at all points. He had adverted to the increase of a million and a-half in bullion, cash at bankers', and money at call; that had arisen from the necessity which arose, in August last, when they saw the mischief that was threatening, to be prepared in time, and, accordingly, they determined to increase their reserve at all points, and this, by causing the withdrawal of a large portion of the working capital, diminished the profits. During the greater part of the half-year they had never less than from £700,000 to £800,000 in cash here, to meet any emergency that might happen. The locking up of so large an amount necessarily made the latter part of the year very unproductive. As regarded the losses that were likely to occur in 1865, the position of the bank, he was happy to say, was very satisfactory. In the present account all losses known at the time of the audit to have been made up to the December 31st were included. In this way the loss arising from the failure of Buchanan, Hamilton, and Co., was provided for. Of the total estimated amount of that loss, amounting to £14 000, £4,000 had been already written off in last year's account, and, including the balance and other losses, it was believed that a sum of £16.000 would cover all likely to be incurred in 1865, which, considering the times they were passing through was, he submitted, exceedingly moderate. The directors had to make the selection between safety and profit, and he had no doubt the proprietors would concur in the conclusion to which they arrived, that safety was to be considered first, and profit upwards. (Hear, hear.) But the result of their decision was that the diminished profit was compensated by the absence of heavy loss. In the current year he hoped the result would be more favourable, and that a fair average profit would be earned. As would be observed from the report, the directors had determined upon closing the Mauritius branch. This had been an unsatisfactory branch from first to last. They had persevered in trying to make it profitable, but had found that the gain was not in proportion to the risk incurred, and had therefore decided upon closing the branch at the end of the year. As was also stated in the report, the board had decided upon closing the branches at Newera Ellia, and Tuticorin, which had only been opened as experiments, but they found could not be worked profitably. Two of the directors, Messrs. Robinson and Stenhouse, having retired, the board had great pleasure in recommending Mr. J. M. Robertson, one of the auditors, and Mr. E. J. Gilman, of the firm of Ashton and Co., of London, to fill the vacancies. Both of these gentlemen were eminently qualified by their experience in the commerce of the East, and by the high position they held in the city of London, to represent the shareholders on this board. Following the usual practice, they had taken their seats at the board provisionally, but at an adjourned meeting for the purpose their election would have to be confirmed by the proprietors. An auditor would have to be appointed in place of Mr. Robertson, and for this office the board recommended Mr. J. J. Mackenzie, late of the firm of Dent and Co., of China. The meeting would be asked to vote an increased allowance to the chairman, whose almost entire time was required to be given to the duties of the office. The allowance proposed to the chairman was £1,000 a year. In conclusion he moved—

2. "That the report of the directors, balance-sheet, and auditors' report now presented to the meeting, be received, approved and adopted."

Mr. D. LARNACH seconded the resolution.—Mr. BROUGHAM asked what dividend it was proposed to pay in July next?—The CHAIRMAN was not in a position to say positively, but everything was going on satisfactorily, and he had no doubt they would be satisfied with the dividend that would be paid in July.—The motion was put and carried unanimously.

The following resolutions were proposed by the CHAIRMAN, seconded Mr. D. LARNACH, and carried unanimously:—

3. "That Sir Frederick James Halliday, K.C.B., the director retiring from the board in rotation, be, and he is hereby, re-elected a director of this bank."

4. "That Mr. John Smith, the present auditor, and Mr. James Joseph Mackenzie, late of the firm of Dent and Co., China, be, and they are hereby severally, appointed auditors of the company, and that their remuneration be £100 sterling per annum."

5. "That Messrs. Coleman, Turquand, Youngs and Co., public accountants, be employed to audit the accounts during the ensuing year, in conjunction with the auditors already appointed."

6. "That having regard to the report of the directors submitted to this meeting, and with a view to increase the chairman's allowance to the sum of £1,000 per annum, the further sum of £500 per annum be and the same is hereby granted, such allowance to take effect as from the first day of January last."

7. "That this meeting do adjourn until Tuesday, the twenty-third day of May inst., at one o'clock in the afternoon precisely, for the purpose of electing two new directors in the place of Mr. George Palmer Robinson and Mr. Thomas Stenhouse, who have resigned their seats as directors."

The following resolution was proposed by Mr. HENRY WRIGHT, seconded by Lieut.-Col. PENLEY, and carried unanimously:—

8. "That the thanks of this meeting are due and are hereby tendered to the chairman, the court of directors, and managers, for their attention to the interests of the corporation, as exhibited in the accounts now before the meeting."

At the adjourned meeting, held on the 23rd, Mr. James Murray Robertson and Mr. Ellis James Gilman were unanimously elected directors in the room of Mr. G. P. Robinson and Mr. Thomas Stenhouse, resigned. The Chairman availed himself of the opportunity to state, for the satisfaction of the meeting, that the failure of Messrs B. H. Cama and Co., of which intelligence had that morning been received, would only cause a very trifling loss to the bank, owing to the precautions taken, and the timely warnings and orders sent to Bombay some months since, that the greatest caution was observed there and at other branches, and that neither by the failure of Messrs. Lindsay and Co., in China, nor by Messrs. Wilson, Ritchie, and Co., Ceylon, would the bank be sufferers; nor, indeed were they affected by any failures which had taken place since that of Buchanan, Hamilton, and Co. The Chairman further intimated that it was the intention of the board to prevent hereafter a re-transfer of shares from the London to the Bombay register, it having been found from experience that this facility, which was not sanctioned by the deed of settlement, opened a door to abuses, and led to speculative operations and fluctuations in the value of shares which the board was anxious to prevent as far as they could.

THE ROYAL GEOGRAPHICAL SOCIETY.

On the 22nd inst. the annual meeting was held, Sir R. MURCHISON in the chair.

The CHAIRMAN proposed the toast of the evening—"The Royal Geographical Society," connecting with it the names of Captain Montgomery, R.E., and Mr. Samuel Baker, to whom the gold medals of the society for the year had been awarded. He next gave "Sir Rutherford Alcock," dwelling upon the great public services he had rendered in the Empire of Japan, and upon his having the true interests of geographical discovery at heart.

Sir RUTHERFORD ALCOCK, replying to the compliment, observed that to some there might seem little affinity between the diplomatic service and geographical discovery, but to his cost he found there was a close affinity, for it was geographers who found out new lands and diplomatists who occupied them. His destiny now took him to China, and any fellow geographer who might visit him at Peking would always find a hearty welcome.

The remaining toasts were "the Lord Mayor of London," given in complimentary terms from the chair; "the Chairman," proposed by Lord Houghton; and "The Travellers in Distant Regions," with which the names of Dr. Livingstone, Mr. M'Dougal Stuart, Mr. Palgrave, and Vambery were connected.

Amongst other remarks the CHAIRMAN said: In the huge empire of China and its dependencies what numerous journeys must yet be made to test the value of the recitals of Klaproth and other Chinese scholars respecting regions not visited by Europeans since the days of Marco Polo, except in certain lines by Huc and Gabet, whose works, however interesting in other respects, have failed in affording us sound geographical knowledge. Among the undescribed tracts dependent upon China is, for example, the great peninsula of the Korea lying between China proper and Japan. Twice conquered by the Japanese, the Koreans are now tributary to China; ingots, furs, and other articles being annually sent as tribute to Peking, with which capital they also keep up a trade in carts, which travel round the head of the great gulf of Leotung. With regard to other parts of Asia, I may first point to New Guinea, and here express my thanks to Sir Charles Nicholson for having specially called our attention to the importance of extending a survey of the accessible parts of this vast but little known land, lying within a few hours' sail of the eastern promontory of Australia. The next neglected country to which I would call your attention is the small group of the Philippines, consisting, according to Spanish estimate, of 400 inhabited islands, one of which is one-half larger than Ireland, and the whole containing (exclusive of mountain negroes) a population of the Malayan race, amounting to 5,000,000, very tolerably civilised and converted to Christianity. Concerning this mighty archipelago of the Philippines, which is within a couple of days' steaming of China, of five days' steaming of our own settlements, and with which, exclusive of the Indian trade, we carry on a direct commerce of the annual value of above £2,500,000 there is not a single paper in our records. Finally, the empire of Japan remains for exploration, with its computed 30,000,000 of people, the most ingenious and industrious of all the nations of Asia next to the Chinese.

THE SUEZ CANAL.

The undersigned, delegates of the Chambers of Commerce to the Canal of Suez, after having examined the works already done, and taken into consideration the possibility of the enterprise, report:—

"We started on the 7th inst. from Alexandria by railway for Cairo, where we remained until the morning of the 9th. We then proceeded by railway to Zagazig, where we embarked at nine o'clock A.M. in boats drawn bay mules and cmels on the fresh-water canal made by Mehemet Ali, and arrived the same day at Telel-Kebir, a station of the company.

"On the 10th, in the morning, we continued our journey in the same manner, and at noon we entered upon the fresh-water canal made by the company. At five o'clock P.M. we arrived at Ismailia, the central station on the Suez Canal.

'The 11th we remained at Ismailia to examine the works there, as well as those of Serapium, the most elevated points of the isthmus.

"The 12th we started from Ismailia by the sea canal in boats of small draught drawn by mules and camels. We arrived at Kantara at 4 o'clock P.M., having visited the important workshops and works of El Guiser and El Terdan. From this point, in many places, and for a length altogether of 60 kilometres (about 36 miles), the canal is already excavated to its full width. The portion previously traversed was only about one-third of the width proposed.

"The 13th we left Kantara in the same way for Port Said. Twenty kilometres (12 miles) before reaching this place we found five small steamboats, which brought us to the Mediterranean. There we examined the piers in course of construction.

"The 14th we remained at Port Said to visit the important buildings, workshops, and materials which the company possess in that town.

"The 15th we returned by boat to Ismailia; and the 16th, in the morning, we started for Suez by the fresh-water canal in boats drawn by mules and camels, arriving at Suez in the evening. The two locks in-

Digitized by Google

tended to connect the sea canal with the fresh-water canal, in course of construction at Ismailia, are not yet finished, and a transhipment here is now necessary.

"Our passage from the Mediterranean to the Red Sea was accomplished in twenty-seven hours, as follows:—Eleven hours from Port Said to Ismailia, and sixteen hours thence to Suez.

"A telegraphic wire extends the whole length of the canal, communicating with the wires of Cairo, Alexandria, and Suez.

"During our voyage we had opportunity to observe the excavators and other machines used for digging the canal. All the works belonging to the company appeared to us built and equipped in a solid and permanent manner. In our opinion the construction of a ship-canal across the Isthmus is only a question of time and money.

"We are informed that the company has already made contracts with various contractors for the completion of the ship canal by the 1st July, 1868, without exceeding the actual capital, including therein the indemnity due by the Egyptian Government under the award of the Emperor Napoleon III.

"During the whole of our trip we received the greatest hospitality from M. de Lesseps and the engineers of the company, and these gentlemen answered freely all the questions which we put to them.

"Cairo, April 17, 1865." (Signed by the Delegates.)

BULLION TABLES.

A tabulated statement of the prices of Bullion in London, with amount shipped, and the Bank rates of discount at the date of the outward mails to the Far East throughout 1864, together with the corresponding prices of bar dollars, and rate of exchange on London six months at Shanghai and Hong Kong at the date of the departure of the return mails in that period, has been issued by Mr. F. M. Page. From this document it appears that bar silver ruled highest on January 19th and 26th, the quotation being 5s. 2d. to 5s. 2¼d., and lowest on October 19th and 26th, when the price was 5s. 0⅞d. to 5s. 0⅜d.; whilst, for Mexican dollars, these ruled highest on July 3rd and 10th, when the rate was 5s. 4d. to 5s. 4½d., and lowest on November 3rd and 10th, when the price was 4s. 11½d. to 5s. 0⅜d. The highest price of dollars by the return mail from Shanghai was on March 8th, when they ruled 76¾, and of bar silver on April 22nd, when it was quoted at 111; the lowest quotation for the former occurring on July 4th, and for the latter, March 25th. The exhibit of the rates of exchange in the comparative form, as here presented, both as to time and place, is highly suggestive, connected, as these figures are, with the various influences affecting the London Money Market and the India and China trade. This table appears remarkably accurate, and will prove eminently serviceable to all engaged in China and India business.

THE DUKE DE MORNY'S ORIENTAL COLLECTION.

The Paris mansion of Louis Napoleon's late most intimate friend and lieutenant, Monsieur De Morny, is just now the scene of much interest. The Duke was a great amateur of pictures of the German, Flemish, Dutch, and French schools, and his gallery contains a hundred and twenty-eight paintings, nearly all of which are first-rate of their kind. Amongst others deserving special mention are—a magnificent portrait by Rembrandt, a glorious landscape with watermill by Hobbema, and charming works by Cuyp, Gerard Dow, Maas, Metyn, Mieris, Ostade Ruysdael, Jean Steen, Teniers, Terburg, Van de Velde, and Wouvermans.

The old French school is well represented by Boucher, Chardin, Greuze, Prudhon, and Watteau—that of the present day by Bonheur, Calame, Comte, Decamps, Dray, Frere, Roehn, Ziem, and, above all, by Meissonier, six of whose finest works are in the De Morny gallery.

But the especial taste of the late Duke was for what are called here *chimoiserie*, and those who desire to know to what an extent the love of Oriental works of art and curiosity is cultivated in Paris, should not miss an opportunity of paying a visit to the collection in question before it is dispersed by the auctioneer. The private views of the gallery take place on the 25th, 26th, and 27th of the present month, and the public exhibitions on the 28th and 29th. The sale commences on the 31st with the modern pictures; the works of the old school are to be sold on the three following days; and the objects of art and curiosity are to be disposed of during the week following the 5th of June.

The latter portion comprises nearly five hundred and fifty items, and includes some remarkably fine objects. Many of them were described in the *Gazette des Beaux Arts* of November, 1863, and January, 1864, under the title of "Collection d'Objects d'Art de M. le Duc de Morny," by M. Albert Jacquemart, author of a well-known work on porcelain, beautifully illustrated by means of etchings by his son. M. Jules Jacquemart, who is now engaged in producing, for the administration of the Louvre, a series of marvellous representations of the principal works in rock crystal, agate, gold, and other metals in that museum.

The Duke's *cloisonnes* enamelled works alone amount to about forty, and some of them are remarkably fine and of large size. Amongst the most choice are several large perfume burners and vases of great beauty; a pair of remarkable pictures in coloured enamels, representing land and water scenery, with pagodas and junks, each three feet wide by more than two feet in height; a model junk of about the same dimensions, executed in ironwood with incrustations of jade, bronze, and enamels. There are eight objects of Chinese workmanship in rock crystal, four of which are of large size and rare execution. The collection includes more than sixty objects in jade, some few of which are Persian and Indian, but by far the greater number apparently Chinese, vases, screens, chimeras, or carved monsters, sceptres, cups, boxes, and ornaments. The porcelain consists of upwards of sixty lots, principally of old Chinese manufacture. Amongst the most remarkable items in this class are two magnificent covered vases, which were formerly in the Palace of the Escurial, each more than fifty-one inches high. The specimens of celadon and crackling china are numerous and fine. There are about fifty bronzes, more than half of which are Chinese, the rest Japanese, some very ancient and fine, two large vases of the latter kind, with ornamental handles, are encrusted with silver.

In addition to these, there are about a hundred pieces of lacquered ware, including some handsome cabinets and cheffoniers; a mandarin's necklace, with heads of lapis-lazuli and coral, and pendants in rock crystal, mounted in gold; an amulet in carved cornelian, with emerald green jade rings and large pearls; several albums and rolls containing Chinese paintings on silk and paper, and a mass of miscellaneous articles.

The taste for Chinese wares has been somewhat satiated in London, but in Paris it reigns at present in full force.

CARVINGS IN JADE, CHINESE ENAMELS, &c.—The very choice collection of carvings in jade, Chinese enamels, and ornamental objects formed by Duncan Fletcher, Esq., late of China, was disposed of on the 22nd inst. at the rooms of Messrs. Christie, Manson, and Woods, King-street, St. James's. Among the more valuable objects were the subjoined:—Lot 96. A beautiful Parisian clock, in case of ormolu and Sèvres, surrounded by a vase jewelled in colours on white and turquoise ground; and a pair of candelabra, for four lights each, *en suite*—40 guineas (Vokins). Chinese enamels.—101. A pair of magnificent two-handled incense-burners, on tripods of the finest old Chinese enamel, with flowers and ornaments in lapis-lazuli and colours on turquoise ground, on carved wood stands 21½ inches high—90 guineas (Durlacher), 102. A pair of very fine oviform two-handled vases of the finest old Chinese enamel, with flowers and foliage in lapis-lazuli and colours on turquoise ground, on carved wood stands 21½ inches high—£165 (Van Cuyck). 103. A pair of magnificent large two-handled vases, of Chinese porcelain, with large subjects of figures in colours, in medallions, flowers, and buds, 54 inches high—72 guineas (Agnew). 105. A splendid globular incense-burner and cover of the finest ancient Chinese enamel, with upright handles, and on three feet, covered with plants, flowers, and ornaments in colours, on turquoise ground, on carved wood stand, 36 inches high—140 guineas (Agnew). Carvings in Jade.—119. A beautiful basin, on feet, carved with dragons and ornaments—£36. (Durlacher). 120. A flat cup, the handles formed as children, and a child with a bird in the centre; a beautiful carving in white jade—£47 (Addington). 121. A beautiful white jade basin, carved with figures in relief, of the most exquisite workmanship—80 guineas (Durlacher). 122. A fine large oval bowl, of white jade, with handles and border of carved openwork foliage—£44 (Lewis). 123. A very fine oval bowl, of white jade, elaborately carved with dragons in high relief—60 guineas (ditto). 124. A magnificent octagonal bowl, with four ring handles carved with ornaments—£35 (ditto). 125. A very large and magnificent white jade incense-burner, the handles formed of animals, with rings attached, the surface carved with ornaments—130 guineas (Durlacher). 129. A very large green jade cylindrical match-pot, pierced and carved all over with landscapes and figures—30 guineas (Lewis). 138. A pair of beautiful white jade basins and covers, on carved wood stands—26 guineas (Bourne). 139. A pair of beautiful pale green jade basins, on richly carved and pierced stands—40 guineas (Enright). Enamels.—149. A pair of very fine altar candlesticks, on square-shaped feet—28 guineas (Russell). 151. A magnificent incense-burner, with flowers in colours, on gilt feet, set with stones; the handles of carved jade; the wood-cover elaborately carved and enriched with jade and other stones—30 guineas (Marshall). 156. A magnificent square-shaped vase, with butterfly and ring handles, covered with ornaments in lapis-lazuli and white, on turquoise ground—£47 (Thomson).

THE NEW COMMANDER-IN-CHIEF IN INDIA.—The greatest military command in the British Empire has been assumed by Sir William Mansfield, and Sir Hugh Rose, after a career which would have entitled a Roman general to a triumph, has just landed in this country. It seems but yesterday that the victorious march of Rose's column restored the glory of our arms in Central India, and yet nearly seven years have elapsed since that campaign was crowned by the capture of Gwalior, and nearly five since Sir Hugh succeeded Lord Clyde as Commander-in-Chief. Lord Canning has been followed by Lord Elgin, and Lord Elgin by Sir John Lawrence during this last interval, which only appears uneventful when compared with the desperate crisis through which our Indian Empire had then but just passed. It has often been pointed out, and yet we are apt to forget, that the entire annals of that marvellous Government are comprised within a single century. There are, possibly, those now living who were born before Lord Clive's return to Calcutta with supreme power, and whose lifetime covers all that grand series of events from the battle of Plassey to the pacification of India after the great mutiny. Hyder Ali and Tippoo Sultan, Holkar and Scindia, the Mahrattas and the Pindarrees, Akbar Khan and Nana Sahib, the splendid catalogue of our Indian victories, the noble muster-roll of our Indian generals, all belong to the same age, and all will be hereafter blended together by the foreshortening effect of time, until they seem almost contemporary. Nine years' active and eminent service in India fills no small space in such a history, and although Sir Hugh Rose, whose return we welcome to-day, may be eclipsed in fame by some whose brilliant genius founded our dominion, he must always hold a foremost place among those whose valour and conduct preserved it.

THE LATE LADY AMHERST.—Probate of the will of the Right Hon. Mary, Dowager Countess of Amherst, formerly of Knole-park, Sevenoaks, Kent, but late of Bournemouth, near Christchurch, Hants, was proved in Her Majesty's Court, on the 12th ult., and the personalty sworn under £140,000; the executors being her nephew, the Right Hon. Mortimer Sackville West (the third surviving son of Earl and Countess Delawarr), and Mr. Frederick Flud Nicholl. The trustees are the Earl of Verulam and Mr. Bernard Hale, of Holly-hill, Tunbridge-wells. The testatrix was the eldest daughter and co-heir of the third Duke of Dorset (title now extinct), and was twice married—first, in 1811, to Other Archer, sixth Earl of Plymouth, who died in 1833 (title now extinct); and secondly, in 1839, to William Pitt, first Earl Amherst, P.C., G.C.H., who had been Ambassador to China, and Governor-General of India, and died in 1857. Her ladyship's will is dated 1860, and there are two codicils, executed in February and May, 1864. Her Majesty having been graciously pleased to grant the dignity of Baroness to the testatrix's sister, Elizabeth, Countess Delawarr, by the title of Baroness of Buckhurst, with remainder of dignity of Baron Buckhurst to her sister's second surviving son (the testatrix's nephew), the Hon. and Rev. Reginald Windsor Sackville West, Rector of Whittingham, and Chaplain in

Digitized by Google

Ordinary to the Queen, the testatrix, by a codicil, has conveyed her estates in the counties of Kent, Warwick, Glocester, and Sussex, and all other estates, together with the statues, pictures, furniture, and effects about the mansion of Knole, in trust, in a course of entail, to correspond as nearly as may be with the title of the Barony of Buckhurst. Her jewels and ornaments of the person she leaves to her niece, Lady Arabella Diana Sackville West. All wines and consumable stores her ladyship has bequeathed to her sister Countess Delawarr, whom she has appointed residuary legatee. There are a few legacies to personal friends, and to each of the executors and trustees £500.

THE DANUBIAN PROVINCES AND SILKWORMS.—The Government of the Danubian provinces, in order to prevent the propagation of unsound silkworms, has adopted measures to prevent the import of seed which has not been carefully examined, in order that the Government may guarantee the quality to purchasers. The same Government has moreover purchased a large quantity of Japanese seed in France, which was imported by the Zoological Society of Paris. This seed is sold by the Director of Public Works at Bucharest, and at the town-house of each district in the departments. The price is fixed at 6 piastres the drachma, being the cost price, exclusive of the charges of import. The Minister further apprises the public that the persons whose names are published in the official journal are the only ones authorised by the Government to sell Japanese seed, of which they are the sole proprietors. It is to M. Drouyn de Lhuys, President of the Zoological Society, that the Government of the Danubian Provinces are indebted for a favour calculated to produce such great advantages to the silk producers in that country.

A NEW AMERICAN SILKWORM.—It appears, from *Silliman's Journal*, that, after numerous experiments, Mr. L. Trouvelot, of Medford, Mass., has succeeded in rearing successfully, and in great numbers, *Attacus Polyphemus* Linn., and in preparing from its cocoon an excellent quality of silk, possessing great lustre and strength, and pronounced superior to Japanese and all other silks, except the best Chinese, by competent judges. The silk is unwound by a simple process perfected by Mr. Trouvelot, each cocoon yielding about 1,500 yards. This insect is very hardy, being found throughout the Northern States and Canada; and, as it feeds upon the leaves of oak, maple, willow, and other common forest trees, may be reared easily in any part of the country. Mr. Trouvelot has gradually increased his stock from year to year by raising young from the eggs of the few individuals first captured, until he has at present seven waggon-loads of cocoons, the entire progeny of which he proposes to raise during the coming season. The first public notice of his experiments with this insect was given by Mr. Trouvelot at a meeting of the Institute of Technology, at Boston, about a year ago, when he exhibited specimens of silk manufactured from it, both natural-coloured and dyed.

THE FLEET OF STEAMTUGS FOR CALCUTTA.—The trial of the *Bombay*, the property of native Parsee, Armenian, and Mahomedan merchants of Calcutta, took place on the 16th, and after running the measured mile, the ship made the round of the *Great Eastern* in the Medway. The *Bombay* is the second of a fleet of the most powerful steam tugs ever built; the great power being necessary, first, in towing heavy ships against the monsoon, and, second, in towing against the heavy gales and rapid tides of the River Hooghly at certain seasons. The first steamer of the company arrived at Calcutta some months since; the *Bombay* will follow immediately, and a third will be shortly launched. Those three steamers have been constructed for, and built and equipped by Mr. Charles Lungley, of Deptford-green Dockyard—the dockyard which has since become the property of the Millwall Iron Works, with Mr. Charles Lungley as the manager of the combined establishments. Other steamers are at present in construction at Newcastle and on the Clyde for the same service.

THE LONDON MISSIONARY SOCIETY.—The 71st annual meeting of this society has been held in Exeter-hall, under the presidency of Arthur Kinnaird, M.P. Among the numerous body of clergy and laity present were Mr. Hadfield, M.P., Mr. Barnes, M.P., Mr. E. Baines, M.P., Dr. Edmonds, D. Morton Brown, Dr. Vaughan, and Mr. Samuel Morley. After the meeting had commenced Dr. Livingstone, the well-known African traveller, was recognised among the audience at the back of the platform, and on coming forward he was accorded a most enthusiastic reception. The annual report was read by Dr. Tidman, an operation which occupied upwards of an hour. This document entered at length into the details of the missionary work carried on by the society in different parts of the world, and announced the fact that the income of the society for last year was higher than in any previous year. The income for ordinary purposes was stated to be £61,069. 12s. 8d., and with the fund for special objects, as for the extension of missions in India, China, and Madagascar, and for the new missionary ship to replace the John Williams, a total income of £91,041. 10s. 1d. was shown. The expenditure had amounted to £99,156. 8s. 2d., and to meet the deficiency sums had been drawn from the special funds put aside for extending the missions in India, China, and Madagascar. The Chairman touched upon several of the topics mentioned in the report, and called attention to the importance of obtaining the assistance of native agents. The Rev. J. Guinness Rogers moved the adoption of the report, with a resolution gratefully acknowledging the "encouraging aspect presented in the varied and extended operations of the society in Polynesia, the West Indies, South Africa, China, India, and Madagascar," nevertheless deploring "the deadly influence of Paganism, which prevails over hundreds of millions of our fellow men, natives of those several countries." The rev. gentleman urged the need of foreign missions, and expressed his warm admiration for the work carried out by the society. The Rev. R. Roberts seconded the resolution, which was supported by Dr. Livingstone, who on rising to speak was loudly cheered. He said he knew a very great deal of the converts to Christianity and the missionaries in both South and West Africa, and he arrived at the opinion, from what he had seen, that those who talked about the missionaries and converts as unworthy persons knew nothing at all about them. A gentleman, he said, whom he knew, went into a certain town in Africa, and was astonished because he saw no missionaries; but when he got into the middle of the town he found a black man preaching to the inhabitants, and that gentleman, having made personal inquiries as to the work carried on by the missionaries, now freely acknowleuged the value of their work. The labours of the missionary in South Africa were such, being carried on in spite of the most deadly disease and the greatest perils, that they only wanted an air of antiquity to be thrown around them to make them equal to those of the saints and apostles of old. It had come to his knowledge that some persons talked about the advance of Mahomedanism, and he had been looking out for that wave which was to spread over Africa; but he had never met with any Mahomedans until two years since, when he came across a couple of Arab slave traders, and the result of the particular inquiries which he made was that those who had been with them for some years knew nothing about the faith, beyond that it was wrong to eat of an animal the throat of which had not been cut. He went on to show that the converts made great sacrifices in order to support the Church of their faith, and he expressed his conviction that the influence of the missionaries was more widely felt than was known, and that the fruit of this influence would be felt in time to come. The resolution was then put and carried. The Rev. Mr. Minton proposed the second resolution, which expressed gratitude to the British Government for services rendered to the society's agents labouring in the Loyalty Islands, and especial thanks to the Emperor of the French for assurance of protection and liberty to all Christian missionaries labouring for the instruction and civilisation of heathen tribes. This was also carried, and, after other resolutions had been passed, the proceedings, which were somewhat prolonged, came to a close in the usual manner.

FRAUD ON THE BANK OF HINDUSTAN.—A curious case of alleged fraud has been brought before the Lord Mayor, in which a Mr. Speltz, a merchant of Liverpool, was charged with having defrauded the Bank of Hindostan of the sum of £1,673, which they had advanced him on the collateral security of invoices of six cases of quinine, valued at nearly £2,000. The complaint was that these cases instead of having 1,000 ounces of quinine each, only held 250 ounces. The matter was complicated by the failure of a foreign house, of which the prisoner, it was admitted, was an agent. The Lord Mayor remanded the case; but the prisoner, who had not an opportunity of entering on his defence, was allowed to find bail.

CHINESE FUNERAL.—A cart, containing the mortal remains of a Chinaman enclosed in a very handsome coffin, passed through Talbot on Thursday, preceded by a European undertaker and a Chinaman, who scattered small slips of perforated paper along the road at every few yards. About 40 Chinamen followed. On arriving at the cemetery where the grave had been prepared a little delay was caused, as the friends of the deceased considered it necessary that his body should lie so as to face the west, and the excavation had to be altered accordingly. After the coffin had been lowered Mr. Gore read the funeral service according to the form of the Protestant Church, deceased having been converted to Christianity. The grave having been filled in, deceased's friends broke food and scattered it on the ground and also spilt liquor. A live cock was brought to the ground by the mourners, and it was no doubt sacrificed at some ceremony on their return to the Chinese camp, where a great feast had been prepared during the day. One of the most noticeable features was a huge porker roasted whole, the method being peculiar to the Chinese, who for this purpose build a high circular oven of stones and clay open at the top, in which, after it had been heated, the pig is suspended. The aperture is then closely covered, and in the course of time the pig is done to a turn. No ceremony is considered complete by Chinamen without pork and crackers.—*Ararat* (Australia) *Advertiser.*

Naval and Military.

A letter from Hong Kong, dated March 31, relates the serious injustice which is contemplated against officers on that station by the withdrawal of Indian allowances. The writer says:—"Nearly all the Indian troops have left, and things remain as they were; and the hopes of those interested begin a little to revive. They trust that the authorities have seen in time the injustice of the step; that they have taken into consideration that China is the most unhealthy, as well as the most expensive, station in the world; and that it would be cruel to throw men on their private resources (which may be very small, or may be *nil*) when they have come so far and to such a climate under a different impression. But they cannot live on their pay here if it is put on the same footing as in Ceylon, as seems to have been proposed. Civilians residing in China are astounded at the idea. The salaries of clerks in mercantile and banking houses here have been raised lately with the prices of necessaries, while the unfortunate British subaltern does not even now receive nearly as much as these very clerks, who have neither board nor lodging to pay for. Should the reduction actually take place, it is hard to say what will be the result. One thing is certain, the junior ranks can barely live on their pay now, much less take the position to which by birth, education, and military rank they are entitled among civilians, whose supply of dollars is almost unlimited. Neither can they afford those comforts which are positively necessary to health in this part of the world."

The Scout, 21, screw steam corvette, which was commissioned on Monday last by Capt. Charles H. May, late of the Canopus, was taken out of dock to her moorings in Sheerness harbour, after having had her screw-propeller and valves examined, and the bottom of the vessel cleaned. Several of the officers have been appointed, and are joining the ship. She is intended for service on the Pacific station, and will have a complement of 275 men.

General Cameron, at New Zealand, has asked for 2000 men from England as reinforcements. The Secretary for War not only peremptorily declines to send them, but repeats his instructions for the withdrawal of five regiments. The Colonial Government has asked permission to enlist 1,500 men from the troops now in New Zealand as a local force, and the Government is willing to accede to their request. But whether the local corps is to be on the footing of militia, or a colonial regiment like the Canadian Rifles, does not appear.

Captain Keith Fraser, of the 1st Life Guards, has been appointed aide-de-camp to Major-General Lord George Paget, Inspector of Cavalry. Captain Fraser will also discharge the duties of brigade major, a post which has been substituted for that of assistant adjutant-general of cavalry.

It is rumoured that in the event of Lord Clarence Paget being success-

Digitized by Google

ully opposed at Sandwich, his lordship will succeed Sir Robert Smart in command of the Mediterranean station.

The Miranda, 15, screw steam-corvette, 1,039 tons, 250 horse-power, Captain Robert Jenkins, C.B., arrived at Sheerness from New Zealand, to be paid out of commission, and saluted the flag of Vice-Admiral Sir Charles Talbot, K.C.B., Commander-in-Chief at Sheerness. The Miranda was commissioned at Sheerness, in October, 1860, by Captain Henry C. Glyn, for service on the Australian station, and has been employed in the late war in New Zealand.

The following flag promotions, dated the 5th inst., have been made in consequence of the death of Admiral Sir Edward Harvey, G.C.B., on the 4th inst. :—

Vice-Admiral Sir John Burnet Dundas, Bart., on the Reserved List, to be Admiral on the same list.

Vice-Admiral Sir Robert Lambert Baynes, K.C.B., to be Admiral in Her Majesty's Fleet.

Rear-Admiral Richard Laird Warren to be Vice-Admiral in Her Majesty's Fleet.

Capt. Wallace Houston to be Rear-Admiral in Her Majesty's Fleet.

The Edgar, 71, screw line-of-battle ship, Capt. G. T. P. Hornby, carrying the flag of the Commander-in-Chief of the Channel fleet, Rear-Admiral Sydney Colpoys Dacres, K.C.B., anchored at Spithead on the the 13th inst., with the Earl of Sefton and suite on board on their return to England from his special mission to Lisbon. Soon after the Edgar arrived his lordship and his suite disembarked, and, landing at the dockyard, proceeded by rail to London. The Hector parted company westward and went into Plymouth Sound. The Achilles and Prince Consort have gone into Portland Roads.

Parliamentary Intelligence.

HOUSE OF COMMONS.

SINGAPORE.

(May 17th.) Mr. MITCHELL asked the Secretary of State for India whether, in the event of the transfer of Singapore from his department to that of the Colonies, full provision would be made for the continued employment of naval officers holding command under him in the Straits of Malacca.—Sir C. WOOD was sorry to say that he did not understand the purport of the question. No naval officer, that he was aware of, held command at Singapore under the Government of India.—Mr. MITCHELL said the purport of his question was this: There were certain officers commanding vessels under the control of the Indian department at this moment in the Straits of Malacca, and their impression was that in the event of the transfer of Singapore to the Colonial department, their services would be altogether dispensed with, and they would be replaced by the Royal Navy. —Sir C. WOOD promised to make inquiries, and reply at a later period.

Monetary and Commercial.

The rumours alluded to in our last of extensive failures in Bombay have been confirmed, and at the same time the suspension of Messrs. Lindsay and Co., of Shanghai; Messrs. Dirom, Davidson, and Co., Liverpool; Messrs. Rimington, Cartwright, and Co., London; and Messrs. Wilson, Ritchie, and Co., Ceylon. Of course there are rumours of others to follow. The money market becomes more easy, owing to the extreme caution adopted by bankers and others in discount operations. The Bank of England official minimum remains at 4½ per cent.

The reportsof the Chartered Mercantile Bank of India, and the Bank of Hindustan, presented at their meetings on the 15th and 16th inst. and alluded to in our last, are now published in extenso.

The half-yearly report of the Scinde, Punjab and Delhi Bank Corporation, to be presented on the 30th inst., shows a profit balance of £3,707, but, owing to the late failures in the Indian trade, this, together with the reserve fund of £24,674, will be absorbed by losses, and a further sum of £5,238 will remain to be provided for.

The annexed circular has been issued, announcing the suspension of Mr. Byramjee Hormusjee Cama, of Bombay, and of his house in London, Byramjee Cama and Son. The particulars of the extent and causes of the disaster cannot be fully received till toward the end of next month, but it is apprehended that the liabilities will be found to approach to nearly £3,000,000. The liabilities on bills held in this country are stated to reach £1,100,000, and the amount to which they may be provided for by consignments of cotton, &c., now on their way, seems uncertain :—

"We regret to inform you that we have received a telegram from Bombay, dated the 17th inst., announcing the suspension of Mr. B. H. Cama (the only partner in the firm of Byramjee Cama and Son, of this city and of Liverpool), and desiring us to suspend payment and call a meeting of creditors. We beg, therefore, to announce our suspension, and that we have placed our books in the hands of Messrs. Coleman, Turquand, Youngs and Co., with instructions to prepare a statement to lay before the creditors."

Bank shares have fallen £1 since our list was made up.

A general meeting of the British India Steam Navigation Company (Limited) is called for the 31st inst., when a dividend is to be declared.

The directors of the Peninsular and Oriental Steam Navigation Company announce that the dividend for the six months ending the 31st of March, to be recommended at the half-yearly meeting of the company on the 1st proximo, is 3½ per cent. without a bonus. Considering the heavy falling off in bullion and silk freights this is not to be surprised at.

At the biddings for bills on India at the Bank of England, the proportions allotted were—to Calcutta £289,000, and to Bombay £55,000. The *minimum* price was fixed at 1s. 10¼d. on Calcutta and Madras, and 1s. 10⅛d. on Bombay, being 2 per cent. lower than on the last occasion; and all tenders on Calcutta and Bombay at and above 1s. 10⅜d. will receive in full. There were no tenders on Madras.

The firm of Messrs. Brown, Buckley, and Co., produce brokers, who suspended on the 14th of October last, but whose difficulties it was believed would prove but temporary, have now, as was anticipated would be the case, paid their creditors in full with interest.

The amount of bullion by the P. and O. Company's steamer *Syria*, from Southampton on the 20th inst., was :—In gold, to Galle, £1,500; to Mauritius, £15,000; to Madras, £250. In silver, to Alexandria, £200; to Yokohama, £165. Total, in gold, £16,750; in silver, £365.

ARTICLES OF IMPORT.

TEA.—Purchases very limited. Red and black leaf, fine Congous have advanced the last ten days 1d. per lb. and there are now but few Kaisows in first hands. The inquiry for export to New York has continued mostly for Green Teas, and to Russia a few transactions have taken place of good flavoury kinds. The sales of red leaf have been chiefly in the better classes; good Kaisow kinds from 1s. 5d. to 1s. 7d., being rather dearer; medium Kaisows 1d. to 1½d. higher, and for which there continues a very good inquiry at from 1s. 9d. to 2s. per lb.; fine and finest have also taken at a similar advance. The imitation made from Taysham leaf has continued in request, and some new season's have realised extreme rates. In Amoy kinds there are buyers at 11d. to 11½d. per lb. In black leaf of the grades up to medium there is no change to notice, but fine qualities from 1s. 9d. to 2s. per lb. are scarce and wanted, finest from 2s. 1d. to 2s. 4d. per lb. have taken more freely. In Oolongs some sales of fine have been made at 1s. 9d. to 1s. 11d. per lb. for home purposes, and good common has changed from 1s. 1d. to 1s. 2d. per lb. for export. Souchongs of finest quality only have been dealt in. The inquiry for Scented teas, both of Canton and Foochow make, has not been large, but prices rule steady. Green: The market is firm, and prices are well supported. Young Hysons have been taken for export at a further advance for good common to fair descriptions, and the trade have taken good to fine Gunpowders at fully previous rates. Shipments of tea continue to arrive in Canada from England, the London market being the cheapest for all kinds except fine Moyune Young Hysons, Hysons, and Gunpowders. There is an increasing demand for Hysons throughout the West. Japans are in good supply, and demand steady. The New York market continues to exhibit much animation, and Green teas of all kinds are wanted, while transactions are reported at advanced rates.

SILK.—We have had another fortnight of active business in silk, with a further considerable advance in prices. In China Silk there has been a brisk demand for all ordinary descriptions, and Tsatlees are much dearer; common Taysaams, on the other hand, appear almost unsaleable. Japan silk has been more current than ever, and anything really good fetches fabulously high prices. Accounts of the European crop are generally bad. Deliveries from 1st to 23rd inclusive :—China, 1,702 bales; Japan, 770 bales; total, 2,472 bales. The quotations are :—Tsatlee, No. 3, 28s. 6d. to 29s.; Taysaam, Key-ing, No. 1, 26s. 6d.; Mibash, No. 1, 32s. to 33s. At the sales of raw silk and cocoons at Marseilles on the 20th inst., 12 coils of Japanese silk were disposed of at 63 francs. The *Courier de la Drome* gives some information as to the progress of silkworm breeding in that department and the Ardèche. Much anxiety prevails amongst the silk breeders in those departments with respect to the forthcoming crop. The silkworms bred from Japanese seed give great hopes, but the others produced from foreign seed cause some uneasiness. Owing to the want of sufficient seed, the number of silkworms is much less than usual, and there is a vast quantity of mulberry leaves, for which it is feared there will be no demand.

COTTON.—The sales in the London market during the business week ending the 19th inst. were—of China, 50 bales of good fair at 8¼d., and 740 bales of Japan, fair to good fair, 8½d. to 9¼d. The stock of China and Japan in London on the 18th was 12,298 bales, against 31,319 last year. The quantity afloat to Europe on the 19th was, of China, 28,661 bales, against 76,376 last year, and of Japan, 531 bales, against 8,487 in 1864. The total stock in London on the 18th was 102,551 bales, against 92,843 bales in 1864; and the stock in Liverpool on the 19th was 506,430 bales, against 351,446 last year. The market was steady in London on the 20th, with sales of 30 bales China, middling fair, at 8d., and 40 of Japan, good fair, at 9¼d. On Monday, the 22nd, in consequence of the American news, a strong demand was experienced, and 3,230 bales were sold at a general advance of ¼d. per lb. Among them were 100 bales China, 8d. to 8¼d. middling fair, and 10 bales Japan, 9½d. fair. On Tuesday, the sales amounted to 3,190 bales on the spot at full prices of the day before, and in some instances at ¼d. per lb. in favour of the sellers. 50 bales of China went at 8d., middling fair, and 390 bales Japan, 8½d. to 10d., middling fair to good. On Wednesday, the 24th, the market was quiet, with sales of only 800 bales at about previous rates; among them 50 bales Japan, good fair at 9½d. At Liverpool, in the early part of the week ending the 19th, China and Japan fell about ¼d. per lb, which induced large operations, and prices recovered about ¼d. per lb. On the 22nd the market opened exceedingly

Digitized by Google

strong, and a large business was concluded at a further ¼d. to ½d. advance, and the increased quotation has been fully maintained.

SUGAR.—Extensive transactions have taken place at generally stiffer prices, and an advance of 6d. per cwt. has been established. On the 23rd, 605 bags Siam were partly sold at 33s. 6d. to 35s. 6d. On the 24th, at auction, 6,300 bags Manila were in part disposed of at 25s. to 26s. 6d. for unclayed, the clayed being bought in at 29s. to 31s. 6d. per cwt.

COFFEE.—The public sales of plantation Ceylon during the week ending the 19th, amounted to 1,060 casks, 333 barrels and bags, and at a decline of about 1s. per cwt., on the prices obtained in the recent small transactions by private contract, the whole was taken off, latterly with a more spirited competition, viz., fine ordinary to low middling 78s. to 81s. 6d.; middling and good middling 82s. 6d. to 84s.; colory, 85s. to 94s. 514 casks, 1,148 bags native, were principally disposed of at a similar reduction; good ordinary, 66s. to 67s.; fine ordinary, 68s. 6d. to 69s.; superior, 70s. to 70s. 6d.: privately, 100 casks have been sold at 66s. to 69s. 6d. During the present week, the supplies brought forward continue to find ready buyers at the extreme of late rates. At auction 230 casks, 476 bags, native Ceylon, at 66s. to 69s.; 295 casks, 173 tierces, 70 barrels, and 130 bags plantation, mid. to good, 81s. to 88s.; fine ord. to low mid., 78s. 6d. to 80s. 6d.

RICE.—Prices are well maintained. The total sales last week amounted to about 60,000 bags, at the previous value, very ordinary old Nakrenzie 8s. middling to fine 9s. 3d. to 10s. 3d., Rangoon 8s. 9d. to 9s. 9d., Bassein 9s. 3d. to 9s. 6d., and white Bengal at from 12s. 9d. for middling, up to 14s. 7½d. for good, a few siftings 11s. 6d. The only parcel in auction was 7,423 bags Moulmein, of which the damaged (3,210 bags) found free buyers at 8s. to 9s., the rest, sound, being bought in.

CARDAMOMS.—Steady, but quiet, with increasing supply; 10 cases Malabar at auction retired, and 2 bags Aleppy, sold at 5s. 2d. per lb. for good.

CAMPHOR.—Subsequently to our last prices fell rapidly to 105s. per cwt. for China in tin, lead commanding very little more money; recently demand has improved; considerable business has been done, and prices have rallied to 117s. 6d. for lead.

CASSIA LIGNEA.—Very firm; and of 1,195 boxes at auction two-thirds sold at 82s. to 87s. per cwt. for second to first quality: moderate business privately. Buds: Flat; three cases at auction retired.

CINNAMON (CEYLON).—We quote first sort 1s. 4d. to 2s. 4d. per lb.; second, 1s. 3d. to 2s. 2d.; third, 1s. 3d. to 1s. 9d.; and fourth and Jungle, 10d. to 1s. 4d.; fair business accomplished privately at a slight advance upon the currency of the late sales.

COCOA-NUT OIL.—This market has undergone a marked change for the better; business very large on the spot and for arrival up to our advanced and highest quotations, 362 casks Cochin, 561 casks Ceylon, 66 casks Sydney, 149 casks Manila, and 22 casks Madras at auction.

DRUGS.—Cubebs: Continues flat, with nothing of any importance doing. Dragon's Blood: Steady, 3 cases sold at auction at £8. 5s. to £9 per cwt. for good lump. Galangal Root: Neglected, 90 bags at auction retired. Rubarb: Has become very quiet, and a decline of 3d. to 6d. per lb. accepted. Of 130 cases at auction, half sold at 5s. 6d. per lb. for middling flat; 4s. to 4s. 1d. good ordinary flat and round.

GUMS.—Benjamin: Siam dearer; and of 9 cases at auction, 4 sold at £36 to £36. 5s. per cwt. for 3rd size drop, in block: Sumatra steady, and of 60 cases brought forward, half sold at £12. 10s. to £12. 15s. for false packed 2nd quality, and £6. 10s. middling 3rd. Damar: Continues quiet; 100 cases at auction retired. Gamboge: Rather lower, and of 26 cases at auction two-thirds sold at £9. 10s. to £9. 12s. 6d. per cwt. for fair pipe.

GUTTA PERCHA.—Very quiet, with little trade; 2 tons at auction retired.

HEMP (MANILA).—This market has been very firm, but with little demand till quite recently; during the last few days a fair quantity has changed hands at £28. 5s. to £29. 15s. per ton for fair to good roping, and £30 to £31 for fair to fine Sorsogon. Of 4,271 bales at auction, about one-third was placed within these terms.

HORNS.—Steady; auctions confined to 9 tons Madras Buffalo Horns, sold at 30s. 6d. to 31s. 6d. per cwt. for 2 lbs. average, and 10 tons Ceylon Deer sold at 55s. to 60s. for 1⅛ to 1¼, being higher.

INDIA RUBBER.—Some inquiry for fine; moderate business privately upon previous terms; 204 packages Assam sold at auction at 7¼d. to 10¾d. per lb. for ordinary to very good.

JAPAN WAX.—Quiet, and nothing of any importance doing.

OILS.—Anniseed: Has advanced to 7s. 9d. per lb., good business accompanying the improvement, and the market remains firm: sales reported for arrival at 7s. 6d. Cassia: Very flat, with scarcely any transactions. Cinnamon: Steady, 4 cases sold at auction at 2s. to 2s. 5d. per oz. for fair quality.

PEPPER.—Black: Has receded nearly ⅛d. per lb., and market very quiet; of 4,486 bags Singapore at auction, about half sold at 3⅛d. to 3⅜d., and of 3,431 bags Penang, one-third sold at 3d. to 3⅛d. White: An unusually large quantity has been brought upon the market, which has produced a fall of fully ½d. per lb.; and of 3,669 bags Singapore, and 445 bags Penang at auction, about half sold at 5⅞d. to 6¼d. for middling to very good.

SHELLAC.—Has suffered a further and general fall of 2s. 6d. to 5s. per cwt., and of 1,240 packages at auction about half sold: Orange at £4. 12s. 6s. to £5. 7s. 6.; Garnet £4. 10s. to £5. 5s.; Button £3. 15s. to £4. 2s. 6d.; Native £4. 10s. to £4. 12s. 6d.; Block and Blocky £3. 10s. to £4. 7s. 6d. Private business very limited.

SAGO.—Firm, and occasionally rather dearer; 1,715 boxes at auction mostly sold at 20s. to 22s. 6d. per cwt. for fair to good large; and 18s. 6d. to 20s. 6d. middling to fine small. Flour: Steady, and of 364 bags at auction one-third sold at 14s. 6d. per cwt. Tapioca: At auction, 50 boxes Pearl were bought in at 26s.; likewise 237 bags Penang at 2¾d. to 3¼d.

SPICES.—Cloves: Quiet; Only 68 bags Zanzibar offered at auction, and those retired. Mace: Steady; of 13 cases Penang at auction, half sold at 1s. 2d. to 1s. 3d. per lb. for fair reddish. Nutmegs: Nothing of any consequence doing.

TERRA JAPONICA.—Cutch, Pegue: Very quiet, but 568 bags and 47 tons loose at auction mostly sold at 19s. 6d. to 20s. per cwt. for very low drossy. Private transactions nearly nil. Gambier: Very quiet, with limited business. 800 bags at auction all retired.

TIN.—This market has been steady, but without animation; fair business done in Straits mainly at £93 to £93. 10s. per ton cash, and up to £95 for arrival; trifling trade in Banca within our quotations of £99 to £101 per ton.

MISCELLANEOUS.—Galls: Flat, and generally rather lower; 48 cases China sold at auction at 62s. 6d. per cwt. for good, and 37 cases Japan at 53s. to 53s. 6d. Musk: Dearer; 25 caddies Tonquin sold at auction at 29s. to 34s. per oz. for good to fine, and 24s. to 24s. 6d. good pickings: of 8 tins grain, one sold at 44s. for middling. Rattans: Steady; 3,944 bundles Calcutta sold at auction at 4s. to 5s. per 100. Sapanwood: Of 15 tons Manila at auction, two-thirds sold at £10 per ton, being very full value, and 22 tons Cochin retired. Mother-o'-Pearl Shells: Firm; and 110 cases Singapore at auction sold at £7. 5s. to £7. 10s. per cwt. for good; and of 145 cases Manila, half sold at £5. 7s. 6d.; similar prices realised privately. Soy: Sales to some extent made at the lower quotation of 3s. 6d. per gallon. Star Anniseeds: Very scarce, and much wanted; £7. 10s. per cwt. demanded. Sticklac (Siam): Remains flat; 108 cases at auction all retired. Tortoise-shell: Auctions limited to 3 whests Sydney, sold at 11s. per lb. for pickings, and 4s. to 5s. hoof; and 2 cases Mauritius sold at 14s. per lb. for good; 17s. to 19s. fine hoof. Vermilion: Steady, with moderate business at 2s. 4d. to 2s. 6d.; 20 boxes at auction retired.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7. 10s. to £7. 15s.; nail rod, £8. 10s. to £9; hoops, £9. 15s. to £10. 5s; sheets, single, £10. 10s. to £11; Staffordshire bars, £8. 15s. to £9; rails, £7.

STEEL.—Swedish keg, £15.

COPPER.—Sheet and Sheathing, £94 to £95 per ton; yellow metal, 7¾d. to 8d. per lb.

TIN.—97s. for block; 98s. for bar. Tin plates, best charcoal, I.C. 28s. to 29s. 6d.

FRANZ AND ELISE, Batavia to Amsterdam, April 1, 10 S., 13 W.

FREIGHTS AND CHARTERS.

Notwithstanding the large amount of tonnage now offering at London for the different ports in China, the improvement in outward freights, noticed in our last impression, has been well supported. Homewards, a few inquiries have been made for ships from Manila, Java, and Colombo, and in some instances business has been done. Coal freights continue firm, rates being slightly in excess of our last quotations.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. 6d. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 35s. weight or measurement. To Bankok: 60s. weight or measurement. To Ceylon: 40s. weight, 25s. measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £35 to £36 and 31s. to 32s. For Shanghai: £41 and £1. 17s. 6d. For Manila: £1. 12s. 6d. For Batavia: £23. For Singapore: £25 and £1. 3s. For Galle: £27 and £1. 5s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty having invited tenders for the conveyance of 128 tons naval stores, including a few combustibles, from the River Thames to Hong Kong.

CASUALTIES.

The Grootmeester Nationaal, Giese, from Rotterdam for Batavia, put into Dartmouth, May 17, with loss of bulwarks, stanchions, rigging, &c., having been in collision the previous night off the Start.

The City of Quebec, from London for Shanghai, put into Table Bay, April 1, for repairs, having been in collision in lat. 35 S., lon. 11 E., with the Glencoe (ship) bound from the Clyde to Shanghai. The City of Quebec is reported to have sustained considerable damage. (Another account states that the City of Quebec had received damage to her foremast, bowsprit, &c., and that the collision took place three weeks previously.)

On the evening of May 17 a fire broke out on board the Tanjore (ship), of Nantes, Dufourneau, loading at Marseilles for China. It was however quickly extinguished, but not until the cargo (coal and spirits) as well as the vessel, had received very considerable damage.

MISCELLANEOUS.

AT ST. HELENA.—March 29, from Singapore, Maury, Harms, and sailed, 30, for London; 30, from Banjoewangie, Constantia, Overgaauw, and sailed, April 1, for Rotterdam; 31, from Singapore, Zizine, Priest, and sailed, April 1, for Montreal; April 14, from Sarawak, Moldavian, Ward, and sailed, 15, for London; 20, from Penang, Avalanche, Stott, and sailed, 22, for London; 21, from Colombo, Ethereal, Anderson, and sailed, 22, for London; 23, from Batavia, Zeenimph, Roggen, from Sourabaya, Cossipore, Halbert; 24, from Foo-chow-Foo, Laurel, Moodie, and sailed for London.

CHARTERED MERCANTILE BANK OF INDIA, LONDON, AND CHINA.

(INCORPORATED BY ROYAL CHARTER.)

SEVENTH ANNUAL REPORT OF THE COURT OF DIRECTORS TO THE SHAREHOLDERS.

The Directors have the pleasure of presenting to the Shareholders the Audited Balance-sheet and Profit and Loss Account of the Bank, for the year ended 31st December last.

After providing for all bad and doubtful debts, and defraying expense of management at all points, the net profit amounts to £126,082. 1s. 1d., to which has to be added a sum of £75,831. 11s. 2d. undivided profit brought forward from the preceding year, making a total of £201,913. 12s. 3d.

Out of the above total £136,153. 5s. has been paid in two half-yearly dividends, making together 20 per cent. on the paid-up capital of the bank. The unappropriated balance of £65,760. 7s. 3d. is carried forward to the profit and loss account of the current year.

The last instalment of £12. 10s. per share, due 2nd January last, upon the ten thousand new shares issued 1st December, 1863, has been paid.

The Newera Ellia and Tuticorin Agencies have been closed, the results not answering expectations, and for a similar reason the Mauritius Branch will be closed at the end of the current year.

The Director retiring from the board in rotation is Sir Frederick James Halliday, K.C.B., who, being eligible, offers himself for re-election, and the Court recommend him accordingly.

Mr. George Palmer Robinson and Mr. Thomas Stenhouse having resigned their seats in the direction of the bank, the shareholders will have to elect two new directors.

Mr. James Murray Robertson, one of the auditors, and Mr. Ellis James Gilman, of the firm of Messrs. Ashton and Co., London, offer themselves as candidates for the vacant seats, and the Court have much satisfaction in recommending them to the shareholders for election; an adjourned General Meeting will be held for the purpose.

The Court recommend an increased allowance being made to the Chairman, and a resolution in terms of clause 113 of the Deed of Settlement will be brought forward accordingly.

The shareholders will have to appoint auditors for the current year. Mr. James Joseph Mackenzie, late of the firm of Messrs. Dent and Co., China, having consented to act, the Directors recommend him to you for appointment in conjunction with the present auditor, Mr. J. Smith, Mr. James Murray Robertson retiring, in consequence of his being a candidate for one of the vacancies in the direction.

52, Threadneedle-street, 27th April, 1865.

GEO. G. NICOL, Chairman.

THIRD REPORT of the Directors, presented to the Shareholders at the ANNUAL MEETING held at the LONDON TAVERN on the 15th May, 1865.

The Directors beg to submit to the shareholders a general statement of the affairs of the company for the year ending 31st December, 1864.

The net profits of the year, after defraying all expenses and providing for losses, amount to £15,893. 12s. 11d., including a balance of £827. 11s. 1d. brought forward from the accounts of the previous year, out of which the sum of £14,746. 5s. has already been paid as an interim dividend on the 20th August last, leaving a balance of £1,147. 7s. 11d., which it is proposed to carry forward.

The Directors have to express their regret that the operations of this company during the past year have not exhibited a more profitable result; but taking into consideration the comparatively recent formation of the bank, and the gradual extension of the branches abroad, the peculiarly disorganised condition of commercial affairs in the latter part or the year 1864, and the existence of a state of things specially calculated to embarrass the successful working of the branches, it must be a source of satisfaction that the transactions of the year have resulted in a profit, that a solid footing has been acquired by the bank, and its business and connections further extended.

The causes which acted prejudicially to the welfare of the bank were of a peculiar and exceptional character. They have now ceased to exist. The operations of the present year have shown decided progress and satisfactory results, and it is therefore evident that the temporary interruption to the successful operations of the bank was caused by circumstances which were beyond the control of the Directors.

The meeting which confirmed the amalgamation with the Imperial Bank of China, India, and Japan (Limited) took place on the 12th of September last, and on and after the 12th October the names of the shareholders in that institution (with the exception of those who expressed their dissent within the specified time) were transferred to the register of shareholders of this bank.

The number of shares unallotted in the Imperial Bank of China, India, and Japan (Limited) was 1,310, and the number of shares refused by shareholders in that bank expressing dissent was 58. Thus, of the 20,000 shares of the new issue by this bank 1,368 may be considered as unallotted.

The total amount of capital in this bank on the 31st December, 1864, was £586,237, and on the 29th ult., it amounted to £720,444.

The Directors have the pleasure to report that, notwithstanding a variety of adverse circumstances, the calls have, on the whole, been remarkably well met.

The reserve fund of the bank amounts at present to £92,900.

In July last the Colombo Branch, with its sub-branches at Kandy and Point de Galle, were opened. The progress of these establishments, although extending over a period of scarcely six months, is satisfactory. The Directors have also to announce that in February last a branch was opened at Yokohama.

The Directors have with regret to report that a vacancy occurred in the board during the past year, by the death of Mr. J. H. R. de Castro; and, acting in accordance with the powers conferred upon them by the articles, of association, they have elected Mr. Sassoon David Sassoon to fill the vacant seat, which election they have no doubt will meet with the approval of the shareholders.

The Directors who retire by rotation are—James Nugent Daniell, Esq. Deane J. Hoare, Esq., and Henry Young, Esq., who, being eligible, offer themselves for re-election; and the auditors, James Goodson, Esq., and Frederick Wm. Spooner, Esq., also retire, and, being likewise eligible, they offer themselves for re-election.

J. N. DANIELL, Chairman.

THE BANK OF HINDUSTAN, CHINA, AND JAPAN (LIMITED).

Balance-Sheet, December 31, 1864.

We have examined the books and vouchers at the head office, and the various accounts transmitted from the branches, and certify to the correctness of the foregoing statements compiled therefrom.
May 11th, 1865.
JAMES GOODSON, } Auditors.
F. W. SPOONER, }

The Secretary having read the advertisement convening the meeting the seal of the company was affixed to the registrar of transfers.

The report was taken as read.

The following resolutions were moved, seconded, and carried unanimously:—

1. That the report and statement of accounts of the directors be received and adopted.
2. That James Nugent Daniell, Esq., and Henry Young, Esq., be re-elected directors, and
3. That Mr. Sassoon David Sassoon's appointment by the board be confirmed.
4. That Frederick Maynard, Esq., and Frederick William Spooner, Esq., be elected auditors.
5. That the thanks of the meeting be given to the chairman for his able conduct in the chair.
6. That the thanks of the meeting be given to the general manager.

Extracted from the minutes.

(Signed) J. N. DANIELL, Chairman.
R. SWIRE TOMLIN, Secretary.

The Assam Company, the first established for the cultivation of tea in India, being desirous of concentrating and confining their operations to the southern division of Upper Assam, and thus centralizing the management of their extensive properties, have determined on selling to the Northern Assam Tea Company (Limited), whose estates are contiguous, the whole of the northern and eastern division of their property in Assam, instead of adopting the alternative of promoting a new company to carry them on, or placing them under separate management.

The present extension of capital, therefore, is for the purpose of purchasing direct from the Assam Company the whole of their out-lying estates in the neighbourhood of the Tingrie and Dehing rivers in Upper Assam, forming their northern and eastern division, and consisting of the following gardens:—

The Tingrie Mookh, Hoogrie Jaun, Kehung, Naholia, Cato, Tippum, Hookan Joorie, Towrock.

These comprise some of the fine old indigenous gardens, respecting which so much has been written, and which only require opening out to ensure their profitable extension. They are at present producing the finest tea and tea seed in Assam—the latter in sufficient quantity to enable the purchasers to plant out any extent of new land without further cost on this head.

The area at present under cultivation is about 1,000 acres, of which over 500 are in full bearing. The gardens are surrounded by lands, for which grants have been obtained to the extent of 10,000 acres, all of which is very superior and suitable for the growth of tea.

The Assam Company's right to the whole of this property, together with all buildings, plant, implements, tools, boats, and live stock, will be handed over to the Northern Assam Tea Company for the sum of £100,000, to be paid as follows:

8th June.	1865	£30,000
15th July,	,,	20,000
15th August,	,,	20,000
15th November,	,,	30,000
		£100,000

The crop of tea of this season, and any further grants of land that the superintendent or agents of the Assam Company may have acquired up to the date of completion of this sale, together with all cultivation commenced during the current season, commencing November 1, 1864, has also been contracted to be transferred to this Company, on payment of the sums actually disbursed since that date.

No commissions or promotion money have been paid or allowed.

In the allotment of shares a preference will be given to shareholders in the Northern Assam Tea Company and the Assam Company.

The Assam Company in 1863 disposed of their outlying estates in the district of Cachar, for the purchase of which a Company was formed in Calcutta, called "The Central Cachar Company," the shares of which Company are readily saleable at 25 per cent. premium. Those of the Assam Company are at above 150 per cent. premium.

The success of tea growing in Assam is now thoroughly established. Indian teas are rapidly increasing in favour and value, owing to their great strength and pungency. Further it may be stated, that the recent reduction of the duty has already caused a considerable advance in prices here, and the supply is still inadequate to the demand.

In reference to the quality and capabilities of the lands proposed to be purchased, the following extracts are taken from the last reports.

The resident secretary in India of the Assam Company, in his report on the property contracted for, says:—

'The lands in this part of the province are the finest for tea cultivation in Assam. The soil is not only the very best, but the forests contain the most splendid timber, inexhaustible in extent, which is not the case is the southern division. It needs no foresight to predict that the property the Company holds in this part of the country, may be made within the next ten years equal, if not superior, to that which they will be in possession of at that time in the southern division.

The following are also extracts from a report made to the directors of the Assam Company by their chief superintendent in January last, when he visited the property:—

"That the land is first rate, there is no question or doubt, but to effect such an object (that is, work it to full advantage) it must be divided into a distinct field, and the management given to the person residing on the spot.

"I have now got the Deputy Commissioner to accept three applications near Tingrie, for probably an area of about 7,000 acres, including the land between Tingrie, Hoogrie Jaun, and Kehung, along the banks of the Tingrie river; and this, with what we have already secured in other quarters between the Dehing and the Tingrie, will bring the Company's holding up to at least 10 or 12,000 acres; and I would recommend the extending in this quarter for the reason that the land is very superior, and the position likely to be much more healthy than any other portion of the Northern and Eastern division.

"The present gardens, if worked up to their capabilities, would yield 2,000 maunds of tea.

"The plants in the nurseries, which were put down last year for the purpose of planting out, have come up very well, some of them eighteen inches and others two feet high."

The estates have been frequently visited by the managing Director of the Northern Assam Tea Company during the last thirteen years, and as lately as March last. He fully confirms the favourable views above expressed, and is of opinion that, with comparatively small outlay, the indigenous plants alone can be worked up to an annual yield of 4,000 to 5,000 chests of tea.

Since the contract for the purchase has been concluded, the Assam Company have received from their managing director in India, and from a large shareholder in both Companies now visiting Assam, valuations of the property greatly in excess of the price agreed to be paid.

On the above grounds, therefore, the acquisition of these estates will render the Northern Assam Tea Company one of the most influential and profitable in India.

Applications for shares to be made by holders of A shares on or before Wednesday, the 31st May, and by the general public on or before the 3rd of June proximo.

London, May 23, 1865.

OFFICES—17 and 18, Cornhill London.

THE CREDIT FONCIER and MOBILIER of ENGLAND (Limited).

ISSUE OF DEBENTURES WITH INTEREST PAYABLE QUARTERLY.

The Directors have decided to issue Debenture Bonds of the Company for the amounts, and bearing interest as under, viz.:—

In sums of £10, £20, £50, £100, £250, £500, and £1,000, with Coupons attached.

INTEREST.

For 3 years ... ... 6 per cent. per annum.
For 5 years ... ... 6½ ,, ,,
For 7 years ... ... 7 ,, ,,

Interest payable quarterly, viz., on the 30th March, 30th June 30th September, and 30th December in each year, payable at the Company's Bankers.

The first payment will be made on the 30th June next. It will be seen that the Directors, with a view to afford the means of investing smaller amounts in securities of this description than is ordinarily obtainable have decided to issue Debenture Bonds in sums of £10, £20, and £50, on the same terms as those for larger amounts.

Forms of application can be obtained of the Secretary, to whom all communications must be addressed.

By order of the Court,
ALFRED LOWE, Secretary.

London, 17 and 18 Cornhill, May 4, 1865.

THE CREDIT FONCIER and MOBILIER of ENGLAND (Limited).

RATES FOR MONEY ON DEPOSIT.

This Company receives Money on Deposit in sums of £10 and upwards on the following terms until further notice, viz.:—

At 14 days' notice ... ... 4½ per cent. per annum.
For fixed periods of
Not less than two months ... 5½ per cent. per annum.
Beyond two and up to four months 5½ per cent. per annum.
Beyond four and up to six months 5½ per cent. per annum.
Any period beyond six months 6 per cent. per annum.

Forms can be obtained of the Secretary, to whom all communications must be addressed.—By order of the Court.

ALFRED LOWE, Secretary.

London, 17 and 18, Cornhill, 4th May, 1865.

THE CREDIT FONCIER AND MOBILIER OF ENGLAND (Limited).

At a MEETING of the SHAREHOLDERS of this Company, held on THURSDAY, April 20, 1865, at One o'clock P.M., the Right Honourable JAMES STUART WORTLEY, Governor, in the Chair,

It was proposed, seconded, and carried unanimously—"That the Balance-sheet and Report be and are hereby approved, confirmed, and adopted."

It was also proposed, seconded, and carried unanimously,—

"That the best thanks of this meeting are due, and are hereby given, to the Governor, Deputy-Governors, and Directors, for the care and attention they have given to the interests of the shareholders, and for the extremely satisfactory results which have arisen therefrom."

It was also proposed, seconded, and carried unanimously,—

"That the cordial thanks of this Meeting are due and are hereby offered to Albert Grant, Esq., the Managing Director, for the talent and untiring energy displayed by him in the administration of the affairs of the company."

It was further proposed, seconded, and carried unanimously,—

"That the thanks of this Meeting be given to Alfred Lowe, Esq., Secretary, for his unvarying courtesy and attention, and to him and the other Officers of the Company, for their industry and zeal during the past half-year." By order of the Court of Directors,

J. STUART WORTLEY, Governor.
ALFRED LOWE, Secretary.

17 and 18, Cornhill, London,
April 20, 1865.

Copies of the Balance-sheet and Report may be had on application at the Offices.

TUCKER AND SON'S

IMPROVED

ENAMELLED PUNKAH TABLE LAMPS.

THE celebrity which TUCKER AND SON'S LAMPS have acquired in the East for burning *steadily* under the Punkah or in side draughts, and *brilliantly* with any of the *coarse native oils*, renders eulogy unnecessary; but having been enabled, by increased facilities of manufacture, very considerably to *reduce the prices* of the above favourite (but hitherto expensive) description of their lamps, . and Son beg to notify the fact to the Eastern public.

They are elegant and durable, are finished in exact imitation of many beautiful stones and marbles, such as Malachite, Lapis Lazuli, Serpentine, Sienna, Brocatella, Jasper, &c., and are not affected by heat, damp, friction, or insects; oil, spirits, or acids accidentally spilled. The enamel surface is so inseparable from the base (block slate, proverbial for its strength) that it cannot be removed except by an edged tool. It *requires* simply *dusting*, but if rubbed hard, it only adds a gloss to its appearance—at all times cool and agreeable.

After ten years' constant use and handling, these lamps are none the worse for wear.

Malachite (green), Serpentine (brown), or Lapis Lazuli (blue), are most re commended.

Table Lamp complete, with engraved glasses, as sketch, 72s.

A Plainer Lamp, without the Corinthian capital, 50s. complete.

Either pattern, with plain frosted glasses, 7s. 6d. each less.

*** *The above Lamps are supplied to burn Petroleum or Rock Oil also.*

Orders can be sent through any merchant or Agent, or, if accompanied y a remittance, direct to

EUGENE RIMMEL,

Perfumer by Appointment to Their Majesties the Emperor of the French, the Queen of Spain, and the King of Portugal, and to H.R.H. the Princess of Wales.

96, STRAND. 24, CORNHILL

NEW WEST END BRANCH 128, REGENT-STREET, LONDON.

BOYVEAU LAFFECTEUR'S ROB.

The only one authorised and adopted in France, Belgium, Austria and Russia.

THIS Vegetable Syrup, prepared and guaranteed genuine by the signature of Dr. GIRAUDEAU DE ST. GERVAIS, is very superior to the purifying syrups. It effects a radical cure, without mercury, in all affections of the skin, scurf, scrofula, &c., and symptoms arising from the acrid state of the humours. The Rob is especially valuable in diseases which have resisted the effect of mercury or iodide of potash. The general entrepot of 12, RUE RICHER, PARIS.

Sold Retail.—London: Jozeau, Hannay. New York: Fougera, Gaudelet, Milhau. Gibraltar: Patron and Danilowich. Malta: Dr. Pirotti, Bugeja, Magri, and Rolando, Esperanza. Alexandria: Bellamore, Galette, Perinie, Bombay; Framjee Nesserwanjee and Co. Singapore: Martin and Little, Batavia: L. Platon and Co. Macao J. D. Freita.

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SEYMER'S BOTTLE PACKINGS AND COOLERS

Price 7½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C. Sole Manufacturer.

COWASJEE DINSHAW,

Close to the Landing Place. Depot of

EUROPEAN, CHINA, AND INDIAN WORK.

WINE, BEER, CHAMPAGNE, and SPIRITS of the best quality. Bombay-made Soda Water and Lemonade. Perfumery, Confectionery, Oilman's Stores, and Stationery of every description. Sola Topees and Canvas Shoes, &c., &c., &c.

STEAMER POINT, ADEN.

Drawing and Reading-room free to Passengers.

THE "LONDON AND CHINA EXPRESS" ON SALE

UMBRELLAS and SUNSHADES suitable for all Foreign Markets and the Colonies are supplied to Shippers on the most favourable terms by JOHN MORLAND and SONS, Wholesale Manufacturers 50, Eastcheap, London-bridge, City. Silk, Alpaca, Gingham Steel Frames, Canes, Fittings and all kinds of Material for the Trade. Oiled and japanned silks and cambrics.

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, 12, THREE KING-COURT, LOMBARD-STREET, LONDON, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Toilet Vinegar, Inexhaustible Salts, Aromatic Vinegar, Aromatic Eau de Cologne.

JOHN GOSNELL and Co.'s Prince of Wales Perfume.

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

JOHN GOSNELL and Co.'s La Noblesse Perfume.
JOHN GOSNELL and Co.'s La Noblesse Pomade.
JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty, and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S OINTMENT and PILLS.—INSTANT RELIEF.—Sores which are daily extending, ulcers which are hourly deepening, may be arrested in their torturing progress and induced to take a healthy action by applying this healing Ointment and taking these purifying Pills. It soothes all distempers of, and extracts all purbid humours from, the skin—old ulcers of the legs, inflammation caused by varicose veins and cramp of the lower limbs can sensibly be eased and shortly cured by Holloway's never-failing Ointment, which represses excessive, and stimulates sluggish, vascular and nervous action. In constitutions breaking down under piles, fistulas, and other similar painful maladies, a few applications of this cooling Ointment will give comfort, and a persistence in its use will effect a cure.

List of Passengers.

PASSENGERS OUTWARD.

Per P. and O. steamer Ellora, from Southampton June 4.—To Shanghai: One second-class passenger. To Hong Kong: Messrs. E. G. Coar, G. M. Smith, A. Smith, and I. Hardie, and one second-class passenger. To Singapore: Mr. J. Rigg and two second-class passengers. To Calcutta: Capt. A. Fergusson, Mrs. Wilson and infant, Messrs. John Saunders, B. W. Blood, R. Blood, and thirteen second-class passengers. To Madras: Mr. and Mrs. H. W. Bird, Mr. Rendle, Mr. and Mrs. J. Roberts, five second-class passengers, and three children. To Ceylon: Mr. Pinchard, two Misses Dodsworth, and six second-class passengers. To Aden: Capt. and Mrs. Valentine. To Suez: Five second-class passengers. To Alexandria: Thirteen second-class passengers. From Marseilles, June 12.—To Shanghai: Mr. Wm. Hargreaves. To Hong Kong: Messrs. C. Arnemann, Scheidt, H. Grauert, and A. Stewart. To Calcutta: Messrs. F. D. Brooks, H. M. Aitken, and Thos. Riseley, Mr. and Mrs. F. Sheppard, Capt. J. Watson, Lieut. and Mrs. Ricketts, Mr. and Mrs. Cable. To Ceylon: Dr. and Mrs. Charsley, Mr. and Mrs. C. A. Morris, Mrs. Freckleton, Mr. Dawes. From Suez.—To Hong Kong: Mr. Julius Peltzer and one second-class passenger.

Per P. and O. steamer Poonah, from Southampton, June 20.—To Hong Kong: Asst.-surgeons A. W. Whitley, R.N., J. A. Gawen, R.N., and E. Hudson, R.N., Mr. C. Cumming, Mrs. Gannett and daughter. To Singapore: Miss Rough. To Ceylon: Mr. and Mrs. Gow, Mr. W. M. Gow, Mr. A. T. Johnston. From Marseilles, June 28.—To Hong Kong: Mr. and Mrs. C. Bradley. To Singapore: Mr. John Ross.

Per P. and O. steamer, from Southampton, July 4.—To Ceylon: Mr. W. Syme. To Singapore: Mr. Skinner.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

We have received no newspapers by this mail. The steamer *Union* arrived at Shanghai on the 10th April, having left Yokohama on the 3rd, only two days later than our last advices. There had been several arrivals at Shanghai, from Nagasaki, the last, a barque, having left that port on the 14th April. As we find nothing relating to Japan in the Shanghai papers, but the following little bit, it is but fair to conclude that the arrivals referred to brought no intelligence worth reprinting.

At one of the last meetings of the Gorogio, it was decided that the treaties made with foreign Powers should be henceforth laws of the empire, and that the States which have not as yet entered into treaty relations shall be informed that the Japanese Government is willing to open negotiations to that end, provided they are willing to respond to this overture. This decision was adopted in consequence of the representations of Daimio Sakkai-Hidano-Kami, who demonstrated to the members of the Council the advisability of admitting as a principle that all foreigners should be admitted to trade; that, in the interests of Japanese commerce, the greatest possible number of nations should have access to the ports. The same Daimio, who is indentified with the party of progress, has determined that Yedo, the residence of the Tycoon, shall be connected by electric telegraph with Miako, the residence of the Spiritual Sovereign, so as to maintain a continual and instantaneous relation between them, and the prompt dispatch of all joint affairs.

NAGASAKI.

Messrs. Glover and Co. have imported a small locomotive carriage, which they run up and down the bund occasionally, to the intense delight and astonishment of the Japanese. The officials take especial pleasure in crowding into it, and finding themselves whisked from one end of the settlement to the other in four or five minutes.

CHINA.

PEKING.

The following is a sketch of the result of the Spring Races held at Peking on the 25th March. Our correspondent gives us no particulars as to the weather at the time, or as to the congregation of youth, beauty and fashion (foreign and native) which no doubt assembled on the race-course.

1. PEKING DERBY.—Mr. Butzoff's Molodetz, 1; Mr. Glinka's Hapoon, 2.
2. KAMBALU CUP.—Mr. Allen's Wildfire, 1; Mr. Honig's Sharik, 2.
3. WANGHALON STAKES.—Mr. Huber's Longue Haleine, 1; Mr. Honig's Sharik, 2.
4. SCRAMBLE.—Mr. Cartwright's Fei-yun, 1; Mr. Bowra's Wu-ta-tang, 2.
5. CONSOLATION.—Mr. Olarowsky's Tim Whiffler.

On the 8th and 9th March his Imperial Majesty held a general review of the Tartar Life Guards. The avenues through the Imperial city at Peking were for the time closed against foreigners. Prizes were awarded to such of the soldiers as distinguished themselves in the national exercises of archery (horse and foot), wrestling, swordsmanship, &c., but no list of successful candidates has as yet been published.

SHANGHAI.

The P. and O. mail of the 27th February arrived out on the 15th April. The dates are now down to the 20th. The items of news are very scanty. A somewhat better feeling in mercantile matters prevailed, but only to be succeeded, it was feared, by despondency, as the accounts arrived from this side. The British Consular Court pronounced judgment in the case of the *Fire Dart v. The Emperor*. The decision was in favour of the defendants with costs. The Court held that the master of the *Fire Dart* was in fault in porting his helm to avoid the *Emperor*, and that he should subsequently have stopped and reversed his engines, which he omitted to do. An appeal will, of course, be laid before the Supreme Court of Hong Kong.

The Fychow giant has positively left in the *Vanguard* for London, accompanied by a dwarf of only two feet high.

Digitized by Google

A dividend of 25 per cent. has been paid on the estate of Alexander Cock.

The following gentlemen have declined to serve on the Municipal Council:—Messrs. W. Keswick, E. F. Duncanson, R. R. Westall, H. S. Grew, W. S. Wetmore, R. Jarvie, T. Hanbury, and L. G. Dunlop. Messrs. Hogg and Probst have also been asked whether they would allow themselves to be placed in nomination; no reply has been received from the former, and the latter, whilst accepting the nomination, expresses inability to attend the board meetings regularly. We understand that none of the retiring Council offer themselves for re-election.

The Times' correspondent writes, under date 19th April:—The opportune departure of the French mail this afternoon enables me to transmit at once the intelligence, which arrived this morning from Peking, of the disgrace of Prince Kung. I hope to be able to send you by the English mail, which will leave four days later, a translation of the edict conveying the sentence. General arrogance, cupidity, and favouritism are indicated as the principal grounds of this important step. The Empress Dowager and the Prince have long been opponents, and it is to her principally that the disgrace which has overtaken him is believed to be attributable. His Highness appears to have counted too far on the security of his position, and to have omitted to pay to the Emperor the respect to which his rank entitles him, notwithstanding his tender years. At a recent review especially his behaviour is said to have been so arrogant towards both his Majesty and the Empress Dowager, that it brought the growing feud to a climax, and promoted the decree which has stripped the Prince of all his appointments and honours, and confined him a prisoner to his palace, to enable him to meditate on and repent his misconduct. Four of his brothers are appointed to fulfil in turn various ceremonial offices hitherto performed by the Prince; and Wen-siange, a mandarin, believed to be well-disposed towards foreigners, succeeds him in the Presidency of the Foreign Board; so it does not as yet appear that foreign interests are likely to be injuriously affected by the change.

AMOY.

The *China Mail* announces the news from Amoy as interesting. The Imperialists are gathering so steadily and closely around Changchow-foo that the Taiping insurgents there besieged are getting desperate. The last fight was on the occasion of a sally made by the rebels against the left wing of the besieging army, which was under Kaou's command. The latter officer was making very good practice with a couple of nine-pounder guns, and the Shi Wong determined to disable them.

For this purpose he came down personally and proceeded to view the firing off of certain shells prepared by an old assistant of Macartney's, named Mike. Shi had just received a wound from the explosion of a shell, and was in rather a dangerous mood. Rhody, it is reported, was taking orders from the Shi Wong, and attempting to silence the Imperialist 9-pounders. Owing, however, to imperfection either in the manufacture of the shells or the length of the fuse, little progress was made, some of the shells dropping at a few yards' distance and some exploding too soon. Exasperated at this and fretting from his wound, Shi had the heads of the two foreigners taken off at once by his own command.

The execution of the Irishmen, Mike and Rhody, will do more than the Queen's Orders in Council to prevent foreigners joining the rebels. We hear that Colonel Kirkman is at the head of the Imperialist army, and is much deferred to by the mandarins. We wish the colonel well; he is a good, modest soldier, and deserves more praise than we can give him. Such men are destined to be heard of in China yet.

HONG KONG.

The P. and O. mail of 10th March arrived out on the 22nd April. The dates are now down, by this mail (French), to the 26th. The P. and O. mail to follow was appointed to leave on the 29th April.

A rumour was circulated on the arrival of the mail steamer that Sir Hercules Robinson died suddenly on arrival at Colombo. We are happy to state that there is no truth in the report.

We hear that the Consuls at Canton are communicating with the Chinese authorities on the subject of the great decrease in the importation of foreign rice. It is astonishing to learn that since the Treaty of Tientsin was signed, the importation by foreign vessels has fallen from 850,000 piculs to 71,000 piculs; consequently rice has risen to the present high price. The cause of this decrease is, we think, owing to a stipulation in the present tariff rules, by which foreign vessels carrying a cargo of grain, although it be duty free, are rendered liable to the payment of tonnage dues. Now, before the Tientsin Treaty came into force, all foreign vessels going to Canton with a full cargo of rice and leaving in ballast, were exempt from tonnage dues; and a vessel bringing a part cargo of rice and part general cargo paid only half tonnage dues. If they took a full cargo out, then of course they paid full tonnage dues.

The following items are from the daily edition of the *China Mail*:—

"The new Union Chapel has been opened for public worship. As our readers are aware, the chapel is built on the site formerly occupied by the St. Andrew's School. The exterior of the building is very good and effective. The chapel is oblong, with a tower at the west end. The style of architecture partakes chiefly of the Norman school, the arches, mouldings, and decorations being after that mode. The difficulty of adapting this or any other style of church architecture to the requirements of a tropical climate has been quite surmounted in the present case. The interior of the chapel is light and airy, and the ornamentation very tasteful and appropriate. The pulpit is on one side of the building, and faces the north; opposite to it is a gallery for the choir; at either end is a gallery fitted with three rows of pews; the pews in the area of the church are spacious and comfortable. The whole arrangements are of such a nature that we may sincerely congratulate the congregation upon the very fine edifice they have obtained. Mr. John Studd, of the Royal Engineers' Department, drew the plans and superintended the work, which reflects decided credit on his ability and taste as an architect. It cannot but be gratifying to the Rev. Dr. Legge to see this new chapel completed so far, and opened free from debt. The tower will soon be finished, and it is to be hoped that the committee will be able to furnish it with a small peal of bells, for which provision has been made in the interior structure."

The two companies of the Hong Kong Volunteer Corps marched out to Pokfolum, starting from Government House at about 8 a.m. The morning was warm with a good breeze when the corps set out, headed by the band, the Artillery leading and the Rifles bringing up the rear. On reaching Pokfolum the corps halted at Mr. Nissen's bungalow, where breakfast, &c., was provided. After breakfast, twenty rounds of ammunition were served out, and rifle practice at 300 yards commenced. The firing was good, and again in favour of the Rifle Company. After tiffin (during which the band played several airs in capital style) the Volunteers amused themselves in various ways, as is their wont on such occasions; and when the afternoon began to cool, a bathing parade was ordered to the pool of fresh water in the adjacent ravine. Two or three photographic views of the corps, grouped in front of the bungalow, were taken, and they came out well. The march home commenced shortly after five, and the head-quarters were reached before seven. The whole line of march, from near the Sailors' Home to Icehouse-lane, was crowded with Chinamen, who seemed to take a lively interest in the re-appearance of the Volunteer Corps, which seems decidedly in favour among the native population; a fact that promises well for the influence of the corps, should there at any time be a disturbance of the peace which it was desired to allay without going to extremities. The officers, non-commissioned officers, and privates, are all known, more or less, to the respectable part of the native community, and as they are not paid for preserving order but give their services for mere goodwill, it is natural that great respect should be shown to them when they appear as peace-makers. There are plenty of ruffians in Hong Kong; and should they ever coalesce for mischief on a large scale, the Volunteers would very soon give an account of them.

The *Pootung* case has had much attention, but there appears to be so much scandal on the subject that we refrain from noticing it.

The P. and O. steamer *Benares*, in leaving the harbour on the 15th April, got aground opposite the Harbour-master's office, but got off and proceeded the next morning.

A private of the Royal Engineers committed suicide by suspending himself. He was formerly a lance-corporal, but had been reduced and sent to confinement for some misbehaviour.

Seventeen piratical Chinese, brought to Hong Kong by the

Digitized by Google

gunboat that went in search of the *Georg Andreas* pirates, were handed over to the Canton authorities. They were taken, we may say, red-handed, in the act of plundering a junk recently captured. When brought to Hong Kong, it became a question whether an indictment against them would stand good, as the crime occurred in the inland navigation of China rather than upon the high seas. There being no doubt of their guilt, however, it was a serious consideration that such men should have the slightest chance of escaping the punishment due to their crimes; and the Acting Governor, on the matter being represented to him, and on persual of the depositions taken at the Police Magistrate's Court, wisely resolved to send the men to Canton, with a copy of the charges against them and the evidence in support thereof. When they first learned that they were to be sent to Canton, several of them said "Then we'll surely die." The captain is believed to be among the number, and he offered liberal cumshaws to be allowed to remain within our jurisdiction, the air of Canton not agreeing with his constitution. We are sure that such a step as this on the part of Mr. Mercer was dictated by a deep regard for justice, and a due respect for the best interests of this colony. We can only regret that in cases of piracy on the high seas, the same course is not pursued. Not only are we at the trouble and expense of apprehending pirates in these waters, but the whole machinery of our Supreme Court is kept in constant operation in trying the cases furnished by our activity in bringing such scoundrels to justice. It would be well if some arrangement were made by which the Chinese Government would do half the work. Article 53 of the Tientsin Treaty says:—"In consideration of the injury sustained by native and foreign commerce from the prevalence of piracy in the seas of China, the high contracting parties agree to concert measures for its suppression."

On the Baron de Meritens the *Daily Press* has the following:—

"The Baron de Meritens appears to be under neither control nor advise. He has, as we previously remarked, entirely stepped out of his sphere as Commissioner of Customs, and has assumed the entire direction of affairs. To say that he has clothed himself with the functions of the Emperor would be to understate the fact, for whilst every Emperor has a council, the Baron has none. To say that he has usurped the powers of a Commander-in-Chief would also be to describe his assumed functions very imperfectly; for who ever heard of a Commander-in-Chief being Commissioner of Customs and Minister of Foreign Affairs, as the Baron undoubtedly is? His assumption of authority is totally unauthorised and spontaneous. It must prove injurious to the customs establishments, and we think detrimental to Imperial interests. The incessant spasmodic interference prolongs that baneful idea in the minds of the Mandarins, that foreign intervention is always at hand to avert their downfall. Their salvation is in their own hands; if they choose to arouse themselves, to eschew apathy, corruption and fatalism, they could sweep the Taipings from the face of the earth in six months. They have the money and the means—there is no obstacle except Mandarin impracticability and obstructiveness. They can never learn this until left to their own resources, and until there is an end of this burlesque of foreign neutrality."

CANTON.

The Amateurs at Canton gave their sixth and last performance to subscribers on the evening of Tuesday, the 18th, when they were honoured by the presence of Admiral Sir A. L. Kuper, K.C.B., and staff. The pieces selected for the occasion were, "The Fearful Tragedy in Seven Dials," and "Sent to the Tower." The various characters were sustained with great spirit, and it would be difficult to judge to whom the palm should be awarded; suffice it to say the whole was very successful.

SIAM.

On the 17th April (reports the *Siam Times* of the 20th), Captain Aubaret, Consul for France, accompanied by the officers of the *Mitraille*, attended at the Palace of his Excellency, the Prime Minister, for the purpose of witnessing the anulling of the Siamese treaty with Cambodia. Also, for signing a supplementary article to the treaty between France and Siam respecting Cambodia. This article stipulates that the King of Cambodia *shall* no longer pay tribute to Siam, but *allows* him to make presents, if he so pleases. This article will have to be sent home to be ratified by the French Government. It absolves Cambodia altogether from any allegiance to Siam. The article which we copy from the *London and China Express** to-day is almost prophetic, though we have reason to believe that no treaty has yet been made by France, with the viceroy of Laos there is every reason to think that it will soon be made. These little bloodless conquests must be very gratifying to France, and as long as the parties most interested in checking them remain oblivious to their own interests, no one else has any right to complain. With reference to this Cambodian business we may remark that Consul Aubaret received his instructions by the *Chow Phya* prior to the arrival of the *Mitraille*. The Siamese authorities had yielded the point prior to her arrival. When it was known in Bangkok that she had arrived at the Bar, instructions were sent from the Foreign Office at Bangkok by express to Paknam, to permit her to pass up at once without dropping her anchor. There was no breach of etiquette committed. But as the Siam authorities took the initiative in civilities on this occasion, the *Mitraille* waited till she got to Bangkok to respond to them.

The *Siam Times* has also the following "leader" on the above:—

"The events of the week have been interesting, if not painfully so, to Siam. One of her dependencies has been wrested from her sway by the Consul of one western nation just at the very moment that her sovereign was granting his first audience and Exequatur to the Consul of another. All this, while the Consul of a third, more deeply interested in Siamese affairs than either of the other two, was enjoying himself on the seaboard, seemingly caring little for events, which, if apparently trivial at present, must have important consequences in the future. It might be even yet time, did the British Consul act, or did he sufficiently possess the confidence of the Siamese Government to induce them to request him to act, (their request giving weight to his remonstrance at home,) to have such influence brought to bear upon the French Cabinet as to prevent the ratification of the Supplementary Treaty which was concluded between H.I.M.'s Consul and the Siamese Government, on the 17th instant. But we fear the Siamese authorities are too proud to ask assistance from such a quarter, even were he willing and ready to afford it. Still, it does seem strange that the representative of one of the oldest allies of Siam should be absent at such a crisis. We wonder if Her Britannic Majesty's representative in China would be so apathetic were the French to make demands on the Peking Government similar to those they have made on that of Siam? We think not. However, it is not to us nor to any public opinion here, that officials must answer for omissions of duty. They are responsible solely to the Governments which send them here, and we have no doubt but that H.B.M.'s Consul will be quite prepared to account for his conduct to those who have a right to demand it."

On Monday, the 17th April, Mr. P. Lessler, the recently appointed Consul for Prussia and the German States, attended at the Royal Palace, for the purpose of receiving from His Majesty in person his exequatur as Consul. We are informed that His Majesty had ordered the reception to be of a most imposing character, as a mark of his esteem for and friendship with the Prussian nation. At the royal landing sedan chairs had been provided to convey the Consul and his friends to the palace, at the gates of which some pieces of ordnance had been placed. Inside the gates the troops were drawn up in line, and presented arms. The Royal Ushers then conducted the party to an ante-chamber, where they were furnished with refreshments, and after waiting five minutes they were ushered into the presence. His Majesty, seated on the throne, and surrounded by the princes and nobles, then called on Mr. Lessler to advance and receive his exequatur, which had been written by the Royal hand. The document having been presented with the usual compliments, the party adjourned to the dining saloon, where a most elegant repast had been provided, His Majesty joining the party, and wishing success to Prussia and her representative in Siam. The dinner over, the consul and party were escorted out with the same honour as at entering.

COCHIN CHINA.

SAIGON.

We learn from the *Courrier du Saigon* that Governor Rear-Admiral de la Girondier has left for France, where he has been summoned by the Minister of Marine and the Colonies. On

* "French Encroachments on Siam," in the *London and China Express* of Feb. 17, and the *London and China Telegraph* of Feb. 20.

Digitized by Google

leaving, the Admiral made over the government to Rear-Admiral Roze, Commander-in-Chief of the naval division in China and Japan. The definite refusal of the Treaty proposed by the Court of Hue has placed the French in Cochin China (remarks the *Courrier*) in a novel position. The work of conquest and the pacification of the country is finished. The uncertainty of its future, which at one time caused anxiety, disappears with the prospect of reconveyance, and limited occupation abolished by the rejection of the treaty; and the colony must now advance towards the destiny prepared for it by the recent decision of the Emperor. The moment has now arrived seriously to study the numerous questions that, under this new condition of things, present themselves, and to adopt in the first place, for the direction of affairs, a certain line of conduct, and to perfect the schemes of organisation which are at present only in outline. For this reason the minister has called Admiral Girondier to him, and as he seeks advice, whom could he consult with more profit than the honest man who with a calm and intelligent spirit has directed during two consecutive years, with moderation, firmness, and success, the affairs of the colony? But it is not only by his profound knowledge of the country that Admiral Girondier will be able to serve Cochin China fully in the Councils of the Emperor. He will also serve her by his sincere attachment to the colony. As he himself said, on leaving, to the Expeditionary Corps, "The Minister has called me in order to have near him a voice devoted to Cochin China." Until the return of the Governor, Admiral Roze will consider it his duty to continue the work begun. The principles that will guide him in the accomplishment of his taskhave been explained by himself in the proclamation which he published on the day he assumed his functions.

STRAITS OF MALACCA.

SINGAPORE.

Dates are to the 4th May. The English mail of the 27th March arrived on the morning of the 30th April.

Colonel Man, Resident Councillor at Penang, has been forced to come to Singapore for change of air, his health having been in a precarious state for some time past.

The feud between the Ghi Hok Kongsi on the one side, and the Ghi Hin Kongsi and Chinese Christians on the other, has at length been patched up. A treaty of peace has been signed and sealed by the elders of each society, and so, for a short time, perhaps, the streets of Singapore will be free of the disgraceful scenes that too frequently disturb them.

The Coroner has concluded by his inquiry into the cause of the death of Henry Sanders, boiler-maker, killed by the explosion on board the *Johore*, when Messrs. Binns and Cooke, engineers of H.M.S. *Rifleman* and *Perseus*, were examined. These gentlemen were of opinion that the boiler burst by over-pressure of steam, but how occasioned they could not say. They also considered that one engineer was not sufficient, even with European stokers, to manage the machinery and boilers, and that there should have been at least two engineers and one European, or skilled native stoker, for thesafety and proper working of the ship. The verdict of the jury was "Accidental Death," and they further recorded: "The jury are of opinion, from the evidence laid before them, that in all probability the explosion of the *Johore* might have been avoided had the ship been manned with the necessary staff of engineers usual on board ships of the same size."

A man named Samuel Smith has been committed for trial at the next Criminal Sessions, for stealing the gold watch and chain lost by Tunku Abdulrahman at the explosion of the *Johore*. Smith states he was in the Royal navy for several years as a seaman, and has two medals and several clasps. He did not attempt to deny the charge. It is believed the prisoner came to Singapore from Swan River, and is most likely a ticket-of-leave man. On the same day another European, named Edwards, who also professes to have been in the Royal navy, was committed to the House of Correction for obtaining a dollar by false pretences.

The races took place on the 25th and 27th of April. Mr. Ferguson's English horse Caledon, by Ellington out of Lady Vernon, a six-year-old, appears to be the crack of the Settlement, having won the Governor's Cup, the Foreigners' Cup the Singapore Cup, the Club Cup (walking over), and the Celestial Plate. Caledon gave his horses a stone or more. Mr. Duclos' Cape horse Mus was the victor for the Johore Plate, given by his Highness the Tumongong.

A thunderstorm burst over Singapore on the 28th April, with a copious downpour of rain, which proved most refreshing after the sultry weather experienced for the preceding four months.

Two Chinese were executed on the 29th April for the murder of one of their countrymen, committed while the late feud was raging between the two hostile sections of that community.

BIRTHS, MARRIAGES, DEATHS.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BAKER.—On the 23rd April, at Hong Kong, the wife of S. W. Baker, Esq., of a son.
GUIMARAENS—On the 28th May, at 10, Mecklenburgh-street, Mecklenburgh-square, the wife of M. F. Guimaraens, Esq., of a daughter.
HILL—On the 31st May, the wife of Albert Hill, Esq., of Tottenham, of a son.
MACTAGGART—On the 4th June, a Blackheath-park, the wife of William Mactaggart, Esq., of a son.
MURROW.—On Sunday, the 16th April, in Wyndham-street, Hong Kong, the wife of Y. J. Murrow, Esq., of a son.
PICKWOAD—On the 7th June, at 8, Great Cumberland-street, Hyde-park, the wife of Edwin Pickwoad, Esq., of a daughter.
RUTTER—On the 3rd June, at Glebelands, Mitcham, the wife of Isaac Campbell Rutter, Esq., of a daughter.
WILSON.—On the 19th April, at Hong Kong, the wife of Wilberforce Wilson, Esq., Acting Surveyor-General, of a daughter.

MARRIAGES.

ARTHUR—BRAE.—On the 18th April, at St. John's Cathedral, Hong Kong, by the Rev. J. J. Irwin, D.D., Colonial Chaplain, Edward Arthur, only son of E. R. Arthur, of North Shields, Northumberland, to Sarah Brae, of Beisoye Park, Hampstead, youngest daughter of the late Thomas Brae, of Jessore, India.
SMITH—ANDERSON.—On the 17th April, at Union Chapel, Hong Kong, by the Rev. Dr. Legge, T. W. Smith, Inspector of Water Works, to Miss Anderson.
STOPFORD—HORNBY.—On the 1st June, at Compton, Sussex, by the Rev. James John Hornby, Rear-Admiral Robert Fanshawe Stopford, to Lucy Hester, fourth daughter of Admiral Sir Phipps Hornby, G.C.B., of Littlegreen, Sussex.
TOWNEND—WOOD.—On the 29th May, at St. Mary's Church, Lewisham, by the Right Rev. the Lord Bishop of Brisbane, assisted by the Hon. and Rev. Henry Legge, vicar of Lewisham, Edward Townend, Esq., of Hankow, China, son of William Townend, Esq., of Blackheath, Kent, to Emily Sarah, youngest daughter of Henry Wood, Esq., of Brooklands, Lewisham, Kent. No cards.

DEATHS.

BURN—On the 5th April, at Malacca, of cholera, Christina, the only and beloved daugh ter and on the 11th idem, of diarrhœa, Edward, the only and beloved son, of Cap tain James Burn, Bengal Staff Corps, and Resident Councillor, Malacca.
DICKENSON.—On the 15th April, at Hong Kong, James Dickenson, Private, 2nd Battalion 9th Regiment, aged twenty-five years.
FENWICK—On the 25th Jan., of dysentery, on board the Monarchy, on his passage home, seven days after leaving Manila, Thomas Henry Fenwick, the dearly-loved son of Mrs. Fenwick, of Whitechapel-road, aged 28 years, having survived his only brother 18 months.
HASKELL.—On April 21st, at Canton, very suddenly, of cholera, Bessie, daughter of Francis H., and Elizabeth R. Haskell, aged five years and six months.
KELLY.—On the 18th April, at the Civil Hospital, Hong Kong, Edward J. Kelly, seaman.
MAGRATH—On the 9th April, on board H.M.S. Sovereign, in which he was returning home in charge of invalids, Ffolliott Charles Magrath, Esq., Assistant-Surgeon H.M.S. Hesper, Hong Kong, eldest son of the late C. K. Magrath, Esq., of Tralee.
VROOMAN.—On the 23rd of April, at Macao, by scalding, at the age of three-and-a-half years, Grace Elizabeth, eldest daughter of Rev. D. and Maria W. Vrooman, of the A.B.C.F. Mission, Canton.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divided into decimal parts of ten.

COMMERCIAL POSTSCRIPT.

A prospectus has been issued of the Blakely Ordinance Company, capital £750,000. Captain Blakely is to act as managing director, with his present staff, consisting of Mr. Vavasseur, C.E., as resident engineer; Mr. Campbell, late of the Royal Laboratory, Woolwich, as superintendent of Laboratory and Shell Factory; and Colonel Burnaby, of the Royal Artillery, as proofmaster. Mr. John Dent is one of the directors. The excellence of the gun and the demand for it in China and Japan are too well known to require any recommendation. It is the most healthy company that has appeared of late.

ARRIVALS NOT INCLUDED IN THE TABLES.—June 6, off Dungeness, from Java, Electra; May, at Montreal, from Singapore, Zizine; 24, from Shanghai, Prince of Wales; 7, off Scilly, from Penang, Avalanche; 8, at Liverpool, from China, Spes.

DEPARTURES.—June 4, from Rotterdam for Java, Joan; 9, from Liverpool for Yokohama, Brilliant.

SPOKEN.—Eliza Thornton, Lon. to Singapore, May 1, 13 (?) N., 21 W; Helen Douglas, Newport to Shanghai, April 29, 18 (?) N., 21 W.; Johanna Maria, Newport to Singapore, May 31, 49 N., 8 W.

AT ST. HELENA.—April 26, from Shanghai, Belle, and sailed 26 to London; 27, from Singapore, Indiaman, and sailed 29 for Liverpool; 28, from Shanghai, Constance, and sailed May 2 for Liverpool; from Sourabaya, Reflect, and sailed May 2 for Amsterdam; from Ceylon, City of Manchester, and sailed 29 for London; May 2, from Macao, Lochnagar, and sailed 3 for London; 3, from Hong Kong, Hindostan, and sailed 3 for Portsmouth; from Macao, Queen of England, and sailed 4 for Havana; 10, from Manila, Madura; from Macao, Light of the Age.

LAID ON: At Glasgow: For Singapore and Penang, Foam.

NEW K.C.B.s, &c.—The Queen has been graciously pleased to give orders for the appointment of Robert Gilmour Colquhoun, Esq., C.B., Her Majesty's Agent and Consul-General in Egypt, to be an Ordinary Member of the Civil Division of the Second Class, or Knights Commanders of the Most Hon. Order of the Bath; and of Surgeon-Major William Munro, M.D., 93rd Regiment, and Surgeon-Major Henry Bruges Buckle, 1st Punjaub Regiment of Infantry, to be Ordinary Members of the Military Division of the Third Class, or Companions of the said Most Hon. Order.

ROYAL GEOGRAPHICAL SOCIETY.—At the meeting on Monday next, at Burlington House, Sir R. I. Murchison, K.C.B., President, in the chair, the following papers will be read: 1. Journey to Wahabee Capital, Interior of Arabia, by Colonel Lewis Pelly. 2. On the Korea, by Captain Allen Young.

MR. R. C. WOODS, Jun., has been duly admitted as a Barrister at Grays Inn, and proceeds to Singapore by next mail.

MR. SUTHERLAND has been gazetted Member of the Legislative Council of Hong Kong.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, June 8.

Contrary to my supposition, the second Chamber of the States-General approved, by 47 against 25 votes, the important economical measure to abolish the Communal Excises, after having passed the new constitution for Surinam and Curacao. The tropical temperature now prevailing seems to induce the Members to pass the several Bills of the Government as quick as possible. In the first Chamber the four Medical Laws were voted in two sittings, in spite of the large number of petitioners. The International Sugar Convention was likewise approved with unanimity, and the Bill relative to the sugar duties confirmed by 16 against 12 votes. The First Chamber took a recess.

In a former letter I mentioned the rumour that the sugar-trade intended to protest against the sugar-laws by not buying the high numbers in the Government sugar auction. This manœuvre, however, has no results. The prices paid at auction for the white qualities were from 1 to 1½ florins higher than those paid in March last.

The Second Chamber has commenced the discussion on the Indian tariff. I told you before that this was a Bill founded upon the system of the *juste milien*, which caused the opposition to come from the Conservative as well as from the Liberal benches. The former were of opinion that the Bill was not protective enough to the manufacturer; while the others said the Bill was illiberal, because our manufacture was too much protected. The majority of the Second Chamber, however, supports the measure of the Minister of the Colonial Department. The amendments (both of the Radical and Conservative side) were rejected, so that the Bill will be voted by a large majority.

The King will start on the 1st of July for Lucerne; while Her Majesty will make a trip to England on the war-steamer *Cycloop*. There are some rumours in circulation that a marriage for the Prince of Orange will be the object of this visit; but I cannot warrant them, and prefer to wait till I have more information. Her Majesty will stay in London about three weeks.

Yesterday the University at Leyden commemorated an existence of 290 years by an historical masquerade, representing the entering of Zierikzee by the Dutch, in 1304, under the command of Younker William, Earl of Oostervant. A larger number of strangers was never seen in the town than was present at this quinquennial festival.

On the 25th another great festival will take place in the same town. The Government offers on that day a dinner to all the old soldiers of 1813-1815. More than 1,500 men have presented themselves. A silver cross will be conferred on these old veterans.

Messrs. Swaan and van Heyningen, the concessionaires for the construction of the harbour of Scheveningen, have contracted with a London financial corporation to furnish the capital wanted, and have laid their contract before the Minister of the Home Department.

I have to mention the death of J. B. J. Sutherland, General-Major of the East India Army, who died at Haarlem. He was one of the bravest officers of that army.

HOUSE OF COMMONS.

LIGHTHOUSE ON THE BASSES ROCKS, CEYLON.

(June 1st.) Mr. B. COCHRANE asked for an explanation of the extraordinary and extravagant expenditure on the lighthouse on the Basses Rocks, at Ceylon. He read an account of the sums voted year after year for several years, amounting to £80,000 or £90,000, for this lighthouse; yet there was no lighthouse at all on the rocks, and he wished to know what had become of the money.—Mr. MILNER GIBSON said attempts had been made to erect this lighthouse, but the great difficulties attending the undertaking had been underrated. In short, the money spent had been thrown away. A lightship had been moored off the reef, and would prove an economical substitute.

CHINA.

(2nd.) Colonel SYKES asked the Under-Secretary of State for Foreign Affairs whether information had been received of the dismissal of Prince Kung from his office of President of the Board of Foreign Affairs at Peking, and as to who had been appointed his successor; and whether official reports had been received from the diplomatic and consular authorities in China of the progress of the insurrection in several provinces as affecting the export and import trade of the country.—Mr. LAYARD could inform his hon. friend that Prince Kung had been appointed his own successor. The Government had received a telegram stating that he had been reinstated in all his offices and was again Prime Minister.

PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY.

The forty-ninth half-yearly meeting was held on the 1st of June, at the offices of the company in Leadenhall-street; ARTHUR ANDERSON, Esq., in the chair. The following report was read by Mr. C. W. HOWELL, the secretary:—

"The *Bengal*, which had been driven on shore at Calcutta by the cyclone, was dug out and floated on the 30th of December, and, as she had not received any injury to hull or machinery, she was able at once to resume her place on the Calcutta and Suez line. This, and other operations and repairs resulting from the cyclone, although attended with considerable expense, have not proved so costly as was at first anticipated. The *Mongolia* was launched on the 1st of March, and the *Tanjore* on the 13th of April, and due progress is being made with the other ship on the stocks—the *Surat*. The *China* has been brought to London to receive new engines and boilers and a thorough overhaul and refit. The *Nubia* is undergoing a complete repair at Bombay, and the *Granada* at Hong Kong. The steam-tug *Mazagon* has been sold at Bombay. Notice was given by the Postmaster-General, in December last, that it was the intention of the Government to terminate the existing contract for the Australian mail service on the date of its expiration—namely, the 12th of February, 1866; and in January last advertisements appeared inviting tenders for this service, to be sent in on the 10th of April. The directors accordingly submitted their terms for a new contract, embracing either a monthly service, a semi-monthly service, or a service under which, whether monthly or semi-monthly, the mails will be despatched on a fixed day of the week. The terms for a monthly service, carried on as at present, were £120,000 per annum; for a semi-monthly service, £170,000 per annum; and as the despatch of the mails on a fixed day of the week would involve the annual performance of thirteen instead of twelve voyages each way, it was stipulated that the subsidy should be increased by one-twelfth in the event of that system being adopted. A reply has been received since this report was in type accepting the company's terms generally, but on the understanding that, for the present, the service is to continue a monthly one, under the existing regulations as regards the dates of despatching the mails. In consequence of the desire expressed by the commercial communities both of this country and Western India for a more frequent postal communication to and from Bombay, and for the establishment of a fixed day of the week for the despatch of the mails, the directors have it in contemplation to make some additional trips with extra ships between Bombay and Suez during the next busy passenger season, commencing in October, with a view to ascertain the lowest terms on which they might be able to undertake a permanent weekly service with that place, should such a measure be decided upon by Her Majesty's Government. The company's operations since the termination of the last financial year, namely, September 30, 1864, have been considerably affected by the prevailing stagnation of business in India and China; and the falling off of silk freight homewards, coupled with the almost total cessation of specie shipments outwards, as compared with those of the two preceding years, will of necessity lead to a diminution in the balance of the revenue account at the end of the year. It should always be borne in mind by the shareholders that when adverse circumstances may temporarily reduce the commercial traffic by the company's steamers, the exigencies of the mail service deprive the directors of the power of contracting their operations in proportion, and thereby diminishing expenditure until trade may revive. They have reason to hope, however, that the worst of the dull period may have passed, and that the company's business in the freight department may shortly become more satisfactory. In the face of the circumstances referred to, the directors are not, on this occasion, enabled to follow the course adopted at the half-yearly meetings in 1863 and 1864 of supplementing the dividend with an additional payment, and they accordingly recommend only the usual half-yearly dividend of 3½ per cent., free of income-tax. The warrants for the half-year ending 31st March will be payable on the 23rd of June, and the proprietors of new shares are requested to take notice that the dividend will be calculated on £30 for the three months between 1st of October and 31st of December, 1864, and on £35 for the three months between the 1st of January and the 31st of March, 1865.

The CHAIRMAN said that the information given in the report was so full upon every important point that it was scarcely necessary for him to say anything in moving its adoption.

Mr. HADOW, deputy-chairman, seconded the motion.

A SHAREHOLDER asked what had been the cost of digging out the *Bengal* (which, it may be remembered, was driven on shore at Calcutta by the cyclone last autumn).

The CHAIRMAN could not say exactly, but it was considerably less than had been anticipated. The contract for digging her out was £11,000, but there would be other expenses in addition. At all events, the cost would be less than at the last meeting was expected.

Mr. JONES referred to the scheme of the Government to establish a transport fleet for the conveyance of troops to and from India, which he thought must militate against the interests of the Peninsular and Oriental Company. The proposal was, he understood, to raise a million of money for the purpose of carrying out that project; but it appeared to him that, by using an inferior class of vessels, the Peninsular and Oriental Company could perform the service on terms which it would be worth the while of the Government to accept, and thus avoid an unnecessary outlay of capital. Referring to an invention for making ladies' dresses uninflammable, he suggested that all the woodwork of the company's fleet should be coated with the preparation as an additional security against fire. He also wished to know whether the competition of the French company did not operate injuriously against them in diminishing the freights of specie.

The CHAIRMAN, in reply, said that the question of carrying troops was one entirely with Her Majesty's Government, and not with the board of directors. The board had been guilty of no neglect in the matter, and when the subject was first mooted they had made a proposal to the Government to undertake the service, to which, however, they had not received any answer. The project of the Government was, he believed, to put five vessels, at a cost of £200,000 each, to carry on the service between Suez and India, the Government itself undertaking the transport between this country and Alexandria. It was obvious that the Peninsular and Oriental could not have undertaken the conveyance of troops as proposed without building new vessels, and consequently incurring a large outlay of capital, and the first point to be considered was whether the terms that could be obtained from the Government would repay that outlay. With regard to painting the woodwork of the ships with a patent uninflammable wash, the directors had had many inventions submitted to them for covering ships' bottoms, and other things, and they had adopted all such improvements as upon full investigation they thought would benefit the company; but with all respect to Mr. Jones, he might be allowed to suggest that a composition which might do very well for ladies' bulk heads was not necessarily the best thing that could be applied to a ship. (A laugh.) No doubt the French company did take more specie, but it was chiefly to Egypt, and at a very low rate of freight, but the deficiency adverted to in the report arose chiefly from the stagnation of trade. At the next meeting he hoped they would be able to report an improvement in this respect, and generally a larger profit; but he hoped that in the meantime the shareholders would adopt the recommendation of the directors of making no payments in the shape of dividends, except out of profits actually realised.

The motion was then put and adopted unanimously, and the dividend recommended—viz., 3½ per cent. for the half-year, free of income-tax, payable on and after the 23rd inst.—having been confirmed, a vote of thanks to the chairman and directors concluded the proceedings.

THE NEW ORDER IN COUNCIL FOR CHINA AND JAPAN.

(THE TIMES.)

The Church of Rome undertakes to exercise a special superintendence over the disciples of her own faith *in partibus infidelium*; and even Mr. John Stuart Mill, in his popular "Essay upon Liberty," excepts "barbarians" from the general right of free thought, and word, and will. The exception might seem to be detrimental to the general argument, since it would leave to Mr. Mill, or to the dogmatist who for the moment might stand in his shoes, the power of determining who are barbarians, and consequently who are persons entitled to liberty. But, in truth, this question, who is a barbarian? is a real, practical, everyday difficulty. When English subjects go abroad among civilized nations we surrender them to the protection and restraint of the laws of those nations, and if they happen to be hanged, *secundum legem terræ*, we take no thought about it. But if they go among "barbarians," where it may happen that they are scalped, impaled, or cut to pieces upon crosses for no crime known to Christendom, then we consider it necessary to follow the errant Briton all through the barbarian territory with the protection of British law, and also to restrain him by the terror of civilised punishments. This is both in theory and in practice a matter of great difficulty. In the first place, we have no right, according to the ordinary law of nations, to claim any special exemption for an Englishman from the laws of the natives with whom he voluntarily dwells, among whom he has perhaps intruded himself; and, secondly, we have very imperfect means of following the occasionally eccentric course of those of our countrymen who do go among barbarians, and, indeed, we are very likely not to see their offences, and not to be in a position to punish their crimes. Our law has dealt with this subject in a vague and tentative manner. It does not declare that Queen Victoria shall have jurisdiction to set up courts and punish offences in the Empire of China, or the territory of Abyssinia, or in the Empire of Turkey, for we have no more right to claim such a jurisdiction, except so far as we have extorted it by treaty, than we have to claim it in France or Spain. But our British Parliaments, like ancient Popes, have given our Queen a *quasi* right of conquest over all barbarians. Parliament has enacted that "it shall be lawful for Her Majesty to hold, exercise, and enjoy any power or jurisdiction which Her Majesty has or may have in any country or place out of Her Majesty's dominions, in as ample a manner as if Her Majesty had acquired such power by the cession or conquest of territory." For the purpose, therefore, of exercising judicial authority over her own subjects in China and Japan Queen Victoria is by our law in precisely the same position as if she had conquered those two Empires.

Digitized by Google

This explanation may, perhaps, be necessary to some persons before they are able to comprehend the purpose of a very long and closely printed Order in Council, recently published. By this Order the Queen of England establishes a Supreme Court, with a Judge, an Assistant-Judge, and a Law Secretary, in a suburb of the Emperor of China's city of Shanghai, and also establishes a series of Provincial Courts throughout the two Empires of China and Japan. Queen Victoria is, in fact, doing in the Empires of China and Japan, and in a judicial way, precisely what the Pope and Cardinal Wiseman did some time since in an ecclesiastical way in this benighted land of England. We, who are an excitable people, were very angry and called it Papal Aggression; the Chinese, who are not an excitable but a remarkably practical people, are not likely to be at all angry. Neither step was perhaps very complimentary, either to us as heretics, or to the Chinese as barbarians; but as our Supreme Court obtains the power to try capital offences, the possible spectacle of a man hanged by a Court of English jurisdiction within a dependency upon the Imperial city of Shanghai will be a more startling exercise of foreign jurisdiction than any which was likely to be offered by an Archbishop of Westminster. We have tested, by an instance familiar to ourselves, this exercise of English prerogative in two foreign States in order that our readers may more easily comprehend its very exceptional nature, and by no means for any purpose of unfavourable criticism. It is a measure which has become absolutely necessary for the preservation of peace and for the protection of our own good name in China and Japan. It is what we have been ourselves urging forward upon every recurring occasion of some unpunished outrage committed by an European upon Chinese victims. Henceforward we may hope that there will be some real protection for the native Chinese against the predatory violence of the European adventurers who make marauding incursions into the country, and even against the more respectable European traveller who fires off his shotted guns to frighten the market-boats out of his way. Henceforward every Consular Court is to be a Provincial Court armed with power to try civil cases up to a moderate amount, and to take cognisance of misdemeanours, and punish, with or without assessors or jurymen, to the extent of twelve months' imprisonment. In addition to this, as we read the Order, every Provincial Court may, in case of a grave offence coming before it, be rendered for the occasion a branch of the Supreme Court—the Judge or Assistant-Judge attending to preside at the trial. If we are right in this interpretation, it is a very important alteration of the old system; for if it had been necessary to try every grave offence at Shanghai, a murder at Nagasaki would have been as unpunishable under the new as it was under the old system. We fear, however, that the Order in Council has been somewhat loosely drawn in this respect, and that the absolute right of a rehearing before the Judge of the Supreme Court after any decision by the Assistant-Judge may tend to create complications under which great criminals may still escape punishment. It is satisfactory to know, however, that so far as British subjects are concerned, a written Code has now been put forth, to which the Chinese and Japanese authorities may appeal when crimes they are not allowed to punish are committed. Crimes which are capital in England are capital also before the Supreme Court of Shanghai, and other crimes and offences which have their punishment here are to be visited with a like punishment there—subject, of course, to the Royal prerogative of mercy, and in cases of death to a confirmation by the Crown, acting by its Minister resident in the country.

There are, however, certain special offences introduced into the jurisdiction of the Supreme and Provincial British Courts of China and Japan which do not obtain in England, but are especially required by the circumstances of these countries. The punishments affixed to these offences cannot be too soon known to the persons whom they are likely to concern. Acts of individuals, which have been most fruitful in contentions and little hostilities, and even great wars in the Chinese and Japanese waters, have been outrages on persons or property; contraventions, commonly with violence, of the Customs' regulations of the Chinese; forcing trade at forbidden ports in Japan; and insults offered to the ceremonies and religion of the people. Outrages on persons and property are now sufficiently provided for. Contraventions of Customs' regulations are still left unpunished, and it is an omission in the new scheme that the Provincial Court is not directed to protect the Chinese officers of Customs in the execution of their duty. The framers of this order seem determined, however, to avoid future disputes with Japan, since they give power to punish with two years' imprisonment and 10,000 dollars' fine, and seizure of his vessel, any British subject attempting to force trade with Japan at other than the treaty ports. Another very important provision enables the Minister resident in China to frame regulations for the government of British subjects in China, and impose fine and three months' imprisonment as the penalty of disobedience. This is the most doubtful part of the Order. It is true that these regulations are supposed to be referred home to receive the assent of the Secretary of State; but as there is an exception in cases of exigency there is reason to fear that the power will afford too wide a scope for the too active meddling of diplomacy, and bring us periodical crops of mercantile grievances from the East. Some such power is undoubtedly necessary to exist, but it will be contrary to all experience if in this form it be found to work well. A much more certainly expedient provision is that which denounces against any British subject who shall take service either with or against the Emperor of China, two years' imprisonment, 5,000 dollars fine, and perpetual deportation. One other special enactment requires to be noted. It is that which ordains that any British subject publicly deriding, mocking, or insulting any religious ceremony, service, or feast in China or Japan, shall be liable to summary sentence, to imprisonment with or without hard labour for any period not exceeding two years. It is a useful and a necessary threat; but it is strange that perpetual deportation, which would be a remedy as well as a punishment, is in this case omitted.

Upon the whole, this very comprehensive scheme of judicature has been well drawn up, and the great and multifarious subjects it comprehends have been treated with much ability. We have indicated some particulars in which we think it might be improved, and in which it will be found faulty in working. The great necessity, however, is that it should be supplemented by some arrangement for combined action among the Treaty Powers. The immediate effect of the promulgation of this Order at Shanghai will be that the "rowdies" of the East will declare themselves Americans, or Portuguese, or Germans, according to circumstances, but will always declare, notwithstanding the registry, that they are not British subjects. The new Order is an important step; but to render the object certain and the remedy complete we must go further. If one Treaty Power can erect this complete judicial hierarchy in the territories of independent States, all others may do so. Is it not possible for all the Treaty Powers to combine to have one Supreme Court and one set of Provincial Courts, whereof there may be different Judges, if they please, and different laws administered to different suitors, according to their nationalities, but whereof the jurisdiction as a Court might be universal over all foreigners claiming exemption from Chinese and Japanese tribunals? This Court would spread a net large enough to catch all the European vagabonds; but now, while each nation makes its separate cast, the worst fish of prey escape between the little independent nets. No doubt, however, there are difficulties in the way of such an arrangement as this. We can only hope that some general scheme may ultimately be perfected, and, meanwhile, thank our own Government for the step now taken to clear our national conscience before the face of our barbarian allies.

THE CHINESE CUSTOMS' ESTABLISHMENT.

(THE TIMES.)

A report, which has been prepared by Mr. Hart, Inspector General of Maritime Customs in China, gives an interesting account of the origin and progress of a foreign customs' establishment in China. The manner in which native officials have been wont to transact customs business at the Chinese ports is this:—Chinese vessels are licensed for the coasting trade, and the tariffs generally amount to about 10 per cent., the customs' duties of a port would be assigned to a person holding some other Government office in the locality, and so farmed as to hold him responsible for the collection of a specific amount, with liberty to retain any surplus; in the absence of a strict supervision, or under an established official laxity, each subordinate having to pay for his place, lies to his superior, and makes as good a purse as he can for himself. The merchants have to make the best bargain they can with the officials, and the Government do not get half the duties really paid. Now in 1854, when Shanghai seemed virtually lost to the Imperial Government, inextricable confusion arose in relation to the customs, and, in fact, the collection of duties passed from the hands of the Chinese for a time. Spasmodic attempts were once or twice made by an office that was very insufficiently recognised, but ships constantly left the port without paying a farthing of duties, the Consuls taking from the merchants bonds, which were considered of questionable validity. Eventually it was arranged that the office of customs should be re-opened under its proper chief, the Taoutae, but that it should be placed under the inspection of foreigners representing the three treaty Powers—England, France, and the United States. This inspectorate was in the first instance a foreign Governmental measure, which relieved Consuls from the necessity of undertaking responsibilities in regard to the clearance of foreign ships, and protected honest merchants from the uncontrolled acts of bad men, at the same time securing the revenue for the Imperial Government. It became more and more a Chinese institution, and when the treaties of Tien-tsin were concluded in 1858, it was arranged, in order to insure uniformity of treatment for the merchants at all the ports, to extend the scheme to all the places opened to trade. Accordingly, the foreign inspectorate is now represented at 14 ports, and employs in various capacities some 400 foreigners and about 1,000 Chinese. It met with much hostility from the old Executive, who saw in it an invincible obstacle to the "doctoring" of accounts, and it was not altogether welcomed by many who had grown accustomed to compounding for duties and nocturnal "running" of cargoes; but opposition has gradually died away. The inspectorate has an establishment at Peking, where juniors on first appointment study Chinese, in preparation for work at the ports; and it is now very generally treated as a branch of the Chinese public service, and regarded as naturally growing out of the new relations in which China finds herself through the treaties entered into with foreign Powers. At each office there is one inspector, or commissioner of customs, representing the three treaty Powers, with assistants under him of various nationalities; at the head is an inspector-general, appointed by the Chinese Foreign-office. This inspectorate has secured for the State funds never dreamt of before and substituted for corrupt and inefficient offices an honest and effective revenue administration, placing all and every trader upon the same footing. It has also assisted the Chinese in fulfilling with advantage to themselves the obligations into which they entered by treaty; with trade at more than a dozen ports, and firms numbered by the hundred, an interdependency of obligations has grown up which could only be met by the operation of such a uniform and efficient system as the inspectorate. In fact, without it the only resource would have been to do away with import and export duties altogether, and then allow the officials in the interior full swing for local taxation; and how that would have answered is easily guessed. The more intimate nature of the relations into which the members of the inspectorate have been brought with Chinese officials conduces not a little to lead those officials to understand foreigners better, and to clear away much of the suspicion and dislike with which they regarded them; and thus the tendency is to remove the position of foreigners from the support on which it has hitherto been based—force and might, and to place it on one that promises better for the future, and which, though at first nothing more than a mere assent to the existing state of affairs, may in time change into an appreciation of, if not a welcome to the foreigner. The juxtaposition of an honest administration is making itself felt; and through the inspectorate, more perhaps than through any other means, does there appear to be an opening for the introduction of sundry reforms and useful ideas. It is gradually leading the Chinese mind in the direction of properly salaried official establishments; and any step in that direction will go far to do away with the canker that preys on the very vitals of the country, and the multitudinous sufferings and malpractices that are its concomitants. The inspectorate will have finished its work when it shall have produced a native administration as honest and efficient to replace it.

LONDON, SATURDAY, JUNE 10, 1865.

BRITISH JURISDICTION IN CHINA AND JAPAN.

HER MAJESTY'S Order in Council for the exercise of jurisdiction in China and Japan is now published, and proves to be a document of much more importance to British subjects in those countries than the extension merely of judicial courts to the open ports. It contains twenty-three articles, divided into one hundred and sixty-five clauses, treating in detail upon every judicial, political, and social relation affecting our fellow-countrymen in the Far East—it is, in fact, a *vade mecum* for the guidance of Englishmen, whether resident or non-resident, who venture to trade, or otherwise come into contact with the Chinese and Japanese, and which no man so doing should be without. In the concise form of forty-two small octavo pages, it comprises all the important clauses of previous Orders in Council—eleven on China, and four on Japan, besides five Hong Kong ordinances—*all of which are repealed* from the commencement of this Order. Henceforth these troublesome, and in many respects contradictory ordinances are null and void, and their objectionable clauses wiped out. If for no other cause than the abrogation of the "Neutrality" ordinance, passed by the Legislature of Hong Kong in January, 1855, this Order in Council is of the greatest importance, as that Act stultified the operations of Her MAJESTY'S forces during the Taiping rebellion. By this Order, Article VI., if any British subject aid or abets any person carrying on war, insurrection, or rebellion against the Emperor of CHINA, or takes part in any operation of war in his service (without the QUEEN'S license), is liable to be punished to the extent of two years' imprisonment, with or without a fine not exceeding 5,000 dollars. But the chief feature in this Imperial manifesto is the withdrawal of judicial power from the colony of Hong Kong, as a court of appeal to the consular courts in China and Japan, and its transfer to the settlement of Shanghai. While we see on the one hand a British colony with its gubernatorial, executive, legislative, judicial and civil functionaries, with their courts, departments, and paraphernalia, shorn of the chief power that gave it *status* in China; on the other hand we find a mere *settlement*, occupied by land-renters from the native authorities, raised to the supreme centre of legal power, not only in China but Japan. This is the greatest blow that could be levelled at the supremacy of Hong Kong; and foreshadows the probability of what is called the "English Concession" at Shanghai, becoming at no distant date a *bona fide* British possession, with its governor and councils, instead of its present hermaphrodite municipal administration. Be that as it may, the Supreme Court of Hong is doomed to dwindle down to a very limited jurisdiction, and its remunerative business to be henceforth greatly curtailed. It may take cognizance of offences committed by British subjects at Macao, or civil cases which have originated there, but it has no power to issue warrant or writ beyond its rocky shore, and its former jurisdiction in the ports of China and Japan, as emphatically stated in Clause 16C, shall, "from the commencement "of this Order, absolutely cease." In future the Supreme Court for China and Japan will sit at Shanghai; and its judicial power will alone determine all civil and criminal matters between British subjects themselves, or when they come into collision with the native inhabitants or the citizens and subjects of other foreign nations. Of course the law of England will be maintained intact, but it is specially mentioned in the XVII. Art. that "Rules affecting the conduct of civil suits shall be so framed "as to secure, as far as may be, that cases shall be decided on "their merits according to substantial justice, without excessive "regard to technicalities of pleading or procedure and without "unnecessary delay." It is to be hoped that his honour Sir EDMUND HORNBY will give especial effect to this clause, as the Supreme Court at Hong Kong was notorious as an arena for legal quibbles to frustrate the ends of justice; especially if a Chinaman was in the case, so that in the eyes of the natives it was considered not much better than their own courts, and they are dens of intimidation and corruption. According to this Order, not only may these and other foreigners institute an action against British subjects, but they can demand their compulsory attendance, to give evidence in other tribunals, under a penalty not exceeding $500, or imprisonment for one month. This is a step in the right direction, and if carried out with vigour and impartiality will tend greatly to raise our character for even-handed justice in the eyes of these oppressed people. In the same spirit the XI. Art. provides for the punishment of offences against religion, or insults to religious institutions and their professors; or even committing any act which tends to bring such into hatred, ridicule, or contempt, and thereby provoke a breach of the public peace, under a penalty of imprisonment not exceeding two years, with or without hard labour, and a fine of five hundred dollars, at the discretion of the court. This may be considered by some an unusually stringent provision in the Order, but it is only just towards the sacred feelings of the people among whom we have thrust ourselves unwillingly; and it is to be hoped that it will curb the conduct of those young men who wantonly treat the inoffensive Chinese and their temples as if they were dogs and kennels. It is not necessary that offenders in the outlying ports should be sent to the Supreme Court for such petty offences, but they may be apprehended, tried, and punished in the provincial courts. These will be presided over by the consuls or vice-consuls at the open ports, who will be empowered to hold such courts by the Supreme Judge at Shanghai; in whom is centred all discretionary power as to the appointment or regulation of the duties of his subordinates. His coadjutor, the Assistant-Judge, only acts in cases that are submitted to him by his superior, while the judge has power to attach any consul or officer of a consulate to his court. At the same time he has no power to remove the Assistant-Judge or Law Secretary, who, like himself, are appointed by Her MAJESTY under her Royal sign manual. The chief duty of the last-mentioned officer is to act as registrar of the court; but he may hear and determine cases of summary jurisdiction. As to the powers of the court and its functionaries, these extend to every class of civil and criminal cases. It is a court of law, equity, bankruptcy, admiralty, coroner, lunacy, matrimonial causes, probate and administration, while its jurisdiction extends a hundred miles out at sea, where offenders may be captured in British, Chinese, or Japanese vessels, and tried as if the crimes they committed had been done on shore. A regular jury list will be made up at Shanghai, restricted to persons having an income of $250 a-year, except civil, military, and naval officers, clergymen, lawyers, and doctors. A jury will consist of five jurors, who must be unanimous in their verdict. Assessors, as at present, will act in this capacity at the provincial courts. Capital crimes, however, can only be tried by jury; and sentence of death must be endorsed by the British Minister at Peking, who has power to commute that sentence to any other punishment he may deem sufficient. To complete this comprehensive jurisdiction of the Supreme Court at Shanghai, the "finisher of the law," will be Her MAJESTY'S Consul; who will have all the powers and authorities of the sheriff of a county in England, with all the privileges and immunities of the office. Thus has great Britain established on the unceded territory of the EMPEROR of CHINA, a complete epitome of the laws that rule her glorious constitution; and it is to be hoped that, in the administration of those laws, the judges of the court will show to the native authorities the high integrity of principle as well as honour that guides our ministers of justice, as hitherto has been displayed by our plenipotentiaries, generals and admirals, in the prosecution of our belligerent rights. There are other points in this notable Order in Council, which are worthy of remark, touching specially on Japan, and the registration of British subjects, which we reserve to another opportunity. Meanwhile it must be considered that the Japanese courts come under

Digitized by Google

the same denomination as the provincial courts in China; only in capital convictions the prerogative of mercy lies with the Minister at Yedo instead of Peking.

THE GOVERNORSHIP OF HONG KONG.

No announcement has been officially made of a successor to Sir HERCULES ROBINSON. It is understood, however, that the appointment will not be conferred upon Mr. MERCER, the Colonial Secretary, who is at present administering the Government on the united half-pays of Governor and Colonial Secretary.

Literature.

Colonial Office List for 1865, by ARTHUR N. BIRCH and WILLIAM ROBINSON, of the Colonial Office. Harrison, Pall Mall. —This is the fourth publication, to be continued annually, of a collection of information of the most useful and indeed invaluable kind to all persons connected with the British colonies either by official, commercial, residential, or natal ties. The title-page tells us that it contains "historical and statistical information respecting the colonial dependencies of Great Britain, with an account of the services of the principal officers of the several colonial Governments." When we say that this hand-book extends to 228 octavo pages, a majority of them printed in double columns, some opinion may be formed of the vast amount of intelligence comprised in the volume, which, as may be judged from the position of its authors, is compiled under the sanction of the Secretary of State for the Colonies. After two or three preliminary pages devoted to the constitution of the Colonial Office, we come to the colonies themselves, arranged alphabetically, with a brief narrative of the history of each, a short account of its climate and productions, and a condensed analysis of its political constitution; for as the majority of these dependencies are ours by treaty, and retain their old laws as the basis of their administration, the number of forms of Government belonging to them is almost equal to the number of the Governments themselves. Each colony presents us with a list of its governors from its first settlement or conquest, going back, in the case of the Bermudas, to the year 1612; then a list of the present officers on its civil, military, judicial, and financial establishments, with the salary attached to the office; and lastly, a statement of the Imports and Exports, and Revenue and Expenditure, since the year 1856. These particulars, many of them to be obtained, we fancy, in no other political or statistical collection, are followed by "the Rules and Regulations for Her Majesty's Colonial Service, compiled by the Secretary of State's directions in 1856;" and last of all there is "a statement of the services of those persons now living who have held, or are now holding, any important office under the Secretary of State for the Colonies." Three names, from a column chosen at haphazard, will show the way in which this part of the task is performed:—

Meller, H. J.—Barrister of the Middle Temple, 1840; member of Home Circuit; appointed Resident Magistrate of Durban, Natal, 1850, to whose court increased civil jurisdiction was given 1852, extending to £100, and trial by jury; was Acting Crown Inspector from October, 1855, to December, 1856; Acting Puisne Judge Supreme Court from July, 1861, for twelve months, and is Colonial Commandant of Durban Rifle Guard Volunteers; Acting Second Puisne Judge 1864.

Melliss, John.—Surveyor and Colonial Engineer, St. Helena; appointed 1859; joined the Colonial Service in the Engineer Department of that island in 1851.

Mercer, W. T.—Graduated at Exeter College, Oxford, B.A., 1843, M.A., 1851; entered the Middle Temple 1842, but has not been called to the Bar; is Colonial Secretary of Hong Kong, and a member of both Councils; entered the Colonial Service as Private Secretary to Sir J. Davis, Governor of Hong Kong, 1844; appointed Acting Colonial Treasurer 1845; confirmed 1847; administered the government of Hong Kong from July to September, 1861, and again from July, 1862, to February, 1864.

The fullness and minuteness of this catalogue of officials is proved by an entry that catches the eye in the same column with Mr. Mercer's services, recording those of an individual whose career, however useful, runs in a far more humble groove—"Millar, W. — Appointed engineer of the harbour steam-tug, Natal, 1860."

Nothing more need be added to signalise the valuable service that has been rendered to the colonies, and the public at large, by the two gentlemen whose names authenticate the compilation before us. It is one of those books, the value of which will be better established by five minutes' reference to its contents than by five columns of commendation. All that it wants is more care on the part of the "printer's reader" in the next republication. The notice of Sir J. S. Pakington, for instance, is made mere hotch-potch by half-a-dozen lines being tacked on to it that are "a double" of some lines that appear also in their proper place, under "George Palmer," the name next in alphabetical order. The following from the account of the Falkland Islands is a specimen of contradictory jumble:—

The wild cattle, horses, and pigs are very numerous; sheep have been introduced, and found to do well in parts, but the land is generally too wet for them—in the Islands—so much so that the diseases common among these animals elsewhere, such as scab and rot in the feet, are almost unknown, while the wool exported realizes a high price in the London markets.

A book partaking so much of the nature of a dictionary of names of men and places demands the closest supervision in the editorial department, and it would be easy to multiply proofs that the Colonial Office List will be all the better for more vigilance in correction. We are not sure, too, but that the geographical notices might not be changed for the better in some instances. We should as soon have expected to find Great Britain described as an island lying off the North Sea as to be told that Jamaica is "an island lying off the Bay of Honduras." All these, however, are trifling points, easily rectified, while the value of the design, and the labour entailed by its execution, entitle Messrs. Birch and Robinson to rank high in the list of those indefatigable compilers whose usefulness the world repays by making their names household words.

Naval and Military.

The Charybdis, 21, screw corvette, Capt. Edward W. Turnour, arrived at Spithead from the Pacific, and on entering the roadstead saluted the flag of the Port-Admiral and Naval Commander-in-Chief, Sir Michael Seymour, G.C.B., which was returned by the three-decked training ship St. Vincent, flag ship *pro tem.*, during the refit of the Victory, the permanent flag ship of the port. The Charybdis sailed from Vancouver on the 14th of December, from Valparaiso on the 2nd of March, and from Rio de Janeiro on the 11th of April, and has brought to England two warrant officers, one naval engineer, 80 naval supernumeraries, and five prisoners from Her Majesty's fleets on the Pacific and Brazil stations. The Charybdis made the passage round Cape Horn, the weather being unfavourable for going through the Straits of Magellan.

Major-General Studholme J. Hodgson has been appointed to the command of the troops in Ceylon in the room of Major-General O'Brien, whose state of health, though somewhat improved, yet obliges him to return home. Although not actively employed of late years, Major General Hodgson has always shown a soldierlike anxiety for service in the field. During a regimental career of nearly 26 years, he served in most parts of the world, and was with the 45th Regiment in the Burmese war.

By the death of General Sir James Shaw Kennedy, Colonel of the 47th Regiment, the following promotions take place:—Lieutenant-General R. B. Coles, Colonel of the 65th Regiment to be General; Major-General Sir Thomas Simpson Pratt, K.C.B., Colonel of the 37th Regiment, to be Lieutenant-General; and Colonel Sir T M. Biddulph, K.C.B., to be Major-General in the Army.

As soon as intelligence had spread about the harbour of Cork that Parliament had decided in favour of a dockyard in the port, preparations were made for public rejoicing. The night of Her Majesty's birthday was chosen for a display of bonfires, tar barrels, and rockets which were fired as soon it was dark on every headland facing the waters, while thousands of young people, accompanied by temperance bands and torches, surrounded the blazing lights.

Captain the Hon. E. R. Bourke, of the Inniskilling Dragoons, has been appointed Aide-de-Camp and Private Secretary to Sir H. R. Robinson, the new Governor of Ceylon.

The ironclad, Lord Warden, which has been before noticed in our columns, has been launched from the Chatham dockyard. The keel of another similar vessel is shortly to be laid.

The Orestes, 21, screw corvette, Captain Alan H. Gardener, arrived at Spithead from the Cape of Good Hope, on the completion of her term of foreign service, and will proceed round to Sheerness to dismantle and pay out of commission.

SCINDE, PUNJAUB, AND DELHI BANK (LIMITED).

The fourth half-yearly meeting of shareholders was held on the 30th May, at the London Tavern; W. P. ANDREW, Esq., in the chair. The report, which will be found in another column, was taken as read.

The CHAIRMAN, in moving its adoption, said that although it was not so gratifying as they could wish, the directors could not have exercised more energy or caution than they had done in conducting the business, and it might be some slight consolation to know that the losses they had incurred were not by any means so large as those which other Eastern banks had suffered; in short, all the bills they had in suspense put together were not equal in amount to the suspense bills held by one of the other banks upon one house. He desired to conceal nothing from the proprietors; on the contrary, he wished to lay before them the full extent of the losses; at the same time he must be allowed to say that their misfortunes had arisen from causes over which they had no control, and he had no doubt if their confidence in the directors was continued that they would be enabled to retrieve the past, and make the bank a most successful and flourishing institution. There were proposals under consideration for strengthening the bank, enlarging the scope of its operations, and giving to it what it had not yet had—a proper and efficient local manage-

Digitized by Google

ment. He was not himself a banker, nor was he acquainted with all the details of banking business, but he possessed a competent knowledge of commercial affairs in the East generally, and was able to speak with confidence of the future prospects of the institution, provided they had efficient local managers to work out the details on the spot on the principles which the board here laid down. Such was the high character of the bank that, notwithstanding the losses they had incurred, offers had been made to them for an arrangement or amalgamation with other institutions of a similar character, of a nature which, if the negotiations were successful, must necessarily add to the stability and ensure the prosperity of the Scinde Bank. They sent out positive instructions to the managers of the several branches to curtail their operations, and if those instructions had been attended to, the total of their losses would not have exceeded £5,000. But they were not—the managers in India said, "We must do as the other banks do," and when they were reprimanded for it they resigned, and at once obtained appointments in other financial establishments at largely increased salaries, those who had been paid in this bank £1,000 or £1,200 a year obtaining £2,000 or £2,500. As he had said, the total losses ascertained up to the end of the year were included in the present account, but since that period other large losses had occurred, by no means, however, equal to the depreciation which had taken place in the value of the shares. The directors had narrowly scrutinised all the transactions of the bank, and the result was that instead of there being a loss of £3 or £4 per share, as the depreciation would lead them to suppose, it was not more than £1 a share at the outside upon the entire capital.—Mr. F. W. RUSSELL, M.P., seconded the motion.—Mr. MACKINNON, a director, offered some further explanations, showing that he had such confidence in the concern that he had recently purchased shares, and had given his broker instruction to buy more if they should be in the market. The rate of profit, he admitted, had hitherto been totally inadequate to the risk run. The directors retiring by rotation were re-elected, and a cordial vote of thanks to the chairman and the other directors terminated the business.

Major-General Sir C. T. Van Straubenzee, K.C.B., is appointed Colonel of the 47th Regiment of Foot, vice General Sir J. S. Kennedy, K.C.B., deceased.

Monetary and Commercial.

There have been no important failures since the last mail, but the alarming telegrams from India of failures, and even of Bank failures, keep the City in a constant ferment. The reduction of the duty on tea came into operation on the 1st, and the clearances from bond on that day amounted to nearly five million pounds, giving a more pleasant tone to the market. The deliveries for the month will most probably reach twenty millions. With the present low rates, the consumption amongst the poorer classes must largely increase—that is, when the grocers in the country give them the benefit—and on this point much remains to be done. It is lamentable that so much chicanery can exist in the retailing of this great boon. Notwithstanding the low rates that have ruled during the past six months, to the ruin of the importers, the great mass of the population have been paying the old prices. There is a most unaccountable freemasonry existing amongst the shopkeepers, utterly inconsistent with the healthy competition which pervades all business in this country. The man who would establish a depot in every town for the sale of tea, only, would do more to benefit the trade and the population generally than any efforts in Mincing-lane. Not only is a gross overcharge inflicted, but the article is itself handled so badly (to say nothing of adulteration) that one-half the virtue is lost to the consumer. For instance, the most popular method is for the grocer to empty his original package into a compartment of his shop-window, there to swelter in company with other commodities.

The meeting of the Scinde, Punjaub, and Delhi Bank Corporation took place the 30th May, when the directors' report, which will be found in another column, was adopted.

Mr. William James Youell, of the Commercial Bank Corporation of India and the East, has been appointed General Manager of "The London and Bombay Bank and General Financial and Insurance Agency Corporation (Limited)."

The suspension has been announced of Messrs. Woodhouse, Kerrich, and Co., and, resulting therefrom, of Messrs. Fulcher, Cooper, and Co., in the East India trade. The liabilities are not large.

The last batch of bills on India for thirty lacs rupees were offered by Government on the 7th. The allotments were—Rs. 19.57.747 on Calcutta, 9.15.000 on Bombay, and 25.000 on Madras. The Government minimum was fixed at 1s. 10½d. on Calcutta and Madras, and 1s. 10¾d. on Bombay.

The Bill introduced by the Government to amend the law of partnership has just been printed, as amended in committee, and the following is a condensation of its clauses:—

"1. The advance of money by way of loan to a person in any trade upon a contract in writing that the lender shall receive a rate of interest varying with the profits, or shall receive a share of the profits, shall not, of itself, constitute the lender a partner, or render him responsible as such.

"2. No contract for the remuneration of a servant or agent of any person engaged in any undertaking by a share of the profits shall, of itself, render such servant or agent responsible as a partner, nor give him the rights of a partner.

"3. No person being the widow or child of the deceased partner of a trader, and receiving by way of annuity a portion of the profits made by such trader in his business, shall, by reason only of such receipt, be deemed to be a partner or subject to any liabilities.

"4. No person receiving by way of annuity or otherwise a portion of the profits of any business, in consideration of the sale by him of the goodwill of such business, shall, by reason only of such receipt, be deemed to be a partner or subject to liabilities.

"5. In the event of any such trader being adjudged a bankrupt, or entering into an arrangement to pay his creditors less than twenty shillings in the pound, or dying insolvent, the lender of any such loan shall not be entitled to recover any portion of his principal, or of the profits or interest payable in respect of such loan, nor shall any such servant or agent, or such widow or child, or such vendor of a goodwill, as aforesaid, be entitled to recover any such profits as aforesaid until the claims of other creditors for valuable consideration in money or money's worth have been satisfied."

The Board of Trade Returns for the month and four months ended the 30th April show a rather considerable decline in the value of exports, which is to be attributed chiefly to the falling off in wool and woollen manufactures, but as regards other articles the changes are not of much importance. The total declared value of exports for the month last past was £12,071,111, against £13,225,039 in 1864, and £11,897,177 in 1863, being a decrease on the first-named period of £1,153,928, but an increase over the latter of £173,934. For the four months of the present year the total was £47,706,818; for 1864, £49,892,420; and for 1863, £39,458,381, showing a decline of £2,185,602 as compared with 1864, but an increase of £8,248,437 as contrasted with 1863. The chief variations as regards exports have been an increase in beer and ale, coals and culm, cotton manufactures, haberdashery and millinery, linen manufactures, machinery and seed oil; but a decrease in alkali, cotton yarn, earthenware, linen yarn, metals, silk manufactures, spirits, wool, woollen and worsted yarn, and woollen manufactures. As respects imports, an increase is exhibited in clocks and watches, guano, raw silk, tallow, wool, woollen manufactures, tea, and tobacco. On the other hand, there has been a falling off in raw cotton, flax and hemp, leather manufactures, flax seed and linseed, cocoa, coffee, spirits, sugar, timber, and wine. Our commerce with the Far East, as far as distinctively returned, is represented by the figures following:—

EXPORTS TO CHINA AND HONG KONG.

	1863.	1864.	1865.
For the Month ended 30th April.			
Cotton yarn	51,060	87,800	45,000 lbs.
Cotton manufactures	2,778,951	5,126,790	13,738,050 yds.
Worsted stuffs	308,267	662,384	2,433,988 ,,
Woollen and worsted cloths	201,157	127,094	159,942 ,,
Lead	963	479	180 tons
Value for the Four Months ended 30th April.			
Cotton yarn	£25,265	£67,524	£57,675
Cotton manufactures	232,167	517,664	844,028
Worsted stuffs	154,228	241,666	426,105
Woollen and worsted cloths.	102,317	88,498	94,155
Lead	112,531	44,101	19,012

The Cotton Manufactures exported to other ports and countries in the Far East were in quantity for the month, and in value, for the four months, as follows:—

	1863.	1864.	1865.
Quantity for the Month ended 30th April.			
Ceylon	869,064	397,598	181,923 yds.
Singapore	2,121,309	3,932,323	2,677,297 ,,
Java	—	2,211,958	— ,,
Philippine Islands	1,555,604	—	— ,,
Value for the Four Months ended 30th April.			
Ceylon	£52,499	£172,516	£80,196
Singapore	109,663	375,964	373,945
Java	32,444	231,101	149,981
Philippine Islands	77,242	162,159	189,201

Of Cotton Yarn, 169,670 lbs. were forwarded to Singapore in the month of April, while the export to Ceylon was *nil*. The value of the export to Singapore for the four months ended 30th April was £61,742, against £51,426 in 1864, and £37,785 in the year preceding.

IMPORTS.

Of Raw Cotton the quantity imported for the month exhibits a remarkable decrease in comparison with the two preceding years; but the import from all countries for the four months shows an augmentation:—

	1863.	1864.	1865.
Quantity for the month ended 30th April.			
British India	264,666	316,339	230,900 cwts.
China	9,912	104,642	36,672 ,,
Quantity for the Four Months ended 30th April.			
British India	652,367	775,367	635,510 cwts.
China	36,863	210,118	142,818 ,,
From all countries	1,203,626	1,759,420	2,025,369 ,,

Of Unrefined Sugar, the quantity imported from Java and the Philippine Islands during the month of April was 963 cwt. of the 2nd quality; 25,519 cwt. 3rd quality; and 81,662 cwt. of the 4th. The quantity for the four months and value for three months is represented by the figures following:—

	Quantity for the Four Months ended 30th April. 1863.	1864.	1865.
Of all qualities (cwts.)	358,498 ..	29,330 ..	322,024
	Value for the Three Months ended 31st March.		
Of all qualities	£253,802 ..	£33,066 ..	£219,853

Of Hemp the import from the Philippine Island in the month of April was 5,742 cwt., and the comparative quantity and value for the three years is thus given:—

	1863.	1864.	1865.
Quantity to 30th April (cwts.) ..	66,945 ..	44,735 ..	75,825
Value to 31st March	£75,250 ..	£5,264 ..	£95,597

Of Raw Coffee, the quantity imported from Ceylon during the month of April was 5,796,814 lbs., and the quantity and value for the three years as follows:—

	1863.	1864.	1865.
Quantity to 30th April (lbs.) ..	15,575,923 ..	16,338,659 ..	15,350,315
Value to 31st March	£400,539 ..	£276,642 ..	£329,913

The present Returns furnish us with the Value of the Imports and Exports (the latter, of British and Irish produce) for the first three months of the year. The trade with the Far East exhibits the following amounts:—

To	Exports for the Three Months ended 31st March. 1863.	1864.	1865.
China (exclusive of Hong Kong)..	£455,219 ..	£637,865 ..	£774,416

ARTICLES OF IMPORT.

TEA.—There has been a satisfactory though moderate business transacted, most of the trade having held aloof from purchasing under the impression that importers would give way in their demands; but as China advices and the certainty of large deliveries under the reduced duty read favourable for the future, the market has continued to strengthen, and for fine Kaisows extreme rates have been paid, small parcels realising 2s. 9d. per lb., a few of the Kum Chune chop 2s. 10¼d. per lb. Export orders for immediate shipment to New York were completed early in the month, and a few purchases have latterly been made mostly in Japan uncolored sorts for Canada. The deliveries do not compare favourably with former statements, having been delayed until 1st inst., when the new duty of 6d. per lb., came into operation, since which time the clearances have been very heavy, reaching to date 7,100,000 lbs. Black: There have been no transactions worthy of note in the grades up to leafy, but a good inquiry for the inferior flavory kinds up to 1s. 1d. per lb., which are getting much reduced in quantity. Good flavoury to medium Kaisow kinds are also in smaller supply, but the demand has quieted down. Good Kaisow kinds and medium Kaisow are 1d. per lb. dearer, and the stock in first hands well nigh exhausted, as also fine and finest Kaisows. Some parcels of Amoy kinds with Souchong flavour, of old import, have been sold at 11½d. per lb. The trade in imitation Kaisow, made from Tayshan leaf, has been curtailed, most parcels offering wanting character and strength. In black leaf there is some inquiry for common at 11½d. to 1s. per lb., but for fair to good at 1s. 1d. to 1s. 3d. per lb., the sales have been few; medium qualities with strength are firmer, and several chops have changed hands at 1s. 4d. and 1s. 7d. per lb.; the greatest reaction, however, since the announcement of the reduction of the duty has been in the good medium and fine qualities; several chops that had been forced off previous to the news have been resold at 3d. to 4d. per lb. profit; and in one or two instances, as much as 6d. per lb. Finest is dearer by 1d. per lb. on last quotations, but the sales are not large. Souchong, owing to the scarcity of fine Kaisow, is more inquired for, and a few sales of fine have transpired up to 2s. 3d. per lb. For Oolongs a few recent of import of fine quality have been taken at 1s. 9d. to 1s. 11d. per lb.; for common the inquiry has ceased. Scented Tea: Canton Orange Pekoe is scarce, but the demand is inactive, as also for Caper. Foochow Orange Pekoe is occasionally asked for at about previous rates. Green: There is little to remark upon, as the supply offering is limited. Moyune kinds are wanted, both by the trade and exporters, and first arrivals will meet with ready sale. In Japan kinds some considerable sales of uncoloured are reported at 1s. per lb. for common leafy kinds, 1s. 1d. to 1s. 2d. for good common to fair, and 1s. 3d. to 1s. 5d. for medium; 1s. 6d. to 1s. 7d. per lb. for fine. The quantity afloat is about 9 million pounds, against about 5 last year; the stock being 106, against 99 in 1864.

SILK.—The sudden termination of the American war coupled with bad accounts of the European racolta, led to a very active demand for Silk during May, and prices of all descriptions have advanced considerably. China Silk: Tsatlees have been most in request, and owing to the extreme scarcity of good Silk, 29s. has been paid for classic thirds; fair and medium Taysaams also sell freely at improved rates, but there is still no demand for inferior descriptions, prices of which are rather lower than otherwise. Japan Silk has been eagerly sought after, and the quotations for Mibash are extravagantly high. The deliveries for the month mark the effect of high prices, being only 2,164 bales of China, and 1,009 bales of Japan. Bengal Silk has been in good demand during the past month, and fully participated in the general improvement. Italian Silk has not been much inquired for, manufacturers here being generally well supplied, but prices continue to creep up. Accounts of the European crop are as usual somewhat conflicting, Japan seed of this year's importation does well everywhere, and especially in Lombardy, where the quantity was large, but the reproduced seed of last season is not so successful, and of all other descriptions there are more or less complaints; altogether, the result is scarcely expected to equal that of last year.

COTTON.—The market, after a brief pause, the consequence of a fall of 10 per cent. in the New York market, which is now the barometer, speedily recovered its tone, when it was seen by the succeeding mail that no further decline had taken place, middling Uplands being steady at 50 cents—a price still beyond that ruling on this side. A good business has been done this week, exporters and the home trade buying freely, and we close with a general advance of ¼d. to ½d. per lb. Sales of 120 bales of China this week at 7¾d. to 8d. for middling fair, and 790 bales of Japan at 9¼d. to 10¼d. for fair to good fair. Stock of China and Japan in London, on the 8th inst., 9,768 bales, against 27,176 bales last year. Afloat to Europe on the 9th June, 32,541 bales China, against 60,682 bales last year; and 531 bales Japan, against 6,218 bales last year. Total stock in London on the 8th June, 84,676 bales, against 82,521 bales last year. Total stock in Liverpool on 9th June, 406,500 bales, against 297,484 last year.

SUGAR.—Continued heaviness has characterised the market, and business has been limited at about 6d. decline. The only transactions reported on the spot by private treaty are 3,900 bags Muscovado Manila at 26s. 6d., and 300 bags clayed at 29s. 9d.

COFFEE.—Colonial descriptions continue to meet a tolerably good demand, and most of the supplies brought forward have been cleared off at prices on the whole equal to those of last week. Ceylon: The public sales of Plantation have comprised 900 casks, 780 barrels and bags, which were taken readily at fully previous rates, fine fine ordinary to low middling 79s. to 83s. 6d., middling to good middling colory 84s. 6d. to 90s. 402 casks, 7,400 bags Native, mostly found buyers at about the former value, common good ordinary to real good ordinary 65s. 6d. to 67s. 6d., fine ordinary 68s. to 70s., superior bold up to 74s. 6d. Mocha: 786 packages at auction, were sold at steady prices, good clean garbled 98s. to 102s., fair long berry 91s. to 92s.

RICE.—The market has been extremely quiet for landed parcels since our last; nothing has been brought to auction, and by private contract, little of consequence has been done. Late last week, two floating cargoes Bassein were reported sold, one, 1,860 tons for Liverpool, at 10s. 9d., and the other, 1,200 tons, at 10s. 6d. for the Continent, or 11s. for the United Kingdom.

SAGO.—Floor: In public sale, 2,743 bags middling quality were nearly all withdrawn at 14s. 6d.

SPICES.—Cloves: Continue quiet. Only 48 bags Zanzibar offered at auction, and those retired; and of 29 cases Penang, a few only sold at 1s. 2d. to 1s. 3d. per lb. Mace: Only 22 cases Penang brought to auction, and two-thirds sold at 2s. 5d. to 2s. 6d. per lb. for good palish, and 10d. to 1s. 1d. inferior dull red to fair reddish, being the previous value. Nutmegs: Firm; and 162 cases Penang at auction all sold at 3s. 4d. to 3s. 6d. per lb. for good bold, 2s. 2d. to 2s. 10d. middling, 1s. 4d. to 1s. 6d. medium, and 9d. to 1s. 2d. ordinary small and shrivelled to good small.

TAPIOCA.—Of 560 bags Penang, only one-half found buyers; good white, 3½d., ordinary, 2d. to 2½d.

CARDAMOMS.—Malabar comparatively scarce and firm, but little doing. Ceylon firm; 22 barrels sold at auction at 3s. 5d. to 3s. 6d. per lb. for good.

Digitized by Google

CAMPHOR.—Business since our last has been very restricted, and the market remains firm, but very quiet at the quotations of £5. 15s. £6 for China, and £6 to £6. 2s. 6d. for Japan.

CASSIA LIGNEA.—Rather cheaper; and of 1,287 cases at auction less than one-fourth found buyers at 81s. per cwt. for ordinary 1st quality, and 78s. to 79s. ordinary 2nd ditto. Buds: Quiet; 5 cases at auction retired.

CINNAMON (CEYLON).—We quote 1st sort 1s. 4d. to 2s. 4d. per lb.; 2nd, 1s. 3d. to 2s. 2d.; 3rd, 1s. 3d. to 1s. 9d.; and 4th Jungle .d 1s. 4d.; 120 bales have been offered at auction, and half sold rat her improved prices; 1st, 1s. 9d. to 1s. 10d.; 2nd, 1s. 6d. to 1s. 7d.; 3rd, 1s. 4d. to 1s. 6d.; 4th, 1s. 2d. to 1s. 3d.

COCOA-NUT OIL.—Is again dearer, with large business up to £44. 10s. per ton for Cochin, and £43 Ceylon: 161 casks Cochin, and 571 casks Ceylon at auction.

DRUGS.—Cubebs: Transactions purely retail. 55 bags at auction retired. Galangal Root: Steady: 110 bags at auction mostly sold at 16s. to 16s. 6d. per cwt. for good. Rhubarb: Quiet, but scarcely any present inquiry: only 4 cases at auction, and those retired.

GUMS.—Benjamin: Steady; of 114 cases Sumatra at auction, half sold at £6. 10s. to £6. 15s. per cwt. for middling thirds, and £2. 5s. to £2. 6s. fourths. Damar: Quiet; 20 cases at auction retired. Gamboge: Steady, but quiet; no auctions.

GUTTA PERCHA.—Continues very quiet; of 23 tons at auction, a small proportion only sold at 11d. to 1s. per lb. for ordinary genuine, and 5d. to 5½d. inferior reboiled.

HEMP (MANILA).—Steady, with moderate business on former terms; 3,000 to 4,000 bales, current quality, reported at £29. 10s. per ton, and some little Sorsogon at £30 to £31. No auctions.

HIDES.—At the sales on the 8th there was a good demand for East India, both for export and consumption, and nearly the whole found buyers generally at last sale prices, but occasionally at ¼d. per lb. decline. Of 1,868 Singapore Cow Hides offered, 1,545 sold; Light, 7d. to 7½d. per lb.; Heavy, 5d. to 6d. per lb.; Small, 7¼d. per lb.; Thirds, 5½d. per lb. 1,503 Singapore and Penang Buffalo Hides offered and sold at 5¼d. to 6d. per lb. for best; Seconds, 4¾d. to 5¼d.; Light, 4¾d. 1,184 Java Bufflalo Hides offered, 808 sold at 4¾d. to 5d. per lb.

HORNS.—Buffalo: Steady; of 26 tons Madras, 11 tons Calcutta, 8 tons Bombay, and 1 ton Ceylon at auction, the greater part sold at 24s. 6d. to 31s. per cwt. for 1¼ lbs. to 2 lbs. average; 11 tons Calcutta tips sold at 28s. to 29s. per cwt. Deer: Firm; and 5 tons Ceylon, and 1½ tons Madras at auction, sold at 51s. per cwt. for 1½ lbs. average.

INDIA RUBBER.—Very quiet; 161 bags Java, and 51 baskets Penang at auction retired, and of 110 baskets Assam half sold at 7½d. to 8¼d. for ordinary to middling.

JAPAN WAX.—Steady, with some inquiry for good block. No auctions.

OILS.—Anniseed: Further business to a moderate extent has been done up to 7s. 9d. per lb., but the market has become quiet, and there are now sellers at 7s. 7d. per lb., with few buyers over 7s. 6d. Cassia: Very flat, with no buyers at the quotation of 8s. 3d. per lb. Cinnamon: Quiet, 4 cases at auction retired.

PEPPER.—Black: Quiet and drooping; 917 bags Singapore and 1,170 bags Penang brought to auction; 700 bags of the former sold at 3¼d. per lb., and about 300 bags of the latter at 3d. Small sales privately upon similar terms. White: Fair business privately on former terms.

SHELLAC.—Very flat, and again rather lower for all descriptions; of 882 cases at auction, only a small proportion sold. Orange, £4. 13s. to £4. 14s. per cwt.; and Native, £4 to £4. 5s. Private transactions very limited.

TERRA JAPONICA.—Cutch, Pegue: Continues flat, with very limited business; only 20 tons at auction, and those retired. Gambier: Steady, with moderate business privately on former terms: 604 bales cubes at auction sold at 27s. 6d. to 27s. 9d. per cwt.

TIN (BANCA AND STRAITS).—This market has become very lifeless: prices have receded fully £2 per ton, and transactions have been most limited.

MISCELLANEOUS.—Galls: Market for all descriptions flat, and 181 cases China and 7 cases Japan at auction all retired. Arrivals of Japan. Musk: Tonquin is 2s. to 3s. per oz. cheaper; 46 caddies sold at auction at 24s. to 27s. 6d. per cwt. for middling to fair; but 26 caddies China Cabardine sold at 16s. to 17s. per oz., being very extreme rates. Rattans meet with good demand; and 7,141 bundles Singapore, and 4,557 bundles Penang at auction, all sold at 3s. to 7s. 9d. per 100. Sapanwood: Quiet, and without any business of consequence. Mcther-o'-Pearl Shells: Inquired for; private sales to a fair extent effected upon fully former terms. Soy: Held firmly, but little doing. Star Anniseeds: Continue scarce, and very high prices are asked. Sticklac (Siam): Steady; of 426 cases at auction, about one-third sold at 45s. to 54s. per cwt. for good small to very good bold clean; 22s. 6d. ordinary woody; and 17s. siftings. Turmeric: No China offering; only 80 bags Java at auction sold at 11s. per cwt. for common. Vermilion: Nothing of consequence doing.

FREIGHTS AND CHARTERS.

Outward freights are steady, and for going ships high rates are obtained. In homeward charters we have no improvement to report.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. 6d. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 35s. weight or measurement. To Bankok: 60s. weight or measurement. To Ceylon: 40s. weight, 25s. measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £36 and 32s. 6d. For Shanghai: £41 and £1. 17s. 6d. For Manila: £1. 12s. 6d. For Batavia: 24s. to 26s. For Singapore: £25 and £1. 2s. 6d. For Galle: £29 and £1. 5s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty have invited tenders for the conveyance of 20 tons naval stores, principally combustibles, from the River Thames to Colombo.

MISCELLANEOUS.

Off CAPE OF GOOD HOPE.—April 15, from China, for Portsmouth, Hindostan.

Off MAURITIUS.—April 18, Ange Garden, Bogre, sailed for Singapore; May 4, H.M.S. Tamar, sailed for Hong Kong.

CASUALTIES.

The Kew Kee, Fuller, from Liverpool for Shanghai, put into Rio Janeiro, April 30, leaky and was obliged to discharge.

The Maravi, Anderson, from London to Yokohama, put into Falmouth, May 29, to stop a leak. She has since been surveyed and ordered to discharge.

LAUNCHES FOR THE CHINA TRADE.

Messrs. Hedderwick and Co., of Govan, launched a screw-steamer of about 600 tons and 85-horse power, named the Japan, which is intended for the China and Japan trade.

A fine clipper ship, the property of John Dryden, Esq., of North Shields, was launched on the 27th of May, from Mr. Alcock's building-yard, at Sunderland, to be named the Prudhoe, after the late Duke of Northumberland. She is intended for the China trade, and is classed 13 years A 1 at Lloyd's. She is 140 feet 6 inches in length of keel; extreme breadth 30 feet 8 inches; 19 feet 6 inches in depth; and 666 tons register. Sh will be under command of Captain Reid, late master of the Maid of Tyne of Shields.

Messrs. W. H. Potter and Co., of Liverpool, have launched a very handsome screw-steamer, which has been built for the King of Siam. This vessel, which is a beautiful model, is 156 feet length, 22 feet beam, 13 feet depth of hold, and 400 tons burthen. The Siam was launched with her masts and rigging complete, her screw propeller and shaft having also been previously fixed. She was at once taken into the Sandon Dock, where she will receive her engines, which are of 90-horse power, manufactured by Messrs. George Forrester and Co., of the Vauxhall Foundry, of Liverpool. She will be despatched in about three weeks.

The screw building for Messrs. Robertson and Co., and others to replace the Sea King, will be ready for launching in August.

Secretary (pro tem.).—JOHN HEALY, Esq.

Temporary Offices—1, Royal Exchange Buildings, London, E.C.

PROSPECTUS.

The manufacture of Ordnance upon the principle patented by Captain Blakely, has for upwards of five years been carried on by private enterprise. The demand for this class of Ordnance has, however, so largely increased, that the Works established at Southwark by the present Blakely Ordnance Company have proved altogether inadequate, and it has been found necessary to establish a Manufactory on a much larger scale. Extensive Works are in course of construction at Greenwich, to which it is proposed to transfer the operations of the Company.

Both in Europe and America, as well as at home, the Blakely Ordnance is daily coming into more extensive use, and during the last six years large orders have been executed for Russia, Portugal, Italy, Egypt, Sweden, China and Japan, Morocco, Turkey, and several important States in North and South America, including the Confederate Government.

As an evidence of the remunerative character of this description of manufacture, it may be stated that the nett profits in the current year amount to nearly £60,000.

With the view of providing the increased capital which is requisite to carry on the manufacture on so large a scale, it is proposed to form a Limited Company, to be called "The Blakely Ordnance Company (Limited)." The services of Captain Blakely have been retained as Managing Director. The present efficient staff will also continue in office, as follows:—Josiah Vavasseur, Esq., C.E., Resident Engineer; Mr. Campbell (late of the Royal Laboratory, Woolwich), Superintendent of Laboratory and Shell Factory; Colonel Burnaby, Royal Artillery, Proof-master.

The Directors have entered into an agreement for the purchase of the existing leases, plant, premises, and goodwill for the sum of £225,000, payable by instalments over two years, and £150,000 in Debentures bearing £6 per cent. interest. In forming their estimate of the value of the plant, leases, fixtures, machinery, stock, and goodwill, the Directors have been guided by a valuation of the same by a competent engineer. The goodwill has been rated at two and a half years' purchase.

As an evidence of their confidence in the undertaking, the vendors have agreed to guarantee that the profits of the undertaking shall amount to a sum sufficient to pay a minimum dividend at the rate of £15 per cent. per annum for three years, on the paid-up Capital for the time being of the present issue of Shares.

As it has been considered impossible to estimate equitably the value of the patents, it has been agreed that they shall be transferred to the Company, the present Proprietor receiving £20 per cent. of the nett profits for the next seven years.

The Company will enter into possession of the Works in Southwark and Greenwich on the 30th of June instant, but will be entitled to the benefit of all contracts executed, and profits made, since the 30th June, 1864. The Vendors reserve to themselves the right of subscribing for one-third of the present issue of Shares.

A copy of the Memorandum and Articles of Association can be inspected at the Offices of the Solicitors, 43, Chancery-lane.

Prospectuses and Forms of Application for Shares can be obtained at the Offices of the Brokers of the Company, and of the Solicitors.

As some applicants may desire to take full advantage of the guaranteed dividend, by paying up their Shares in full, two Forms of Application are annexed, one for Ordinary Shares, and the other for Fully Paid-up Shares.

FORM OF APPLICATION FOR SHARES.

To the Directors of the BLAKELY ORDNANCE COMPANY (Limited).

Gentlemen,—Having paid to the Agra and Masterman's Bank the sum of £ , being £1 per Share on Shares, I request you to allot me Shares in the above Company, in conformity with the Prospectus issued by you, and I hereby agree to accept such Shares, or any less number that may be allotted to me, and to pay the further sum of £4 per Share due on allotment thereof, and the calls when due, and I request you to place my name on the Register of Shareholders for the Shares allotted to me.—I am, Gentleman, your obedient servant,

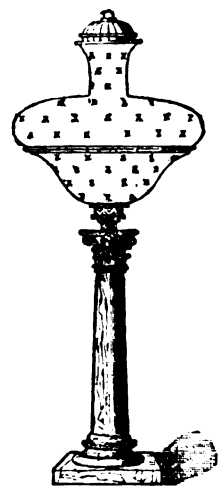
TUCKER AND SON'S

IMPROVED

ENAMELLED PUNKAH TABLE LAMPS.



THE celebrity which TUCKER AND SON'S LAMPS have acquired in the East for burning *steadily* under the Punkah or in side draughts, and *brilliantly* with any of the *coarse native oils*, renders eulogy unnecessary; but having been enabled, by increased facilities of manufacture, very considerably to *reduce the prices* of the above favourite (but hitherto expensive) description of their lamps, and Son beg to notify the fact to the Eastern public.

They are elegant and durable, are finished in exact imitation of many beautiful stones and marbles, such as Malachite, Lapis Lazuli, Serpentine, Sienna, Brocatella, Jasper, &c., and are not affected by heat, damp, friction, or insects; oil, spirits, or acids accidentally spilled. The enamel surface is so inseparable from the base (block slate, proverbial for its strength) that it cannot be removed except by an edged tool. It *requires* simply *dusting*, but if rubbed hard, it only adds a gloss to its appearance—at all times cool and agreeable.

After ten years' constant use and handling, these lamps are none the worse for wear.

Malachite (green), Serpentine (brown), or Lapis Lazuli (blue), are most re commended.

Table Lamp complete, with engraved glasses, as sketch, 72s.

A Plainer Lamp, without the Corinthian capital, 50s. complete.

Either pattern, with plain frosted glasses, 7s. 6d. each less.

*** *The above Lamps are supplied to burn Petroleum or Rock Oil also.*

Orders can be sent through any merchant or Agent, or, if accompanied ya remittance, direct to

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle, half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty, and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S OINTMENT AND PILLS have over and over again proved the best friends to persons afflicted with ulcerations, bad legs, sores, abscesses, fistulas, and other painful and complicated complaints. Printed and very plain directions for the application of this ointment are wrapped round each pot. Holloway's alterative Pills should be taken throughout the progress of the cure, to maintain the blood in a state of perfect purity, and to prevent the health of the whole body being jeopardised by the local ailment. Bad legs, old age's great grievance, are thus readily cured, without confining the patient to bed, or withdrawing him from the nutritious diet and generous support so imperatively demanded when weakening diseases attack advanced years or constitutions evincing premature decrepitude.

Sinclair, Mr. and Mrs. C Bradley, Mr. John Pitman. To Singapore: Mr. John Ross. From Suez.—To Singapore: Capt. and Mrs. Dana.

Per P. and O. steamer, from Southampton, July 4.—To Ceylon: Mr. W. Syme. To Singapore: Mr. Skinner.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Dates are to the 13th April. The London mail of the 10th February arrived out on the 6th April, but telegrams had been received bearing so late a date as March 4.

The Japanese Ministers for Foreign Affairs have addressed a protest to the representatives of the Treaty Powers, against allowing "subjects of non-Treaty Powers, such as Danes Chinese, Germans, Italians, and others," to reside on their property at the open ports. It would be the wish of the Japanese, they said, to send away individuals so established, if such a step would cause no difficulty in their relation with the Treaty representatives; but it was hoped that the latter would deliberate on the best method of solving the difficulty. The British Chargé d'Affaires, in reply, disclaimed power to deal with such a question, which he considered could only be decided by reference to the respective Governments; but he suggested that, in the meantime, foreigners so circumstanced who might be guilty of any offence, should be amenable to a Japanese tribunal, at which one or more Consuls should sit as assessors. Semi-official information had been received from the Japanese authorities of the arrest of a *samurai*, believed to be the second assassin of Major Baldwin and Lieut. Bird, of the 20th Regt., in November last. This person was captured along with others of a gang inimical to foreigners, who were undergoing examination before the Governor of Yedo.

The battery of the Royal Artillery which has been posted at Yokohama since August last, left on the 30th March in Her Majesty's steamer *Leopard*, carrying with them the good wishes of the community, which has had every reason to appreciate the excellent conduct of the men during their short sojourn, and with whom Lieut. Wood was a universal favourite. A half battery of artillery has been manned by a selection of the men of the 20th Regt., who have been for some time in training. They are under the command of Lieut. Barlow, and are esteemed to be well up to their new duty.

A considerable amount of excitement has been caused by the re-publication here of a very extraordinary letter written by the Hon. R. H. Pruyn, United States Minister Resident, and first published in the (New York) *Missionary Record*, which has come out mainly in consequence of the acquisition by that official of a most valuable piece of land in the settlement for "an American church" (whatever that may be), or for the Reformed Protestant Dutch Church, professed only by a very small portion of even American residents; and by further allegations of the "squeezing" by himself and the United States Consul of some enormous sums of extra exchanges as the expenses of their removal respectively from Yedo and Kanagawa. The *Japan Herald* stated that it was prepared with the proof of these allegations, and undertook to produce them if their truthfulness was challenged—but up to this time no attempt has been made to call them in question. We subjoin our contemporary's observations, which tell the whole story:—

The very extraordinary letter of the Hon. R. H. Pruyn, Minister of the United States of America, resident in this country, which we reproduced from the (New York) *Missionary Record* in our issue of the 18th ultimo, will, we doubt not, ere long attain a world-wide notoriety. We should feel fairly open to a charge of shirking a manifest duty were we to be ourselves entirely silent upon the subject, and shall therefore (acknowledging that we approach the task as a disagreeable one to be avoided as much as possible), touch lightly upon those heads of it which most prominently call for remark. We may first put ourselves right on one point. It has, we are aware, been asserted by the hon. gentleman that this letter was not written for publication. Finding that the New York *Missionary Record* has done him a disservice by the publication of it, he first gives that pious journal an unkind kick, saying he believes it is defunct; and then attributes any mischief which may be done, or any offence which may be given to anyone, by its publicity, to the fact that the *Japan Herald* has got hold of it and put it in print. This may be true enough, but there are two things herewith connected which are worthy of observation before he should endeavour to accuse us of mischief making. The *Missionary Record* is the avowed organ in New York of the Reformed Protestant Dutch Church, the interest of which, and the honour of the

Digitized by Google

members of which, are so much cared for by the proprietors of the paper, that it is removed from out of the danger of all influence from the predilition and bias of a poor erring editor, and, as it tells us in large letters under the title, it is "Published by the Board of Publication of the Reformed Protestant Dutch Church." Surely with such guarantee for caution and wisdom, nothing should be said against the good faith with which it may propagate the intelligence or communications it receives, and no fault could fairly be laid to our charge for gathering a sip from such a fountain after such filtration. Again, the hon. gentleman must know that, whether erroneous or not, a general impression holds that, so attached are diplomatists to the principle of non-committal, and so careful, therefore, never to put in black and white anything which may thereafter be inconveniently quoted against them, that it is generally very difficult to unravel the knots with which they will fasten the red tape around their most ordinary notes or correspondence; and that, therefore, when one does find the name of a Minister accredited to a foreign Court attached to a published document, that document is not only fair food for criticism, but its matter fitly accepted as statements or opinions, as the case may be, thrown out for the purpose of discussion. However, further talk on this is of no avail; the letters are published and republished, and, as we have said above, are now fairly on the high road to celebrity—or notoriety.

There is one remark made by the Hon. General Pruyn to which we must give our most unequivocal adherence:—

"Dissenters, and American Dissenters, would probably at this early stage of the movement be regarded as impertinent intruders on British ships of war, where the Church service is regularly read each Sabbath morning, and ample means of grace therefore duly provided by law."

And long may it be so, say we, for it would be but a sorry day for England's honour, or the world's peace, when any canting, hypocritical, superannuated field-preacher who could raise a suit of musty black, a white neck-tie, and a sanctimonious countenance, on ascending the side of a British man-of-war to show the Jacks his notions of how they should be saved, should be received in any other character than that of an "impertinent intruder"—or receive any other hospitality than a seat in the slush bucket, or any further entertainment than a game of "keel-hauling," in which he should be the principal performer. The very mischievous statement in the latter part of the paragraph commencing "Will not you and your people remember these seamen in your prayers" (which for motives of policy that will be understood we do not reprint conspicuously again here, should be now before the other Ministers Resident and Chargés d'Affaires in Japan; if it does not engage their attention, it certainly will not escape that of the Ministers of the countries having, and determined to maintain, amicable relations with Japan.

We then come to a paragraph which we think contains about as shameful a piece of libellous back biting as it was ever our ill-fortune to hear or read of. When we recollect that it comes from the pen of an Honourable Minister—accredited to a foreign country diplomatically to represent one of the noblest nations of the world—that he is a man of arms—high in rank—a General,—and that he levels his remarks at a man of peace, a minister ordained to service in a Christian Church, our indignation is with difficulty kept within bounds. Here is the precious morsel. (The italics here also are our own.)

"Mr. Richards had been here four months confined most of his time on shipboard, and a stranger. Though desirous of Christian intercourse and fellowship, he knew not where to go. He knew nothing of the presence of our Missionaries. *Though there is an Episcopal Chapel here, there was no one there by whom he could be benefited, or with whom he could associate.*"

Those who would stigmatise this further than we have done, and with another word still more unpleasant (which we have not added here, but yet is in our mind) will recollect that the only excuse which has been made for this effusion is, that it was never thought it would be published and reprinted here! We make it a rule never to enter upon any matters which may lead us into theological discussion; and are still more careful never to be drawn into any expressions as to the merits or demerits of those exercising ministerial functions in any section of the Church, and it is not for us to vindicate the British consular chaplain against the imputations conveyed in the above sentence. We presume, as he holds his office by appointment (and partly under pay) from the Foreign Office, it will be necessary for him, now that he is thus challenged by the United States Minister Resident, to show that to write and publish a statement that there is no one here connected with the Episcopal Church by whom spiritual benefit could be rendered to, or association held with, by a gunner on board one of H.B.M.'s gunboats, is an unfounded libel.

Throughout the former part of this letter there runs a tone of assumed humility and self-denial which strangely puzzles us when compared with the last paragraph, which seems to be—like the P.S. of a lady's letter—the whole gist of it.

"We have been favoured also as to temporalities. I succeeded on Monday in procuring from the Japanese Government the best lot in the place, 184 x 115, adjoining the Government warehouse, and first from the Hatoba or wharf, instead of one on the hill long promised but persistently withheld. The lot now granted is part of Commodore Perry's treaty ground and would sell to-day for $30,000. The Central Bank of Western India wishes to lease part of it. Should business continue as now, we can reserve enough for Church and parsonage, and support the entire Mission to Japan from the rent received for the balance."

Now, we should like to have one or two doubts which arise to our mind on reading these paragraphs set at rest. Who are the "we" who have been thus favoured as to "temporalities"—as they have been in "spiritualities?" Is it "these men among whom God's Spirit is now moving"—the Jacks of H.B.M's. Navy, the "two warrant officers and three seamen of the fleet," who have been connected in the chamber of the United States Minister, who have received this further manifestation of grace in the shape of "the best lot in the place, 184 x 115," which would sell for $30,000, and upon which the Central Bank has cast (as is said, but we doubt it) its avaricious eye? Fair play is a jewel all the world over, and if, as it turns out, and as we predicted when this land was first grasped, this is another application of the old Quaker's theory of land-titles—"The earth is the Lord's and the fulness thereof:—The Lord hath given his earth to his saints:—We are his saints:—Ergo—The land is ours." In this case, we say, the now satisfied British gunner, the two British warrant officers, and the three British seamen, upon the principle held up in the Parable of the Labourers in the Vineyard, although they have come late in the day, have clearly as much right, title and interest in every inch of the 184 x 115, as their fellow-saints who have borne the heat and burthen of the day;—and we only wish they may get it.

But we said at the time the obtaining of this piece of ground seemed very like a job, and a gross one: the letters of General Pruyn and the Rev. Mr. Brown, now published, certainly do not convince us of error in that opinion. But there are other views in which this should be regarded, besides the question of any jobbery, or even the interest of the American branch of the Reformed Protestant Dutch Church: How will the Japanese feel when they learn that they have been induced by a foreign Minister to give up, for the purpose of the erection of a building for a small sectarian body, "the best lot in the place," "which would sell to-day for $30,000," "a part only of which is required for a church and manse, the remainder of which might be used for stores and godowns, and which will rent at very high rates, on account of the excellence of the locality?" We hope they will accept the assurance of the American Minister and the Rev. Mr. Brown that they have (under error as they can show) granted, or agreed to grant, more land than required for the alleged purpose, and insist upon the recession of the balance, which they certainly never intended to grant for the purpose of being let to support a sectarian foreign religion in their own country.

Before quite concluding on this subject of jobberies, following the example of the American Minister, we will lift the veil which hitherto covered an abuse scarcely less vicious than the sale of foreign liquors to British tars; and expose a dark corner which will be none the worse for ventilation. We have before us as we write, a curious document which lets us into a few secrets as to how these operations are worked.

"EXCHANGES.

"For the year 1863, exchange of American Minister, $28 000—in this sum $18.000 for 6 months, from 7th month till 11th month, $3,000 for a M." $10,000 extra exchange on the Japanese month 8th, as the expense at the time when he removed from Yedo to this place."

"Exchange of American Consul." "$27.000, in above sum $12,000 from 1st Japanese month till 12th for 12 months ($1,000 per month), and $3,000 extra exchange as expense on the month of 6th, when he removed from Kanagawa to this place, and $12,000 for the same as above on the Japanese 7th month."

So it appears that the American Minister, residing privately, having no Legation building to keep up, and his whole staff consisting of a Secretary and Interpreter in one person, receives a monthly exchange of $3,000, at the rate of 300 itzibus for $100, which he can put in the market and sell at an average rate of say 240 per $100, and thus clear the tidy monthly income of say $750. This seems pretty handsome, and we should have imagined would have sufficed to have supported a Foreign Minister in Japan, who had no staff and no Legation to keep up, even supposing his own Government made him no

Digitized by Google

allowance; and that out of the accumulations of the profit of this he would be able to pay his ordinary personal expenses. But it appears not to be so in this case, for such was the condition of the American Minister in "Japanese month 8th," that he absolutely received from them the expenses of his removal from Yedo to this place, a boon which placed in his pocket another tidy sum of $2,500, more or less.; But not to be selfish, he secured a like advantage for his subordinate and friend, Colonel Geo. S. Fisher, the United States Consul, and besides the exchange of $1,000 per month (probably equivalent to a profit of $275 or $300), "on the month of the 6th," he obtained for him an amount of exchange which put, say, $750 more—and in the Japanese month, 7th, another exchange, which put another $3,000 in his pocket. And on what pretences were these grants obtained? As expenses for removal from Yedo and Kanagawa. We would undertake to find a man to remove the whole traps moved by the American Minister from Yedo to Kanagawa, for which he received from the Japanese Government an equivalent of $2,500, back to the spot from whence he transported them, for $50; and those of the United States Consul, from Kanagawa to Yokohama, for which he received say $3,750, for a like sum of $50, and that he would pocket a handsome profit by the transaction.

These statements will not be readily credited, but we hazard none such without proofs. Let those who dare, deny them, and challenge the proofs—they shall be produced.

We say emphatically it is time that this system of squeezing money, land, and everything else out of the Japanese should be stopped, or they will look upon foreigners, from the highest official down to the lowest "vendor of foreign liquors of every colour and mixture of adulteration," as a horde of insatiable interlopers. It is to men high in office—especially to those who profess to be "unco guid," that we should look for example against this rapacious thirst after the land and gold which is not ours, until we have fairly earned and honourably acquired it.

CHINA.

TIEN-TSIN.

(FROM AN OCCASIONAL CORRESPONDENT.)

As the Imperial Edicts of importance are forwarded at the rate of 200 miles a-day to the great cities of Central and Southern China, and the steamers that ply between Tien-tsin and Shanghai do not leave this port with the primary view of catching the earliest mail for Europe, or conveying the latest intelligence hence, you will probably have already heard from southern sources of the *coup d'etat* at Peking, which resulted in the degradation of Prince Kung, and the appointment of a commission, with Wansiang at its head, to undertake the duties which had previously devolved upon his Imperial Highness.

The charges brought against the Prince are detailed in an Edict of the 3rd April, and are of a very sweeping and general character. He is accused of "partiality, avarice, extortion, overbearing insolence, and ambitious usurpation in the discharge of his public duties, to such an extent as to be generally talked about." The Edict proceeds to say that though these grave charges cannot be proved satisfactorily, still, as they had been so publicly discussed, there must have been something in them; and whilst any deep scrutiny into the case is prohibited, the Prince is degraded from his position, and forbidden to take part in public affairs, with the intention of preventing his involving himself in greater trouble.

The promulgation of this Edict took us all by surprise here, and the removal of Prince Kung was looked upon as a triumph of the reactionary and anti-foreign party. And such it probably was, but the triumph has been shortlived, for news has reached us this evening of his reinstatement, and the excitement which has prevailed at Peking for the last fortnight has again subsided.

The present season at Tien-tsin, judging at least from the number of steamers that have arrived since the river opened last month, promises to be a busy one, though the trade is passing very much from the hands of foreigners, great quantities of goods being sent up here to Chinese merchants direct from their constituents in the South. The steamers that have come up the river, and anchored off the Foreign Settlement, since the 11th of last month when the season opened, are the "*Yuentzefei*" (twice), *Gerard*, *Sir Harry Parkes*, *Yeddo* (twice), *Vulcan*, *Kinlin*, *Island Queen*, *Promise* (three times), *City of Nantes*, *Yesso*, *Nanzing* (twice), and *Confuscius*. This last-named steamer belongs to the Chinese Government, and came up with a portion of the tribute rice, the conveyance of which will bring a large number of junks to Tien-tsin this year.

We have had a daring robbery perpetrated some days since, between this and Taku, by armed and mounted brigands, who looted a large pawnshop in one of the towns; seventeen of the robbers have been captured, and are now in the district magistrate's hands. They are all, I believe, to be beheaded, and their heads exposed near the spot where the crime was committed. In the south of this province also, the *Nien fei*, or local banditti, are again troublesome, and are in such strong force near the city of Taming-fu, that a large body of European-drilled Chinese soldiers has been sent against them. The *Nien fei* are now an institution in the provinces of Shantung and Chili, and their annual re-appearance in armed hordes is only one of the many symptons of the weakness and corruption of the Manchu Tartar Government. Many people think that if our troops are altogether withdrawn from Taku, as it is reported they will be this summer, we may have an opportunity of observing the habits of the *Nien fei* at a nearer distance than at present.

The American Minister, Mr. Anson Burlinghame, has left for Shanghai, *en route*, they say, for the States; and General Ward, about whose mode of travelling to Peking the British Parliament were so inquisitive some years ago, passed through Tien-tsin a few days since to visit the capital; but I don't think that he went this time in "one of the carriages of the country."

Mr. Mongan resumed his duties here as Consul on the 1st inst.; and Mr. Lay, who has been appointed Vice-consul at Taku, has meanwhile gone to Chefoo to take temporary charge of that port. Mr. Meadows remains at New-chwang, and is not going home on leave as was reported.

SHANGHAI.

The present mail brings dates to the morning of the 23rd April. Nothing of any note had transpired since the French mail left.

The *London and China Express* of the 27th Feb., in the absence of other matter, had been specially attacked by the *Friend of China*, but we fear the reproofs administered will be entirely lost upon us.

The following, on the affairs of the Municipal Council, is from the *North China Herald*:—

The large deficit shown by the statement of Municipal accounts for the past year, sufficiently indicates the necessity for the economy on which Mr. Hogg insisted at the last meeting of Land Renters. The falling off in anticipated revenue accounts to a certain extent for the disagreeable result exhibited; but still there has been a large expenditure in excess of the outlay of Tls. 221,000 which was authorised at the meeting of Land Renters held on the 19th August last. Even had this limit been adhered to, the financial situation of the Council would have been sufficiently unpleasant, as a deficit of Tls. 3,000 would still have existed after the savings bank deposit fund and every other available dollar had been paid away in liquidation of claims. But, from sheer inability, we presume, to confine the expenditure to this sum, additional liabilities were incurred, to meet which the Council had only a failing income to rely upon. Deprived of the fictitious adjuncts so unmercifully exposed by Mr. Hanbury, the Municipal accounts show taels 180,000 only to have been received during the year; while of the taels 236,000 which have been expended, some taels 20,000 will have to be refunded to the Agra Bank and the Savings Bank and Tavern depositors, who unwittingly contributed towards the defrayal of Municipal bills. For the unsatisfactory state of the accounts which they had to lay before the Land Renters the Council, as we have already pointed out, are to blame only to the extent of taels 15,000, by which sum they have exceeded the outlay sanctioned, and the revenue which was accorded them when the budget for 1864-5 was finally decided on. Had that limit been adhered to, the loan from the Agra Bank would not have been required, and the savings of the police need only have been partially trenched on. For this excess of the power awarded them, they have been unsparingly censured. The epithets of wasteful extravagance and useless expenditure have been freely applied to their proceedings. We sincerely hope that the incoming Council may not find the demands on the Municipal purse so pressing that a contraction of the strings will prove impossible. Amidst much that is unsatisfactory in Municipal finance for the past year, there is at least one gratifying point,

Digitized by Google

namely, the firmness of the Chinese house-tax. This important resource of revenue yielded 54 taels more than was anticipated; so we may fairly assume that the drain of Chinese from the settlement, which ensued after the capture of Soochow and Nanking, has at length ceased, and that the income during 1865-6 will be rather in excess of than under the Tls. 50,000 estimated. Before finally turning from financial questions to the other equally interesting points raised by the Council's report and by speakers at the meeting, the statement of defaulters for the past year claims a moment's notice. Much discussion arose in reference to the amount of Tls. 3,662.60 which stood at the head of the list to the debit of the British Consulate; and it will, we think, be generally admitted that the claimants of this sum had the best of the argument. The objection that the land had not, like that belonging to private individuals, a marketable value, was shattered to fragments by an apt quotation of Mr. Medhurst's unfortunate sale of a large portion of it for 100,000 tls.; and the subsequent remark that the community contributed nothing towards the support of an establishment from which it derived so much benefit, equally lacks point. In the first place, the principle has not yet been laid down that British communities abroad shall support their consulates; and in the second, the British Consulate at Shanghai does contribute very largely towards its own expenses out of the fees it receives. From a regard for the dignity of other Governments, therefore, as well as for the welfare of the Municipal purse, we would gladly see the sum in question wiped from the prominent position it now occupies on the defaulters' list.

At Hankow all is quiet. Our advices from Kiukiang are to the 18th April. The braves were still passing through the place on their way to the North, but there had been no murders of late. The annual races had just come off, and the prizes were divided with the Hankow community. An Alpine Club has been formed, and held its first meeting lately on the summit of the mountain behind the settlement, said to be 5,000 feet high, and very difficult of ascent. Municipal matters are making satisfactory progress; the hot weather has set in—thermometer at 80 degrees.

On Easter Monday, says the *Recorder*, the Shanghai Volunteers were entertained by W. Keswick, Esq., at his summer residence, Woosung, to a grand banquet. Among the guests present we noticed H.B.M.'s Consul, Sir Harry Parkes, Colonel Yonge, 67th Regt., and a number of the *elite* of Shanghai; the day was beautifully fine for the occasion, and one looked forward to, in England, as a day especially set apart for Volunteer field exercise and review. Including a large number of ladies, about 200 guests sat down; and all were delighted with the day's entertainment and Mr. Keswick's hospitality. A great cricket match came off at the Shanghai Club's ground on Tuesday, 12th inst., between the Scotch Eleven, and an Eleven chosen from the English members. Our Caledonian friends came off second best, leaving the English eleven victors by 76 runs in one innings against the Scotch two.

The approaching race meeting is not looked forward to with the usual amount of interest the dulness of the times having apparently extended itself to sporting as well as to business matters. There has been little betting; and a feeling adverse to lotteries and sweepstakes has been manifested among many influential members of the community.

The following mercantile notices have appeared:—

We have this day established ourselves in business at this port as Merchants and General Commission Agents, under the style and firm of Ballance and Hallam.—T. Frederick Ballance, J. B. Hallam. Hankow, April 1st, 1865.

We have this day established ourselves in business at this port as General and Commission Agents, under the style and firm of Rainbow, Lewis and Co.—J. M. Rainbow, G. Lewis. Nagasaki, March 1st, 1865.

The ship *Talbot*, Captain James, has been chartered to convey the Royal Artillery to Bombay.

KIU-KIANG.

The following is a more detailed account of a meeting to which we alluded in a previous issue:—

P. J. Hughes, Esq., H.B.M.'s Consul, in the chair.

Present: Messrs. Hollingworth, Sams, Priee, Rainbow, Styan, Lenny, Hancock, Lovell, Ringer, Little, Mackintosh, and Hyde, representing eighteen renters, and others not renters.

The minutes of the last meeting having been read, Mr. Hollingworth presented the committee's report, and all accounts for the past year.

It was proposed by Mr. Styan, seconded by Mr. Ringer, and carried unanimously,

"That the accounts be passed."

After some discussion upon the subject of the committee's report, Mr. Little proposed,

"That the report just read be adopted, but that the proposed taxation scheme, extension of the bund, and arrangement of station-house be reserved for discussion at a special meeting to be called for that purpose, and of which due notice be given."

The resolution was seconded by Mr. Hyde, and carried by a majority of 10 to 8.

Mr. Sams proposed, and Mr Styan seconded,

"That Messrs. Hancock and Price be elected, and that Mr. Hollingworth be re-elected, members of the Municipal Council."

The resolution was carried.

On the motion of Mr. Ringer, seconded by Mr. Rainbow, a vote of thanks was given to the retiring Council.

A vote of thanks to the Chairman terminated the proceedings.

(Signed) P. J. HUGHES, Chairman.
(Signed) GEO. P. THOMSON, Secretary.

The report announced the completion of the repair of that portion of the bund line damaged by the gales last summer, and the payment of an instalment of the cost. A terrace had also been constructed which, by encouraging deposit, would, it was hoped, strengthen the bund. The wooden jetties had stood well, and sustained no apparent damage from their long immersion. A stone jetty had, however, been destroyed by the gale. The two principal roads have been raised, macadamised and shingled, at a cost of some tls. 1,500. Eighteen lamp-posts have been erected, which light the settlement satisfactorily. Some burners were stolen, it was suspected, by native gunboat men, and pressure upon the authorities was successful in eliciting tls. 150 in compensation. Drainage is still in abeyance, but is much required. Two tracks of land had been bought to enable the middle and cross roads to be continued to the native suburbs. Arrangements have been made for the extension of the bund in front of Messrs. Augustine Heard and Co.'s property. An inspector of police has been engaged, and arrangements will be necessary for a new station-house. The Council consider that the time has arrived when some system of taxation should be settled. Hitherto expenses have been met by calls of such a plot, but now that expenses have became diverse, a more equitable arrangement should be decided on. It is suggested that a tax of 3 per cent. be raised on rentals and ¼ per cent. on land. Valuing the rentals at tls. 33,000 and the land at tls. 210,000 a revenue of tls. 2,040 would thus be raised. The amount realised last year amounted to a trifle less than tls. 7,000, the expenditure to tls. 7,164.09.

HONG KONG.

The present mail brings dates down to the 29th April, or three days later than the French mail. The items of news during these three days appear to be *nil*.

The following on the rebellion is from the *China Mail*:—

"The last news from Amoy, if all rumours are correct, would seem to indicate the coming close of a civil war in China, which has lasted so long that few foreigners now resident in this part of the East saw its commencement. To trace the history of the Taiping rebellion would be a useless task. We said, ten years ago, that its success would neither benefit China nor Christendom, and we have had no reason to change our original views on the matter. The first to espouse the rebel cause and the last to abjure it were the Protestant missionaries, a circumstance that has probably had the greatest possible influence in the destinies of the present Chinese dynasty. There cannot be any doubt but that, had the rebels proclaimed themselves in favour of the Roman Catholic religion, the French Emperor would have declared a crusade in their favour, which would only have ended when China had become French territory. If the Taipings had raised the standard of the cross, and planted it in triumph upon every captured city, not France alone, but Catholic Europe would have answered the call of a second Peter the Hermit, as it sounded from the Tuileries or the Vatican. The eldest son of the Church would have commanded the sword to be unsheathed in her favour, and Christianity would have been, in a few years, the national religion of China, The Pope would have been called in to bless every fresh expedition sent to free his oppressed children; people's heads would have been turned with religious enthusiasm; English diplomatic action would have been brushed aside like a cobweb; a second India would have been laid open to the enterprise of a great military power, under the holiest of all sanctions; and that little clause in the Franco-Chinese treaty which places Roman Catholic Christians under a kind of French protection would have become a trump card, would have acquired the force of a pawn transformed into a queen.

A fire took place on board the *Jane Woodburn* which is thus reported in the *Daily Press*:—

Digitized by Google

"April 27th. The British barque *Jane Woodburn*, Capt. Harrison, ready for sea and bound to Rangoon, caught fire in the cabins on starboard-side aft. No cause for the calamity can be shown—the crew were, its is said, stowing some provisions in the cabin an hour before the fire broke out. The mizen mast, mizen boom, all the spare sails, the spanker (bent), the whole of the personal property of the captain, his officers, and the carpenter (including the latter's tool chest), cabin furniture and many planks in the quarter-deck will have to be replaced. Boats from H.M.S. *Melville, Princess Charlotte*, the dockyard, and Messrs. Boura and Co.'s water boat—fire engineer from the P. and O. S. N. Co.'s office, and their ships *Ganges* and *Emeu* were quickly on board with fire-engines, and the surrounding ships, &c., lent valuable aid in sending their boats full of men to assist in putting the fire out, which was accomplished after the magazine had blown up (luckily without hurting any one), though many men on board, fearing something worse after the first explosion, dropped overboard out of the way.

NETHERLANDS INDIA.

MACASSAR.

The Netherlands India barque *Susanna Elizabeth*, Captain Van der Heide, reported here on the 24th March that there were pirates in the Straits of Macassar, close to Pulo South, on the south-east coast of Borneo. The report was found to be correct, for news was received from Takalar, the chief place of the southern district, that eight large and four small piratical boats had been off that place and had captured one trading prow and two men. When H.M.'s steamer *Sindore*, Commandant K. F. R. Andrew, lieutenant in the navy, returned from Tomtoli on March 31, she was ordered to be in immediate readiness. Subsequently, the extra courier of Djeneponts brought news that the pirates had shown themselves in Macassar Bay, On the 2nd April, early in the morning, the *Sindore* got up steam. and proceeded towards the place. Some firing was heard in the afternoon in that direction. The pirates had shown themselves also close to Bontheim, but it was believed that the *Sindore* had not fallen in with them. A boat belonging to a native had been captured, which, with its cargo, was valued at 10,000 florins.

STRAITS OF MALACCA.

SINGAPORE.

Dates are to the 6th May, only two days later than those brought by the French mail.

Some idea may be formed of the business transacted at this port, remarks the *Free Press*, when we state that at this moment there are lying in the roads, besides native craft, 154 square-rigged vessels, of which 3 are British men of war; 2 Straits Government steamers; 2 British merchant steamers; 2 American ditto; 2 Dutch mail steamers; 78 British merchantmen; 19 Hamburg; 9 Bremen; 8 French; 5 Danish; 5 Prussian; 4 American; 4 Dutch; 3 Oldenburgh; 2 Hanoverian; 2 Swedish; 2 Siamese; 1 Norwegian; 1 Belgian. Of the merchant vessels those under German flags are in proportion as one to two to the British: and to two to one to vessels of all other nationalities. Eight years ago at the same season there were only sixty merchant vessels in the harbour, the proportion being as one German to eleven British, and one German to eight of other nations. So much for free trade and Tuetonic enterprise. We should not be at all surprised, in a few years hence, to see the proportion still more in their favour.

PENANG.

Colonel Kitson will officiate as Resident Councillor during the absence of Colonel Man from Penang. This arrangement has taken place through the illness of Mr. Earl, the Assistant Resident Councillor, who has been confined to his house for the last fortnight, and has been obliged to appoint Mr. D. C. Presgrave as his substitute in the Police Court. It is reported that Mr. Earl will remove to Singapore on account of his health, and that his place will be filled by Mr. F. H. Gottlieb, one of the Singapore magistrates.

The Hon. Colonel Man arrived from Singapore on the 6th May.

Mr. D. Logan is appointed Crown Prosecutor for the station of Prince of Wales's Island.

It is seldom that our harbour is so crowded with vessels as t present (states the *Gazette* of the 6th of May). Ships are ocking here from all quarters in search of freight; rates, owever, being very low, several ships are laying up for more avourable times. Several ships have already been sold, and there are negotiations for the purchase of others. The last vessel sold was the *Buenos Ayres*, bought by Mr. Mahomed Noordin, who has altered her name to that of *Forbes Scott Brown*.

On the 26th April, the Penang Royal Dramatic Corps gave another representation, on which occasion they acted the farce of "Lend me Five Shillings," winding up the entertainment with several comic and sentimental songs. The management was rather rich in pianists on the occasion: there were no less than three, Messrs. Von der Meden, Zanders, and J. Anthony; this promises well for future concerts. The Dramatic Corps seems now to be pretty well established, thanks to the very able management of Lieut. Yaldwyn.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

HAZELAND—On the 25th April, at the Albany, Hong Kong, the wife of F. I. Hazeland, Crown Solicitor, of a daughter.

HALLILEY—On the 13th June, at Bedford, the wife of William Hallilcy, Esq., C.C.S., Collector of Customs, Point de Galle, Ceylon, of a daughter.

SEVERS—On the 13th June, at Woodlands-road, Redhill, the wife of Henry H. Severs, Esq., of a son.

MARRIAGES.

HUGHES—ROBINSON.—On the 13th June, at St. James's, Spanish-place, by the Right Rev. Dr. Morris, Bishop of Troy. John Hughes, Esq., of Yokohama, Japan, to Jane, eldest daughter of the late Harrison Robinson, Esq., of Anwick, Lincolnshire. No cards.

DEATHS.

BUTLER—On the 21st April, at Ningpo, from the effects of a pistol-shot wound in the abdomen, inflicted four days before by a Frenchman in the pay of the Chinese Government, John Butler, native of New York, U.S.A., aged 32 years, [many years resident in Shanghai, and highly respected by all who knew him.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—CANTON.—During the fortnight the remaining chop of country Congou has been taken, in conjunction with a Canton packed Congou, at the proportionate price of 17 taels, being about equivalent to former settlements. Country Greens have not been touched during the fortnight, but several bids are reported outside. Canton-made Teas: A few old season's teas of low grade have been taken, but attention is now being directed to the new season's teas, for which the teamen are at present asking about five taels above foreigners' ideas for the Scented kinds. Gunpowders have hardly yet been looked at—the only settlements have been some 1,400 boxes Sychue Congou at from Tls. 33 to 36.5.

FOOCHOW.—There have been no transactions during the fortnight, and arrivals, settlements and stocks need hardly be repeated until the season is closed.

SHANGHAI.—Black Teas: There have been no settlements or shipments of Congou during the fortnight, and without any arrivals to report, the stock remains as last stated (3,500 chests). We quote Ningchow and Oopacks, medium to good, none. Oonams, medium to good, taels 21 to 24. Fair Black Leaf, tls. 16 to 20 per picul. Total settlements and shipments: From 1st June to date, 381,600 chests, against 393,921 chests last year. Green Teas: The market has continued active, 22,000 packages having found buyers chiefly for America, at a decline of one tael on common and medium grades; but good and fine Moyunes being scarce have realised previous rates. Settlements comprise, common to fair Fychows, at tls. 21 to 28, and fair to fine Moyunes at taels 29 to 36½ in proportion. Re-shipments have been4,500 half-chests, and the stock is estimated at 61,000 packages. Total settlements and shipments: From 1st June to date, 293,600 half-chests, against 303,800 half-chests last year.

HANKOW.—One chop of Black Tea has gone forward on Chinese account, leaving two small parcels of half chests on the market. Total settlements and shipments: 373,000 chests or 37,405,900 lbs. against 362,200 chests or 35,320,700 lbs. last year.

KIUKIANG.—Green Teas: Shipments on native account have continued largely in excess of the settlements, the latter amounting only to 7,000 packages against 40,000 of the former. Fine teas chiefly had been taken, and for these an advance amounting to about one tael had been paid. The stock on the market was reduced to 40,000 packages, nearly all common and medium teas. Quotations were—Moyne: Fine to finest, Tls. 29 to 32; Common to medium, Tls. 33 to 27 per picul. Fychow, medium to fair, Tls. 23 to 25; common, Tls. 19 to 22 per picul. Total settlements and shipments, 186,000 half-chests or 10,884,900 lbs., against 217,600 half-chests or 12,675,100 lbs. last year. Black Teas: In these there was again no business to report, and no change in quotations, which remained—Ningchow, common, Tls. 16. Hohow, common, Tls. 12 per picul. Total settlements and shipments, 110,900 chests or 9,675,800 lbs., against 111,600 chests or 9,732,200 lbs. last year.

YOKOHAMA.—During the past fortnight a good business has been done in our tea market; purchases (with but a few exceptions) have been, as before, almost entirely for the American market; the bad news, repeatedly received by every mail, of the home markets most effectually deterring would be purchasers from shipping to that quarter to any but a very trifling extent. Prices remain much the same, with the exception of common kinds, for which higher rates are demanded. Settlements for the fortnight we estimate at 2,200 piculs.

RAW SILK.—SHANGHAI.—Early in the fortnight the dealers remained firm for previous quotations, but since the arrival of the English mail of 27th February, conveying unsatisfactory advices of the home market, they have been more anxious to realise, and now appear willing sellers and ready to submit to a decline. The miserable selection of silk in stock, as well as the present high prices, have prevented operations, and the settlements since last mail have barely amounted to 100 bales. There is nothing left unsold better than No. 4 Tsatlees and No. 3 Taysaam; the

Digitized by Google

bulk is, however, chiefly composed of inferior silk. The stock remains unchanged, the receipts from the interior having been in the same proportion as the sales. The Yokohama mail steamer arrived on the 20th instant with 392 bales of silk on board. Prices there had further advanced $30 to 50 per picul;—best hanks of Mybash costing $740 to 755, or 30s. 10d. to 31s. 5d. per lb. Stock was estimated at 550 piculs, or 1,000 Japanese bales. Export to date 12,475 bales, against at same date last year 13,906 bales. The settlements of the fortnight are estimated at 100 bales, against 582 bales corresponding fortnight last season, 371 bales, and 2,500 bales in the seasons previous respectively. The present stock is 100 to 200 bales, against 3,000 in corresponding period last season, 1,000 and 2,000 bales respectively the seasons previous.

YOKOHAMA.—Business in silk has been quiet, the late extreme price here, as well as the rather unfavourable advices by the 10th of February mail, having had the effect of considerably checking the demand. The native dealers are, however, exhibiting much firmness, and our quotations below are nominally without alteration; but should the reserve of the buyers continue for some time longer, a greater or less reduction may be reasonably anticipated. The settlements of the fortnight are barely 400 bales, making a total for the season of 12,950 bales against 14,150 bales the same time last year. The unsold stock on the market is about 800 Japanese bales:—Ida, medium, 710 to 730; inferior, 670 to 690. Mybash and Sinchu—best parcels offering, 740 to 755; medium, 710 to 730; inferior, 680 to 690.

DRUGS, &c.—CANTON.—Cassia Lignea: The new crop is shortly expected; the old stock is apparently exhausted. Cassia Buds: The quotation is $51; stock, 45 pls.; sales and quotations being far higher than those at Macao. China Galls: Quotation, $16, sales none; stock, 200 pls. Vermilion: Small sales at $38½ per box. Musk: No supplies, no settlements. Rhubarb: Nothing doing; the old and common stock remains neglected. Galangal: $2.30 nominal, the article being much cheaper at Macao. Essential Oils: None brought to market.

COTTON.—The quotations at Shanghai are 14 to 15 tls. Stock, small. At Japan the quotations are nominal, the export having ceased.

CAMPHOR.—Sales at Hong Kong at $20 for first chop.

CHINA IMPORTS.

COTTON YARN.—The sales of the fortnight consist of 112 bales, one half of which is composed of twist imported from Singapore. Quotations remain nominally unchanged. Grey Shirtings: The quotations of goods weighing lbs. 7, being the quality of which stocks are now principally composed, are put about 10 cents per piece below the prices given under date of last circular. In other kinds there is not any change to notice, and settlements are limited to 1,800 pieces. White Shirtings meet with but little inquiry, and prices are nearly nominal. Sales, 1,100 pieces. T-Cloths: There has not been a single transaction in these manufactures reported since the date of last circular, and prices are nominally unchanged. American Drills: No stocks and no sales. White Spotted Shirtings, Dyed do., Brocades, White and Coloured: These articles have been entirely neglected during the fortnight in this market, but from Canton we hear of a sale of 500 pieces White Spotted Shirtings at $5 per piece. A sale of 500 pieces of Coloured Brocades has been reported this morning. Damasks meet with no inquiry. Chintzes: 950 pieces have found buyers during the fortnight. Handkerchiefs: There have not been any sales of these goods reported.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths: Have been in hardly any request during the fortnight, and sales are limited to 300 pieces of Habit Cloths at $1.02 per yard. Long Ells: There have not been any sales of these goods reported, and in the absence of transactions quotations show a nominal decline of 10 to 15 cents per piece upon the prices previously ruling. Camlets: Without any change to notice in value have found buyers in this market to the extent of 260 pieces. Lastings: 100 pieces have found buyers. Blankets: Have met with a fair amount of inquiry, and the sales reported during the past fortnight amount to 468 pairs.

METALS.—Iron, Flat, &c.: The various descriptions of Iron enumerated show but little change in value, and have met with a brisk demand during the fortnight. The sales reported consist of 4,160 piculs of Nail Rod, 2,100 piculs of Square and Flat Bar, and 840 piculs of Hoop. There are not any transactions reported from Canton. Lead: Without alteration to notice in price has met with but little inquiry, and the sales of the fortnight are embraced in the settlement of 500 piculs. In the Canton market 1,800 piculs have found buyers. Tin: Sales during the fortnight are estimated at 1,570 slabs. Tin-Plates: Have found buyers to the extent of 230 boxes.

COALS.—HONG KONG.—A new feature is observable in our market, viz., the absence of arrivals of any English or Welsh coals for sale for upwards of a month. This added to the limited shipments of late from England and Wales will doubtless ere long bring about an improvement in prices, but the demand has not yet set in strongly enough to have any effect upon stocks or upon the price of coals from store. We still quote Welsh, $7½ to $8, English, $7 to $7½, Australian, $4¼ to $4½, at which prices the Devonshire's and Eberdhard's cargoes of Australian have changed hands from alongside.

SHANGHAI.—The only arrival of the fortnight has been a cargo of Sydney coals. During the greater part of the fortnight very few sales were made, but at the close there was an active demand for English coals and 6,000 to 8,000 tons of West Hartley have changed hands at prices varying from tls. 6.7.5 to 8.0.0 per ton ex Godown, and a cargo has been sold to arrive at the latter figure. A cargo of Cardiff coals to arrive is reported sold at tls. 9.0.0 per ton, and sales of American Anthracite, have been made ex ship at tls. 8.80 to 9.0.0, but this description is in least request. Sydney coals, tls. 6.0.0 to 7.0.0; none in stock.

SHIPPING INTELLIGENCE.

ARRIVALS.

At NAGASAKI.—From London: March 13, Dwina.
At SHANGHAI.—None.
At FOOCHOW.—None.
At HONG KONG.—From London: April 25, Arab Steed. From Newcastle: 18, Migrator. From Cardiff: 24, Typhoon.
At MANILA.—None.
At SINGAPORE.—From London: April 30, Norfolk. From Liverpool: May 3, Wm. Chandler, Advance. From Southampton: April 28, Benvoirlich. From Cardiff: 30, Satellite, Ocean Belle. From Newcastle: Preciosa. From Shields: Hollandria. From Hamburg: Laura.
At PENANG.—None.

DEPARTURES.

From YOKOHAMA and NAGASAKI.—None.
From SHANGHAI.—For London: April 10, Antipodes. For New York: 13, Canvas Back; 21st, Egmont.
From FOO-CHOW.—None.
From HONG KONG and CANTON.—For London: April 17, Broadwater.
From MANILA.—For London: April 8, Indien; 10, Sir W. F. Williams; 11, Osprey; 18, Alvis. For New York: 18, Young America. For Boston: 10, Hazard; 11, Wild Rover.
From SINGAPORE.—For Liverpool: April 26, Veloz.
From PENANG.—For London: April 26, Britannia.

VESSELS LOADING.

At YOKOHAMA.—For London: Mirage.
At SHANGHAI.—For London: Cissy. For Liverpool: Lalla Rookh, Wm. Melhuish, Woosung.
At FOOCHOW.—None.
At HONG KONG and CANTON.—For London: Banda, Pakwan, Burdwan. For Liverpool: Vanda.
At MANILA.—For London: Vorsetzen, Westburn. For Liverpool: Raby Castle, Tewkesbury. For Havre: St. Esprit. For New York: Bavaria. For Boston: Conquest.
At SINGAPORE.—For London: Clarendon, West, Fortitude, Martin Luther, Civiale. For Liverpool: William Dixon, Richard Cobden. For Bordeaux: Robur. For Falmouth: Ida, for orders.
At PENANG.—For London: Caroline, E. Castle.

FREIGHTS AND CHARTERS.

YOKOHAMA.—Tea and cotton, £3 to London and Liverpool: silk, £4. 10s. per ton.

SHANGHAI.—There has been some improvement in the market, and vessels have found ready employment for coasting purpozes, but no settlements have taken place for home. The two vessels on the berth for London are loading at £2. 10s. to £2. 15s., and for Liverpool at £2. 7s. 6. to £2. 10s.

FOOCHOW.—Nothing doing.

HONG KONG AND CANTON.—The demand for tonnage has been good, but without an improvement in rates, the market plentifully supplied with tonnage. Nothing has been done in home charters. The vessels on the berth for London and Liverpool are filling up slowly at £3; to New York, £2.

MANILA.—The British ship Raby Castle has been chartered to load via Cebu for Liverpool with unclayed sugar at £2 and hemp at £4 per ton of 20 cwt. For the Tewkesbury to same port, 200 tons of coffee has been engaged to complete cargo at £3 per ton of 18 cwt. The American ship Conquest loads for Boston with hemp on owners account. Hamburg barque Vorsetzen for London rates not yet settled.

SINGAPORE.—Seeking vessels continue to arrive, and rates have further declined, viz., dead weight 30s., and measurement £2 per ton.

PENANG.—The Bremen ship Caroline is loading at £2 to £2. 10s. per ton for dead weight, £2. 5s. to £2. 15. light freight, £3. 10s. measurement, and 3½d. per gallon rum.

CASUALTIES.

NEWCHWANG.—The British barque Durban has been wrecked off the port of Newchwang; a survey has been held, and the ship condemned.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—April 17, Hybhow, London to Shanghai; 21, Taiping, London to Hong Kong; 28, Scotland, Glasgow to Batavia; 17, Libra, Amsterdam to Kanagawa.

From UNITED STATES to CHINA, &c.—April 12, Brewster, Boston to Batavia.

From CHINA, &c., to ENGLAND and CONTINENT.—April 11, Falco, Singapore to Gibraltar; 17, Stuart Wortley, Shanghai to Liverpool; 18, Indien, Manila to London; 21, Maiden Queen, Foochow to London; 24, Phillipins, Canton to London; 24, Prince Arthur, Hong Kong to Liverpool; Agamemnon, Shanghai to Liverpool.

From CHINA, &c., to UNITED STATES.—April 23, Resolute, Shanghai to New York; 25, Wild Beaver, Manila to Boston.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.

Literature.

The Russians in Central Asia, by Capt. Valikhanoff, M. Veninkoff, and other Russian Travellers; translated from the Russian by JOHN and ROBERT MICHELL. Stanford, Charing-cross.—This volume supplies a want felt alike by the political and the reading world in a far more satisfactory fashion than could reasonably have been hoped for. The information desired could be furnished only by Russians or agents in Russian employ; and yet, as emanating from such a fountain, it would always have been looked on with suspicion. With the exception, perhaps, of Chapter XII., "On the Commercial Prospects of Central Asia, viewed in Connection with Russia," we cannot but feel, after an attentive perusal, that the translators were justified in stating, as they do in the Preface, that, "as the work of geographers and men of science, these narratives and descriptions have been executed with impartiality and without any political object." A complete idea of the gap filled up in the department of history, through the labours of the Messrs. Michell, can only be gathered by reference to the book itself, for the title-page is unjust to the novelty and interest of its contents. Even the daily journals have begun to look on Central Asia as a domain brought regularly within their circle; and we are getting accustomed to hear of "wars and rumours of wars" in countries and among tribes who really needed a geographical Master of the Ceremonies for their introduction before the mere newspaper reader could be expected to acknowledge any curiosity in their doings, or even to recognise their existence. The collection of papers comprised in the book before us gives all the story of the past that is necessary for the comprehension of what is now going forward in Kokan, in Dzungaria, and in that Chinese Turkestan where a Mahometan rebellion, to which we now have constant references, has been chronic for the last half century. The general ignorance on such matters is, however, perfectly excusable, for we learn, on no less competent authority than that of the late Mr. Hume Greenfield, who but just prior to his decease wrote the valuable Introduction to this volume, that "the historic period" of this vast area "commences only within the last ten years." Not but that much of this knowledge should have been at our command had what was fairly ours by right of purchase been properly cared for. The Russian Government have, it appears, a most magnificent manuscript, in the German language, accompanied by forty sketches of the country traversed, of "Travels through Upper Asia, from Kashgar, Tashbalyk, Bolor, Badakshan, Vakhan, Kokan, Turkestan, to the Kirghis Steppe, and back to Cashmere, through Samarcand and Yarkend." The author, it is inferred from the preface, and from certain observations in the narrative, was a German, an agent of the East India Company, despatched, at the beginning of this or the latter part of the last century, to purchase horses for the British army. The text, we learn further, has also been translated into French in a separate manuscript, and the maps worked into one itinerary in an admirable style. We may conclude, then, that the manuscript was offered to Napoleon I. before it was tendered to Russia. Pains have been taken to prevent the identification of this agent, for though his christian name remains on the manuscript, the surname has been erased. This little anecdote of years long gone by should be a caution against the employment of foreign agents for missions of exploration that, to say the least, could be as well discharged by Englishmen—a caution that we fear has been much neglected of late years.

The advances of Russia towards a permanent occupation of the Steppe that stretches eastwards to Khiva and Kokan date so recently as 1833; but since then her progress has been rapid, though it was only in 1840 that reliable accounts were received respecting the Sea of Aral, where she now has a steam flotilla. The first official intercourse with Khiva is recorded as belonging to the year 1557, and political relations may be said to have subsisted since the latter part of the 17th century. The *Moscow Journal* of April, 1703, notified that the Khan of Khiva had sent to tender the allegiance of himself and his subjects to Peter the Great, and that "our Sovereign Lord graciously granted" his request. For all that, however, Prince Bekovich, an envoy from the Czar, was murdered with all his attendants in 1717, at Porsu, a town about seventy miles north-west of Khiva. When the time comes Khiva must and no doubt will be annexed, but at present the main object of Russia is the conquest of Kokan. She has been pushing her posts from the Sea of Aral along the Syr-Daria (the ancient Jaxartes) till, we are told Russia thus occupies an almost barren extent of country along the Syr-Daria; while between Djulek and Fort Vernoe extends the northern part of the Khanat of Kokan, celebrated for its beautiful climate, fertility of soil, and rich tracts of land.

If we may believe accounts received during the present year, the greater part of this district has been already annexed; and a rumoured defeat of the Russians by the Kokanians, heard of this very week, is perhaps only to be credited to the extent of proving that war is actively raging between the parties. To whom the final victory must fall it needs no prophet to foretell, whatever temporary checks may delay the triumph of European artillery and resources. There needs no theory of dreams of unlimited sway on the part of Russia to account for the extension of her dominion in Eastern Asia. The truth is that security for the life and property of her subjects in that quarter is to be found only in conquest. The whole of the population of Central Asia is composed of hordes of plunderers, and Russia is restoring half a continent to the use of the human race by establishing therein order and settled law. One very singular fact is to be suspected, rather than positively asserted, from scattered passages in these papers, namely, that the Russians find Mahometanism more effective with the Tartar tribes as a religious agent of civilisation than Christianity. The fullest revelation in this regard is that made by Captain Valikhanoff, when speaking of the Kirghizes of Dzungaria:—

RUSSIAN PROPAGATION OF MAHOMETANISM.

The condition of the Russian Kirghizes, or those of the Middle Horde, was the same thirty years ago. The Russian Government, however, proceeded to erect mosques, and appointed Tartar Mullahs, under whose influence the Middle Horde Kirghizes do not now yield in fanaticism to the most fanatical dervishes. They regularly observe the period of prayer and thirty days' fast, while some have even introduced the exclusive system of the harem. It would be difficult to decide which would be more beneficial to the Kirghiz Steppe, the former state of ignorance with perfect religious toleration, or contemporary Tartar civilisation with its strong anti-progressive tendencies. The Tartars in Russia constitute a totally separate Eastern world, having nothing in common with the interests of Russian nationality. The great Kirghiz Horde is now in a transition state, and the Tartars who are scattered throughout it are making their influence felt more and more each succeeding year. It must be observed that the farther we remove from the Tartars the less fanaticism do we find among the Kirghizes, notwithstanding that they live here under the influence of Central Asiatic rulers, and in a country usually regarded as the very focus of bigotry. The Bokhara Mullahs are, in my opinion, much less to be dreaded than their Tartar brethren.

The judgment passed by Mr. Hume Greenfield, in his able Introduction before adverted to, on the position of both the Powers who are supposed to be the rivals of English influence in the East, is that which will be concurred in by every real friend of humanity as well as by every thinker on history and politics:—

THE THREE RIVAL POWERS IN THE EAST.

The exhaustive system of agriculture which travellers have described as characterising Persia, and which, with advantages hardly equalled, certainly not surpassed, by any Oriental country, still keeps her impoverished, and consequently warlike, along her frontier line, will readily account for the attempts of that Power to subjugate the mountainous region interspersed with fertile valleys which forms her eastern boundary. Hence the permanent feeling of irritation which prevails among the Hill tribes all along the north-west frontier of our Indian empire, and the constant recurrence every few years of some miserable squabble about Herat, which although distant 500 miles of the wildest mountain desert from Attock, it is still the fashion to call "the Key of India," in these days when Bombay is only twenty days distant from London, and when Bombay and Calcutta are themselves on the eve of being brought within three days of each other by the development of our Indian railways. A cursory glance at the map might at first sight seem to give some ground for alarm when we find that Russia has virtually pushed forward her outposts to within 300 miles of the British frontier on the north. But the barrier here is even more impassable than to the westward, since there intervenes between the Muscovite and the supposed secret object of all his movements and intrigues in those regions, the mighty barrier of the Hindoo Koosh and the Kuen Lun, which rise like a wall 17,000 feet high, with scarcely a crest or depression throughout their entire extent—none certainly practicable for an army with the *matériel* and appliances of war as waged by the nineteenth century civilisation. The truth is, that in the interest of science and humanity Great Britain ought to rejoice that any form of European civilisation is penetrating the howling wilderness that lies to the north of the Himalaya. Secure behind that impassable bulwark, still more secure in the gradual elevation in the scale of nations of the vast population which destiny has committed to her charge, she ought to view with feelings of sympathy and interest any policy that will replace the barbarities of such men as Hodja Khan and the other ruffians that infest the territory conterminous with our own to the N.N.W.

We have said enough to excite the curiosity of every reader interested in the East, and may dismiss the book with cordial thanks to the translators for the valuable mass of novel and unhoped for information thus placed at our service. We must add, however, that an excellent map of Central Asia, the most correct, we apprehend, ever yet submitted to the English student, enables one to follow every statement with satisfaction and profit.

LONDON, FRIDAY, JUNE 16, 1865.

THE SILK TRADE IN FRANCE.

THIS subject has assumed such a serious aspect that the Senate has taken it up in a very earnest manner. Two petitions, one signed by no less than 3,574 maires, municipal councillors and landed proprietors of the departments of the Gard, Hérault, Ardêche and Lozère, were sent in to the Senate and were placed in the hands of M. DUMAS, the Chemist and Senator, to examine and report upon. M. DUMAS brought up his report on Friday, the 9th instant, and the Senate took up the matter as one of great urgency. The representations of the petitioners, endorsed as they are by M. DUMAS and other authorities, give the subject a more serious aspect than has ever heretofore been presented. M. DUMAS said, in presenting the report, that whatever might be the opinion of the Senate respecting the kind of aid asked for of the Government by the petitioners, there could be no question as to the suffering complained of, which, from its gravity, duration, mysterious nature, and the importance of the mischief done, assumed the proportions of a public calamity. It appears that the breeders of the silk-worms are not the proprietors of the mulberry trees on the leaves of which the insects feed, and there seems to be great reason to fear that unless some assistance is given to the latter they will be compelled to convert the land occupied by these trees to other uses, and thus the chance of resuscitating the industry would be deferred for years. The trees average twenty years of age, and this shows how great would be the loss by their destruction.

M. DUMAS says that the total amount of silk produced in the world is in value, about 1,100 millions of francs, or forty-four millions sterling per annum. France used to produce at least a tenth of this whole, and in the year 1853 her produce was valued at 117 millions of francs. To produce this result no less than eighty-three tons of eggs and six hundred thousand tons of mulberry leaves are required. In ordinary times the cost of the eggs or seed was between £120,000 and £160,000 per annum; but since the appearance of the disease amongst the worms this amount has been doubled, tripled, and at last reached six times the sum. Even in 1853, when the mischief was far less than it has since been, five millions of francs were expended in the importation of foreign seed. The ordinary expenditure for mulberry leaves is stated to have been between fifty-five and sixty millions of francs per annum; and M. Dumas agrees with the petitioners that for several years the growers have been losers to the extent of half that amount, or considerably more than a million sterling per annum. In good times the eggs or seed was worth only one or two francs per ounce and it was often given away amongst the breeders; now they have to pay twelve, fifteen and even twenty francs per ounce. The amount paid for foreign seed amounted to more than thirteen millions of francs in 1860, and to ten millions in 1863. One of the worst features of the disease is the fact that there is no appearance of it until just when the worms are about to spin their cocoons, so that the unfortunate breeders have to support the whole cost of the rearing and feeding to see the result swept away, as it were, in a day. It appears to be the opinion of everyone who has examined the question, that the disease attaches entirely to the worms, and not in any way to the mulberry trees. A similar visitation occurred in France in 1688, and did not entirely cease till 1710, and during this period so many mulberry trees were destroyed in Lanquedoc that the authorities were compelled to interfere and levy a fine on any one who destroyed or injured them. At the present time the condition of the growers is most lamentable; they cannot sell the leaves, and the *Credit Foncier* and other agricultural societies refuse to make advances on the security of mulberry plantations.

When the disease first reappeared, between fifteen and twenty years since, it was very partial, but it has now extended not only all over France, but also to Italy, Spain and the East, in fact to every silk-producing country except Japan. All agree that none but Japanese eggs are at present of any use; only the other day the President of the Agricultural Committee of Alais wrote as follows:—"Generally, all the indigenous seed has failed. That imported direct from Japan is the only kind that can be depended on. But the supply of this good seed is infinitely below the demand, and the quantity of silk now produced is scarcely equal to one twentieth part of good average. The greater part of the mulberry plantations do not yield sufficient to pay the taxes." The petitioners ask the Government for relief in the matter of taxes; for the means of transporting the eggs from abroad in good condition; or for employment in public works for the suffering workpeople, and to institute a searching inquiry into the causes and possible means of combating the disease, which is known in France as *La Gatine*. Of all these means the only one which is calculated to supply immediately the deficiency complained of, is the importation of Japanese eggs at a price lower than twenty francs an ounce, a rate which the poor breeder cannot pay. Two reasons are given for the conveyance of the seed in ships belonging to the Imperial marine; in the first place, it is necessary that the eggs should not be carried in the same vessel with other commodities which might affect them injuriously, and that they should be disposed that the cases could be brought on deck, and their contents examined in fine weather; and, secondly, that the French flag would be considered a guarantee that the seed really came from Japan.

The Government expressed its strong desire to aid the unfortunate silk growers as far as possible, and the petitions were referred to the four Ministers of Finance, Agriculture, Colonies and Foreign Affairs. It is right to mention, in connection with this subject, a fact referred to by the only Ministerial speaker on the occasion, namely, that the returns of the imports and exports of the French silk trade do not bear evidence of a state of things so gloomy as that represented by the petitioners and others with respect to the home production. The importation of foreign silks has fallen since 1855 from more than eleven to less than four millions of francs, while the exportation of French tissues has risen from 340 to 368 millions—an increase representing however in fact a small diminution, on account of the rise in prices; and as regards the raw material, the imports have risen from 206 to 314 millions, and the exports from 30 to 97 millions, which, considering the increase in value, present no very remarkable result. The matter certainly requires explanation, and it is far from the only instance of official returns requiring elucidation. It appears by the official returns that while during the first quarter of 1864 there were 5,066 kilogs., or rather more than five tons of silk-worms' eggs *exported* from France, the quantity of this precious seed sent away during the first three months of the present year was 11,225 kilogs., or more than double the former amount. Here is another riddle to be solved.

(Omitted from our last issue.)

THE falling off in the total amount of exports of French manufactured silk since 1859, not only to America but to all the other countries of the world, except our own, coupled with a growing increase of the quantity taken by the United Kingdom, and the unsatisfactory condition of the supply of the home-produced raw material, in consequence of the disease amongst the silk worms, naturally gives rise in France to many speculations as to the causes and probable consequences of this state of things. A certain class of people in France, disregarding all facts and figures, seem firmly convinced that commercial reform has done it all, but this absurd notion is easily disposed of. The change in the tariff took place in 1860-1, and we find by the French official returns that, although the total exports from France was less in 1864 than in 1860, the whole fall occurred

Digitized by Google

in 1861, and the amount has been rising ever since. Here are the figures :—

1860	454,800,000	francs.
1861	332,891,000	„
1862	363,156,000	„
1863	370,293,000	„
1864	384,521,000	„

Now, the increase since 1861 would have been turned into a decrease but for the arch free-trader, England, for while the total exports from France, as shown by the above table, were higher in 1864, as compared with 1861, by not quite fifty-two millions of francs, the increase in the amount sent to England was sixty-seven millions. So much for that bugbear. Other people look at the matter in a calmer manner, and do not hesitate to tell their countrymen that the failure in the silk crop is not the sole cause of the falling off in the exports of the manufactured article, and attribute it to the want of daring, or over-caution, which generally characterises French commercial operations, coupled with the effects of the war in America. The influence of that terrible conflict must have been very great, for the direct exports from France to the United States have fallen in six years from 138 to 23 millions of francs per annum, without a single halt in the downward course till last year, when the exports were the same as in 1863; but another fact cannot be overlooked, namely, that while the exports to all other countries, as well as America, were constantly falling until last year, those to England have been as constantly rising since 1861, and were still advancing at the end of 1864. Looking at these figures a French journalist says :—"Seeing our hesitation about maintaining our relations with countries which give themselves up to the horrors of civil war, England adroitly substituted herself for us and helped herself to the customers with whom we dared no longer deal." This may be true, and is stated fairly and without rancour; but when the same writer adds—"She (England) comes to us for the arms with which to fight us"—he exhibits that habitual want of acquaintance with the first principles of commerce which is too often so evident in the French press. Did the merchants and manufacturers of France sell their silk at a lower rate to us than they would have sold them to the Americans, and was the credit longer and the money less secure in consequence of the shifting of the transaction from New York to London? We have heard a great deal of late about the enormous increase in exportation generally from France, and the immense progress which has been made in commercial matters in that country as compared with England; now we have a complaint that the latter is beating France by buying too many of her silks! Where would the export silk trade of France have been had her dealings with England followed the course of the rest of the world? Just about eighty millions of francs worse off in four years! Great complaints are made against the Americans for having tripled the import duties on silks, and they are accused, and with perfect truth, of having borrowed from the Old World one of its greatest economical errors; but the increase of the customs duty in America bears equally upon English and French silks, so that argument falls to the ground with respect to the shifting of the mercantile portion of the transaction from French to English shoulders, and could only account for a reduction on the total amount which should, but for some other circumstances, have fallen equally on the commerce of both countries. The returns quoted above show that since 1859 the proportion taken by England of all the silks exported from France has risen from one-third to one-half; but has not the general trade between France and England risen enormously, and is not this the grand result calculated upon by those who have worked towards the abolition of commercial restrictions? When, however, a French writer declares that this increase in the exports of silks to England has been the cause of the great influence which she now exercises over the French markets, and "of the additional suffering arising from the "sacrifice which the French manufacturer makes while awaiting "the return of regular communication between the French "centres of production and the countries of consumption," he exhibits a lamentable want of commercial knowledge. It is not to such causes that we must look for the results referred to, but to those which prevent general increase in the carrying trade and other mercantile transactions of France. Whether enormous taxation, the increasing subdivision of property, and the withdrawal of too large a number of young men for the army, navy, and public employment, are sufficient to account for the very slow growth, if any, of the French mercantile navy, and of bold undertakings of the purely commercial kind, is another and, for the French nation, a very serious question. But whatever be the cause, it is useless for French writers to fly in the face of economical science and to attempt to mislead the world with respect to such matters. When a general deficiency is felt, there is nothing like a special exception to aid in throwing a light upon the subject. Let those who complain of England absorbing too much of the foreign trade in French silks study the proceedings of the *Messageries Imperiales*, and see what capital and energy, properly applied, can do in such matters, and then we shall not have to discuss and expose such fallacies as those referred to.

Through the gloom that hangs over the silk trade a little light is peeping out; accounts from Lyons state that export business exhibits some symptoms of revival, and that a few important sales made at New York have caused fresh ventures to be undertaken. Moreover, as regards the raw material, science, aided by the State, has succeeded in doing something towards remedying the failure of the silk crops; at the Imperial farm at Vincennes the many new species of silk-worm introduced of late are receiving great attention, and young oaks, wild plum trees, the castor oil plant, and the *ailante*, or *Vernis de Japon* tree, are covered with insects of all colours and sizes. The worm which feeds on the last named tree is considered to be completely acclimatised, and its eggs are now being distributed as fast as possible, but not fast enough for the demand.

THE PHANTOM LIGHTHOUSE OF CEYLON.

THE almost boundless trust with which the Commons vote the various items of the annual estimates, fortunately obtains from time to time a wholesome and salutary monition. A plain, straight-forward inquiry the other night has given members the opportunity of experiencing, in however weak a degree, the pang arising from misplaced confidence. It was only last year that £5,000 was noted for "the completion of the Ceylon Lighthouse," towards the erection of which, on the Basses Rocks, successive sums of public money, amounting in the aggregate to upwards of £65,000, have been voted. We do not include the re-votes in this total. The undertaking was in accordance with the recommendation of the Commons' Committee of 1854, which but affirmed the decision of a previous Committee in 1826 charged with investigating the matter—the structure being deemed essential to the safety of our vessels in the Indian trade. Parliament, after its long series of contributions, may be supposed to have felt all the pleasure arising from the complete discharge of an appointed task when called upon last year, in a monetary sense, to put on the top-stone. But what is its astonishment now to learn that its money is at "the bottom of the sea?" that—needless information!—this money "cannot be got back;" that "the erection" vouched for by the Government as only requiring £5,000 "for completion" has had, outside the official mind, no objective existence; and that, on nearing the Basses Rocks, the aerial fabric that rose nearly to completion under parliamentary votes resolves itself into a heap of stones and a flag-staff. The Ceylon Lighthouse which the Commons were so near completing may for the present serve the purposes of the ghostly crew of the *Flying Dutchman*, whose favourite cruizing ground is known to be in the neighbourhood of the Basses Rocks—nothing more. It is nevertheless difficult, after such heavy money votes, including actual payment to the fabulous builders for "the finishing job," to realise the structure as that which is not. Notwithstanding nine years of presumed operations, Mr. MILNER GIBSON could not inform the House whether the engineer or the site were at fault; whilst Mr. HENLEY'S recollections as to the action of the monsoon in preventing approach to the rocks or raising a heavy sea on the reefs, are entitled to little more weight in forming a judgment as to the practicability of the erection, than Mr. GIBSON'S plea as to the disadvantage which distance creates in securing the requisite engineering facilities. We hold that suitable engineering science, such as may be commanded any day in London, would secure, at an outlay of but half the sum already voted by Parliament, a substantial iron lighthouse; and shall not fail to urge the appropriation next session. No nautical man will acquiesce in Mr. MILNER GIBSON'S dicta that a light-ship will be almost equally valuable. It can neither afford the same strength of light nor the required elevation. We believe the Government itself has no doubts as to the practicability of the erection, but that it is judged prudent to avert that

Digitized by Google

scrutiny which a further call for money might invite into past outlay—an outlay of which the true history has yet to be written. Besides, when we can erect a lighthouse on the Goodwin Sands, surely the Basses Rocks are not to remain the perpetual monument of the discomfiture of British engineering and hydraulic science.

THE STRAITS TRANSFER.

No doubt but that the parties interested in the transfer of the Straits Settlements from the India to the Colonial Office are somewhat anxious to know if the statement we made some three months since, to the effect that the Bill would be introduced during the present session, is likely to be carried out. Our information at the present moment is to the effect that the Bill is already draughted, and will be introduced as soon as the War Office has determined the nature of the defences to be maintained, and the expense thereof.

Continental Intelligence.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

JUNE 7.

The *Russian Invalide* gives some interesting particulars of the Dunganes, whose insurrection against the Government of China, quite independently of that of the Taipings, excites such general attention. It appears that these insurgents are a Mohammedan race, called by the Chinese *Ouigour*, and disseminated at the present day throughout all the provinces of the Celestial Empire, but more especially in the North and West. Originally they dwelt in what is now called Turkestan, and as far back as the sixth century formed a powerful State known in the Chinese records of history under the name of Gaotchan, their chief city being Karaschar (the present Turkestan). At that remote period they were Bhuddists by religion, but about the eighth century Islamism was by degrees introduced, and since became general. The dynasty of Tang, which came to the throne of China in the seventh century, entered on a vigorous war with the Ouigours during that and the succeeding century, to ensure the security of the Chinese capital, which at thattime was what is now called Si-ann, in the province of Chang-si, at no great distance from Ouigour territory, and having subjugated them, annexed the whole of Eastern Turkestan to the Celestial Empire.

But as the Ouigours nevertheless remained a powerful people, and were moreover constantly rebelling against their conquerors, the Emperors of the dynasty of Tang resolved, about the end of the eighth and beginning of the ninth century, to remove a part of this unruly tribe to China Proper, and form colonies there, which was effected at two different periods, mentioned in the Chinese history, first with 800,000 families and subsequently 200,000 more. At first they were located in the provinces of Chang-si and Hang-sou, but by degrees they spread over all the Northern parts of China as far as the Great Wall, and thence westward. Living as the Ouigours did among the Chinese, they forgot by degrees their own tongue and adopted in time the language, as well as the manners and customs of their conquerors, though as Mussulmans they continued to form a distinct religious tribe and retained some of their original peculiarities, which have descended to the present generation, for very few of them drink wine or smoke opium or even tobacco.

The commune of Salar, in the district of He-chow, in the province of Chang-si, being the seat of the spiritual head of the present Dunganes, may be considered as the capital of this singular people, the more so as it was thence that the first impulse was given to the several insurrectionary movements and the rebellions that have more than once broken out in modern times among the Dunganes under the present Mandschurian dynasty, the latest of which occurred in 1862, at which period the rebellion; that broke out in Chang-si, spread to the provinces of Hang-sou, Si-chwang, and Yung-nang to such an extent that the Chinese Government estimated the number of rebels to be more than a hundred thousand men under arms. Obliged to retire from the province of Hang-sou to that of Ourum-chee, which lies more to the west, they found the whole of the population disposed to join the insurrection, which tended to increase their forces very considerably; for in the district of Kouldja alone there are sixty thousand Dungane families, and in the whole province proportionably more; besides which there is the significan fact that the major part of the Chinese local corps or militia (20,000 men), stationed at Ourum-chee, is composed of Dunganes, among whom are the commandant and several of the superior officers.

It was under the command of these latter that, at the end of last year, the fresh insurrection broke out at Ourum-chee and the surrounding country against the Mandschurian authority, and having seized the city they set fire to it and gave it up to pillage, retreating subsequently to the citadel, which is strongly fortified, and still remains in their possession. As the centre of the commerce and industry of the Western parts of the Chinese Empire, Ourum-chee contains a vast population—estimated at two millions of souls—and had an immense stock of merchandise both of native and foreign produce and manufactures. According to the statements of officials and merchants of Tchougoutschak, the insurgents massacred no less than 150,000 inhabitants of all ages, and destroyed the valuable stores by setting fire to the warehouses. The communication with Kouldja and Tchougoutschak being intercepted by the insurgents, the Mandschurian authorities were unable to correspond with the Government, except by the circuitous route of Khobdo and Ouliasoutai.

From Ourum-chee the insurgents advanced in two separate corps to the neighbourhood of Kouldja and towards Turkestan. The former was interrupted in its march at Kour-Kara-Oussa by the troops sent for that purpose from Kouldja, but the other corps reached Turkestan, where the inhabitants of Koutcha, also Mussulmans, raised the standard of revolt and joined their co-religionists. After taking possession of the last-named city the insurgents went off in a westerly direction, and took up a position near the city of Aksou, a very important place in a strategical point of view, because the great roads of Kouldja to the north, Hotan to the south, and Kashgar and Yarkend to the west, all meet at this spot. The commandant of the city immediately sent off to meet the insurgents all the regular troops at his disposal, as well as the local militia; but they were beaten by the rebels, and obliged to retreat. This was the situation of affairs at the close of last year. The principal chief of Turkestan, having reason to fear that the insurrection would spread to Kashgar and the other western cities of the province, required assistance from the Governor of Kouldja. In the meantime the insurgents, having occupied the pass of Yan-shan-Koou, leading from the mountains of Aksou to Kouldja, no relief could be sent to him, and also because intelligence arrived that, in the month of October the Dunganes of the province of Kouldja had also revolted and seized the cities to the east of Kouldja, and subsequently had taken possession of that provincial capital.

COMMERCIAL.

COFFEE.—Great confidence is felt in this article, as enormous quantities will now be shipped to the Southern States of North America, where the ports will be opened on the 1st of July. All descriptions in good request, especially the finer qualities and prices a shade higher. Since last mail 35,000 bags sold. Among the sales were 800 bags of Timor which realised 8¾ sch. Banco.

SUGAR.—Raw has been rather lively, but the demand has now somewhat subsided and the market is calm. No alteration in values of raw or refined. Of the latter 25,000 loaves changed hands.

RICE.—Market looking up, as stocks are much reduced.

SPICES.—There is more demand for Cassia Lignea. Of Cassia Flores 30 chests found purchasers at 27 sch. Banco. Cloves also more inquired for, and 300 gonjes sold at 4 Sch. Banco.

TEA.—There has been an animated demand, and prices are well supported. The following were sold by importers: 1,438 quarter chests, 2,339 eighths, and 498 sixteenths Congou, 748 quarters, 95 eighths Souchong, and 232 quarters Congou, all per *Conard Heinrich*, and 302 quarte chests of Congou per *Picciola*, as well as several parcels of green and black teas by the dealers both for shipment and consumption.

SPELTER.—At first the market was not so lively, and prices sensibly receded, but within the last few days they have fully recovered their former position, the advance in May being fully 12 Sch. Bco. per Centner. The following transactions are reported:—

1,000	Centners	in loco	..	14	Marks	2	Sch. Bco.
500	„	for arrival	..	14	„	4	„ „
1,000	„	loco	..	14	„	4	„ „
1,500	„	loco	..	14	„	6	„ „
500	„	per July	..	14	„	7	„ „
2,000	„	do.	..	14	„	8	„ „
1,000	„	loco	..	14	„	3	„ „
3,000	„	per July	..	14	„	4	„ „
1,000	„	loco	..	14	„	8	„ „

The arrivals this year to end of May were 174,000 centners against 239,000 at the corresponding period of 1864. Stock on the 1st June 35,000 centners against 6,000 do. last year.

SHIPPING.—Sailed: Valedora, for Manila.

CASE OF THE "ANN ADAMSON" CHARTER.

ADAMSON V. DUNCAN AND ANOTHER.

This was a special case. The action was brought for alleged breaches of a charter-party in not loading the plaintiff's ship *Ann Adamson* with a full and complete homeward cargo, as required by the said charter-party, and also for a balance of freight claimed to be due under the charter-party. On the 8th of May, 1863, the plaintiff, being the owner of the *Ann Adamson*, chartered her to the defendants for a voyage from London to Shanghai or Nagasaki, and back to London or Liverpool as ordered. By the charter-party it was stipulated that the freight should be as follows:—"For the round (*i.e.*, for the voyage out and home), at the rate of £6. 10s. per ton of 50 cubic feet of tea or silk; if other goods be shipped, freight to be in the same proportion as if those goods were tea." The vessel proceeded to Nagasaki, and, after unloading her outward cargo, received there from the defendants' agents a homeward cargo of cotton and other lawful merchandise, but no tea or silk. For the purposes of the case it was assumed that the homeward cargo, so loaded, was a full and complete cargo for the vessel, and also that the capacity of the vessel for tea was equal to 769 tons of 50 cubic feet measurement each, and also that the above-mentioned homeward cargo was, in fact, less than 769 tons of 50 cubic feet each, and was also less than 769 tons of 20 cwt. each. The plaintiff contended that, as a matter of law, upon the true construction of the charter, he was entitled to be paid for the "round" the sum of £6. 10s. per ton upon the first number of 769 tons, which would have been the amount had the cargo of tea been loaded. The defendants contended that the freight was payable upon the number of tons of cargo actually shipped, calculating according to the standard of 50 cubic feet measurement, equal to 20 cwt., and that the amount of freight was not a fixed sum for the "round." The question for the opinion of the Court was whether, as a matter of law, upon the true construction of the charter, the plaintiff was under the circumstances entitled to be paid freight upon 769 tons, at the rate of £6. 10s. a ton. If the Court should be of opinion in the affirmative, there was to be judgment for the plaintiff for £701; if otherwise, for the defendant. The question turned mainly on the words "in the same proportion."

Mr. Lush, Q.C. (with him Mr. Kemplay), argued for the plaintiff, and urged that the plain meaning of the charter was this, that as this was a new trade, in which the measurement was 50 ft. to the ton, whereas in other trades it was only 40 ft., the standard was taken to be tea and silk, because those commodities, from the square compact form and shape of their packages, were adapted to that measurement—packing, as they did, more closely than other commodities, so that a much larger quantity could be taken of tea and silk than of other goods. Hence, tea and silk were taken as the standard, and this was the key to the construction of the charter. Goods were divided into measurement and weight, that is, goods of which the tonnage was calculated only by weight and those by which it was calculated by measurement—that is, so many cubic feet to the ton. If goods were not to be calculated by measurement, they would be calculated merely by weight. If taken by measurement, of course it was very important how the measurement should be taken. In this case, the measurement adapted to tea and silk was adopted; and if other goods were laden, which would take more room, they must pay more tonnage. In short, every kind of cargo was to pay freight at the rate of 50 cubic feet per ton; and that was what was meant by other goods paying "in the same proportion." Any other construction made nothing of those words, or gave them no real meaning.

Mr. Watkin Williams argued for the defendant. The real question, he said, was whether the freight was to be fixed, or to vary with the cargo. It was well known that shipowners often chartered their ships at a fixed freight per ton for the cargoes of whatever value, so that the freight would produce very different amounts, according to the nature of the goods shipped. But the truth was that it might be more advantageous to carry one kind of cargo for a lesser freight than another kind of goods at a larger rate of freight. Tea or silk, for instance, would make a far better cargo than rice or millet seed, straining the ship much less than other goods. Hence the shipowner was influenced not only by the mere rate of freight, but by the nature of the cargo as well. Thus, then, it was not to be taken for granted that the shipowner meant to contract for a fixed rate of freight with a view to secure the same amount of freight. The standard was fixed with reference not merely to the rate of freight, but to the weight of the cargo, with reference to specific gravity. It was well established that goods which went above 40 cubic feet to the ton were to be charged on the measurement, and if below, then at the ton weight. No doubt the shipowner was entitled to full freight, but the question was as to the meaning of the words "the same proportion." It was perfectly well known that different kinds of goods earned different amounts of freight in proportion. No shipowner would expect the same amount for wool as for tallow. The words "same proportion" meant that the rate should be £6. 10s. reduced to the standard of 50 cubic feet a ton. It would startle mercantile men to be told that all goods were to pay the same freight, whether good for the ship or bad for the ship. Tea was a light cargo, and considerably above the average to be allowed in measurement. In the Baltic trade there were different scales of freight for different goods—tallow, hemp, &c. This was not a case of that kind, but the same result was to be attained thus—that as the goods varied in specific gravity, the parties had agreed upon a standard of weight and measurement to be adopted, and to which the rate of freight was to be reduced—that is, a fixed rate of freight was to be adopted for different kinds of cargo. If the cargo measured 50 cubic feet to the ton, it was to pay £6. 10s.; but if less, or if it measured 40 feet to the ton, then it was to pay a proportionate rate of freight, which would be one-fifth more upon the measurement. This was the meaning of the words "same proportion." If, again, unpressed cotton were carried which would measure (say) 60 cubic feet to the ton, the shipowner was to get £6. 10s. for 50 cubic feet, or one-sixth more per ton. In fact, 50 cubic feet was substituted for 40 as the turning-point between measurement and weight. This was the meaning of the words "in the same proportion." Proportion here fixed the rate of freight to the weight and measurement, not that other goods were to pay at the same freight as tea. On goods lighter than tea—hat is, more than 50 cubic feet to the ton—the freight was to be paid at the rate of 50 cubic feet to the ton. On goods heavier it was to be paid by the measurement of a ton for every 50 cubic feet.

The Lord Chief Justice delivered judgment as follows:—Generally speaking, the ambiguous language of these mercantile documents make them so doubtful, that it perhaps would be better if they were referred to a mercantile tribunal. No doubt they are very intelligible to mercantile men, but to lawyers they are full of ambiguities. Construing the document, however, as well as we can, according to the ordinary sense of the terms used, the meaning of this charter-party is tolerably clear. The stipulation as to freight is that for silk and tea—the species of cargo the parties contemplated. The rate was to be £6. 10s. per ton, not ascertained by weight, but by measurement. But, then, as the charterer would not be necessarily limited to tea and silk, it is stipulated that if other goods shall be loaded instead of tea or silk, the freight shall be paid in the same proportion as the other. One construction of these words is this that the measurement should be ascertained with reference to other goods, of the like species, and the weight in the same ratio as if dealing with tea; but that construction would lead to consequences so monstrous that it is impossible to sustain it. The only other construction is, that if, instead of loading a cargo of tea or silk, the charterer loads other goods, the shipowner shall stand in the same position as if a full cargo of tea or silk were loaded, and that then any one competent to deal with the matter, and knowing the capacity of the ship, can ascertain what amount of tea or silk the ship can hold by measurement, and thus get at the number of tons, and so calculate the freight to be paid. That is the only reasonable construction. The construction contended for by the defendant, the charterer, is that whereas the proportion (whatever may be the sense of the term) is to be the same between other goods and tea and silk—that is, that a certain proportion shall take place between the measurement and weight—the actual weight is to be introduced, which would frustrate the whole object of the stipulation, and introduce quite a new element into the calculation. In my opinion the meaning is that the shipowner is to be in the same position as if there were a full cargo of tea or silk. What that would be is to be calculated, and the charterer is to pay at the same rate; and judgment, therefore, I think must be for the plaintiff.—The other learned judges concurred.

COURT OF ADMIRALTY.

THE AMERICAN WAR.—THE "D. JEX."

This was originally an American vessel, and in consequence of the havoc by the *Alabama*, she was transferred, and had since sailed under the British flag. The vessel had sailed to China and back, and the master brought an action to recover his wages. The defendants brought in a large claim for a former debt, and the plaintiff now sought to make his claim and to re-arrest the vessel for the amount due to him when he transferred the vessel from being an American to be a British ship.

Mr. Vernon Lushington appeared for the plaintiff, and said the application was a very unusual one. The vessel had been transferred owing to the losses sustained by North American vessels from the *Alabama*. The vessel had been transferred, but the money not paid, and under the 191st section of the Merchant Shipping Act the present claim was made.

His Lordship asked whether the transfer was a mere colour.

Mr. Vernon Lushington said the money had not been paid.

Dr. Lushington: Then, a mere cover.

Dr. Deane, Q.C., on the other side, contended that as the action was, in fact, against an American ship, it could not be granted. The vessel was at Liverpool as a British ship, and the claim was for the transfer of an American vessel. The vessel was registered not at a British port. The court had no jurisdiction in the matter.

Mr. V. Lushington said his client was an American, and claimed for the sale made in 1861. He relied on the 191st section of the Act.

His Lordship considered the question raised an important one, and reserved his judgment.

BENGAL SILK.

(To the Editor of the *London and China Telegraph.*)

SIR,—It appears to me that the tendency of the Chinese and Japanese to limit supplies of silk for the express purpose of enhancing its price might be materially counteracted were European enterprise and capital applied to that extent which circumstances seem to warrant in the culture of the article in Bengal. Allowing for the deficiency of supply from the Far East, and the anticipated shortness of the European crop, it must yet be allowed that Bengal silk has reached an extreme price in view of the drawbacks of its being so lowered in quality as to be the least desirable, and the difficulty of obtaining anything like a satisfactory valuation in the European market, many skeins being faced with good silk, whilst the interior is filled up with coarse and inferior thread. More European capital, with its appropriate organisation, invested in the business, together with European supervision, would soon produce, I am satisfied, a marked change in the quality and reputation of Bengal silk. Where skilful and systematic manipulation has to be combined with production, and, indeed, wherever firm and unremitting superintendence is required, the Hindustanees are generally found wanting, and the steadier action of the European mind required. The West Indies and tropical America, more particularly Guatemala, were enabled from this one cause to snatch away the indigo trade of India after it had been established a hundred years; and again, from the introduction of European agency, India recovered it. I know no enterprise more promising than the culture of silk in Bengal, and trust, should this publication be published, it may serve to draw attention to the subject. Numerous new companies have been brought out in London for industrial purposes in India, but none for the cultivation of Bengal silk. It is capable of demonstration that such a company, respectably formed, and with anything like judicious management, would secure, in the present state of the silk trade, most satisfactory profits—profits, of course, proportioned to the scale on which the enterprise was undertaken.

Yours, &c.,

SILK.

Digitized by Google

THE HARBOUR OF NEW-CHWANG.

(To the Editor of the *London and China Telegraph.*)

Sir,—It may be worth while recalling to parties connected with the China trade that, by Lord Elgin's treaty, the valuable harbour of New-chwang, in Manchouria, was opened to us—a port that places us within easy distance of the Amoor. I cannot learn that anything has yet been done to take advantage of this proximity. Seeing that the merchants of Boston, in the United States, find it to their interest to maintain a direct trade with the Amoor (*vide* report of H.M.'s Consul at Boston), it appears to me that English enterprise might accomplish much in the same direction.—Yours, &c.,

F. L.

Baltic Rooms, June 9, 1865.

GROWTH OF SILK IN IRELAND.

(To the Editor of *The London and China Telegraph.*)

SIR,—When so much attention is being given to revive the staple industries of Ireland, I would venture to suggest the application of capital and skill to another production—that of silk. I am not the first to moot this idea. Though now lost sight of, it has been advocated at various times by parties well acquainted with the conditions of successful silk culture; among others by Mr. Martin in his work on China. The prospective scarcity of silk, or at least the certainty that the supply will not come up to the requirements of manufacturers, constitutes a powerful reason for attention to a culture which, under proper management, could not fail to ensure satisfactory returns. Myrtle trees, the most indispensable requirement to success, flourish in the sister-isle; and healthy seed may be obtained from Algeria, respecting which the *Mitidja* of Blidah remarks, somewhat extravagantly I allow, that "a single grain never failed to produce a silk-worm." Should any capitalists be disposed to give attention to this proposition, I shall be most happy to communicate the method of treatment adopted by Count Selimbene, of Modena, whose silk produce is remarkable for its unvarying excellence, and commands the highest price in the Italian market.—Yours, &c.,

MILANESE.

New Broad-street, June 8.

ROYAL GEOGRAPHICAL SOCIETY.—The fourteenth and last meeting of the present session of this society was held on the 12th inst., at Burlington-house, Sir Roderick I. Murchison, President, in the chair. The first paper was on a "Visit to the Wahabee Capital of Central Arabia," by Lieutenant-Colonel Lewis Pelly, Her Majesty's political Resident at Bushire, Persian Gulf. The author was led to undertake this remarkable journey to the chief seat of the jealous and bigoted Wahabee Mahomedans from having read in the published proceedings of the Royal Geographical Society that the situation of these interior cities had never been fixed by direct observation. He was desirous at the same time of a personal interview with the Amir, on matters connected with public duty. He started, therefore, with two officers belonging to his establishment, Dr. Colvill and Lieutenant Dawes, on the 18th of February in the present year. The party did not attempt to conceal their nationality, although they found it prudent to throw the *abbah* and *chiffeeah* of the country over their own clothing, and thus avoid needless intrusion and collision. They travelled on camels, starting each morning a little before daybreak, and continuing the march until sunset. Colonel Pelly had the honour of three interviews with the Wahabee ruler, who is both the spiritual and temporal head of the Wahabee territories, and is absolute throughout his dominions. A second paper was "On the Korea," by Captain Allen Young. This was a description of the almost unknown peninsular of Eastern Asia, lying between Northern China and Japan, giving an account of its interior as derived from Chinese and Japanese writers, and a summary of the various futile attempts made by the commanders of European expeditions to gain an entrance into the land for the purpose of investigation. Korea lies under the temperate latitudes of 33 deg. to 43 deg., is thickly peopled with an industrious and civilised race, abounds in agricultural and mineral products, and with manufactures which promise all the requirements of lucrative exchange, and yet the country is so completely lost to the outer world that no foreign ship ever enters its ports, nor is any European voyager allowed to remain on its shores. The country forms the eastern shore of the Yellow Sea, the great highway to the rich treaty ports of Northern China, yet its western coast, masked by innumerable, and mostly inhabited islands, dangerous to navigation, has never yet been surveyed, and laid down on our charts. The history of the Korea is diversified by various attempts of the Chinese to encroach on the Northern Provinces, and particularly by two invasions of the Japanese in the 16th century. The latter still hold one port, Fouchan, opposite Tsu-Sima, the most westerly island of Japan, as a trading and military station. The author of the paper concluded by stating that his object in bringing forward the subject of the Korea was to attract the attention of all who take an interest in geographical discovery and the progress of our commercial intercourse with the East to this fine new field for enterprise—a country producing silk, cotton, hemp, rice, wheat, tobacco, gold, silver, copper, coal, furs, and manufactures similar to those of China and Japan. The question arises, how can we visit a country or initiate political and commercial relations with a people whose Government is so opposed to any connexion with the foreigner? The Korean Sovereign is practically independent and despotic, and a direct embassy to his Court would effect more than any other course we might pursue. The French would have carried out this end in 1848, had it not been for the loss of their ships on the coast, and they will probably renew the attempt. The Russians are already working down the eastern coast. The changed state of affairs in China and Japan now justifies the attempt to open negotiations with the Korean Government, and it is to be hoped that our Government may be induced to take steps towards giving us this new field for scientific exploration and commercial enterprise.*

* An account of the Korea appeared in our issue of the 28th Feb.

Monetary and Commercial.

The Bank of England has again reduced its rate of discount from 3½ to 3 per cent. Everything is flat, and the special suspicion attaching to the East India and China trade has not yet abated.

According to a report issued by the Customs, the quantity of tea entered for home consumption was, in 1860, equal to 76,859,428 lbs., the duty collected at 1s. 5d. being equal to £5,444,157 in 1861; 77,949,465 lbs., £5,521,322, in 1862; 78,817,059 lbs., £5,582,792, in 1863, at 1s. 5d. and 1s.; 85,206,776 lbs., £4,652,822; and in 1864, 88,637,099 lbs., £4,431,867.

At the half-yearly meeting of the British India Steam Company the usual dividend was announced, notwithstanding the losses incurred by the cyclone at Calcutta. The company's lines are in good working order, and it is contemplated to place another steamer on the Singapore line.

John James Lowndes, Esq., one of the directors, has been appointed to succeed H. D. Cartwright, Esq., as chairman of the Commercial Bank Corporation of India and the East.

The Chartered Mercantile Bank of India, London, and China has declared a dividend of 8½ per cent. for the half-year ending 1st July next.

The shares of many of the Indian banks are recovering from the depreciation which occurred in their value the last few weeks.

The claim of Messrs. William Pustau and Co., amounting to about £11,000, on what has been technically named the "Canton claims," has at length been allowed by the British Government. Mr. Parsons, solicitor, late of Hong Kong, has conducted the matter.

At a meeting of the creditors of Messrs. Dirom, Davidson, and Co., who suspended at Liverpool, in the East India trade, with uncovered liabilities to the amount of £140,000, a composition of 10s. in the pound was accepted.

A general court of proprietors of the East India Company was held at the offices, No. 3, Lothbury, on the 14th inst., Colonel Sykes, M.P., in the chair. The minutes of the former court having been read,

The Chairman read the notice that the dividend on East India Stock payable on the 6th July next, under section 2nd, 3rd and 4th William IV., c. 85, will be ready for delivery at the Bank of England on that day.

The Secretary read a detailed account exhibiting the state of the East India Company on the 1st June, 1865, which showed an aggregate total amount of

£5,287,258 3 5	Three per Cent. Reduced.	
777,178 14 3	Three per Cent. Consols.	
Total .. £6,064,436 17 8		

COMPANY'S INVESTMENTS, JUNE 1, 1865.

£10,422 19 7	Consols,	cost £9,285 0 0
6,000 0 0	Exchequer Bills,	cost 6,021 2 8
		£15,306 2 8

The members of the bye-laws committee were severally re-elected.

Mr. Beddome drew attention to a petition from the Company, which had been presented to the House of Commons some twelve months since, on the subject of the claims of the officers of the Company's navy. It was a case in which an Act of Parliament had been violated. The claims of the officers of the navy were utterly ignored, and in the debate in the House of Commons it was considered by Captain Jervis that the petition applied only to the army. Now, in the army the injury done to the officers was of comparative extent, but to the navy it was annihilation of officers who had been appointed, between the ages of 20 and 40 especially.

The Chairman said the army was annihilated (hear), but it was to be regretted that the officers of the navy did not petition the Legislature as a body, in appealing for the settlement of their just claims. Unfortunately there were only three petitions altogether presented by the officers of the navy. The gallant officer advanced many cases of hardship which had come under his own cognisance.

Mr. Jones suggested that the company should interfere by petition to protect the rights of the naval officers.

After some further conversation the matter was dropped, and the meeting separated with a vote of thanks to the chairman, proposed by Mr. Jones.

According to a circular of Messrs. Arles Dufour and Co., of Lyons, the attention of the silk trade in that city has lately been entirely directed to the progress of the silk crop, the unsatisfactory prospects of which, combined with a decided improvement in the state of the American market for silk goods, have led to important transactions. Owing to this activity and to the very high opening rates of cocoons, prices have experienced a progressive improvement, and now show an advance of 5 to 8 per cent. on the rates current a month ago.

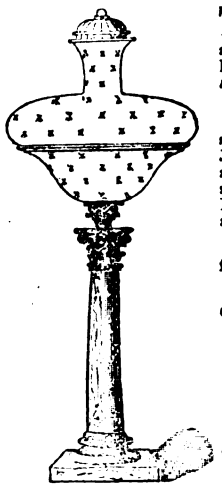
TUCKER AND SON'S

IMPROVED

ENAMELLED PUNKAH TABLE LAMPS.



THE celebrity which TUCKER AND SON'S LAMPS have acquired in the East for burning *steadily* under the Punkah or in side draughts, and *brilliantly* with any of the *coarse native oils*, renders eulogy unnecessary; but having been enabled, by increased facilities of manufacture, very considerably to *reduce the prices* of the above favourite (but hitherto expensive) description of their lamps, and Son beg to notify the fact to the Eastern public.

They are elegant and durable, are finished in exact imitation of many beautiful stones and marbles, such as Malachite, Lapis Lazuli, Serpentine, Sienna, Brocatella, Jasper, &c., and are not affected by heat, damp, friction, or insects; oil, spirits, or acids accidentally spilled. The enamel surface is so inseparable from the base (block slate, proverbial for its strength) that it cannot be removed except by an edged tool. It *requires* simply *dusting*, but if rubbed hard, it only adds a gloss to its appearance—at all times cool and agreeable.

After ten years' constant use and handling, these lamps are none the worse for wear.

Malachite (green), Serpentine (brown), or Lapis Lazuli (blue), are most re commended.

Table Lamp complete, with engraved glasses, as sketch, 72s.

A Plainer Lamp, without the Corinthian capital, 50s. complete.

Either pattern, with plain frosted glasses, 7s. 6d. each less.

*** *The above Lamps are supplied to burn Petroleum or Rock Oil also.*

Orders can be sent through any merchant or Agent, or, if accompanied y a remittance, direct to

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle half bottles, 10s 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess o Wales, London.

HOLLOWAY'S OINTMENT and PILLS —A WORD OF PROMISE.—All sufferers from sores ulcers, scorbutic affections, and skin diseases, may confidently commence the treatment of their several infirmities with these healing and cleansing remedies. Under Holloway's well-tried medicaments the worst cases will soon assume a kinder aspect, and in the progress of the cure the afflicted will neither be embarrassed by difficulties nor disheartened by failures. A little perseverance and moderate attention to the "directions for use," enveloping every packet of ointment and pills, will enable every invalid to conduct his complaint to a successful issue, and he may feel assured that by following this simple but searching treatment his skin will be made sound, severe suffering spared, and health restored.

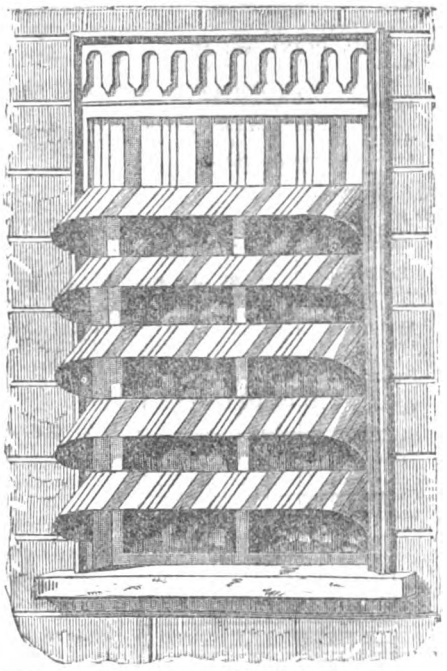
ESTABLISHED IN 1815.

PATENT HELIO-SCENE SUNBLIND.



THIS very handsome SUN BLIND has the effect of keeping rooms cool in summer to an extent never before attained, for the very obvious reason that a double layer of cloth (by the overlapping of the hoods) is interposed between the sun and the window, whilst the wide open space between each hood favours a copious ventilation.

The blind is so light that a child can draw it up, and so simple in construction that it is impossible for it to get out of order. It is particularly valuable for windy situations, because of the peculiarly firm way in which it can be fixed, and also because the wind passing freely through it takes no effect upon it.

For tropical climates extra Linen Covers are provided, which, being merely laced on to the Blinds, can be readily removed for washing. In measuring for these Blinds, send the exact size of the opening OUTSIDE the window.

Price 2s. 9d. per square foot, complete in wooden frames the full size of the "reveal" or opening. The Linen Covers 1s. per square foot extra.

R. LOWTHER & CO.,

31, REGENT-STREET, LONDON.

N.B.—Ordinary Venetians and all descriptions of Sunblinds made and repaired.

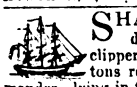
For Freight or Passage apply at 27, Leadenhall-street, E.C.

FOR SHANGHAI Direct (to sail on the 20th June), the well-known clipper ship ANGLO SAXON, A 1 13 years; 693 tons register; A. W. PLUMMER, Commander; lying in the London Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.



SHANGHAI Direct, with immediate despatch, the beautiful river-built clipper ship DILKHOOSH, A 1 12 years, 816 tons register, JONATHAN PURDAY, Commander; lying in the East India Docks. This magnificent ship, launched last year, is confidently recommended to shippers, having made most rapid passage both to Shanghai and from Foo-chow.

For Freight or Passage apply to GEORGE DUNCAN and Co., 2, East India-avenue, E.C.

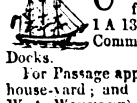
Regular Line of Packet Ship.
To sail on the 20th June.

FOR HONG KONG and WHAMPOA, the splendid Clyde-built clipper JAMES RUSSEL, A 1 thirteen years; 768 tons register; JOHN GRIFFITHS, Commander; lying in the St. Katharine Docks. Has a full poop, with excellent accommodation for passengers.

For Freight or Passage apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

FOR HONG KONG and WHAMPOA, the splendid Clyde-built clipper ship SYDNEY EGGERS, A 1 twenty years, 874 tons register, T. RICHARDSON, Commander; loading in the East India Docks. This beautiful vessel, just returned from China, is strongly recommended to shippers.

Apply to GELLATLY, HANKEY, and SEWELL, 27, Leadenhall street, E.C.



COLOMBO Direct (will sail in a few days), the China clipper WYNAUD, 1 A 13 years, 521 tons register, C. P. JONES, Commander; loading in the West India Docks.

For Passage apply to W. H. TINDALL, 5, Tokenhouse-house-yard; and for Freight apply to F. TALLACK (late W. A. WINKLEY). 23, Birchin-lane, Cornhill, E.C.

With Immediate Despatch.

FOR COLOMBO and COCHIN, the beautiful clipper STAR OF THE MERSEY, A 1, 254 tons register, EVAN THOMAS, Commander; West India Docks. This splendid nearly new vessel is expected to make a rapid passage, and offers a first-rate opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "Star of Ceylon."

FOR COLOMBO and COCHIN, the beautiful British-built ship EAGLET, A 1, 892 tons register, J. GINDER, Commander; St. Katharine Docks. This vessel has a large portion of her cargo engaged, and is confidently recommended to shippers desirous to despath.

For Freight or Passage apply to TOULMIN, LIVINGSTON, and Co., 31, Great St. Helen's Bishopsgate-street, E.C.

FOR COLOMBO Direct, the fine barque CRIXEA, A 1 nine years, now loading in the London Docks.

For Freight or Passage apply to SUART and SIMPSON, 9, Clement's-lane, Lombard-street.

Has nearly the whole of her Cargo engaged.
To Sail positively on the 22nd July. Last Shipping Day the 20 h.

FOR ADEDAIDE and VICTOR HARBOUR, the fine fast-sailing clipper barque SAMUEL, A 1 thirteen years, 426 tons register, RICHARD WIGZELL, Commander; London Docks. This splendid vessel (built in 1861) is celebrated for her very rapid passages and the good order in which she invariably delivers her cargoes, thus offering a first-rate opportunity to shippers of fine goods. Has elegant accommodation for passengers.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to HIORNS and PHILLIPS, 155, Leadenhall-street, E.C.

Mate's receipts will be required before signing bills of lading for water-borne goods.

To follow the JAMES SEDDON, with immediate Despatch

DIRECT for BOMBAY, the magnificent new river-built clipper ship DILBHUR, A 1 fourteen years (owned by Messrs. Smith, Fleming, and Co.), 1,320 tons register, ———, Commander; East India Dock. This high-classed vessel, built expressly for the Bombay trade, under special survey, is strongly recommended to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL' 22, Great St. Helen's, E.C.; or to TOULMIN, LIVINGSTON and Co., 31, Great St. Helen's, Bishopsgate-street, E.C.

Will follow the "Adelaide."
With immediate Despatch.

DIRECT for RANGOON and MAULMEIN, the well-known British ship WASHINGTON IRVING, A 1 (owned by Mr. T. R. Edridge), 777 tons register, R. GARBUTT, Commander; lying in the London Docks. This vessel, so well known in the India trades, offers a favourable opportunity to shippers desirous of despatch.

For Freight or Passage apply to TOULMIN, LIVINGSTON, and Co., 31, Great St. Helen's, Bishopsgate-street E.C.; or to EDWARD HIGGIN and Co., 2, East India-avenue, Leadenhall-street.

To follow the "James Seddon," with immediate despatch.

DIRECT for BOMBAY.—The magnificent new River-built Clipper Ship, DILBHUR, A 1 Fourteen years (owned by Messrs. Smith, Fleming, and Co.), 1,330 tons register, ———, Commander, East India Docks. This high-classed vessel, built expressly for the Bombay trade, under special survey, is strongly recommended to shippers of fine goods.

For freight or passage apply to TOULMIN, LIVINGSTON and Co., 31, Great St. Helen's, Bishopsgate-street, E.C.

CHINA OR JAPAN.

A GENTLEMAN lately returned from China is desirous of making a RE-ENGAGEMENT with a first-class firm connected with the East.

Address A.B., care of Messrs. C. MITCHELL and Co., Red Lion-court, Fleet-street, London.

THE UNDERSIGNED LICENSED PILOTS

FOR THE

PORT OF SHANGHAI, CHINA,

BEG to inform SHIPMASTERS that their Schooners DANIEL WEBSTER and A. J. WESTEWELT will be found at the OUTSIDE PILOT STATION on the YANG-TZE-KEANG, with thoroughly qualified PILOTS on board. The schooners distinguishable by being painted white, and having the word Pilot on the mainsail.

To regular traders the undersigned are known to be among the oldest and best Pilots on the River:—

List of Passengers.

PASSENGERS OUTWARD.

Per P. and O. steamer Poonah, from Southampton, June 20.—To Shanghai: One 2nd class passenger.—To Hong Kong: Asst.-surgeons A. W. Whitley, R.N., J. A. Gawen, R.N., and E. Hudson, R.N., Mrs. Gammell and daughter, and two 2nd class passengers, To Singapore: Miss Rough, Miss Page, and one 2nd class passenger. To Ceylon: Mr. A. Macartney, Mr. T. Powrie, Mr. and Mrs. Gow, Mr. W. M. Gow, Mr. A. T. Johnston, and four 2nd class passengers.

To Calcutta: Miss Pinope, Mrs. Naeve, Mr. Skinner, Mr. C. J. Sharp, Mr. H. Cherrys Mr. F. T. Brooks, fourteen 2nd class passengers, and one child. To Madras: Mr. Richardson, Mr. and Mrs. Labourn, six children, Capt. and Mrs. Stewart, two infant, and native female servant, Mr. R. H. Campbell, Major Gray, and nine 2nd class passengers. To Suez: One 2nd class passenger. To Alexandria: One 2nd class passenger. From Gibraltar.—To Hong Kong: One 2nd class passenger.

From Marseilles, June 28.—To Hong Kong: Capt. D. Sinclair and native servant, Mr. and Mrs. C. Bradley, Mr. John Pitman, Mr. C. F. Rodaty, Mr. Morewood and son. To Singapore: Mr. John Ross.

To Calcutta: Lieut. Thorpe, Mr. and Mrs. Le Mesurier, infant child, and European female servant, and one 2nd class passenger. To Madras: Mr. and Mrs. Conolly, Major Pearse, Mr. and Mrs. Hardy Johnstone, Major E. B. Ramsay.

From Suez.—To Singapore: Capt. and Mrs. Dana. To Calcutta: Mr. and Mrs. J. Broadrich.

Per P. and O. steamer Pera, from Southampton, July 4.—To Ceylon: Mr. W. Syme, Rev. Gerard Middleton. To Hong Kong: Capt. and Mrs. Kinder and child, two Misses Kinder, Miss Sergeant, Mr. Allen, Mr. Tookey, Mr. C. Fox, R.N. To Singapore: Mr. Skinner.

Per P. and O. steamer, from Suez, August 4.—To Shanghai: Mr. M. Archer Shee, jun.

THE INCOMING MAILS.

The P. and O. Company's mail due on 27th inst., which has been delayed by the accident to the *Nemesis*, cannot arrive in London until after the 6th July, and as the French mail with ten days' later news is expected about that time, we go to press to-day in order to complete the three numbers for June.

MR. HENRY DENT ON THE MUNICIPAL COUNCIL.

On retiring from an office which I have held for something over two years, I may be permitted to make a few observations on the so-called municipal government of Shanghai. Perhaps there is no time more suitable than the present to make the remarks I have to offer. When times are prosperous and large fortunes are made with rapidity, men usually are far less prone to criticise the nature of the taxes they have to contribute to, or even their amount. Let, however, adversity come upon us, let commerce fail, let property depreciate to a fearful extent, then different feelings are awakened in the minds of taxpayers. Taxes which heretofore have been found to yield a sufficient revenue, gradually are becoming less and less productive. Hence new taxes become a necessity, and with these the means of enforcing them. This being one of the most important features in municipal government, naturally leads to its consideration. The first body which undertook to carry out in Shanghai the ordinary duties of a Town Council was entitled the "Committee of Roads and Jetties." On the 13th June, 1854, the gentlemen composing this committee wrote to Messrs. Alcock and Murphy, Consuls for Great Britain and the United States, stating that various reasons necessitated some change in the management of municipal matters. Mr. Alcock, in conjunction with the Consuls for France and the United States, convened, in consequence, a meeting of land-renters on the 11th July, 1854. By reference to his speech you will see that he states he presents to the land-renters "a carefully digested code of land and municipal regulations, adapted, as he trusted it would be found, to the local condition of the place. It had been reduced to its present form, only after drafts had from time to time been under revision by the Ministers of the three Treaty Powers." In another part of his speech he went on to say that "the question for the meeting seemed, therefore, not so much whether a Municipal Government was necessary, or whether there should be one, as what form it should take. Consider what effects the rebel raid on the surrounding districts had upon this city. The crowds of Chinese that then poured into the settlement will well be remembered, as also will the rapid rise in the value of property and the building of innumerable Chinese houses. The attraction of high pay held out by the rebels caused hundreds of the lowest class of foreigners to flock to this port, rendering imperative a much larger police force. But with the retirement of the rebels came a large efflux of the native population, a fall in rents and a decrease in taxes. There are now only 100,000 Chinese in the English and American settlements, whereas at one time the foreign settlements were believed to contain 500,000. The last remark leads me to the subject of finance. In days gone by the amounts derived from the old system of taxation proved sufficient for the expenditure. The eight per cent. tax on Chinese rentals was always that which brought in the largest sum. When the necessities of the Chinese Government caused a heavier tax to be levied on all classes of natives, rents fell. Another cause of rents falling was the partial migration of Chinese from this settlement when quiet was restored in the neighbouring districts. The popular idea at that time was that the foreign settlements contained some 500,000 people. The census now shows that not one-third of that number is in the

Digitized by Google

place. The rents have fallen so low now and the number of houses occupied is so small, that not one-half of what was can now be collected. Then again the wharfage dues have fallen off considerably, in consequence partly of the erection of private wharves on Hong-que and partly of the depressed state of trade. From what I have said it will be abundantly apparent that the revenue has fallen off and still shows a tendency to fall off. When again the serious increase of expense which the incorporation of Hong-que has been and is to this settlement, the vast number of new roads which have to be kept in repair, it will be readily admitted that something should be done to provide new sources of revenue. Some gentlemen have stated that the fall in rentals of Chinese buildings was owing to the 16 per cent. tax which prevailed a short time back—this could hardly be, however, the whole cause, as the fall in rents in most cases amounted to 50 per cent. The real cause no doubt was the almost unlimited number of Chinese buildings that were erected, and the partial exodus of the natives. The heavy expenses connected with the police have also often been commented upon. When the population is taken into consideration it will be seen that for every thousand we have only 1¼ man. If the police force of other places is investigated, it will be seen that that existing here is small by comparison. One observation might appropriately be made, that in no other place in the East were foreigners taxed to so small an extent as at present in Shanghai. As regards the constitution of the Municipal Council, with its powers to enforce payment of taxes and to carry out the local government of the place, defects were very early observed. In 1862 a committee was selected to write an address to Sir F. Bruce on the subject. The objects which that address aimed at appeared to Sir Frederick of too high a nature, and his reply served rather to damp the views of the committee. To provide for the better punishment of Chinese criminals the Municipal Council recommended the establishment of a mixed court; it was thought that by the association of a Municipal Officer with a Mandarin that the Council would gain some authority over criminals so as to secure their certain punishment. By the assistance of the Consuls of America and Great Britain this court was established, "At the instance," however, of the latter, as the report states, a consular interpreter was substituted, and the object of the Council was to a certain extent defeated. That good results have arisen from the establishment of the court no one will deny; the diminution of crime in the settlement is sufficient to prove this. The duties of a council are well stated in the reply of of Sir F. Bruce to the address of the committee above referred to. In this reply, dated August 6, 1863, he states:—"Territorial jurisdiction is understood to mean the right to control thoroughfares and public buildings, public wharves and jetties; to improve and collect taxes; to establish and support a police; to arrest, for disturbance of the public peace, and bring to trial; to license houses of public entertainment, public chairs, carriages, and boats; to enforce sanatory regulations by fines." As regards the internal civil government of England, every parish has its churchwardens, every town its town council, every city its council or corporation. Each town has its separate code of bye-laws, which bye-laws, after having been approved of by the privy council, become law, and can always be enforced before the justices of the peace. These bye-laws form the basis of the authority of the council, and their course of action has always to be guided by their tenor; new bye-laws can at any time be submitted to the privy council, and with their consent may become law. The system is found to work well, based as it is upon the interests of the many. Again, the local knowledge obtained by a permanent establishment guided by fixed laws becomes an important point; not to mention the increased interest men take in an undertaking when a likelihood prevails that their efforts may not prove unavailing. On page 15, Toulmin Smith writes in his work on the "Nuisances Removal Act"—"Certainty, in all legislation, should be a primary object; the most earnest will not exert themselves, unless they see this certainty." Further on he writes—"Law without certainty, has no being. Property and enterprise and liberty are mere fictions, unless this certainty is felt. Property or enterprise made dependent on shifting legislation, is destroyed." The question now to be decided is whether any system of government could be devised for Shanghai as regards foreigners. The first question to be resolved is, "What body has inherent in itself the powers exerted by a Town Council at home." Not the Consuls, surely—Sir F. Bruce's and Mr. Alcock's letters would seem to decide this. No one would like to dissent from the opinion generally held, that those who pay taxes should have a voice as to what form they should pay them in. Not the Chinese, in so far as taxation of foreigners is concerned, inasmuch as the exterritorial law prevails here. In whom then does it exist—in the body of taxpayers. Hitherto the practice has been of only land-renters voting. That this system is wrong in principle can hardly admit of doubt. Rent-payers contribute largely to taxes, and ought certainly to have a voice in matters of taxation. Woolrich, in the introduction to his work entitled "The Metropolis Local Management Acts," on page 40, lays down the principle that "That system which wholly ignored the constitutional relation between taxation and representation, and under which the ratepayers had no voice in the election of those by whom their affairs were administered, could only be of limited duration." He would suggest that a committee be appointed to consider the subject of representation, that the interest of the many might be consulted. The *Recorder* had suggested that a council of thirty members should be chosen. What the number should be will be a matter for after consideration. The committee should be empowered to frame bye-laws, to be submitted for approval to the foreign Ministers—these would detail the duties and powers of the Council, the mode of enforcing penalties for breaches of regulations and the mode of exacting due payments of taxes. At the present moment no code could be said to exist. It was true that resolution after resolution had been carried unanimously at meetings of land-renters, but these resolutions could never be carried out, as no method of compulsion could be employed. Budgets had been framed and carried by a majority, but generally one man and then another objected to the payment of taxes levied under it, and all schemes alike must fail under existing circumstances. The Chairman said the Council was wrong in saying that the Consular authorities had been wrong. I am a member of the consular body myself, and I remember that the agreement was signed under the distinct impression that everything was to be done equally in every portion of the foreign settlement. Now it is well known that gambling-houses still exist on the French side.

The Chairman only objected to the form of protest. If the interests of residents on this side of the Yang-king-pang had been injured, this was neither the happiest nor the most courteous method of protesting.

Mr. Dent, then, could only opologise for the form. In conclusion, he would remark that whatever credit might be deserved by the Council was due to the working members; whatever was wrong was attributable to the Council themselves. Some misapprehension had got about regarding Mr. Clark, who was supposed by some to have originated certain measures which were now found objectionable. The drainage system had not been commenced by him. Sixty thousand taels had been spent on it before Mr. Clark arrived in Shanghai, and he found it necessary to spend a certain sum further, in order to utilise what had been done. The jetty in the Soochow creek which had been so much objected to was built up before Mr. Clark came. The encomia which the chairman had passed on Mr. Penfold rendered unnecessary any further remarks from him; he would only say that the Council fully endorsed them. It must be gratifying to the land-renters to find that so large a sum had been collected as the accounts showed to have been received by purely voluntary taxation. He would propose a resolution to the effect that:—

"A committee be appointed to considerthe method of government best adapted to the requirements of the community, and that the interests of all classes be taken into consideration."

The Chairman (Sir Harry Parkes) thought the resolution most opportune; but there was considerable elasticity about it, inasmuch as it did not mention who were to form the committee, or when it was to be formed. Every one knew that difficulties existed in the way of the Council; but he could not reply to every point which had been raised. In regard to the matter of the stones which had been complained of, if it appeared that a man had a right to retain stones in any position, the Council could not interfere to enforce removal. The British Government had expressed its readiness to give its assent to land regulations which might be acceptable to the community. But when so large a topic as a charter of incorporation was spoken of, he could understand that so small a matter as the land regulation, fell out of sight. He thought, however, if the latter were neglected, valuable time would be lost before they could obtain the former. He might ask, who was to approve

Digitized by Google

of the bye-laws which the last speaker had referred to; and before whom could the corporation be sued?

Mr. Dent: The Ministers and the privy council. It was quite clear they must have their approval. His resolution had nothing to do with the corporation; he merely said that what we had not the smallest town in England had.

THE CURRENCY QUESTION.

(HONG KONG DAILY PRESS.)

The difficulties regarding the currency strike us in a new light. It is very clear to us, so soon as the Mint shall be in working-order, that broken money and badly-chopped dollars will entirely cease to be current, and will consequently be greatly depreciated in value. The bankers must anticipate this, and unless they adopt early precaution they will surely find themselves in the vocative as regards their specie in reserve. The new dollar will of course be the current dollar—the bankers must redeem their issues in current dollars—and although it might answer to liquidate deposits by the measure of currency existing at the time of their receipt, it would never do to attempt to redeem bank-notes by the measure of currency existing at the time of their issue.

If this view of the case be correct, and we should say it can scarcely be controverted, we can easily understand the bankers giving orders to their compradores to receive no broken money, nor badly defaced coin, and to get rid of what they may already hold by all possible means. And should this suggestion be correct, it will fully account for the stand the Chinese merchants have taken, the salient item of their complaint being the loss on the broken dollars which they receive from the country.

We repeat that the Chamber of Commerce would have done wisely to have appointed a committee to investigate this matter. The contingency we have indicated is as sure to happen as any sublunary affair that can be conceived. The evil day may be staved off, but it cannot be averted. It seems certain—at least according to our view of the case, that a great deterioration in the value of all the defaced coin in China will be caused by the operation of the Hong Kong Mint. Who, we ask, is to bear the loss? The reply is clear—the parties who hold defaced coin when the new currency shall appear. Consequently the cry is now, "Let defaced currency be eschewed as much as possible." But defaced currency being the currency of the day, how are commercial operations to be carried on in the meantime? The present attitude of the Chinese merchants will afford the best reply. The complaint may be brow-beaten or over-ridden, but it will surely break out afresh. The bankers will probably carry the day in relation to broken money, but it is little likely they will stop there, when they see the Mint staring them in the face. Defaced dollars will be next interdicted and then chopped dollars. At each and every stage of the proceeding the Chinere merchants will be the losers, and they will have to pay a much better kind of dollar than they receive.

There is a certain loss to be borne, and it only remains to be decided who is to bear it. It has ever been the custom on the establishment of a new coinage, to display the utmost consideration for those whose interests may be absolutely injured by the innovation. If the Chamber of Commerce had grappled with this question as they should have done, they would have arrived at the conclusion we have indicated, and they would then have been induced to open a correspondence with the local Government on the subject. They would have solicited the favour of having all broken and defaced money converted into the new coin on terms which would just save the Government from absolute loss. The rate of conversion could soon have been arrived at and declared, when the loss could be ascertained to a nicety.

It is a sad mistake to suppose that the Chinese merchants of this colony are combining to serve their own interests in this matter. They receive remittances of broken and defaced coin from the interior, the yield whereof proves very unsatisfactory to the parties remitting. The present stand is taken, more for the purpose of convincing the country dealers of the true state of affairs, than in the hope of coercing the foreign merchant. The combination of the Chinese will be pushed just far enough to stop the complaints of the country customers and no further. If the country customers should meanwhile take it into their heads to coerce the foreign merchants, they will of course try it. They cannot possibly succeed; they have merely to choose whether chopped coin shall be at a discount, or clean dollars at a premium. One or other must be the par of exchange—both cannot be, and it is useless to attempt it.

MACAO.

(DAILY PRESS.)

In addition to the gunboat which the Macao authorities contracted for with Messrs. Thos. Hunt and Co., Whampoa, we understand that Governor Amaral has entered into a contract for the construction of one in this colony. That both these are meant for service on the West Coast there is no matter of doubt, but in what respect they are destined to benefit the interests of Macao, is by no means certain.

Macao, as a place of trade, appears to be "flattened out," and gone past all redemption. Neither the Governor nor the Municipal Council appears to entertain the smallest hope of its resuscitation—if they had any such hope their intentions would have been expressed ere this; inasmuch as the Whampoa gunboat is nearly ready for service.

The Government of Macao is rich. It draws a large revenue from licensing and fostering Chinese immorality. The place is a stigma on civilisation, a cancer on Christianity. The end and the aim of the Government is not a desire to further Portuguese interests, nor yet to advance or promote the interests of its Portuguese residents. The latter are fast evacuating the place, which is being populated by Chinese. These are taxed and are allowed for a consideration to revel in immorality. A large revenue is obtained, and what is done with it?

Is it right that a European Power having no commercial interests whatever in China, should settle on the confines on its shores—and should provide a sanctuary for the outlaw, the man-stealer, and the pirate—for by these are the gambling tables of Macao maintained?

And under such circumstances, what can these gunboats mean? The prizes which they take from pirates may in the first place prove lucrative employment—but with the decrease of piracy that must follow, this source of revenue will soon fall off. What then—either the Macao authorities must undertake the protectorate of the west coast, as the Portuguese Consul of Ningpo some years ago undertook the protectorate of the Chusan fisheries, or the exclusive right to trade on the west coast will be set up. The latter conclusion we do not think likely, or the present exodus of Portuguese from Macao would cease. We do not feel clear about the former, because we do not exactly see how it is to be done.

The authorities of Hong Kong should keep a sharp eye on this gunboat movement. We can give them two strong hints—one, that notwithstanding the exodus of Portuguese from Macao, the value of property has more than doubled there the last few years, owing to the immigration of Chinese; the other, that the Macao authorities would never think of injuring the revenue they derive from the gambling licence (which they will do if they suppress piracy), unless they felt very sure of being recompensed in some other way. The Hong Kong authorities must further recollect that man-stealers and resetters are admitted into society at Macao. Men whose wealth has been notoriously derived from piratical connections, stand high in social life there.

THE VOLUNTEERS.

(EVENING MAIL, APRIL 17.)

The Volunteers should be getting into drill for the annual "turn-out" on Her Majesty's birthday. Since Colonel Brine left the colony there has been a want of life in the corps. This cannot be because the members are unwilling to turn out, but because of the ex-Colonel's ready tact in investing the simplest movement with the charm of novelty. The corps may therefore be reminded that though it has made a few excellent displays of strength during 1864 and in previous years, it has done nothing in 1865. It will not do to dream over past achievements and to prattle like garrulous old men over previous triumphs. The trips to Stanley and Macao have now done their work, and the accounts of them which we placed on record may be wiped out of the slate. The Volunteers must do something fresh; their arms are rusting and their very name is suggestive of something that was "Volunteers *fuerunt*" will not do just yet as an apt mode of referring to the existence of such a corps as we can muster. Let the Volunteer who reads this examine his side-arms and look at his carbine; if they are rusty or stiff from disuse, he may begin by having them made clean and bright. He may also air his summer clothing from time to time before laying aside the woollen uniform. We have had sundry successful marches, but a rendezvous at Victoria Peak has not been tried. Nothing could be more picturesque than fifty or a hundred uniforms wending upwards to the place of muster. The sound of the bugle call at the flagstaff would be most effective, and the company's colours would wave as gracefully on the mountain top as anywhere else. A couple of small howitzers might be made to do business for the day instead of the "deep-mouth'd" cannon which are usually brought into the field.

Our professional brethren in arms, the second battalion of H.M.'s 9th Regiment, lately treated us to a very excellent review on the Parade Ground, and it becomes the Hong Kong Volunteers to endeavour—not certainly to rival them in renown, but to pass a kind of fair muster with a view to maintain their knowledge of drill.

Since Major Scott left there has been no election of an officer to succeed him, so far as we are aware; and it is time that a successor should be named. Nor should we forget that the mantle of Corporal Goodall has not been offered to any of the active non-commissioned officers now in garrison.

We hear that signs of life are beginning to appear, and it is only to be hoped that these may not prove delusive, for there is a limit to the time that a healthy body may remain in a comatose state. It becomes the members of the corps as a matter of duty, to maintain some kind of coherence, so long as they are embodied, and recognised by the authorities. Their own sense of propriety must point that out clearly enough, and there is no time to be lost. Macao was the last great triumph of their arms, but that is nearly forgotten now even in the home papers.

The public want to know how the band is getting on, and whether its later progress bears out its early promise. The moment has arrived for putting this to the test, a test which, though severe, we are sure the gallant bandsmen will not flinch from.

The late success of the Rifle Corps at the shooting match has brought that body into favourable notice; surely the Artillery mean to show a front, but the decision on that point rests with the members.

We heard some time ago that a troop of Volunteer Horse was among the coming wonders of Hong Kong, and the idea is at least pleasing. There is no want of equestrian ability here, nor are there many men of standing who would find it difficult to produce a charger. We should feel greatly refreshed by the introduction of such a novelty as a mounted company. Let us hope the matter may prove something more than a joke.

A march-out has been circulated, we notice, for Monday first, when a good muster may be looked for, considering the famous weather.

WOOSUNG FOR THE PORT OF SHANGHAI.

(To the Editor of the *London and China Telegraph.*)

SIR,—The articles which have lately appeared in your columns on the subject of the river communication between Woosung and Shanghai are deserving of minute attention from the different commercial Chambers in London and Liverpool, and from the home insurance offices. Indeed, the statements made by you are rather below than above the mark, and have elicited unqualified approbation from those foreign merchants at this port who are not interested in steam tugs, and possess no overwhelming amount of landed property under the walls of the Chinese city. As might reasonably have been expected, those members of the community who have speculated on the rapid deterioration of the river, and, in view of it, have invested largely in powerful tug-boats (which, by the way, are not always successful in saving the ships under their charge from the perils of the river

Digitized by Google

navigation) cry down the idea of a railway to Woosung, and extol the upper reach of the Wongpu as the safest and most convenient of anchorage grounds. The space now available for berthing vessels opposite the settlement is rapidly narrowing, in consequence of the natural tendency of all muddy rivers to silt up their banks, while the operations of nature are powerfully aided by the exertions of private firms, which operate by the extension of long stone jetties into the current of the stream. There is, unfortunately, no power in existence here competent to check the ruinous practice of running piers into the river; and indeed the Municipal Council itself has just achieved a work which, I fear, will in five years' time stand as a monument of their ignorance or recklessness. They have placed a mole at the end of the avenue of the settlement now known as Nanking-road, but probably more familiar to your readers as Park-lane. This mole is constructed of earth, faced on three sides with shingle, and projects some 100 feet into the river at a point where, especially during spring tide, the stream runs like a mill sluice. Such an obstruction can have but one effect—the narrowing of the channel and the diversion of a considerable body of water into the centre of the whirlpool which now eddies opposite Putung Point. The "chow-chow" water must necessarily be increased in volume as well as in intensity; and, to render the matter still worse, an enterprising private speculator has rescued about two hundred feet of the Putung Point from the river, thus rendering the chance of a vessel arriving in safety at the upper reach extremely problematical. I have no hesitation in saying that within three years it will be utterly impossible for a thousand-ton ship to reach a berth opposite the Custom-house; and unless the wharf accommodation of the port be largely increased, or Woosung be made the anchorage, the only means of landing cargo will be by cargo boats sent from Shanghai to an indefinite distance down the river, and liable to all the abuses which have lately been exposed here. Now, in order to encounter all these inconveniences and danger, ships pass Woosung, where there is excellent shelter, pay a large amount for tonnage, and, unless sent alongside one of the few wharves, are delayed for periods varying from three to eight weeks before they are able to discharge their cargo. Moreover, the large river steamers which, especially during the tea season, arrive daily from the Yang-tse ports with Chinese produce for transhipment, run through Woosung, tempt the dangers of the bar, and the still greater dangers of the river, and eventually arrive at Shanghai to transfer their cargo to ships which in turn have to run the gauntlet of *chow-chow* water, mud banks, non-teetotal pilots, and finally the bar, below which the tea, or whatever else it may be, could easily have been transshipped, and upon which no less than eight vessels were during last year badly stranded. Besides these drawbacks, which are indeed sufficient to suggest the establishment of a different order of things, two mails have lately been detained below the bar (one for five hours) while waiting for sufficient water to carry the steamer over. Now, these are simple facts, well known to everybody in Shanghai; and in the face of them I have been astonished at various furious letters which have been indited on the subject, some of which I have no doubt reached you, Sir, by the French mail, and others which will accompany this communication of mine. The advantages of Woosung have already been enlarged upon. There we have an excellent anchorage, with the best possible sites for docks and wharves; between it and Shanghai we have a perfectly level country, intended by nature for the construction of a railway; and even now there is a carriage road 25 feet wide, which, with the few bridges necessary, will be completed by the middle of May. The constructors of this road have hit on a novel and ingenious mode of making it pay its expenses. They have ordered two omnibuses, which will each make a trip up and down daily at a moderate fare; and as it now costs natives one dollar for a wheelbarrow and two dollars for a sedan, from Woosung to Shanghai or *vice versa*, the omnibuses will no doubt be extensively patronised. I say nothing of the healthfulness of Woosung, although that is an element which might very reasonably enter into our calculations; yet, against all these considerations, the owners of tug-boats and the owners of property accumulated in mad speculation during the land mania of 1862, cry out in concert that the adoption of Woosung as the port of Shanghai will prove the knell of Shanghai prosperity. It may prove inconvenient to the men who have plunged into extravagant speculation on the strength of owning some hundred *mow* of Shanghai mud—it will prove still more inconvenient to the holders of mortgages effected two years ago, but to the men who hold property only in proportion to their absolute mercantile importance the step would prove in no way injurious. Whether Woosung rival Shanghai or not, the foreign settlements, as in the immediate vicinity of the Chinese city, must retain a considerable amount of importance. Godowns and warehouses will still be required here, and the necessary intercourse with the Chinese will be conducted as heretofore, at the offices in Shanghai.

I am not therefore careful to answer the many assertions which will probably inundate your columns. I am satisfied that sooner or later Woosung must become the port of Shanghai, and the obstacles now thrown in the way are simply practical illustrations of selfishness and short-sightedness.

With many apologies for thus trespassing on your space,

I remain, Sir, yours, &c., FREE TRADE.

Shanghai, April 2, 1865.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, June 15.

The Minister of the Colonial Department has gained, without any doubt, an immense Parliamentary victory. His Bill about the tariff for the Netherlands Indies has passed by 49 votes against 8, whilst all the amendments—whether in a Conservative or more Liberal sense—are rejected. When the First Chamber of the States-General has passed the Bill—and there is no doubt that will be done—the export duties from the 1st January, 1866, will be fixed as follows :—

Articles.	Rate.	Duties when Exported to Holland.	Elsewhere.
Hides	Value ..	2 per cent. ..	2 per cent.
Indigo, not prepared for the inland market	Per lb. ..	f.0.10 ..	f.0.15
Coffee	Value ..	6 per cent. ..	9 per cent.
Sugar	„ ..	Free ..	3 per cent.
Tobacco, not prepared for the inland market ..	Cwt. ..	1f. ..	1f.
Tin	„ ..	f.3.50 ..	5f.
Birds'-nests	Value ..	6 per cent. ..	6 per cent.

Amongst those who opposed the Bill were two Liberal members, but they represented the Almelo district, the Dutch Manchester, and—I need not add—it was not to the interest of those manufacturers that the Bill should pass. In the meanwhile the first step is taken towards introducing in our Indian possessions the principle of free-trade, and there is no doubt that on the 1st January, 1872—till which day this law will have effect—the principles of protection will be totally relaxed.

If Mr. Fransen van de Putte has been fortunate, such has not been the case with his *confrere*, the Minister of the Financial Department. After his Bill for the augmentation of the excise duty on spirits to 50f. per 100 litres was approved, the Bill relative to personal taxes came on for discussion. At the first sitting six members, mostly of the Liberal party, opposed the measure, and Mr. Betz asked for a delay till the following day before he replied to their arguments. At the next sitting, however, he did not make his appearance, and the President stated that illness prevented his presence. One of the ministerialists then proposed that the House should adjourn, and this motion was carried to-day by a majority of four votes. Why was the Bill not withdrawn, since it meets so much opposition ?

The First Chamber of the States-General will meet again on the 22nd inst.

COMMERCIAL.

COFFEE.—The market remains in a firm condition ; the trade is occupied inspecting the parcels to be offered by the Trading Company on the 21st inst. These parcels are almost all of a good and superior quality, so that probably high prices will be paid. Good ord. with good demand at 44½ to 45¼ c. The 4,200 bags Santas in auction on the 7th inst. were sold from 31½ to 39½ c.

SUGAR.—The market is calm; there are no transactions to be mentioned since my last report, except 1,149 krang. Passaroeang ex Catharina Maria, at 1½f. under May prices.

TEA.—Firm but inactive, by want of parcels in the 1st hand.

RICE.—Unchanged, prices nominal; Aracan, 8f. to 8¼f. ; Bassein, 8¼f. to 8½f. ; Java, 9f. to 10½f.

SPICES.—With some more inquiry for export, but holders decline to operate at the existing prices. Mace 43 to 44 c. ; Cinnamon 97c.

TOBACCO.—The several auctions of circa 8,000 p. Java have begun, the buyers are more animated. The several prices paid will be mentioned in my following report. Stock in Rotterdam 11,693 b. Java

COTTON.—There is a good demand at former prices. 400 b. Java were taken for export.

HIDES.—In more request at former rates. The parcels sold consisted of 1,328 p. E.I., per Oceanus; 315 p. Buffalo, per Constantia; 600 p. Sourabaya Buffalo, ex County of Lanark; 486 p. Batavia Buffalo, ex Gysbert Graaf van Hogendorp.

INDIGO.—The market is in a firm condition. 100 chests Java were sold, and an advance was paid on the auction prices.

TIN.—Without transactions. Prices nominal, 56f.

COCHIN COCOA-NUT OIL.—1 a Cochin, 28f. ; good white, 27f. ; 1 a Ceylon, 26f. to 26½f. ; good white, 25½f.

ARRAK.—In much demand. 200 casks ex Nova-Zembla ; 190 casks ex Maria ; 50 casks ex Oceanus ; 30 half-casks ex Augusta were sold.

GUTTA PERCHA.—At the auction held to-day 19,600 lbs. were partly sold at from 100c. to 130c. ; 9,377 lbs. were retired at 40c. to 125c.

MONEY.—Our money market is easy. Bank discount for bills 3 per cent., for acceptances 3½ per cent.; open market 3¼. Homestock, 2½ per ct., 62⅝ ; 3 per cents., 73 13-16ths ; 4 per cents., 97⅛ ; Handelmaatschappy, 144½ per cent. ; Rhine Railway Shares, 337f. ; Central Railway, 36 per cent. ; Soc. of Expl. States Railway, 92 per cent.

EXCHANGE.—London, 3 months, f.11.77 ; 2 months, f.11.80 ; short, f.11.87½ ; Paris, 3 months, f.46,66 ; 2 months, f.46.80 ; short, f.47.20 ; Hambro, 3 months, f.34.87 ; 2 months, f.34.95 ; short, f.35.10 ; Berlin, 3 months, f.171 ; St. Petersburg, 3 months, f.151 ; Italy, 2 months, f.46.

SHIPPING.—ARRIVALS.—June 8, at Texel from Batavia, Zeenimph ; 9, at Texel from Banjoewangie, Electra.

DEPARTURES.—June 7, from Brouwershaven to Batavia, G. K. Graaf van Hogendorp ; to Hong Kong, Nova Zembla ; to Batavia, Loevestein ; 10, from Brouwershaven to Batavia, Philips van Marning.

FREIGHTS.—Quotations of Messrs. Fauchey and de Vletter, shipbrokers, Rotterdam :—For Batavia, Koffyboom, 1,280 tons, 18f. to 20f. ; Batavia and Sourabaya, Bezoekie, 747 tons ; Hugo Grotius, 673 tons ; Boni, 575 tons ; Johanna, 713 tons—18f. to 20f. for B., 25f. to 30f. for S. ; Batavia and Samarang, Bilderdyk, 754 tons, 18f. to 20f. for B., 25f. to 30f. for S. ; for Samarang, Doelwyk, 824 tons, 25f. to 30f. All per last of 2,000 ks. or 120 cubic feet, Amsterdam, and 15 per cent. For Kanagawa and Nagasaki, Maria, 380 tons, 20s. to 30s., and 15 per cent. ; Cape of Good Hope, Wildeman, 325 tons, 30f. to 40f., and 15 per cent. ; Singapore and Hong Kong, Mary Goddard, 312 tons ; Sophia Amalia, 319 tons, 30s. for S., 40s. for H., and 15 per cent. ; Singapore, Neerlandsch Vlag, 106 tons, 30s. to 35s., and 15 per cent. All per ton of 1,000 ks., or 40 cubic feet, English.

Digitized by Google

PASSENGERS INWARD.

From Java, per Zeenimph, Captain Graadt von Roggen, Messrs. M. J. Moltzer and five children, C. J. Kraus and family, Hoorn and family, Struick, Snyders, Mrs. C. Gebing van den Berg, and 77 soldiers; per Electra, Captain Landweer, Messrs. J. W. E. Knipe rs and family, W. C. Ros Vosmaer, J. Sas.

PASSENGERS OUTWARD.

From Brouvershaven to Batavia, per Philip van Marnix, Captain van Ruyven, Messrs. Berg and family, Hissink, Mrs. Roukens and family, de Korte, Messrs. Busch and van Ruijven; per Kosmopoliet, Captain Koning, Dr. J. Enthoven and family, Messrs. F. David and family, C. Pruys van der Hoeven, Blanche van Kempen, Miss M. v. d. Broek, Messrs. J. van der Quass, M. Plate, A. Cupaerus, J. Guerin, J. S. Roels, A. H. A. C. van Nistebrooy and family, K. J. A. Pape, H. A. A. Nielson, J. E. Kokart, H. A. Reyers, W. J. R. Kalkshoven, and 150 soldiers.

ROTTERDAM, June 23.

There is no political news of any importance. The Second Chamber—adjourned when in the debate on the personal duties (*belasting op het personeel*)—was interrupted by the illness of the Minister of the Financial Department, Mr. Betz. On the 4th of July the members will meet again, but it is very doubtful whether this Bill will be brought forward in an unaltered state.

The First Chamber of the States-General meets to-day, and after some other business the Indian Tariff will be laid on the table, which, without any doubt, will be passed by a large majority.

Our Queen will start on the 26th for England. It is still widely rumoured that her journey has reference to the marriage of the Prince of Orange.

COMMERCIAL.

COFFEE.—Before the auction of the Trading Company the transactions were of little importance for want of ordinary good tasting Java sorts. 1,000 bags Padang, ex Jan Daniel, only changed hands at 45c. The 84,231 b. Java and Macassar, offered yesterday by the Trading Company, were all sold at ¼ to 1 c. above valuation, so that the market closes in a very firm condition.

SUGAR (RAW).—Dull: The market inactive. 1,400 kr. Java only were sold at 1¼f. beneath the May prices.

TEA.—The market is in a firm condition, but there are no transactions to be mentioned for want of parcels in the first hand. Java sorts are in more request in the second hand, and an advance upon the last auction prices is willingly paid.

INDIGO (JAVA).—There is much inquiry, but the transactions are very limited for want of stock. About 200 chests were sold with an advance of 20 to 25 cts. on the last auction prices. Holders now decline to operate beneath an advance of 30 cts.

BANCA TIN.—The market is more active, and several pareels were taken at 55f., 55¼f. to 55½f. There are now no parcels in the market beneath 56⅛f. In consequence, however, of the near approach of the quarterly sales buyer decline to pay that price.

COCOA OIL.—Much higher; Cochin is willingly paid with 28f.; Ceylon with 27f. There is no stock.

GINGER (CHINA).—The 100 chests offered in auction were retired at 66 cts., but they were sold since at prices that did not transpire.

JAVA VANILLE.—The quantities offered in public sales were retired at 3f. per lb. Inferior quality was paid with 1f.

CASSIA LIGNEA.—20 p. were sold at 11½f.

TOBACCO.—The several auctions on which 5,236 p. were offered, went off at improved prices. The market closes, however, inactive and dull.

RATTANS.—6,898 bundles, ex Fransen Elise, were sold at former rates.

MONEY.—The quotation of the Bank discount is still unaltered, and money is abundant. The Stock Market is calm, except for those stocks for which there is much speculative inquiry. Dutch 2½ per cent., 62¾; 3 per cents., 73⅛; 4 per cents., 97⅞; Handelsmaatschappy, 145½; Dutch Rhenish Railway (shares), 337f.; Company for Exploration of the State Railway, 92 per cent.

CHANGE.—London, 2 mo., f.11.80; short, f.11.87½; Paris, 2 mo., 56.3-16ths; short, 56⅛f.; St. Petersburg, 152f.; Italy, 46⅛f.; Spain, 229f. to 231f.; Hambro', 2 mo., 34.15-16ths.; short, 35⅛f.

EXPORTS FROM THE 13TH MAY TILL THE 2ND OF JUNE, FROM DUTCH HARBOURS TO THE DUTCH EAST INDIA POSSESSIONS:—Butter, 13,246 lb.; flour, 30,610 lb.; cheese, 9,637 lb.; ham, 4,659 lb.; meat (preserved, 2,087 lb.; pork, 33,800 lb.; syrup, 600 lb.; victuals (preserved), 5,621 lb.; confectionery, 4,935 lb.; fruits (preserved), 2,339 lb.; cakes, 7,025 lb.; geneva, 72,084 litres; rum, 336 litres; liqueurs, 2,368 litres; cognac, 4,553 litres; beer, 67,095 litres; vinegar, 3,020 litres; wine, 53,441 litres: linseed-oil, 13,600 litres; petroleum, 6,670 litres; cotton (manuf. all sorts), 951,480 yards and 18,100f.; drillings, 100,000 yards; silk (manuf.) 2,124 yards; calicoes, 10,925 yards; jute coffee bags, 12,000 ps. and 8,000f.; flannel, 5,283 yards; carpets, 295 yards; sail-cloth, 5,000f.; earthenware, 100,966f. and 13,340 lb.; earthen-tiles, 20,000 ps.; window-glass, 104f.; glasswork, 12,490f. and 2,553 lb.; lamps, 4,000f.; rope, 4,771 lb.; white lead, 1,250 lb.; coal-tar, 28,000 lb.; tar, 7,750 lb. pitch, 70 lb.; coals, 1,151,160 lb.; copper, 2,635 lb.; iron bars and rod, 17,000f. and 10,000 lb.; iron-nails, 6,400 lb.; needles, 2,000,000 ps.; alkali, 1,270 lb.; machinery, 13,800 lb. and 674f.; silverwork, 950f.; carriages, 2,600f.; clocks, 1,045f.; photogr. and optical, 1,080f.; mercery, 20,720f.; and 502 lb.; arack-casks, 3,840f.; mattresses, 7,000f.; music instrum., 2,130f.; perfumery, 882 litres and 104 lb.; furniture, 9,100f.; writing-paper, 1,900f. and 700 reams; paper, 8,963f.; Holloway's pills, 100 lb.; steel-pens, 130 lb.; copper (manuf.), 6,384 lb.; lucifers, 1,713 lb. and 1,500f.; cotton-yarns, 9,000 lb. and 3,000f.; chocolate, 478 lb.

SHIPPING.—DEPARTURES.—June 14, from Brouwershaven, for Batavia, Cortgene; 15, from Texel, for Sourabaya, Nederland and Oranje, Zeemanshoop; 16, from Brouwershaven, for Batavia, Kosmopoliet; 18, from Texel, for Batavia, Amsterdam, Nic. Witzen: for Macassar, Elizabeth Jacoba; 19, from Zeirikzee, for Batavia, Grondwet; 20, from Brouwershaven, for Batavia, President van Ryckevorsel.

ARRIVALS.—June 13, at Texel, from Banjoewangie, Henriette; 17, at Hellevoet, from Banjoewangie, Elise Mary; 18, at Brouvershaven, from Banjoewangie, Cassipore.

LOADING.—For Kanagawa and Decima: Bantam, Gloria, Hermine, Marie Elizabeth. For Padang: Excelsior, Anna and Jeannette, Helena. For Batavia: Azia, Jan van Brakel. Helena and Anna. For Batavia and Samarang: Constance, Jacob Roggeveen, Tjilingsie. For Batavia and Sourabaya: Louise, Henriette Geertruida. For Samarang: Gerredina, Wilhelmina, Mathilde, Albasserwaard, Tenalak, Presto. For Sourabaya: Quintet, Senior, Bellatrix, Henderika. For Singapore and Hong Kong: Bernard and Agnes.

FREIGHTS.—Quotations of Messrs. Fauchey and de Vletter, shipbrokers at Rotterdam:—For Batavia: Koppyboom, 1,280 tons; Constantia, 741 tons; 18f. to 20f. For Batavia and Sourabaya: Bezoelci, 747 tons; Hugo Grotius, 673 tons; Boni, 575 tons; Johanna, 713 tons; 18f. to 20f. for B., 25f. to 30f. for S. For Batavia and Samarang: Bilderdyk, 754 tons; 18f. to 20f. for B., 25f. to 30f. for S. For Samarang and Doelwyk, 824 tons; 25f. to 30f. All per last of 2,000 kilo., or 120 cubic feet Amsterdam and 15 per cent. For Kanagawa: Maria, 380 tons; 20f. to 30f., and 15 per cent. For Singapore and Hong Kong: Mary Goddard, 312 tons; Sophia Amalia, 319 tons; 30s. for S., 40s. for H., and 15 per cent. For Singapore: Neerlandsche Vlag, 106 tons, 30s. to 35s., and 15 per cent. All per ton of 1,000 kilo., or 40 cubic feet English.

PASSENGERS INWARD.

From Java, per Henriette, Captain Visser, Mr. J. W. Schutter.

PASSENGERS OUTWARD.

For Java, per Nederland and Oranje, Captain Haasnoos, Mr. R. Zindelhoff.

HAMBURG.

(FROM OUR OWN CORRESPONDENT.)

JUNE 14.

In one of my earlier letters in the *China Express*, now some years ago, I warned your mercantile readers in the Far East not to charter or send goods to this port by any vessel under the Oldenburg flag, as the Grand Duke had not agreed to pay his share of the indemnity to Hanover for the abolition of the Stade dues, and that this was the only State whose vessels and cargoes were liable to that toll. I am now enabled to state for their government that Oldenburg has at length made up its mind to pay its quota, and a treaty with Hanover has lately been signed to that effect, so that from and after the 1st of July next Oldenburg vessels are placed on the footing of all other flags, and the officials at Stade and in this city—where the dues were chiefly collected—are discharged, and the whole establishment will be broken up.

Intelligence has been received here fully confirming the report contained in my last letter of the attack on the *Georg Andreas*, Capt. Ahrenholdt, belonging to this port, but sailing, I believe, under the Danish flag. She left Hamburg on the 29th of March last for Swatow, and it appears she was attacked by pirates near Single Island, in the Lye-moon Passage, who drove the crew below deck and plundered the ship. In attempting to defend himself the captain was unfortunately killed, and two of his sailors were slightly wounded. The pirates, finding the cargo consisted only of rice—whereas they thought it was opium—abandoned her, and the crew managed to regain possession of the deck, and eventually succeeded in bringing the vessel in safety back to Hong Kong.

At the last sitting of the Historical and Philosophical Department of the Russian Academy of Sciences, at St. Petersburg, Lieutenant-Colonel Tatarinoff, of the Imperial Engineers, who has lately returned from an exploring expedition in the Province of Semipalatinsk, presented to the Academy a slab of calcareous stone, covered with inscriptions, discovered by him in the Tarbagat range of mountains. The learned academician Schiffner, having examined the inscriptions, pronouneed them to be of Bhuddist origin, and written in the language of Thibet with the well-known form of letters, which he found no difficulty in deciphering.

The Russian *Northern Post* (an official journal) contains the following:—"The Director of the Department for Foreign Affairs in China has informed our Envoy Extraordinary and Minister Plenipotentiary at the Court of Peking, that in virtue of Art. 1 of the tariff, stipulating that all articles not enumerated in the tariff shall be subject to an import duty of 5 per cent. *ad valorem*, it has been decided that camel's hair (to-joun), not being specially mentioned, shall be subject to the duty of 5 per cent. on importation into China."

The *Irkutzk Gazette* gives the following particulars of the trade of Kiachta during the year 1864:—Exports: Russian produce and manufactures, value 3,589,221 roubles; foreign do., 57,089. Precious Metals: Russian gold coin, 322,056 roubles; do. silver coin, 1,721,994; foreign silver coin, 843,625; Russian paper money (bank notes), 953,632; total value of exports, 7,497,619 roubles. Imports: China produce and manufactures, value 7,577,975; Mongolian do., 179,835; cotton stuff of velveret, 6,412; total value of imports, 7,764,222 roubles.

Mr. Franz Carl Ferdinand Nissen, whose appointment as Vice-Consul for Sweden and Norway at Ningpo I mentioned in my last letter, has now

Digitized by Google

been appointed by the Senate of Hamburg, in conjunction with the Senates of Lubeck and Bremen, Hanseatic Consul at the above-named port, and gazetted accordingly.

COMMERCIAL.

COFFEE.—Enormous quantities of this berry have been shipped from this port to the United States for consumption in the Southern States, the ports of which will be again opened to the commerce of the world on the 1st of July. Competition to be the first in the market is so keen that the shippers make no scruple of paying steamship freight, and send out large parcels by the regular Hamburg steamers to New York for trans-shipment to the South. Several sailing vessels, with cargoes of coffee for this port, have been intercepted in the Channel, and ordered to proceed to the United States. All this has caused great activity in the market here, and prices are higher. Sales of the week, 31,000 bags, partly on speculation, and partly for the execution of orders.

SUGAR.—But little has been done in Raw, and there is no alteration in the values. Refined firm; sales of the week, 15,000 loaves.

RICE.—No dealings of any importance, but prices well supported.

SPICES.—Neglected; prices without variation.

SPELTER.—The opinion for this metal is favourable, and sellers are loath to operate. Prices rather better, with a tendency to a further rise. The following sales are reported since last mail:—

1,500	centners	in loco	14 marks	8	Sch. Bco.
500	„	per July and August	14 „	8	„
500	„	loco	14 „	9	„
2,000	„	per August and Sept.	14 „	10	„
5,000	„	per ultimo June	14 „	10	„
1,000	„	per July and August	14 „	9	„
1,000	„	in loco	14 „	9	„
1,000	„	for arrival	14 „	10	„
2,500	„	per ultimo June	14 „	10	„

Stocks considerably reduced, and comparatively but little expected.

DISCOUNT—2½ to 3 per cent.

SHIPPING.—SAILED.—Elise, to Singapore and Hong Kong; Tek-li, to Singapore direct.

JUNE 23.

Captain Greif, of the Hamburg three-masted schooner *China*, lately returned to this port from Zebu, one of the Philippine Islands, reports having passed over a coral reef on the afternoon of the 30th December last, in the Balabac Straits, not laid down in any of the charts. He hove the lead and found successively seven, nine, and ten fathoms, and the next cast gave no soundings at all, though with a deep sea line. Observing surface ripplings to the south he thought it prudent to alter his course. As he had taken a good observation of the sun at noon he was able to fix the position of the reef, which he states to be 8 deg. 1 min. north latitude, and 118 deg. 4 min. east longitude. He judged it to be a mile and a-half in circumference. The breeze was blowing too fresh to allow him to lower a boat and make any further examination; he therefore bore up and continued his voyage.

Letters received here from Shanghai state that the Chinese authorities have made a new arrangement by which Hamburg vessels, which hitherto had to pay their tonnage dues at the rate of two tons register, per commercial last (which is the unit of Hamburg ship measurement), will in future be charged at 4 lasts, equal to 9 tons register. The treaty of September 2, 1861, contains no stipulation on the subject, and the letter states that the captains and supercargos of Hamburg vessels prefer to pay this overcharge to incurring the expense and loss of time occasioned by insisting on an actual measurement in Chinese ports. I think they act very wisely in thus holding their tongues, and the less they say about it the better, as were they to make a formal complaint and court inquiry the result would probably not be so favourable as they might wish; for the Hamburg commercial last is for all general purposes taken to be equal to three tons for measurement goods, whilst for dead weight it is 6,000 Hamburg lbs., or 3,000 kilogr., which at 110 232-1,000ths Hamburg lbs. per cwt. avoirdupois, makes three tons, less only 106 lbs.

By advices from Siberia, it appears that brigandage is becoming very general on the Russo-Chinese frontier, several cases having been reported lately. The St. Petersburg *Northern Post* contains the following account of the latest highway robbery there: "The Chinese subject Lian-tsun was returning home on the evening of the 14th of February last from the town of Troitzkosafsk, in the province of Sabaikalsk, to his village near the frontier town of Kiachta, when he was stopped by three unknown persons, who under the pretext of asking him for some tobacco, took off his fur pelisse, and relieved him also of 372 roubles that he had with him. Only a few days later a caravan travelling with valuable merchandise from Mongolia to Kiachta, and escorted by five Mongolians, having stopped to pass the night near Troitzkosafsk, was attacked by an armed band of robbers in the costume of the Bouriates, and the caravan was pillaged. They took away 50 liangs of Chinese silver, 5 chests of tea, 90 pieces of manufactured goods, 3 cases of tobacco, with some pistols, pipes, stirrups, and money. The Mongolians at first defended themselves and wounded some of the robbers, but were eventually overpowered by numbers. The account adds that the Border Police were actively engaged in tracing the culprits, and had succeeded in arresting some of the lawless band."

The following account has been received at St. Petersburg of the state of affairs in the town of Tchougoutschak subsequent to the catastrophe of the 15th of January last. The Russian factory and the consulate were guarded by a detachment of rebel soldiers under the command of a serjeant. The church remains intact, though the Dunganes at first wanted to enter it in the hope of finding ammunition for their artillery, but the Russian sub-lieutenant (a Tartar) attached to the factory opposed it, threatening them with the vengeance of the Muscovite Government should they force the gates. The town is almost destroyed, and the Mandschurian population all massacred. More than seven hundred dead bodies were lying in the streets, and as many more persons who had fled to the steppes were either killed by the Kirghese or perished from cold. The citadel was still defended by seventy Mandschurians, who courageously held out, the rest of the garrison having been massacred by the Chinese, as before stated, on the 15th of January, as well as the Governor, Hebay Ambani, and the Vice-Governor, Bolgoss Ambani. The insurgents are vigorously supported by the Kirghese, of whom there are more than a thousand in the town, as well as fifteen hundred Dungane rebels, all inhabitants of Tchougoutschak. Further assistance was expected from the interior of China—especially from the tribe of Salo-Dungan, which is composed of a mixture of all the insurgents in China,

COMMERCIAL.

COFFEE.—The demand continues active for all descriptions, especially the finer sorts, which are a shade dearer, and getting scarce. Market on the whole remarkably firm. Sales of the week 13,000 bags ex warehouse and floating cargoes with 24,000 bags ordered to proceed to New York.

SUGAR.—Importers of Raw are more inclined to sell, and have therefore lowered their pretensions without avail, as the demand was slack. Refined maintains its position with a fair amount of business. Sales 12,000 loaves, chiefly of Hamburg make.

RICE.—Market in a favourable position, and rather higher prices paid, but the dealings were of limited extent.

SPICES.—Nothing to say about any one article.

SPELTER.—Prices continue to improve with a further upward tendency. The following transactions have taken place since last report:—

			Marks	Sch. Bco.

Parliamentary Intelligence.

HOUSE OF LORDS.

SINGAPORE AND THE STRAITS SETTLEMENTS.

(June 19th.) The Earl of ALBEMARLE, in rising to ask the President of the Council what progress had been made in the transfer of Singapore and the other settlements in the Straits of Malacca from the Indian to the Colonial Department, said that at the time the English flag was hoisted in these settlements the population was chiefly composed of piratical Malay fishermen. Now, however, there was a peaceable, industrious, and thriving population of a quarter of a million, with a trade which might be estimated at £15,000,000. The greatest portion of that commerce was transacted with this country, and the capital embarked in it belonged to merchants of London, Liverpool, Manchester, and Glasgow. Singapore, the principal settlement, was 1,500 miles from Calcutta. It was true that these settlements possessed a Governor, but he had no legislative power, that power being lodged in the hands of the Governor-General of India. Not only were these settlements situated at so great a distance from the seat of Government, but the population was chiefly composed of Malays and Chinese. They now naturally desire to come more directly under the authority of the Crown. They wished to have the same kind of constitution that had been granted to Hong Kong and Ceylon. For five long years they had been petitioning Parliament for this boon, but hitherto without success. In the beginning of this Session there was a slight gleam of hope that before its termination they might be transferred. The Secretary of State for India, after having demurred, gave way, and said he was ready to get rid of them; the Colonial-office said they were perfectly ready to receive them, but the Treasury naturally asked if they could pay their way. They gave a most satisfactory account of themselves, saying they raised an annual revenue of £250,000, which was amply sufficient for all municipal purposes, and for the military expenditure. The Treasury were satisfied, and sent them to the War Department. But here a little difficulty occurred. Some circumlocution took place. The present gar-

Digitized by Google

rison consisted of two batteries of artillery and two companies of Madras Native Infantry. The Straits Settlements, or those acting for them, proposed that there should be three batteries of artillery, and one native corps for police purposes, and to do duties of fatigue unfitted for the European constitution, with a due proportion of European officers and non-commissioned officers. The noble earl the Secretary for War gave the agents for the Straits Settlements reason to believe that the War-office accepted their proposals; but some time after, as he understood, the Horse Guards insisted it was indispensable that artillery should always have the protection of infantry, and therefore the proposal of the War-office was that there should be two batteries of artillery and a wing of a European regiment. The annual expense of all these combined, it was calculated, would be £48,000 a year. The Straits Settlements proposed to throw in £2,000 more, so as to make the amount £50,000 a year, leaving the War-office to make what arrangements they pleased. Considerable delay had since taken place, and the Straits Settlements were anxious to know the cause of it. He hoped their just expectations would not be disappointed, and that his noble friend the noble earl would be enabled to give a satisfactory answer to the question he had put to him.—Earl GRANVILLE said that a week ago he might have been enabled to give his noble friend a more satisfactory answer than he could now do. At that time it was thought another hour would have settled the whole question; but it had been found on a matter of practical detail that it would be necessary to bring in a Bill to effect the object in view; and, although the Government were very anxious to do so, he could not give his noble friend any assurance that it could be done this Session.

THE CONSUL AT SARAWAK.

(23rd.) Lord STRATFORD DE REDCLIFFE asked his noble friend the Secretary of State for Foreign Affairs whether in sanctioning the appointment of a consul at Sarawak, under the exequatur of Sir James Brooke, Her Majesty's Government intended to recognise Sir James Brooke as an independent Sovereign in Borneo.—Earl RUSSELL said that application having been made for the appointment of a consul by the Rajah of Sarawak, he felt it his duty to ascertain first whether Sir James Brooke had been placed in an independenr position by the Sultan of Borneo; and, second, whether, if he had, there was any objection to the appointment of a consul in his dominions. It appeared to be clear from the papers which were submitted to him that an independent position had been granted by the Sultan of Borneo to Sir James Brooke, and the law officers of the Crown, upon being consulted, gave their opinion that there was no objection to the appointment of a consul at Sarawak. He therefore advised Her Majesty to appoint a consul at that place.

HOUSE OF COMMONS.

THE INDIA AND CHINA MAILS.

(June 19th.) On the vote of £841,867 for the Post-office Packet Service Mr. WHITE asked the Secretary to the Treasury whether the Government had come to any decision on the question of a weekly mail to India, leaving on Friday. Such a mail would be of great importance to those engaged in the India and China trades.—Mr. CRUM-EWING expressed a hope that the Government would adopt the suggestion of having Falmouth or Plymouth the port for the India mail instead of Southampton; as such an arrangement would be a gain of nearly three days in the postal communication with India to the whole of Scotland and the north of England.—Col. SYKES observed that there were 70,000 European troops in India. The whole were to be relieved in ten years, at the rate of 7,000 in each year; making 14,000 *in transitu* between England and India every year. In addition, there were expired men and invalids, and men going out to fill up vacancies caused by death, which would give about 2,500 each way, or 5,000 in all, to be added to the 14,000; so that they had the total brought up to 19,000. The conveyance of these men involved a very considerable item of expenditure; and the consequence was that his right hon. friend the Secretary for India had before him a proposition for the building of transport vessels of a large class, like the *Himalaya*, to convey troops between this country and Alexandria and between Suez and Bombay and Calcutta. But, as it was not advisable to land troops in India during the monsoon or the hot weather, these vessels could only be used as transports during six months of the year. It was worthy of the consideration of his right hon. friend the Secretary for the Treasury whether they could not be turned to good account in carrying mails during the other six months. (Hear, hear.) He wished to know why an increase had taken place in the charge for the postal communication with the West Indies, and why there had been an increase of £7,000 for the packet service between this country and India.—Mr. Alderman ROSE said that the question of substituting Plymouth or Falmouth for Southampton as the port for the India mails had been fully considered by the Postmaster-General; but the noble lord had been unable to see that such a change would be attended with advantage. Southampton had great advantages. (A laugh, and "Hear, hear.") It had a double line of rail to London, and good dock accommodation for the steamers; while neither Plymouth nor Falmouth possessed either of those requisites. In addition, Southampton was within two hours of London by rail. Instead of there being a saving of time such as that spoken of by the hon. member (Mr. Crum-Ewing), the probability was that a delay in the transmission of the mails would be, as a general rule, the result of such a change. Southampton had as good a through communication with the north both by broad and narrow gauge as any other port, and postal communication, therefore, to the north could be effected as rapidly from Southampton as from Plymouth or Falmouth.—Mr. F. PEEL said that, as he had been prevented by a count out from answering some remarks made by the hon. member for the city of London on the memorial presented to the Treasury praying that the despatch of mails to India, instead of being on a fixed day of the month, should be on a fixed day in the week, as was the case with the Cunard mails to North America, he wished to say that the Postmaster-General was quite as sensible of the value of such a change as any one could be. The question, however, was one of expense. It must be remembered, however, that the mail service to India was connected with the mail service to China and Australia, and it would be impossible to make alterations in one service without making them in the others. The scheme of the mail service was this:—The mails went out four times in the month to Alexandria, and on the other side they went twice in the month to Bombay, and the other twice to Ceylon, and thence to Calcutta and China. One of these two last mails went on to Australia. So that there were forty-eight departures in the year for India, twenty-four for China, and twelve for Australia. If, therefore, weekly departures were substituted for the present departures of four times a month, the mail service would be increased by one-twelfth—there would be fifty-two departures for India instead of forty-eight, twenty-six for China, and thirteen for Australia. The increase in the frequency of departure would, of course, increase the expense to a proportionate amount. The expense of the service, as hon. members were aware, was very large indeed. (Hear.) The total expense amounted to about £390,000 a year; and of that £160,000 belonged to the Australian service, the loss upon which was divided between the Imperial Government and the Australian Colonies. The remainder represented the gross cost of the service to India and China, and the net loss upon that was divided between the Indian and the Imperial Government. The proposed increase of service would entail a further expenditure of about £35,000 a year, and though that might be probably covered by an increase in the number of letters sent, there would still be a large sum to be added to the present cost of the service. The proposal which had been made by the Post-office was, that the postage to India should be increased from 6d. to 1s.; and, when it was proposed that a fortnightly mail should be sent to Hong Kong, he believed that the commercial community had cheerfully acquiesced in such an increase, nor was he aware that any single complaint had been raised. The hon. member for the city spoke of a charge of 16d.; but that referred to letters going by way of Marseilles, the additional 4d. being the charge of the French Government for the transit through France. The member for the Tower Hamlets had called attention to the impolicy of foreign Governments imposing heavy transit rates, and he quite concurred in the hon. gentleman's observations. The present payment to the French Government was 10d. per ounce, but in the opinion of the Post-office the French Government would be indemnified if the charge were reduced by one-fourth; and in that case the transit charge on an ordinary letter, instead of being 4d., would be only 1d.; and the charge under the under the new system would be 1s. for letters going by Southampton, and 1s. 1d. for letters *via* Marseilles. This change would enable the Government to give additional postal facilities. It had been suggested that there should be a weekly mail to Bombay, but that would necessitate an increase in the number of running vessels from Bombay to Suez; but, judging from some recent tenders which had been received, that would be an additional expense, which could only be defrayed by an additional charge on the public. No decision had been come to yet, for it did not appear that the mercantile community would be satisfied to pay the additional charge. An hon. and gallant gentleman had referred to some transports which were being built to run between Bombay and Suez and Alexandria and England, which might be made available for carrying mails, but those vessels would not be ready before October, 1867. Consequently there was ample time for discussing that point. With regard to the Indian service, the contract with the Peninsular and Oriental Steam Company provided for their carrying Government passengers at two-thirds of their ordinary passenger rates. But it had been thought that the Government ought to make a contribution towards the cost of the passage of persons travelling between this country and India, and the company had arranged to charge the ordinary passenger fare for Government passengers, making to the Government an abatement of £15,000 from the subsidy on that account. There was not a real increase of cost for the Indian service, but, on the contrary, a reduction. The total charge was £162,125. From this they must deduct £44,000, the proportion to be paid by the Indian Government. A less sum would be paid by the Indian Government than last year, and the reason was that the postage was more. They had to deduct the amount of the postage from the whole charge, and what remained was divided equally between the Governments of this country and of India. The net loss last year was £100,000, but this year it was reduced to £80,000, half of which the Indian Government paid, but, of course, the gross charge had to be voted.—Mr. H. SEYMOUR thought they could not overrate the importance, in a social, commercial, and political point of view, of increasing and facilitating their communication with all parts of the world. Greater convenience, he believed, might be secured to the public without burdening the Exchequer. He had long been of opinion that our communications with India were not as perfect as they ought to be. The mails were not sent out with sufficient frequency; and it was most desirable that the civil and military *employes* of India should be able to visit this country as often as possible, and at the most moderate cost. The contracts for India were not on the best footing. There ought to be a separate contract for Alexandria, a separate contract for the Red Sea and down as far as Aden, and then they should have branches for India, China, and Australia, the Mauritius, and the Cape. In that way they might, without greater expense, have a weekly communication with these various important places. An increase of the Indian postal rates was a most impolitic measure, while it would bring a mere peppercorn to the public revenue, and he trusted that the Government would carefully reconsider the matter in the recess. In China the merchants were making large gains, and therefore, in equity, if the rate of postage to India was 1s., to China it should be 2s. 6d. [The hon. member has been badly posted up in regard to the "profits" of the China trade.]

CHINA.

(20th.) Mr. LIDDELL asked the Under-Secretary of State for Foreign Affairs whether any communications had passed between the Foreign-office and Her Majesty's representative in China relative to the permission said to have been given by the Chinese Government to its subjects to own foreign vessels and sail them under the Chinese flag; and whether, with a view of affording protection to the crews and cargoes of such vessels, Her Majesty's Government anticipated the necessity of any increase of our naval forces in Chinese waters, or whether the protection of its flag would be left exclusively to the Chinese Government, and all risks attending such trade, coasting or otherwise, left to be borne by such Chinese owners.—Mr. LAYARD said there had been a report to the above effect in the public papers, but the Government had received no information on the subject either from the British Consul at Shanghai or from Her Majesty's Minister at Peking.

LONDON, FRIDAY, JUNE 30, 1865

THE POLICY OF SIR RUTHERFORD ALCOCK IN CHINA.

THE appointment of Sir RUTHERFORD ALCOCK as our Minister at Peking receives the approbation of most of the banking and commercial classes interested in Eastern commerce. The judgment and decision exhibited in the past career of his Excellency promise to be of essential service in strengthening our political connection with China, and extending our trade. At a former election it will be remembered China provided one of those great questions on which issue was joined. We have now conducted a trade with China since 1684—a trade involved, for the most part of this period, in endless inconveniences and embarrassments. The results, however, are such as indicate that it has no present assignable limit, although the absorption of our manufactures and the actual gains realised are far from commensurate with the time during which our enterprise has been freely applied, or to the capital actually invested. A conviction appears generally to prevail that our Anglo-Chinese transactions are about to receive a fresh impulsion; that, notwithstanding the reign of civil war, we are destined to find ourselves brought into closer connection with the great centres of inland trade, and to be enabled to apply more profitably and on a more extended scale, the financial capital at our command—in a word, to obtain, if not a firmer, a more advantageous footing. It has become a question of no little interest as to what policy within the circle indicated by public opinion, our envoy will pursue? It is certain that Sir RUTHERFORD ALCOCK will not be content merely to exercise the symbolic function of Her MAJESTY'S representative, but will avail himself of every opportunity that present itself to forward, in all practicable forms, our material interests and strengthening in every practicable form that prestige which our Continental friends are apt to affirm we have seriously damaged, but which we venture to say was never further advanced than at the present time, whether the estimate be taken from a Mantchou or a Chinese point of view. We can well afford to fall short of any ideal of the Franco, the Tartar, or the Celestial type, provided we find our transactions in course of steady augmentation. Having met the full brunt of opposition to the presence of foreigners, we are now in a position that enables us to make our future moves a matter of accurate calculation of results, knowing pretty well the character and force of the disturbing elements.

Sir RUTHERFORD ALCOCK has not yet received his formal instructions, but in the interviews had by his Excellency with Earl RUSSELL, opportunity has been afforded for a complete interchange of views, which have coincided to such an extent as must aid the *potentiality* of the mission. It is considered no part of a Minister's duty to suggest means for securing to our merchants a greater profit upon capital, but our political and trading interests in China are in many respects so identified that any guarantees or special privileges which Sir RUTHERFORD may obtain for further encouraging inland intercourse, and more particularly in our obtaining a recognised position as traders in the great central marts of the empire, would certainly be in keeping with the mission. Both the Foreign Office and the Board of Trade are keenly anxious that our manufactures should obtain a larger outlet in China, and internal and unrestricted intercourse be extended and rapidly multiplied. It is not to be supposed that we can at once break down native combinations resulting in the adventitious control of the chief staples of Chinese industry; but with secured inland marts, and our own system of communication between them and the nearest ports, the conditions of trade, both for the foreign importer and exporter, must be far more favourable; 15,000 miles of water navigation will gradually become available for purposes of barter, and we may hope to see an end to the practice of Chinese mandarins forcibly preventing native merchants disposing to us of their produce except on the same terms they have arbitrarily fixed for their own stocks. We are satisfied that want of co-operation on the part of the representatives of other Powers will not turn Sir RUTHERFORD from his purpose. It is not always easy to judge the executive merits of diplomatic agents without seeing the instructions under which they act. There is some reason to suppose that the American policy will undergo a change with the changed fortunes of that Republic; that it will at once be more aggressive, and, to a certain extent, not altogether harmonious with our own. An undisguised dissatisfaction has already been manifested by Americans to the appointment of Sir RUTHERFORD ALCOCK, for his well-known characteristics, sagacity and energy, which enable him quite as readily to forestall the political movements of rivals as to break through the toils woven by Asiatic cunning and duplicity.

One of Sir RUTHERFORD'S earliest acts will, no doubt, be to urge on the Chinese Government its obligation to contribute a given annual sum towards the maintenance of gunboats on the coast and at the mouths of the great rivers, for the suppression of piracy. It is judged unreasonable that the Chinese Government should have the enormous advantages of the services of our gallant seamen, and of our large outlay to this end, and yet not contribute. We certainly do not find any such generous action on its part in other matters. The policy of the future may, we hope, be defined as a policy at once more positive and practical, tending to give free scope to our trading enterprise and the widest possible market to our manufactures. It will be anything, indeed, but that which—

> ———"stands upon the swell at full of tide,
> And neither way inclines."

Diplomacy in China is chiefly of value so far as it serves in protecting our present ventures, relieving us from the combinations of irresponsible officialism, and enabling us better to discover whence increasing resources may be drawn.

WOOSUNG FOR THE SEAPORT OF SHANGHAI.

IN AN article on the "China Shipping Trade," which appeared in our issue of the 17th February, we commented upon the high shipping charges, the losses from collision, and the detention of vessels at the port of Shanghai in consequence of the crowded state of the river Wongpoo; the insufficient accommodation for ships discharging and loading; the evils of the lighterage system, and the shoaling of the upper anchorage from natural causes, which the local authorities have not the means of preventing. To obviate these drawbacks of this *river-port*, we hailed with some degree of satisfaction the proposition to constitute Woosung the *seaport*, for the accommodation of sailing vessels that have a difficulty in crossing the bar, and to connect it with Shanghai by a line of railway, only *eight miles* long, so as to avoid *thirteen miles* of intricate and dangerous navigation to ships of large burthen. It appears that the project—which emanated from this side—has given umbrage to a certain class of traders, and their exponents in the local journals, who benefit by these very evils, which are so ruinous to shipowners and insurance companies connected with the shipping trade of Shanghai. On the other hand, those British residents of a liberal turn of mind, who have the interests of commerce at heart irrespective of individual considerations, look upon the project as the only means of maintaining the commercial supremacy of Shanghai—the emporium of foreign trade in China and Japan. On that head we refer our readers to a letter in another part of our columns, signed, "FREE TRADE," which has been forwarded to us from Shanghai by a correspondent, who furnishes from the spot most convincing proofs of the necessity for having Woosung made the anchorage for large tea-ships, and others heavily laden trading with the port. From the statements contained therein, it is evident that the narrowing of the channel at the upper anchorage, so as to preclude the

Digitized by Google

safe navigation of large ships, is actually being accelerated by the construction of a mole, a hundred feet long, straight into the river, a short distance below the Custom-house, which will have the effect of accumulating silt, and forming a shallow bank, like that before the British Consulate grounds. These, together with the numerous stone jetties at the bund, will tend to throw the force of the current towards the Pootung bank, where a British resident has reclaimed about two hundred feet of the shore. The consequence is, that where the channel was 1,650 feet wide at low water, in 1860, it is now in five years not more than 1,200 feet. At this rate another five years will, in all probability, narrow it to some 800 feet, and so on until the bed of the river becomes so shallow that ships drawing nine or ten feet of water will stick in the mud at ebb tide. But there is even a more serious contingency than this arising from the contracting of the channel in the elbow of the Wongpoo, which forms the two reaches above and below the Soochow Creek. It was the opinion of Commander WARD, R.N. and Captain BORLASE, R.N., when the river was being surveyed and sounded, that as the channel narrowed in these reaches the stream would naturally, force its way above the Chinese city, where it is wider, and cut a new channel for itself across the Pootung side, eventually forming the Point into an island. Moreover, in the early history of the Shanghai district, which is alluded to in the *Chinese Repository*, we find it mentioned, that "Twelve "centuries ago, in the time of the TANG dynasty, as related by "the Chinese historian, the river of Woosung (Wongpoo) was "twenty *li* (6⅔ miles); in the time of the SUNG it was nine *li*; "afterwards it gradually lessened down to five, to three, "to one *li*." In view of this data, and the reports of the engineer to the Municipal Council, which verify the statements of our correspondent, there are strong grounds of apprehension that the upper and middle anchorage of Shanghai is rapidly becoming dangerous and unfit for the safe discharging and loading of large ships, and the anchoring ground must be gradually extended towards Woosung below the "limits" where even now many vessels bring up when deeply laden, after struggling from two to four tides in attempting to cross the bar. By the construction of convenient T jetties at Woosung, where ships could be safely moored, or in docks, which that place is eminently calculated for, these dangers could be avoided; and, as our correspondent remarks, "the large river steamers which especially during "the tea season, arrive daily from the Yang-tse ports with "Chinese produce for transhipment, run through Woosung, "tempt the dangers of the bar, and the still greater dangers "of the river, and eventually arrive at Shanghai to transfer "their cargo to ships which in turn have to run the "gauntlet of *chow-chow* water, mud banks, non-teetotal pilots, "and finally the bar, below which the tea, or whatever else it "may be, could easily have been transhipped, and upon which "no less than eight vessels during last year were badly stranded." "The advantages of Woosung have already been enlarged upon. "There we have an excellent anchorage, with the best possible "sites for docks and wharves; between it and Shanghai we "have a perfectly level country, intended by nature for the "construction of a railway; and even now there is a carriage "road twenty-five feet wide, which, with the few bridges neces-"sary, will be completed by the middle of May." Coming, as this communication does from a correspondent on whose impartial judgment and opinions we have the utmost reliance, we take him as the exponent of the unprejudiced portion of the community, who look to the improvement of this port commensurate with its immense trade, and the introduction of modern works to facilitate commerce. "The owners of tug-"boats, and the owners of property accumulated on mad specu-"lation during the land mania in 1862, cry out in concert "that the adoption of Woosung as the port of Shanghai will "prove the knell of Shanghai prosperity." These are the class of residents whom our correspondent considers the alarmists at the railway project, and the obstructives to free trade. Now, we feel confident that there never was a greater fallacy than this cry of the general prosperity of Shanghai suffering from the introduction of safe, regular, and speedy communication with the sea-board; and we even go so far as to remark that landed property in business sites would improve by the railway being carried along the bund, or into the middle of the settlement. As to most of the cargo-boat and lighterage people, with certain pilots who prey like harpies upon ships and freights that enter the river, we would not libel the respectable residents of Shanghai by placing them in the same category of obstructives. As there were unprincipled traders who fattened on the contraband traffic in arms and ammunition with the Taipings, so there are selfish, overcharging boat owners and pilots, who get wealthy on the disasters that befal the shipping. These are just a kind of "wreckers," who gloat over the stranded vessels on the bar or shoals, where the latter are paid extra for detention until they reach the anchorage, and the former charge what they please for lighterage to ease ships when ashore. For the credit of Shanghai, irrespective of this Woosung railway scheme, the evils attending the pilotage and lighterage of vessels up the river are a disgrace to the port, and should be remedied without delay. The residents there must remember that this question involves the interests of others who are not land-renters or speculators in the country. The shipowners and insurance companies of England are largely interested in it, from the losses they annually sustain by detention and accident in the Wongpoo. The attention of the Chambers of Commerce in London and Liverpool is being directed to this dangerous navigation in a port where it might be avoided if not remedied. They find by the very reports of the Municipal Council that they are utterly powerless to render the river harbour safer, from want of means to dredge the channel and construct the necessary works. The annual report of that body was submitted to the land-renters in April, the details of which reached us by the last mail—showing that there is a large *deficit*, and there appears no prospect of raising sufficient revenue to cover it next year, in addition to the ordinary expenditure. As it is not a corporate body, each member is liable for the deficiency, consequently responsible residents decline acting, and there is little, if any, probability for years to come of the treasurer being able to collect taxes for carrying out the plans of the engineer, even to save the existing works in the harbour from decay. Under these circumstances it would be a boon to the whole community if a company was established with English capital to construct a railway to Woosung, and make that the seaport of Shanghai.

THE POSTAL SERVICE.

THE question of a weekly mail service to India and China has again been broached in the House, and according to the explanation given by Mr. PEEL, the Secretary to the Treasury, it is not intended to make the service to Singapore and China weekly, but on alternate Fridays; thus making 26 mails per annum in lieu of 24 as at present. We see no advantage in this alteration, and we think residents in the Far East will take the same view. What we require is an alteration in the time of arrival of the mails in London, which at present arrive just one to three days after the departure. This of course would involve an alteration in the time of starting from the Far East, which might not suit all ports.

THE STRAITS TRANSFER.

IN our Parliamentary intelligence it will be seen that Earl GRANVILLE, the President of the Indian Council, has stated in reply to the Earl of ALBEMARLE, that the Government were very anxious to have the Bill passed during this session, but that it was uncertain. From late inquiries we find that, owing to the early closing of the Session, the Bill must be thrown over until next Session, which is very unsatisfactory for all concerned. Residents in the Straits, however, will not regret it more than the India Board.

Sir Rutherford Alcock has left for the Continent in order to obtain the benefit of the German baths, previous to his departure for China, by the mail of the 10th Sept.

Mr. F. Clare Ford, at present an attaché to the Embassy at Vienna, has been appointed Secretary of Legation at Japan.

W. H. Mitchell, Esq., late Chief Magistrate of Hong Kong, has been duly passed as Barrister at Lincoln's Inn.

The China Dinner, fixed for the 15th July, will be presided over by Admiral Keppel, and will take place at Willis' Rooms, King-street, St. James's, at eight P.M. It is intended to confine it to officers of the Army, Navy, Consular and Civil services, and Merchants and others who have been resident in China and Japan. The tickets are one guinea and a-half. And the Secretaries are J. J. Mackenzie, Esq., and Major Brine,

Digitized by Google

Royal Engineers. The China Challenge Cup will be shot for on that day at Wimbledon.

We understand that Robert Jardine, Esq., is a candidate for the representation of Ashburton in Parliament. In consequence of his intended departure for China, it is not the intention of John Dent, Esq., to offer himself during the coming elections.

Naval and Military.

The following has been issued from the Admiralty:—(Value of the Mexican Dollar in China and Japan.)—The value of the Mexican dollar in China and Japan having been fixed by proclamation at four shillings and threepence, the paymasters of Her Majesty's ships and other accountant officers, are, upon the receipt of this circular, to make payments to the officers and crews at the above rate, and take credit in their cash accounts for the gain on such Mexican dollars as they may have on charge at four shillings and twopence each, the previous rate at which they were received and issued.

The Medea, paddle sloop, Commander D'Arcy S. Preston, has been out of commission at Portsmouth, after being dismantled and cleared of stores, on return to England from service on the West India and North American station.

The Wivern, 4, iron turret (2) ship, 1,857 tons and 350 nominal horse-power of engines, one of the celebrated "rams" built by the Messrs. Laird, of Birkenhead, and subsequently purchased by the Admiralty, arrived at Spithead from the Mersey on Wednesday evening, in charge of Captain Paynter and a party of officers and seamen from Her Majesty's ship Donegal. The vessel is reported by Captain Paynter to have behaved exceedingly well during the passage round, and to have made an average speed of ten knots.

THE PORT OF BRINDISI.—This port, which is some 800 miles nearer o Alexandria than Marseilles, is again brought to notice as the port of departure for the India and China mail service. The Bombay Chamber of Commerce has sent home a memorial to the Postmaster-General on the subject, pointing out also that Falmouth should be substituted for Southampton. We do not think the former has any chance of being carried out. Indeed, if the passengers who go to and fro could be canvassed, we are of opinion that Falmouth would not be approved over Southampton, which lies so convenient to London. The long railway journey involved with Falmouth would be found very unacceptable, to say nothing of the certain annoyances to be incurred for the first year. Experience proves very distinctly that the conveniences of a packet port are not to be "pulled together" or produced by "magic." Nothing but time can bring us all the advantages of Southampton, and we advise experienced residents in India and China not to trifle with that delicate fabric in a hot climate—"the temper." The annoyances which would be met with at a new port would be a grievous tax, especially to invalids who, in many cases, are quite unfit for a long railway journey. With regard to Brindisi it will be a long time before the harbour is fit for the arrival and departure of steamers at all hours; and in other particulars we think it would be premature to adopt the port in lieu of Marseilles.

THE CONFEDERATE CRUISER "SHENANDOAH."—The *Liverpool Albion* understands that instructions were sent some time since to the captain of the *Shenandoah* to abstain from all hostilities against the ships of the United States, and that Earl Russell has undertaken to send an intimation of the fact to the British consuls in the East. The *Shenandoah* is supposed to be on the coast of Japan.

GEORGE WINGROVE COOK.—This gentleman, who will be remembered as the special correspondent of *The Times* in China, died suddenly at his residence in Chelsea, on the 19th inst.

Monetary and Commercial.

Amongst the new undertakings lately announced is the British India and Colonial Trust Corporation, for the purpose of acting as agents for either merchants or private individuals resident in India, China, Australia, the Cape, West Indies, &c. The list of directors includes R. M. Martin, Esq., formerly Colonial Treasurer at Hong Kong, and the other directors have been so selected as to represent all these places. The company propose to deal entirely on commission, and transactions on their own account are strictly prohibited. Under good management this agency will be a very profitable affair, as the residents in these parts have almost outgrown the private agencies now in existence. Details will be found in another column.

Telegrams have been received dated Hong Kong, May 30, announcing the opening of the new teas at Foochow at two taels above last year, and that the *Serica* and *Fiery Cross* had sailed.

The biddings for £250,000 in bills on India took place at the Bank of England. The proportions allotted were,—to Calcutta, £121,200; to Madras, £31,200; and to Bombay, £100,000. The *minimum* price was as before, 1s. 10½d. on Calcutta and Madras, and 1s. 10¾d. on Bombay. Tenders on Calcutta and Madras at 1s. 11d. will receive about 60 per cent., on Bombay at 1s. 11⅛d. about 45 per cent., and above these prices in full. These results show a little increase in the demand for means of remittance.

The amount of bullion by the P. and O. Company's steamer *Poonah*, from Southampton on the 20th inst., was:—In gold, to Alexandria, £5,000; to Madras, £411. In silver, to Hong Kong, £6,630; to Shanghai, £4,000. Total, in gold, £5,411; in silver, £10,630.

ARTICLES OF IMPORT.

TEA.—Business has been limited, except in the finer kinds of Congous, which have become very scarce, whilst export orders have been on only a moderate scale. Prices have, however, been well maintained, the only exception being in fair medium kinds of Congou, on which importers have given way about ¼d. per lb., the demand for these at present being very limited. Prices for the low and dusty kinds of Congou have rather hardened, siftings now selling at 8d. per lb., whilst those with leaf under 1s. per lb., are difficult to meet with. Fair to good common show no alteration. Common to fair flavoury kinds do not meet with much inquiry the better kinds of medium quality are saleable at full prices, whilst fine to finest are firmly held for extreme rates. Common to fair blackish-leaf kinds are only taken to a small extent at about former prices. The qualities ranging from 1s. 3d. to 1s. 6d. have not been readily saleable; but good to fine and finest have been taken to some extent at fully previous prices. Tayshans show no alteration. Further arrivals of boxes of new-make, overland, have been sold at about 3s. per lb. Oolongs have not been in demand. Common to fair Souchongs show no change; fine continue in request at full prices. Flowery Pekoes are neglected. Scented Teas have been saleable at fully previous prices, but only as buyers have wanted them. Green: The new Moyunes have fetched extreme rates, as high as 2s. 8d. to 2s. 10d. per lb. having been paid for finest or No. 1 Young Hyson; fine grades, 2s. 2d. to 2s. 6d. per lb.; medium, 1s. 9d. to 2s. 1d. per lb. Gunpowder has fetched up to 3s. 6d. per lb. for finest, and finest Hyson 4s. per lb. There have been large sales of uncoloured Japan the last few days; about 5,000 packages having changed hands, the demand has chiefly been for good common and the fine qualities, and prices have ruled about the same as last quoted. The public sales, which commenced on the 20th inst., consisting of 46,000 packages, 18,000 packages, without reserve, are still in progress, and are passing without any striking change. Common Black Teas are selling at ½d. to 1½d. lower, but the few fine Congous offered have realised outside rates. Sales of about 1,000 packages of Indian Tea are declared for the 28th inst.

COTTON.—The Weekly Circular of the London Cotton Brokers' Association states—An improved demand on Friday, the 16th, was followed by a good business on Saturday, at enhanced prices; and on Monday and each succeeding day a large business has been transacted, resulting in an advance on Tinnivelly and Western Madras of 2½d. to 3d., and on other descriptions of 2d. per lb., the market closing firmly at these rates. There has been a considerable inquiry for Cotton afloat, but the operations have been limited by the small quantity available. Of the sales in London during the week comprising 18,560 bales, 410 China, middling fair to fair, went at 8¾d. to 11d., and 1,060 bales Japan, middling fair to fully fair, at 10¼d. to 12¾d. The total stock in London on the 22nd June was 66,687 bales, against 85,304 bales last year. Of China and Japan the

Digitized by Google

stock was 7,521 bales against 33,278 last year. The stock of cotton in Liverpool on the 23rd June was 276,000 bales, against 311,551 last year. The total cotton afloat to Europe on the same date was 509,219 bales, against 475,657 bales last year. At that date there were 25,181 bales of China afloat, against 57,622 last year, and 531 bales Japan, against 8,252. The report from Liverpool of the week's business is—a very large business has been transacted in East India, at rapidly advancing prices; the lower kinds, which had been previously neglected, and were comparatively plentiful, have risen as much as 3d. per lb., while other grades are quoted 2d. per lb. dearer, with the exception of Scinde and Bengal, which have advanced 1½d. per lb. China and Japan have participated in the general activity, and are 2½d. per lb. dearer in the week.

SUGAR.—At the opening on the 20th, a steady demand prevailed, and business to a fair extent was concluded at last week's rates, since when, buyers having somewhat held back, a more subdued tone has again been apparent, and though prices remain tolerably steady, transactions have been effected with less facility. Among the transactions reported by private contract are 9,000 bags Muscovado Manila at 26s. Also 6,500 bags Clayed Manila at 30s.

COFFEE.—Increased buoyancy has characterised the colonial market this week, and stimulated in some measure by the favourable result of the Dutch Company's sale, the more numerous parcels of Ceylon, offered by auction, have been cleared off with spirit at improving rates, establishing an advance of 6d. to 1s. per cwt. on those of last week, viz., 690 casks, 530 brls. and bags Plantation, fine ordinary to low middling 79s. to 84s., middling to good ordinary at 68s. 6d. to 69s. 6d., superior up to 75s. The latter description has also been in request by private contract, and business of some importance has been done on proportionate terms. On Friday, the 23rd, 39 casks, 474 bags Ceylon went off at firm prices.

RICE.—The market on the spot has remained very quiet, and the business privately has been limited to 10,000 bags at, in some cases, barely previous prices, good bold new white Bengal, 15s. 9d.; middling to good middling old, 13s. 6d. to 14s.; and Rangoon and Bassein at 9s. The following parcels at auction were withdrawn, but afterwards placed, viz., 996 bags good middling white Bengal, of the new crop, at 14s. 3d., and 2,040 bags middling Rangoon at 9s. 4½d. Afloat, two cargoes Nakrenzie, together 2,750 tons, have been sold at 10s. for the Continent, or 10s. 9d. for the United Kingdom.

CAMPHOR.—Business has been very restricted, and the market is quiet at £5. 10s. to £5. 17s. 6d. for China, and £6 to £6. 2s. 6d. for Japan. 85 cases China at auction retired.

CARDAMOMS.—All descriptions steady; at auction 2 cases Malabar were retired; of 43 bags Madras, one-fourth sold at 4s. to 4s. 10d. per lb. for middling to good Aleppy; and 7 casks Ceylon sold at 3s. 2d. to 3s. 3l. per lb., for fair.

CASSIA LIGNEA.—There have not been any auctions; moderate business has been concluded privately upon the terms previously required. Buds: Quiet; supplies not yet on the market.

CINNAMON (CEYLON).—We quote first sort 1s. 4d. to 2s. 4d. per lb.; second, 1s. 3d. to 2s. 2d.; third, 1s. 3d. to 1s. 9d.; and fourth and Jungle, 10d. to 1s. 4d. Limited trade at firm rates.

COCOA NUT OIL.—This market has continued very firm, without any variation in value, and good business for arrival, as well as on the spot. Only 100 casks Cochin, 90 casks Ceylon, and 372 casks Manila at auction.

DRUGS.—Cubebs: Auctions confined to 84 bags, two-thirds (damaged) sold at 80s. to 82s. per cwt., being dearer. Dragon's Blood: Only 2 cases at auction, and those retired. Rhubarb: Very quiet; and of 136 cases at auction a few sold at 4s. 3d. to 4s. 6d. per lb. for middling round; private trade exceedingly limited.

GUMS.—Benjamin: Steady; 6 cases Siam at auction retired; and of 123 cases Sumatra, about one-fifth sold at £10. 10s. to £13 per cwt. for inferior to fine 2nd quality; and £6. 10s. to £9. 12s. 6d., middling to fine 3rd. Damar: Quiet; of 124 cases at auction, a few only sold at 23s. 6d. to 31s. 6d. per cwt. for very inferior to ordinary in sorts.

GUTTA PERCHA.—Continues very quiet; 18 tons at auction all retired.

HEMP (MANILA).—Very firm, with inquiry; improved terms generally demanded; of 5,281 bales at auction a small proportion, damaged, only quitted at full value.

HIDES.—At the public sales on the 22nd there was a fair demand for East India for export, and a moderate one for consumption. Prices generally showed a decline of ¼d. per lb., but in a few cases former rates were obtained for inferior qualities. Of 1,675 Java Buffalo Hides offered, 1,368 sold—1st heavy, 5¼d. per lb.; light, 4¼d. per lb.; seconds, 4¼d. per lb.

JAPAN WAX.—Steady, but quiet; of 126 boxes at auction, a few sold at 67s. 6d. to 68s. per cwt. for good saucers.

INDIA RUBBER.—Is better; sales made privately up to 1s. 3d. per lb. for Singapore, and 1s. 2d. Penang, and no good now to be had at those prices. Only 61 bags Mauritius at auction sold at 10d. to 11¼d.

OILS.—Anniseed: There has been but little activity in this market, and small sales only have been effected at our quotations of 7s. 6d. to 7s. 7d. Cajaputa: Two cases at auction retired. Cassia: Cheaper; of 20 cases at auction half sold at 8s. per lb. Cinnamon: Quiet; 6 cases at auction retired. Mace and Nutmegs: Dearer; of 3 cases at auction one sold at 3d. per oz. for middling.

PEPPER.—Black: After falling slightly in value, has recovered to quite the currency of our last. Of 1,954 bags Singapore at auction one-third sold at 3⅞d. to 3¼d. per lb., and of 5,483 bags Penang half sold at 2⅝d. to 3⅛d. White: Limited business privately on former terms. No auctions.

SAGO.—Very quiet; 100 boxes at auction all retired. Flour; Very flat, and no business of any consequence doing.

SHELLAC.—Of 781 cases at auction, little more than half sold: Orange at £4. 2s. 6d. to £4. 17s. 6d.; Garnet £4. 12s. to £4. 15s.; Button £3 to £4. 1s.; Native £3. 10s.; block and blocky £3. 19s. to £4. 7s. 6d. Very little business accomplished privately.

SPICES.—Cloves steady: 31 cases Penang at auction sold at and after the sales at 1s. 2d. to 1s. 3d. per lb. for fair to very good; and 366 bags Zanzibar mostly sold at 3⅛d. to 3½d. for ordinary to good. Mace: Nothing of any consequence doing. Nutmegs: Transactions too unimportant for reference.

TERRA JAPONICA.—Cutch, Pegue: Continues very quiet; of 864 bags at auction, half sold at 22s. 6d. to 23s. 6d. per cwt. for fair quality, but in bad condition. Gamboge: Very flat, with private business upon lower terms—21s. 6d. per cwt. for fair quality. 2,849 bales at auction all retired; 150 baskets cubes, ordinary dark, sold at 22s. to 22s. 6d., being cheap.

TIN.—This market has lately undergone marked improvement; large business done in Straits, commencing at £90 cash, and rapidly rising to £92. 10s. For arrival, sales have been also made at £91 to £93. Operations in Banca very small.

MISCELLANEOUS.—Galls: Market for all descriptions remains quiet, and 61 cases Japan at auction sold at 52s. 6d. per cwt. for good clean. Musk: Tonquin is again rather cheaper. Of 68 caddies at auction, two-thirds sold at 25s. to 27s. 6d. per oz. for fair to good, and 22s. to 23s. pickings. 11 tins China Cabardine retired. Rattans: Steady; and of 8,152 bundles Singapore and 1,638 bundles Penang at auction, about two-thirds sold at 4s. 2d. to 8s. per 100, with a few extra large at 13s. 10d. to 14s. 6d. Sapan Wood: Quiet; 15 tons Siam at auction retired: of 98 tons Manila, a few sold at £8 per ton; and 20 tons Ceylon sold at £10. 10s. Shells, Mother o'Pearl: Firm; 72 cases Singapore sold at auction at £7. 7s. 6d. per cwt. Soy: Held firmly, but very little doing. Star Anniseeds: Very scarce: 17 cases at auction retired; retail sales made privately up to £8 per cwt. Sticklac, Siam: Steady; 150 cases at auction sold at 45s. to 53s. per cwt. for fair to good. Vermilion: Nothing of consequence doing; 7 boxes at auction retired.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7. 15s. to £8; nail rod, £8. 10s. to £9; hoops, £9. 15s. to £10. 5s; sheets, single, £10. 10s. to £11; Staffordshire bars, £8. 15s. to £9; rails, £7.

STEEL.—Swedish keg, £15.

COPPER.—Sheet and Sheathing, £93 to £94 per ton; yellow metal, 7¾d. to 8d. per lb.

TIN.—97s. for block; 98s. for bar. Tin plates, best charcoal, I.C. 28s. to 29s. 6d.

LEAD, &c.—English pig, £19 to £19. 5s.; W.B., £21; shot patent, £22. 10s.; sheet, £20. 10s.; spelter, £22. 15s. to £23 10s.; zinc, English sheet, £26. 10s. quicksilver, £8.

With the exception of a further advance in the price of Spelter, there is scarcely any alteration in the Metal market.

KITE (brig), Foo-chow-Foo to Cowes, April 17, 35 S., 19 E.

FREIGHTS AND CHARTERS.

We have again no alteration to report in outward freights. Ships of good character have been in demand both for general cargoes from London and for coals from Wales and the Tyne. In homeward charters we have nothing to remark.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. 6d. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 35s. weight or measurement. To Bankok: 60s. weight or measurement. To Ceylon: 40s. weight, 25s. measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £38 and 37s. 6d. to 40s. For Shanghai: £43 to to £44 and 47s. 6d. to 50s. For Manila: £34s. to 35s. For Batavia: 24s. to 26s. For Singapore: £24 to £25 and 25s. to 26s. For Galle: £29 and £1. 5s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty have invited tenders for the conveyance of ten tons (meast.) of boots from the river Thames to Hong Kong.

CASUALTIES.

The Queen of the North, Tidmarsh, from Colombo for London, put into Mauritius, May 10, leaky, having experienced heavy weather from the 26th April to the 3rd May, commencing in lat. 10 S., lon. 78 E., during which she made 16 inches of water per hour.

The Malabar, Chambon, from Colombo to Belle Isle, put into Mauritius, May 15, making 10 inches water per hour, having experienced heavy weather on the 17th April, in lat. 1 N., lon. 80 E.

Advices from Neuwe Diep, dated the 16th June, state that on the previous evening a strong smell of fire was noticed on board the Batavia (ship) v. Dolder, bound from Amsterdam for Yokohama, whils tlying in port ready for sea; she was examined by surveyors, but no cause for the same being discovered, she sailed the following day for her destination, when a smell of fire again was noticed. She has consequently put back to Nieuwe Diep, and her whole cargo will be discharged in order to ascertain the cause of this smell.

The Willem Hendrik, Bickering, from Amsterdam for Batavia, put into Simon's Bay, May 8, with loss of foremast.

The Fernande, Giles, from Rio Janeiro for Singapore, put into Table Bay, May 14, for repairs, having been struck by a heavy sea, which carried away her weather bulwarks, stanchions, rails, &c., filling her deck and bursting her bulwarks on the opposite side.

The Ian van Schaffelaar, from Java for Amsterdam, was spoken, May 2, in lat. 35s., lon. 25 E.; with her fore main yard gone.

The wreck of a large iron ship, stranded on the West Point of Pulo Leat Island, was passed, Feb. 17, by the Empress of India, arrived at Liverpool. Her stern was under water, consequently her name could not be made out. This wreck is supposed to be that of the Sea Horse, Carty, which was bound from Liverpool for Shanghai last year.

MISCELLANEOUS.

Off TRINIDAD.—May 24, from China, Paria.

At ASCENSION.—May 1, from Hong Kong, Warrior, and sailed 3 for Liverpool; 23, from Ceylon, Charlotte Anne, Roberts, and sailed 25 for London; 25, from Ceylon, Attilar, Browne.

With Immediate Despatch.

FOR COLOMBO and COCHIN, the beautiful clipper STAR OF THE MERSEY, A 1, 254 tons register, EVAN THOMAS, Commander; West India Docks. This splendid nearly new vessel is expected to make a rapid passage, and offers a first-rate opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

FOR COLOMBO Direct, the fine barque CRIXEA, A 1 nine years, now loading in the London Docks.

For Freight or Passage apply to SUART and SIMPSON, 9, Clement's-lane, Lombard-street.

With immediate Despatch.

FOR COLOMBO and COCHIN, the well-known Aberdeen clipper-built ship, JOHN BUNYAN (owned by Messrs. Vanner, Prest, and Lyth, London),—ALLAN, Commander; 521 tons register; A 1 at Lloyd's; West India Docks. This splendid vessel, by Walter Hood and Co., builders of the celebrated Aberdeen Clipper Line, and so well known in the Australian and China trades for her very rapid passages, and the good order in which she invariably delivers her cargoes, presents a most favourable opportunity to Shippers. Has elegant cabin accommodation, which Passengers are invited to inspect.

For Freight or Passage apply to HIORNS and PHILLIPS, 155, Leadenhall-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Has nearly the whole of her Cargo engaged.
To Sail positively on the 22nd July. Last Shipping Day the 20th.

FOR ADEDAIDE and VICTOR HARBOUR, the fine fast-sailing clipper barque SAMUEL, A 1 thirteen years, 426 tons register, RICHARD WIGZELL, Commander; London Docks. This splendid vessel (built in 1861) is celebrated for her very rapid passages and the good order in which she invariably delivers her cargoes, thus offering a first-rate opportunity to shippers of fine goods. Has elegant accommodation for passengers.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to HIORNS and PHILLIPS, 155, Leadenhall-street, E.C.

Mate's receipts will be required before signing bills of lading for water-borne goods.

To follow the JAMES SEDDON, with immediate Despatch.

DIRECT for BOMBAY, the magnificent new river-built clipper ship DILBHUR, A 1 fourteen years (owned by Messrs. Smith, Fleming, and Co.), 1,320 tons register, ——, Commander; East India Dock. This high-classed vessel, built expressly for the Bombay trade, under special survey, is strongly recommended to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, E.C.; or to TOULMIN, LIVINGSTON, and Co., 31, Great St. Helen's, Bishopsgate-street, E.C.

Will meet with very Quick Despatch.

DIRECT FOR RANGOON, the splendid clipper-built ship LEOPOLD, 3-3rds 1.1. A 1; 498 tons register; J. FISCHER, Commander; to load in the London Docks. This fine little vessel, having a large portion of her cargo engaged, will meet with very quick despatch.

For Freight or Passage apply to EDWARD HIGGIN and Co., 2, East India-avenue, Leadenhall-street; or to TOULMIN, LIVINGSTON, and Co., 31, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "James Seddon," with immediate despatch.

DIRECT for BOMBAY.—The magnificent new River-built Clipper Ship, DILBHUR, A 1 Fourteen years (owned by Messrs. Smith, Fleming, and Co.), 1,320 tons register, Commander, East India Docks.

This high-classed vessel, built expressly for the Bombay trade, under special survey, is strongly recommended to shippers of fine goods.

For freight or passage apply to TOULMIN, LIVINGSTON and Co., 31, Great St. Helen's, Bishopsgate-street, E.C.

CHARTERED MERCANTILE BANK of INDIA, LONDON, and CHINA.

WALKER'S CRYSTAL CASE WATCHES.

PRIZE MEDAL, 1862.

JOHN WALKER,

CHRONOMETER, WATCH AND CLOCK MAKER,

(BY APPOINTMENT), TO THE

English, Indian, Foreign, and Colonial Railways,

68, CORNHILL, AND 230, REGENT STREET, LONDON.

J. W. SOLICITS the attention of Military and Naval Officers and the Public of China to his CRYSTAL CASE WATCHES, as they are especially adapted for foreign use.

The CRYSTAL CASE WATCH is so constructed that it entirely obviates the necessity of a Hunting Case Watch, as it is much stronger and cannot so easily get out of repair. Description Pamphlets with List of Prices on application.

BASS AND CO.'S INDIA PALE ALE.

BARCLAY, PERKINS, AND CO.'S STOUT,

STRONG BURTON AND EDINBORO' ALES AND GUINNESS'S STOUT

In Cask and Bottle, in the best condition for Exportation.

AGENTS:

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty, and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S PILLS.—NERVOUS DEBILITY.—Persons who feel weak, low, and nervous, may rest assured some serious ailment is looming in the distance, against which instant action should be taken. Holloway's Pills present the ready means of exciting energetic action on the liver, liberating accumulated bile, and lifting at once a load from the spirits, and expelling a poison from the body. This simple and natural method of remedying the first tendency to disease gives present ease and insures future safety. The pallid, and all those who are losing flesh, should try these Pills, which are especially useful when the digestive or other functions are imperfectly performed, and demand immediate correction, or, in after years, neither mind nor body will be developed.

PROSPECTUS.

I. The objects for which this Company has been incorporated are stated in the Royal Charter as follows:—"Carrying on the business appertaining to the fulfilment of Agency, Commissions, Trusts, Assigns, and Executorship in the United Kingdom of Great Britain and Ireland, and within the dominions of the British Crown and elsewhere; receiving consignments of merchandise and goods, and selling the same on commission; purchasing goods for persons abroad, and forwarding the same on payment by remittances; holding in trust of lands, buildings, and other property of every description; the safe custody, insurance, administration, and disposition of such property; the administration of solvent and intestate estates; the transmission of valuables and property of constituents and others to and from the United Kingdom, and other countries beyond the seas, and generally to perform and fulfil all such business, transactions, functions, and operations as are implied in the duties of Agents, Trustees, Executors, Administrators, and Assigns."

II. Hitherto there has been no public company to perform these highly-important duties; they have been scattered among persons engaged in various branches of trade, or entrusted to private individuals, although there is no description of business which more imperatively requires the security, permanence, and responsibility of a monied Corporation.

III. The several millions of British subjects resident in Asia, Australasia, Africa, and America; the vast trade (£100,000,000) which they carry on with England; and the rapid communication by steam navigation and telegraph which makes London the monetary and commercial capital of the world, indicate the extensive operations which this Corporation will be prepared to undertake.

IV. Among the more prominent may be named:—

1. *Commission Business* of every description; receiving merchandise from constituents, selling the same, and remitting promptly the proceeds; executing orders for goods from abroad when accompanied by remittances; and generally acting as the medium of exchange between the producer of commodities and the purchaser.
2. *Agencies* of private individuals in any quarter of the globe; also those of regiments and officers of H.M.'s ships on foreign service, the management of military and other public funds, and the duties of Colonial Government agents.
3. *Executorships and Trustees* for persons at home and abroad, the administration of wills, the care of minors, and the management of estates.
4. *Custody of Property* in fire-proof buildings, for the security of which the Corporation will be pecuniarily responsible.
5. *Carriage of Valuables and Parcels* insured between the United Kingdom, India, the Colonies, and Foreign Countries.

V. The profits on these transactions, ranging from 2 per cent. upwards, are well known to be very lucrative; the business does not demand an outlay of capital, but necessitates confidence, trust, and punctuality; and the remuneration from even a moderate amount of transactions will afford a very satisfactory dividend to the shareholders.

VI. Various Trusts and Executorships in the United Kingdom have already been offered to the Corporation. Negotiations for the purchase of several well-conducted private agencies have commenced, in order to begin with established connections under experienced managers. When these negotiations are completed due notice will be given, and there will be a further issue of shares.

VII. To provide security for those who confide property, executorship, and trust to the Corporation, banking and trading, or buying and selling goods on account of the Corporation, are prohibited by Clause III. of the Royal Charter and by the Articles of Association. The business done will be similar to that performed by the large India Commercial Agency Houses, such as Forbes and Co., Crawford and Colvin, Arbuthnot and Latham, &c.; and by the more personal agency firms of Grindlay and Co., Smith and Elder, &c.; all which houses have realised large fortunes without any outlay of capital, their transactions being purely those of commission and agency, which are carried on by the moneys of their constituents.

Application for shares must be made in the printed form, which may be obtained from the brokers and bankers, and at the offices of the Corporation, where a copy of the Royal Charter may be seen.

List of Passengers.

PASSENGERS INWARD.

By yesterday's mail, per P. and O. steamer Ceylon, arrived at Marseilles July 4.—From Shanghai: Messrs. Dick, Antrobus, and Webb, and one second-class passenger From Hong Kong: Messrs. J. Ray, A. Coxon, A. Heard, and Ward, Mr. and Mrs. Burlingame, child, and European servant, Capt. W. Endicott, Gen. Pruyn, and nine second-class passengers. From Singapore: Mr. Cardinaal. To Malta.—From Hong Kong: One second-class passenger.

To Southampton, per Syria, expected to arrive 10th inst.—From Shanghai: Four second-class passengers. From Hong Kong: Hon. Chief Justice Adams, Mrs. Adams, Rev. Dr. Irwin and three children, Mr. Happer and one second-class passenger. From Yokohama: Mr. Henderson. To Gibraltar.—From Hong Kong: Two second-class passengers.

To Southampton, per Ellora, expected to arrive 10th inst.—From Singapore: Mr. and Mrs. Meldrum.

PASSENGERS OUTWARD.

Per P. and O. steamer Pera, from Southampton, July 4.—To Ceylon: Mr. W. Syme. To Hong Kong: Capt. and Mrs. Kinder and child, two Misses Kinder, Miss Sergeant, Mr. Allen, Mr. Tookey, Ensign Kinder. To Singapore: Mr. Skinner. From Marseilles, July 12.—To Ceylon: Mr. and Mrs. A. W. Green.

Per P. and O. steamer, from Southampton, July 20.—To Hong Kong: Staff-Commander Thain, R.N., Mr. R. S. Syer, Mr. and Mrs. Davies, Mr. and Mrs. Manning. To Shanghai: Mr. Scheidt. To Ceylon: Rev. G. Middleton. To Singapore: Mr. E. J. Smith. From Marseilles, July 28.—To Hong Kong: Mr. J. Troncoso, Mr. I. A. Tuton. To Shanghai: Mr. E. B. Drew. From Suez.—To Shanghai: Mr. M. Archer Shee, jun. To Hong Kong: Mr. W. Hulse.

Per P. and O. steamer, from Southampton, Aug. 4.—To Hong Kong: Mr. W. Foster, Mr. Rennie. To Ceylon: Mr. G. Studdart.

Per P. and O steamer, from Southampton, Aug. 20.—To Hong Kong: Mrs. Tomlin To Ceylon: Mr. F. M. Evans, Mr. E. W. H. Holdsworth. From Marseilles, Aug. 28.—To Hong Kong: Mr. and Mrs Davidson.

THE INCOMING MAILS.

A telegram has just been received from Suez announcing the arrival of the mail steamer with the Calcutta, China, and Australian mails, which are expected in London on the 15th inst.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Dates hence are to the 28th April. The London mail of Feb. 27 had arrived out.

The political intelligence is still meagre, save as regards the important fact of the Government of the Tycoon having declared that at present no new port will be open to Europeans; and that it is willing to pay $3,000,000 as indemnity for the Simonoseki affair.

The Hon. General R. H. Pruyn, United States Minister Resident in Japan, was to leave by the present mail, deputing A. L. C. Portman, Esq., his Secretary of Legation, to take charge until the pleasure of his Government be signified in the matter The favour in which Mr. Portman is held by his compatriots in Japan makes the appointment a generally acceptable one. It was not known whether General Pruyn goes home under a recall or leave of absence.

The Municipal question still drags its slow length along, and seems as far from settlement as ever. Two meetings had been held at H.B.M.'s Consulate during the fortnight.

The harbour presents a very different appearance from that witnessed a few weeks back. The merchant vessels keep up their usual numbers, but the men-of-war are gradually leaving. H.N.M.S. corvette *Metulen Kruis* took her departure for Nagasaki on the 25th April, and H.B.M.S. *Barossa* and *Havoc* have left for the same port—the former being about to relieve the *Argus*, which vessel will proceed to Shanghai in company with the *Havoc*. H.B.M.S. *Leopard*, Captain Leckie, arrived here on the 19th April from Shanghai. She had an accident near the Ki Channel on the 16th, and received some damage, which will necessitate her going to Shanghai or Hong Kong to be put in dock.

Socially, the last fortnight of April had been enlivened by the performances of two amateur theatrical companies, and with a concert by Mons. Desvachez, a violoncellist of great talent.

CHINA.

PEKING.

We have no direct news from Peking or Tien-tsin, but we find the following in the *North China Herald*:—

In our last issue we had to record the complete and sudden degradation of Prince Kung from rank, titles, and favour; and we now have to report his no less unexpected restoration to office. The regency is still withheld, but the Prince has resumed his seat at the Foreign Board, and has received permission to again enter the palace; but the Emperor, while yielding to the representations of several high officials, fully maintains the guilt of the Prince and the justice of the first sentence. It is worthy of notice that the officer who was most prominent in denouncing the faults which led to the promulgation of the edict of degradation, was a brass-button mandarin of the seventh class, who must either have possessed singular moral courage or relied with certainty on the support of higher influence than his own. And it is remarkable that among the petitioners whose representations have led to the partial abrogation of that edict, the most prominent are the Prince of Li, who is a mere child, and Kwang-chêng, who, although once a powerful mandarin, was some time ago degraded in consequence of faults very similar to those attributed to the Prince Kung. The Prince is the second high officer, Hsueh Huan being the first, who has been degraded from every other post he had previously filled, and yet allowed to remain in the Tsung-li Yamen. It is certainly flattering to the foreign represen-

Digitized by Google

tatives that persons whose official corruption has become so glaring that, even in China, they are held unfit for any other position, should be allowed to remain in the office by which foreign affairs are exclusively conducted. Prince Kung's restoration to the Foreign Board must, however, be regarded as satisfactory in at least one sense. It destroys any doubt which may have been entertained that his removal was a mark of the ascendancy of anti-foreign prejudices in the councils of the Emperor.

SHANGHAI.

The P. and O. mail of 26th March arrived out on the 12th May, and the French mail of the 17th March on the 7th May. Telegraphic news was up to the 4th April.

The *North China Herald* has the following on the new "Chinese Medal:"—

"More than two years ago we mentioned that the Chinese Government was contemplating the creation of a decoration on the model of European orders, for the purpose of rewarding foreigners who might render it distinguished service. The effort of arriving at such a decision was, however, apparently exhaustive, as the idea remained in an embryo state so long that its adoption had almost been forgotten, and nearly all those who were looked on as likely recipients when the project was first mooted had left China. At length, however, the period of incubation has ended, and the result is sufficiently successful to reconcile us to the delay. The new distinction is in the form of a gold medal, to be worn on the breast, but in the centre is inlet a small red, blue, or white stone, to mark the first, second, or third grade of the order. On the obverse, circling round the stone, is the Imperial dragon; while the reverse bears an inscription in Chinese, announcing it to be the 'Imperially presented star of the dragon of the great dynasty.' A more happy combination of the European and Chinese ideas could not have been attained. The prejudices of the former are consulted in the form of the decoration, while the grade is marked in a manner essentially Chinese. The intrinsic value of the medal is probably about that of a gold dollar, which it nearly equals in size and weight. Since the order was first projected, most of those who were regarded as likely recipients have left the country, but others have arisen whose claims to one or other of the three grades are weighty. To Gordon the highest class has of course been decreed; and M. Giquel, the acting Commissioner of Customs at Shanghai, has been similarly rewarded, for services rendered in connection with the Franco-Chinese contingent in the province of Chekeang. The acceptance of the distinction by the gentlemen whom the Chinese may seek to honour, necessarily depends on the approval of their Governments; but this will of course be accorded, as it has been in the numerous other instances where decorations have been awarded as a mark of appreciation of services rendered to foreign Governments."

The Spring Meeting, which commenced on the 26th of April, seems to have excited the usual degree of interest, notwithstanding the commercial depression that prevailed. In a betting point of view, however, we are glad to observe that the meeting was characterised by a quietness and an absence of "speculation," which we look upon as indicative of the restoration of a better tone than has of late years prevailed on the turf at Shanghai. The following is a summary of the sport:—

FIRST DAY.

1. Tsatlee Cup, 300 tls., second pony 50 tls.; China ponies only. Bogtrotter, 1; Blair Athol, 2.
2. Arab Cup, 100 guineas, 1½ miles. Belooch, 1; Busy Bee, 2. Won easily.
3. Griffin's Plate, 100 tls.; for China ponies. Fleur-de-lis, 1; Flotsam, 2.
4. Derby Stakes, tls. 25 each, and 100 guineas from the fund; for colonial horses. Pomeroy, 1; Vesuvian, 2. Oriflamme and Beauregard fell at starting.
5. Ladies' Purse. Won by Early Purl, whose rider was presented with the Purse by Madlle. Montmorand.
6. Volunteer Plate, tls. 150. Piff-Paff, 1; Gorilla, 2.
7. Welter Cup, tls. 150. Sir William, 1; Anecdote, 2.

SECOND DAY.

1. Maloo Plate, 75 tls.; for ponies. Fleur-de-lis, 1; Birdlime, 2.
2. Arab Challenge Cup, value 250 guineas, 2 miles. Early Pearl, 1; Hassem, 2.
3. Chaasee Cup. Fleur-de-lis, 1; Flotsam, 2.
4. Challenge Cup, 500 guineas; for all horses, 2 miles. Sir William, 1; Pathfinder, 2; Incledon, 3; Haddington was pulled up lame; and North Pole fell dead nearly opposite the Grand Stand.
5. Chukaza Cup, 250 tls., for Arabs. Bedouin, 1; Hassan, 2.
6. The Selling Stakes, value 400 tls. Anecdote, 1; Spartacus, 2.
7. Hack Stakes, of 10 tls. each, with 100 tls. from the fund. Robin Hood, 1.

THIRD DAY.

1. Consolation Sweepstakes. Deserter, 1; Cobnut, 2.
2. Byramjee Cup, value 50 guinuas; for Arabs. Busy Bee, 1; Hassan, 2.
3. Kathay Handicap, 25 tls. each, with 200 tls. added. Anecdote, 1; Warrior, 2; Ironclad fell with his jockey under him.
4. Fa-kei Cup, 500 tls.; for all horses, 1¾ miles. Sir William, 1; Incledon, 2.
5. Roadsters' Plate, 100 tls. San-ko-lin-sin, 1.
6. Steeplechase, for all horses, 300 tls.—3 miles. Won by Kangaroo. No others were placed. Louise started with the lead but fell at the first jump, when Kangaroo went to the front; but the mare quickly collared him and led to the last jump but one home in the first round. She then fell again, but picked herself up and went on bravely to the jump at the Grand Stand in the second round. when she fell heavily and disappeared from the race. In the meantime Kangaroo came home at his own pace, clearing everything, and allowing nothing else to pass him. This race occasioned intense excitement.
7. The Scramble, 100 tls.; for ponies. Birdlime, 1; Mud 2.

The following mercantile notices have been published:—

Mr. T. S. Borradaile is authorised to sign our firm. Dow and Co.

The interest and responsibility of Mr. William Herbert Vacher in our firm ceased on the 30th April, 1865. The partnership now consists of Richard James Gilman, Charles Augustus Wild, Henry Beverley Lemann, William Lemann, Edmund Henry Lavers. Gilman and Co. China, 1st May, 1865.

The *North China Herald* has the following on the report of the French Municipal Council:—

The report drawn up by the French Municipal Council of their proceedings, during the past and their projects for the ensuing year, sets the position of affairs lucidly before the land renters. Thanks to the sum of Tls. 33,260 yielded by the tax on gambling-houses, their financial position is most flourishing, the balance in hand at the end of the year having been Tls. 8,000, out of a total revenue of Tls. 103,000. Nearly the half of this large sum is derived from taxes which have either never been recognized in the English concession, or were voluntarily abandoned by the land centers at their last meeting; while only Tls. 35,000 were derived from the house and land tax which figures so prominently in the English budget. Opium-houses, brothels, sampans, and gambling-houses alone yielded Tls. 48,000, and the proceeds of taxes on various shops contributed Tls. 3,300 more. The expenditure is classified so differently from our own that it is difficult to compare the items. The salaries of the Secretariat at Tls. 5,948 and of the Police at Tls, 25,663, however, attract attention by the inferiority in amount to those paid by ourselves. Passing to the estimates for the ensuing year we find an anticipated income of Tls. 111,500 to meet an expenditure of 110,500 tls.; and this time the gambling houses are assessed at 43,500 tls., while the Chinese house tax is only to produce 19,000 tls., and that on foreign houses 750 tls. No less than 7,000 tls. are anticipated from the boat-tax, which the English Council so generously abandoned, and 4,500 tls. for that impost on brothels which the Taotai has objected to sanction. It is satisfactory, however, to find that the Consul-General has objected, however gently, against the utter disregard of the Chinese authorities shown by persistence in the levy of the tax on gambling houses, after the emphatic protest of the Taotai. M. de Montmorand has, it will be seen, requested the Council to consider how they can replace this tax by some less objectionable impost. But these gentlemen held that the creation of any new taxes was impossible; that the existing revenue was barely sufficient to meet the engagements which had been undertaken, and consequently begged the Consul-General to defer the question until it could be laid before a meeting of the land renters on the Concession. This was agreed to, and it remains to be seen whether the Consul-General will insist on the illegality of thus running counter to the wishes of the Chinese, with sufficient emphasis to induce the abandonment of the impost. That he will meet with strong opposition cannot be doubted, for without the 43,000 tls. anticipated from this source, the budget would be completely upset, and the abandonment of many contemplated works become inevitable. The scheme for the advancement of the bund to low water mark, which is now rapidly approaching completion, is also fully explained. The total cost of this work is to be 37,340, tls. of which 22,840 tls. are allotted to the construction of the necessary bunding, and 14,500 tls. to raising the mud-bank to the necessary level. The latter measure is by far the more simple of the two, and we fear that a recurrence of the disaster which has already happened to a portion of the new work is not improbable. The sinuosities which were noticeable shortly after its commencement, have lately become still more apparent, and suggest the fear we express lest it should prove too weak to support the immense pressure which is being gradually brought against it. A floating jetty has been constructed near the northern end of the bund, at a cost of 2,000 tls., and it is purposed to erect a similar one at a similar cost near the Pagoda bridge. Great improvements, however, are contemplated if the Land Renters agree to the sale of the 20 mow of land which will be reclaimed by the advancement of the bund line; amongst these the construction of two floating piers at a cost of 15,000 tls. are the most prominent. It is also suggested that 10,000 tls. from the proceeds of such sale should be appropriated to the building of a chapel at, and the embellishment of the new cemetery.

Sir Harry Parkes has been appointed commandant of the volunteer corps, vacant by the departure of Mr. Antrobus.

Another attempt has been made by rowdies to carry off a steamer from the river, which fortunately proved unsuccessful. Twenty men boarded the steamer *Hyson*, and cast her off from her moorings; but they were unable to get up steam, owing to the absence of an important portion of her machinery. They then abandoned her, with the exception of the leader of the gang, who was captured, and conveyed to the English consular gaol.

Digitized by Google

The *Friend of China* has the following notice of the sale of steamers :—

"To show the variation in the price of steam vessels in these waters, we may mention that the little craft built in England originally for Murrow's Canton line, afterwards sold to Tah Kee here for $44,000, and called the *Mandarin*, was bought the other day by Captains Partridge and Roundy for 3,500 taels; and after undergoing some slight repairs, passed last week into the hands of Kwok Acheong, Hong Kong P. and O. Comprador, for 16,000 Mexican dollars. The *Cricket*, again, which Captain Hill sold to Tah Kee for 22,000 taels, passed also into the lucky hands of the gentlemen above mentioned for 1,150 taels only, and will, we hope, eventually obtain as good a return as her predecessor the *Rose*. We hear Mr. E. A. Reynolds has purchased that most serviceable steam-ship the *Chusan*, for 18,500 taels, her price when transferred by the P. and O. Company to Chinese a couple of years ago being 65,000 Mexican dollars.

A road is being constructed to Woosung, which will be completed in about a week. A sum of 7,000 tls. was, we believe, subscribed for the purpose, on which no return is expected by the projectors. The only obstacle to free communication between this port and Woosung, at the present moment, is the Soochow bridge, which, by some extraordinary means, continues to stand, supported principally by the reputation of a charter from an unknown Taotai. The proprietors have an undoubted right to levy some toll, although Mr. Webb, one of the original shareholders, has publicly stated that it was the intention to throw it open so soon as it had paid itself, an object which has long since been obtained. But we do object to so large a revenue being extorted from the community for the privilege of using so inconveniently situated and crazy a structure. We doubt, moreover, the legality of exacting a tax from the Chinese. The Stone Bridge is an instance out of many in which a tax is being levied to recover the original outlay. But we do not think an instance can be quoted of a Chinese bridge, of which the cost has been repaid, being still subjected to a tax.

Mr. Antrobus, of the firm of Lindsay and Co., proceeds to England by the present mail; also Mr. Dick, Commissioner of Customs. The following announcements in connection with the customs have been made :—

P. Giquel, Commissioner at Hankow, to officiate as Commissioner at Shanghai, vice T. Dick, granted seventeen months' leave of absence.

Richard W. Halkett, Clerk of the 1st Class, Hankow, to take charge of the office at Hankow.

James Brown, Clerk of the 3rd Class, Ningpo, to be Deputy Commissioner at Shanghae.

H. E. Hobson, to be Clerk of the 3rd Class at Ningpo, vice James Brown, promoted.

The passage of the *Silver Eagle* is thus noticed :—

This celebrated clipper ship has made one of the fastest passages ever recorded. She left the Downs on the 20th December, and crossed the equator on the twenty-second day. Her commander, Captain Longman, is of the Royal Naval Reserve, and adheres to the great principle of circle sailing, in pursuance of which he extended his course as far south as 51. She carried the winds prevailing from the northward from the meridian of the Cape of Good Hope, cleared Van Dieman's Land on the 23rd February—only 43 days from the equator—and made the South Head Light on the evening of the 5th March, having achieved the distance from the Downs to Port Jackson in the singularly short time of seventy-two days. The extraordinary despatch which this vessel met with at Sydney is worthy the notice of the mercantile community at this port. She discharged 1,500 tons of general merchandise in 49 hours, and shipped 930 tons of coal; the entire discharging and loading being accomplished in 21 days, when she was again ready for sea. The *Silver Eagle* again left the anchorage at Port Jackson on the 2nd March, having made the run to this place in 38 days, with calms and light winds to contend against. During the passage from thence her royals were only lowered for a few hours. The entire voyage, including detention in Sydney, was made in 135 days.

Letters from Tangchow record the defeat of San-ko-lin-sin by the force lately commanded by Shih-ta-khai, better known as the Assistant King. These troops appear now to have amalgamated with the Mohamedan rebels, and the combined forces are for the present clearly in the ascendant in the Shantung province. San-ko-lin-sin's defeat caused a panic throughout the province and led the inhabitants to seek refuge in the walled towns. In Fohkien the Imperialists have been more successful, having, it is said, defeated a sally of the Changchow garrison with a loss of 1,500 men. The success was mainly attributable to a movement suggested by Col. Kirkham, by which the rebels' right flank was turned; when, as usual with the Chinese, a panic at once ensued.

An action has been brought into the Consular Court by Messrs. Smith, Preston and Co., of London, against Messrs. Maitland, Bush and Co., of Newchwang, to recover the sum of tls. 5,052.95 being amount of losses arising on the charter of the *Vanda*, which vessel they had taken up in Liverpool on time charter for account of Messrs. Maitland, Bush and Co., jointly with Messrs. Maitland, Maclean and Co., of Shanghai. The charter party having been made out in the names of the plaintiffs, they had been held responsible by the owners of the vessel, and now sought to indemnify themselves by recovering the amount of the loss from the real charterers. Owing to the absence from Shanghai of Mr. R. K. Maitland, who had been chiefly concerned in the management of the affair, there was some difficulty in elucidating the actual nature of it, and judgment was reserved.

The Acting British Minister at Peking, Mr. Wade, it is stated, is at issue with Prince Kung on the subject of the confiscation of the steamer *Mercury* for entering a non-treaty port.

HANKOW.

A letter from this port states that a force of eight thousand of the Imperialists who have made themselves so notorious in that neighbourhood and at Kiukiang, entirely ignored the authority of their commanders when at Kinkow *en route* for Hankow, and, having looted the former town, declared their intention of marching on Hankow forthwith. Finding, however, H.B.M.S. *Hardy* and a French gunboat in the river, awaiting their arrival, they changed their minds, marched into the interior towards the black tea districts of Anhuei, when they practically raised the standard of rebellion by murdering a Chi-Hsien, and giving up the district to plunder. Circulars had been issued by the Consuls impressing upon foreigners the necessity of acting prudently, and not straying too far from the settlement.

The navigation of the Yangtsze has been much impeded of late by constant changes in the bed of the river. Even in the course of a few weeks new sandbanks have formed, and old ones entirely changed their position, so that steamers leaving Hankow after having lain alongside a wharf with plenty of water, often find, on their return from Shanghai, considerable difficulty in approaching their moorings. For instance, only two weeks ago, the *Fusiyama* found it impossible to get alongside the Paoushun wharf, and had to anchor in the stream. It has been suggested that something might be done, by means of dredging-boats to remedy the rapid shoaling of the river, and by frequent superficial surveys to keep the channel properly buoyed. But this would necessarily entail great expense, which it would probably be difficult to induce the Peking Government to sanction, while nothing can be drawn from the Shanghai Customs to defray any expenditure, however necessary, on the upper portion of the river.

NANKING.

Considerable excitement has been caused in this city by the discovery that some daring agent of the rebels had posted a Taiping proclamation on the great gate of the Governor-General's Yamen. Copies had also been affixed to the walls of tea-houses and on other conspicuous places. Six men were arrested, and not being able to give a good account of themselves, were beheaded. Such an occurrence is a sufficient evidence that disaffected bands still exist even at the very centre of constituted government, and that but little reliance can be placed on the tranquillity which now apparently prevails.

KIU-KIANG.

A special meeting of the renters of land at this port was held on the 28th of April, for the purpose of considering "*the proposed taxation scheme, extension of the bund, and police station*," P. J. Hughes, Esq., H.M.'s Consul, in the chair. The following resolutions were agreed to :—

Proposed by Mr. Rainbow, seconded by Mr. Hyde—"That in the opinion of this meeting the present condition of the port does not warran the outlay recommended by the late Municipal Council. That instead of increasing the expenditure it is desirable to curtail it in every possible way, and with this view the meeting would recommend the present Council to abandon the scheme of bunding in front of Messrs. Heard and Co.'s land."

Proposed by Mr. Mackintosh, seconded by Mr. Styan—"That the arrangements for a police station be left to the discretion of the Municipal

Digitized by Google

Council, as it is the opinion of the land renters that they will incur no needless expense."

Proposed by Mr. Harvey, seconded by Mr. Mackintosh—"That in the opinion of this meeting, it is undesirable to make any addition to, or alteration in the present mode of taxing the land renters."

A vote of thanks to the Chairman terminated the proceedings.

Considerable annoyance has been occasioned by the presence in the neighbourhood of a large number of braves, who committed acts of violence on several persons who came within range of their projectiles. The native authorities appear to be powerless in the matter, and the English Consul does not feel justified in taking upon himself the responsibility of calling on the gunboat to enforce order.

HONG KONG.

The P. and O. mail of 10th April arrived out on the 21st May. The dates are now down to the 23rd.

We have to note the departure for America of the Hon. Mr. Burlinghame, U.S. Minister at Peking, and Mr. Pruyn, Minister at Yedo. Chief Justice Adams, and Mr. Irwin, Colonial Chaplain, come home also by this mail.

The following is from the *Daily Press*:—

"The military authorities are materially increasing their establishment in this colony. They are putting a third storey on the godowns on the south side of Queen's-road, opposite the Commissariat whereof they are the tenants, and they have taken those large premises at Spring-gardens known as McGregor and Co.'s, to the godown whereof another storey is also being added. It would appear from this that Kowloon is not deemed healthy. What surprises us is that the military do not level the ground on which the deserted quarters of the 22nd N.I. stand. The earth taken away could be shot down the hill, and could be used for filling in opposite the Commissariat and naval yard. In this manner for a small sum of money the naval and military authorities would obtain two most valuable sites; one with a water frontage, the other on a fine healthy bluff overlooking the Queen's-road. Besides, both these sites would be within their own palings, as it were.

"The naval yard is being vastly increased, and will really very soon make an imposing appearance. We can see, or fancy so, that Sir Rutherford Alcock's plan is being carried out. Namely, to keep a force in reserve to overawe the Chinese and Japanese Governments. In other words, to provide a body for that of which diplomacy is the soul. This reserve can only be kept in Hong Kong, and the attention which the military authorities are observing relative to malaria and ventilation does them infinite credit.

"We would suggest the feasibility of putting the Saiwan and the Stanley Barracks in good habitable order, and of making arrangements with the naval authorities to keep up a daily communication between Victoria and those places, by means of a gunboat to be placed at the disposal of the military. The trip would be conducive to health, and so would the change of air. It would not take a gunboat more than an hour and a half to go from the parade ground wharf to Stanley, and she would be a good patrol against pirates in the Ly-ee-moon passage. The only objection to the Stanley Barracks is that they are inaccessible—to place them within one hour and a half's distance from the parade ground wharf would be a great acquisition to the Hong Kong garrison."

The British ship *Taeping*, Captain Mackinnon, left London on the 8th February, discharged her pilot on the 9th, crossed the Equator on her 20th day out, passed the meridian of the Cape on the 43rd, St. Paul's on the 53rd, Anjer 71st, obtained her pilot on the 12th May, and entered this port in tow of the *Fame* on the 13th, having only occupied 92 days on her passage from pilot to pilot, an almost unparalleled passage at this season of the year.

SIAM.

BANGKOK.

Our dates are to the 20th May. The London Mail of the 27th March reached Bangkok on the 14th May. Later intelligence would be brought there it was hoped by H.M.S. *Princess Royal*, bearing the flag of Vice-Admiral St. Vincent King, which was expected to pay the Siamese capital a visit before the end of May. The French despatch boat *Mitraille* left Bangkok for Kampoot on the 2nd May. Messengers were to be despatched from the latter place to Udong, to inform the Cambodian Prince of his independence of Siam and dependence on France. A Royal autograph from His Majesty the First King of Siam, in reply to the one from His Imperial Majesty Napoleon III., received in April, was sent late in the afternoon of the 19th May, accompanied by a large procession, to the French Consul, for transmission to Paris. This autograph was said to relate to the new Cambodian treaty and other matters of present interest, and was to be transmitted by the steamer that left next day.

On the night of the 25th April a daring attempt at robbery and murder was perpetrated in the residence of Captain G. H. Roberts, situate immediately behind Mr. Blake's premises. The thief entered by removing some of the bamboos leading into the front room. A noise then aroused Captain Roberts, who sent his housekeeper, a China woman, to close a window, supposing it to be raining. On going into the hall she was immediately knocked down by a ruffian. Captain Roberts then jumped out of bed, drew a sword-cane, which lay convenient, and attacked the thief, who assailed the Captain, cutting him over the head several times with a sharp instrument. Roberts's sword-cane got bent in the struggle, and the would-be-thief and murderer made his escape by the back door. Dr. Campbell was sent for and dressed the wounds of Captain Roberts and the woman. Mr. Blake was also on the spot, and messengers were sent for the police. The Commissioner on being informed of the outrage asked whether the sufferer was an Englishman or an American. Being told he was an Englishman, he sent off a native officer and two or three peons, and troubled himself no farther till six o'clock next morning. The housekeeper's skull was cut by the blow or blows which she received. Captain Roberts received more than a dozen cuts on his head and shoulders, though happily none of them were very dangerous. The thief did not succeed in getting away with any property, but on the contrary, with several thrusts from the sword-cane. At daylight next morning the thief was tracked by his blood, which must have flowed freely, to the New Road. There traces of him were lost, and the circumlocution officer had to delay the chase in conformity with established usage. At half-past eight or nine o'clock Acting-Consul Newman made his appearance on the ground. At three in the afternoon the Phra Raj Rong Muang came down, and the Acting-Consul proceeded to take down Captain Roberts's statement. The native officer of the district suggested that if the foreigners were to offer a reward the burglar might be caught. The fellow had fifteen hours' start of his pursuers, and is likely to evade justice, though a reward of 80 ticals has been offered for such information as may lead to his apprehension, Mr. Blake and Capt. Ames offering 50 ticals, and the Phra Raj Rong Muang 30 ticals, making 80 in all.

Since the above was written, on the 28th April, a Siamese with a stab wound in his face and two or three other wounds on his person, has been arrested in a wat. south-east of the Burmese village. This man may prove to be one of the burglars. This case is a striking commentary on the assertion of Consul Knox, that a police for the foreign quarter is not needed.

The *Siam Times* remarks on the above:—"The present police force is not authorised by the authorities to act outside of Sampeng, except in some special cases. Its chief cannot act without a warrant from the superior Siamese authorities. For the prevention of crime in the foreign quarters it is not available. For its detection, if made available by the slow process of applying for a warrant to superior Siamese authorities, it is useless; for so much time must elapse before the Phra Raj Rong Muang can be communicated with, that evil-doers have a chance of escaping. This was clearly illustrated in the case of Captain Roberts. In the morning at daylight the miscreant who assailed him had been traced by his blood to the New Road, by the Commisioner of Police and a foreign merchant. The quarter to which he was traced was inhabited principally by Hong Kong Chinamen. The Commissioner of Police applied to the acting British Consul for power to search the houses of Hong Kong Chinese in the vicinity, while traces of the ruffian were yet fresh. This power was refused by the Acting-Consul and application had to be made to the Phra Raj Rong Muang. This the Commissioner of Police knew would occasion delay enough to allow the would-be murderer to escape, and he remonstrated against it, but in vain. The acting Consul had had his way, and after the lapse of fifteen hours the Phra Raj Rong Muang came on the ground, looked around him, and went home again. This last outrage is a painful instance of the evils affecting the community through the apathy of the Foreign Consuls and the Government. Had a regular police patrol been at all convenient, this daring attempt would not have been made, as it was from a public thoroughfare, and

Digitized by Google

the villain could not have escaped had there been any police to follow him up immediately. Captain Ames would have been justified in not sending a single peon to assist in this case unless he had been called upon by the Phra Raj Rong Muang. Her Britannic Majesty's Consul has persistently endeavoured to ignore the existence of the force under Captain Ames, and has shown himself ever ready and willing to lessen the respect in which Captain Ames should be held by his subordinates and the public, by forcing him to appear as defendant to answer trumpery charges preferred by perjured natives for alleged illegal acts, which acts are necessarily incidental to his anomalous position."

STRAITS OF MALACCA.

SINGAPORE.

Dates are to the 31st May. The London mail of the 17th April arrived out on the 21st May.

H.M. steamer *Euryalus*, Admiral Kuper, arrived at Singapore on the 17th May, and on the 23rd Admiral King relieved the former as Commander-in-Chief of the China and Japan station, hoisting his flag as such on board his vessel the *Princess Royal*.

The *Euryalus* will return to Europe with Admiral Kuper, and the *Princess Royal* will proceed to China, calling possibly at Bangkok and Saigon by the way. H.M. steamer *Severn*, bearing the broad pendant of Commodore Montresor, left for Trincomalee on the 21st May.

H.M. steamer *Tamar*, Captain Stirling, from Mauritius and Natal, from which latter station she embarked the 11th Regiment, arrived on the 19th May and sailed for Hong Kong on the 23rd.

His Honour the Governor and suite returned from Malacca on the 20th May in the *Mohr*.

The United States frigate *Iroquois* anchored in the harbour on the 22nd May, after a cruise.

On paying a visit to the powder magazine at Kallang, the Deputy Commissioner of Police found 500 barrels of powder stored in an open shed, with a Chinese cooking his rice within a dozen feet of the same. On the 18th May, the proprietor of the magazine, Koo Chan, was fined 200 rupees by the sitting Magistrate, and the gunpowder was confiscated.

PENANG.

With the close of the Criminal Sessions we hope (remarks the *Gazette*) we have heard the last of the late Congsi riots. A tedious sessions has been prolonged by the vindictive, but, happily, absurd proceedings on the part of the Ghi Hin and To-Peh Kong Congsis. Not satisfied with the charges which they brought against some thirty-five or forty individuals at the February Sessions, and nearly all of whom were found innocent, they again invoked the assistance of the Court to aid them in their work of revenge. Each Congsi, after retaining a special Law Agent to prosecute or defend as the case may be, thought to obtain the mastery over the other, but in this they were foiled. The ridiculous nature of their proceedings was too evident to every observer. Some of their victims turned out to be decrepit old agriculturalists, whose very appearance ought to have been a sufficient guarantee against their engaging in any lawless riots. In every case the witnesses were enabled to prove in a graphic manner the whole scene of a riot, or the loot and burning of house and property. At the sound of horn and gleam of spears, the unhappy prosecutor fled in haste for his uncertain life; but his presence of mind always got the better of his terror, and just at the desirable distance he bethought himself of seeking a retreat under the ample shades of coffee or mangoostin trees or behind canes and plantains, whence he accurately noted down in his mind's eye every circumstance which took place so as at some future trial to be able to answer every question which the ingenuity of lawyers could devise. Not in one case did this happen but in a dozen, and three at least of such fearless observers were alloted to each case for the prosecution, so that every subsequent Congsi case was nothing more than a rehearsal of the same play. But the strongest fact which appeared in every case was that though the prisoners, their occupation, and abode had been well known to the prosecutor and his witnesses for years, yet no information was given against them till about a month after the occurrence, nor were they arrested for another month after the information, though the prisoners were frequently seen by the parties and the police during these intervals. It seems more likely that in every case the prosecutor and his witnesses fled at the first approach of some assailants, and never returned till his house had been ransacked and deserted, and that not till after he had cast about in vain for the likely parties did his Chinese instinct of revenge fasten on some innocent parties whom he knew to belong to the opposite Congsi.

From the north of the Province we learn that a good deal of rain has fallen, and some of the Malays have been tempted to commence paddy planting, the scarcity of rice probably inciting them to anticipate the regular paddy season. There has been an almost entire failure of the rice crop in Kedah, and the people are consequently suffering much from the scarcity of their staple article of food. Cholera has nearly quite disappeared; a great number of deaths have, however, occurred during the last few months, causing considerable alarm amongst the natives.

Another vessel, the barque *Snap Dragon*, was sold the other day to some Chinese merchants here for $17,500. This vessel was originally under the American flag, and has traded in the East for the last three years, but when the Confederate cruizers appeared in these waters, she, in common with many others of the same nation, was sold in Bangkok, and hoisted Siamese colours. She will make a very creditable addition to the ships already owned in Penang, and we are glad to see the Chinese merchants speculating in really good ships, instead of, as in former days, buying up old half-rotten craft, which will be continually requiring repair.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BERRIEN—On the 22nd May, at Singapore, the wife of G. Berrien, of a son.
DALY—On the 28th June, at Wandsworth, Surrey, the wife of Robert Daly, Esq., of daughter.
LEWIN—On the 28th June, at Tynwald Lodge, Springfield-road, St. John's-wood, the wife of D. Duncan Lewin, Esq., formerly of China, of twin daughters.
WADMAN—On the 27th June, at Slaugham Park, Sussex, the wife of E. Wadman, Esq., of a daughter.
WALKER—On the 8th May, at Hong Kong, on board the British ship Arab Steed, the wife of Henry Fowler Walker, commander, of a daughter.

DEATHS.

BARKLEY—On the 7th May, at the Civil Hospital, Hong Kong, Alexander J. Barkley, destitute seaman.
EHRESTENSEN—On the 7th May, at the Seaman's Hospital, Hong Kong, Hans Ehrestensen, seaman unemployed.
JOHNSON—On the 10th May, at Bangkok, of apoplexy, Capt. Johnson, Master of the Siamese ship Norseman; a native of England.
MOUL—On the 1st May, at Canton, Jessie Moul, aged 10 months.
O'RILEY—On the 6th May, at the village of Kamain, up the Attaran River, in the Amherst district, of fever, Edward O'Riley, Esq., Deputy-Commissioner Shoay Ghyeen, while employed as special commissioner for defining the boundary between British Burmah and Siam.
SOAMES—On the 26th April, on the passage from Hong Kong to Shanghai, after a short illness, Fanny Augusta Dickson Soames, aged 3 years and 7 months, daughter of Wm. Soames, commander, P. and O. Company.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Shanghai (per Tael.)	6 months sight.	6s. 0¼d. to 6s. 0½d.	6s. 1d. to 6s. 2d.
At Canton, At Hong Kong, At Macao	6 ditto	4s. 4¼d.	4s. 5d. to 4s. 6d.
At Singapore	6 ditto		
At Manila	6 ditto		

At Shanghai, Bills on India, Rs. 299 to 300 per 100 taels. At Hong Kong, Rs. 216 to 217 per $100. Bar Silver at Shanghai, 111 taels; at Hong Kong, 10 per cent. prem. Mexican dollars at Shanghai, taels 72 per 100, and Exchange on Hong Kong, 27 to 28 discount.

The circular of Sharp and Co. states:—

DISCOUNTS AND MORTGAGES.—As mentioned in our last the value of money generally may be said to range from five to eight per cent., according to time and character of security. Short discount five and mortgages eight per cent.

EXCHANGE.—There has again been a gradual decline during the fortnight, a great deficiency being observable in the supply of first class commercial paper; the remittances are therefore mainly composed of Bank drafts. The rupee rate, however, has not been similarly affected.

SHARES.—The new Bank Shares are still lower, Union Docks are rather in demand, probably owing to the concession which the company have obtained of land at Kowloon, their rental being $480, whereas the adjoining property of like demensions is held by private parties at a rental of $7,759, showing an annual saving of $7,279, or if capitalised at 5 per cent., a fair rate for landed property, an actual fund of $145,580, an amount more than covering the total outlay upon the docks, plant, stock, and goodwill at Whampoa, which in this sense may be said therefore to have been bought for nothing.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divided into decimal parts of ten.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA—CANTON.—Country Greens: The market has at length opened by the settlement of a chop by an American house at 31 tls. proportion, which may be quoted fully 10 tls. lower than the teamen would have taken when the teas first arrived at market this season, and considerably lower than last year. Canton-made Teas: The market, after some apparent shyness on the part of intending buyers, opened at from 10 to 12 tls. higher for Scented Orange Pekoes, and 6 to 7 tls. for Scented Capers than last year, but equal to (in consequence of the low rate of exchange and freight) only 6 tls. for the former and 2 to 3 tls. for the latter; the quality of the leaf being also inferior, and 12,000 boxes Scented Orange Pekoe, with 18,000 boxes Scented Caper have been taken by two or three houses, which now leaves our market comparatively bare, in consequence of the paucity of flower to scent the leaf with. It is expected that a considerable decline on these opening rates will soon take place. Canton Greens: Have not attracted any attention as yet, and a small quantity only of these kinds are at present being made up, owing to the large quantity remaining over from last season. New make Tayshans from Macao are being taken at full rates for the finer descriptions, but the medium and lower grades are rather neglected. All Canton made Congous are being taken at full rates. The sales of fortnight are as follow:—Canton Congous, 3,700 boxes, at 29 to 36 taels; Scented Orange Pekoe, 12,000 boxes at 31 to 50 taels; Scented Caper, 18,000 boxes, 26 to 47 taels; Country Green, 624 half-clests, at 25 to 31 taels. The stock of Country Green is about 20,000 packages, that of other kinds being uncertain.

FOOCHOW.—The market being swept, there is no report.

SHANGHAI.—Black: There has been little done during the past fortnight, settlements only amounting to 50 half-chests; quotations remain unaltered. Settlements on the market 2 chops, 504 chests, Oopacks, Oonahms, Ningchows, Hohows, and Flowery Pekoe. Re-shipped on owner's account 1 chop, 600 chests Oopacks, Oonahms, Ningchows, Hohows, and Flowery Pekoe. 3 chops, 110 chests, making total to date 387,246 chests. Stock: Waiting shipment, for re-sale, 5 chops, 2,900 chests. We quote: Third crop Oopacks, none; Ningchows, 17 to 20 tls.; Oonahms, 15.50 to 20 tls.; Hohows, None. Green: There has been considerable business done in Green Teas for New York and Canada, arrivals from Kiukiang on native account having kept the market well supplied, and prices have ruled favourably to buyers, there being fully a fall of 1 tls. since our last. Common to fair Moyune having been freely settled at 25 to 28 tls., and fine to finest, 29 to 34 tls.

AMOY.—The stock noted in last report continues to attract little or no attention, and only a few trifling settlements are reported. Musters of the new Plain Orange Pekoes have been shown, and further musters representing specific parcels are expected in a few days. Prices in the country are reported to have opened at very moderate rates, and the teamen are displaying great caution, believing that to induce foreigners to operate a much lower range of rates must be established than has existed for many years past. The unsold stock is stated at 2,400 half-chests Oolong, and 76 half-chests Congou, which being refused, the season may be called closed, the export being 700,000 lb. in excess of last year.

NINGPO.—Contracts to the extent of 2,000 pls. are reported from the interior at 31 to 32 tls. deliverable in Shanghai, but as there is not much disposition to purchase, rates are expected to recede.

HANKOW.—During the past fortnight 1 chop of common coarse Oonam has been settled at 11.2 taels leaving only 1 chop which is of similar quality on the market. Total settlements to date 740 chops. Quotations nominal.

KEWKIANG.—Green Teas: Nearly 7,000 packages had been settled for United States and Canada at prices showing a decline of nearly two taels on common and one tael on fine teas. Supplies continued to arrive, but the shipments on native account were largely in excess of arrivals, and only 14,000 half-chests remained in stock. Quotations were—Moyune: Fine to finest, tls. 27 to 31; common to medium, tls. 22 to 26 per picul. Fychow: Medium to fair, tls. 21 to 25; common, tls. 18 to 20 per picul. Total Settlements and Shipments: 219,300 half-chests or 12,881,400 lbs., against 231,500 half-chests or 13,488,100 lbs. last year. Black Teas: In these there was again no business to report, and no change in quotations which remained—Ningchow: Common, tls. 16. Hohow: Common, tls. 12 per picul. Total Settlements and Shipments: 110,900 chests or 9,675,800 lbs., against 111,600 chests, or 9,739,500 lbs., last year.

NAGASAKI.—Is just now quite neglected, and prices have fallen about $2. The new season's leaf is expected to arrive in about forty days.

YOKOHAMA.—Since the departure of last mail a fair business has been transacted in our Tea Market; the settlements as before have been almost entirely for the American market; the almost unprecedentedly flat state of the Home markets having, as we previously stated, put at all events a temporary stop to the purchases at high rates for that quarter. Prices we must quote decidedly lower, with a tendency to a still further decline. Fine Teas are $0.50 to 1.00 per picul lower, while medium teas about $22.00 are fully $1.00 lower than at the date of our last. Settlements for the fortnight amount to about 1,200 piculs, leaving a stock of about 3,000 piculs.

RAW SILK—SHANGHAI.—Since our last we have very little business to report in this staple. The total settlements for the month of April, amount to about 100 bales Chinas, chiefly Sze-chuen silk lately arrived from Hankow, and about 1,000 bales Japan, making total settlements for the season 38,900 bales, against 37,900 at corresponding period last season. The total export of all kinds from China and Japan to date is 38,900 bales, against 37,900 last season. The unsold at stock is only about 150 bales. The prospects for the new season's crop are encouraging, and some native dealers estimate the probable production at as much as 60,000 bales. From Japan, advices to the 27th ult. report a quieter feeling and a decline in prices of $35 to $50 per picul, with an increasing stock.

YOKOHAMA.—For a few days after the departure of last mail steamer business was very flat, few buyers only being disposed to operate at the high prices that were still ruling. But since the receipt of the 27th February mail, the native dealers having submitted to a reduction of from $30 to 70 from the highest point, about 350 bales were settled, making a total for the season of 13,300 bales, against 14,300 at the time last year. The unsold stock on the market amounts to about 900 or 1,000 piculs, mostly composed of medium and coarse kinds, fine hank silk remaining scarce. To all appearance the approach of the new crop, and the fear of a further fall in prices, are strong incentives for the Japanese holders to bring their silk forward and press realisations. We therefore venture to hope that, if the foreign buyers do not spoil their own bargain by too much eagerness, we are at the beginning of a reaction in our favour. The Japanese are now anxious sellers; it will be our own fault if we throw away our chance. Ida: Medium, 680 to 700; inferior, 590 to 640. Mybash and Sinchu: Best parcels offering, 710 to 730; medium, 680 to 750; inferior, 650 to 670.

DRUGS, &c.—CANTON.—Cassia Lignea: Of the new crop only 200

Digitized by Google

pls. Taiwo and 500 pls. Loting have as yet come to hand, but further and fuller supplies are expected in a few days—$15 75 is asked for the best quality and $14.75 for Loting, but it is expected that these rates will soon give way, the demand being very limited. Cassia Buds: 25 pls. have been taken at $48.50. Stock 30 pls. China Galls: The native demand has slackened of late, and larger parcels are offered to the export trade at the reduced rate of $14, but purchases might be made even cheaper. Vermilion has declined $1 per box, and may now be quoted $37.50. Musk: The market is bare, and the native demand being good, exporters can hardly expect to operate for some little time. Rhubarb: No supplies—no sales. Galangal: As last reported. Essential Oils: No supplies—no sales.

CAMPHOR.—Further supplies have come to hand, and owing to very favourable advices from the home markets by last mail a good demand for the article has existed, but buyers are not particularly anxious to submit to the higher prices asked by importers. 250 piculs sold at $20.75 per picul packed.

RAW COTTON.

HONG KONG.—There has continued a fair inquiry during the fortnight for local consumption. The supplies from the North have been small in quantity and indifferent in quality. The sales amount to about 5,000 bags at $22.50 to 24.50 for China, and $25.50 to $26 for Japan. The demand appears to be steady, and the quotation for fine is readily obtainable. A small quantity of Bengal cotton has been imported per Thunder, and full supplies are shortly expected thence.

AMOY.—Sales for the month from foreign hands amount to 2,167 bags at $25.10 to $28.50—quotations have since fallen to $25½ to $27 owing to the increased transit dues. Stock in foreign hands is stated at 1,750 bags, the native merchants holding quite as much.

SHANGHAI.—The business done has been chiefly for the coast ports, at about last mail's quotations say tls. 14 in for Shanghai, and tls. 14.50 to tls. 14.75, for Koong-pek. Nothing has been done for the home market.

CHINA IMPORTS.

COTTON YARN.—A decline equal to fully $15 per bale must be quoted in the value of this article, the demand for which continues extremely trifling, and even at the low rates now current is confined to the best qualities imported. The total sales for the past fortnight amount to 176 bales, and there are not any settlements reported from Canton or the Coast. Grey Shirtings: The quotations for all classes of these manufactures must be put at 10 cents lower than the rates last current, and a fair amount of settlements have been made at the reduced prices annexed. Sales of the fortnight amount to 9,500 pieces, and from Amoy we hear of settlements of 2,550 pieces, chiefly lbs. 8¼ goods, the quotation for which at that port is $5.75. White Shirtings: Show a decline in value equal to that sustained by unbleached goods, with settlements reported during the fortnight equal to 5,500 pieces. T-Cloths: Have found buyers at the reduced quotations given in this report to a considerable amount, and as the dealers have now supplied themselves pretty freely, the market closes somewhat weak, and to effect further sales in quantity a further concession would be necessary on the part of the importer. The settlements effected in this colony during the past fortnight amount to fully 18,000 pieces, Sales of 2,100 pieces are reported from Amoy at $3.30 to 3.45 for lbs. 6 to 6¾ goods. American Drills: No stocks, but sales of 2,000 pieces of drills of English manufacture are reported. White Spotted Shirtings, Dyed do., Brocades, White and Coloured: There are not many sales of these goods to report, and prices remain nominally as quoted last month. Damasks: Meet with no inquiry. Chintzes: The sales reported during the fortnight amount to 450 pcs.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths: Have not met with any very brisk enquiry, and rates remain without alteration. The sales reported consist of 120 pieces of Spanish Stripes and about a similar amount of Medium and Habit Cloths. Long Ells: Assorted colours are quoted as under date of last report, but Scarlet commands an advance of 15 to 20 cents per piece upon the price current a fortnight ago. The sales reported amount to 600 pieces. Camlets: Remain unchanged in value, and have found buyers to the extent of 300 pieces. Lastings: 200 pieces have been purchased.

METALS.—Iron, Flat, &c.: A fair average amount of business has been transacted in the various descriptions of Iron enumerated during the past fortnight, but the value of Nail Rod shows a decline of about 12 cents per picul upon the quotations previously current. The sales reported consist of 840 piculs of Nail Rod, 3,900 piculs of Square Flat and Round Bar, and 270 piculs of Iron Wire. Lead: Has met with but little attention, and sales are restricted to 840 piculs. Tin: Some 1,250 piculs have found buyers. Tin-Plates: The sales of the fortnight are estimated at 640 boxes. Steel: There are not any transactions to report.

COALS.—HONG KONG.—The demand for this article, anticipated in last report as likely to set in sooner or later, has come on more quickly than was expected. Stocks, although still heavy, are diminishing, which circumstance, added to the continued absence of arrivals, to the small quantity known to be afloat, and to some orders for shipment of Welsh to Shanghai, has tended to improve prices, and from $7.50, at which the last sale was effected, the market has suddenly risen to $11 to 11.25 for best Welsh or English in store or to arrive—at from $10 to 11.25 several cargoes have changed from the hands of importers into those of consumers. In Australian there has been nothing done since the sale of the Electra's cargo at $4.90, but the next cargo that arrives will, doubtless, realize a much better price.

SHANGHAI.—The speculative demand which we reported in our last has had the effect of clearing the market of most available lots of steam coal, and the stocks on the market in first hands are now much reduced. Stock for consumption having been well laid in during the time of the low prices, it is doubtful whether any advance upon present rates can be looked for. The rates at which sales have been made are: English steam coals taels 8.50 to taels 9. West Hartley to arrive at taels 8 per ton. Cardiff to arrive 57s. 6d. to 60s. Sterling per ton, payable by 6 mos.—sight bill on delivery. Recent arrivals of best Sydney have been placed at taels 8 to 8.25 per ton. Sales for arrival taels 8. American: Little doing; a few sales at taels 10 from Godown, but the bulk held for taels 11.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From London: Eliza Shaw, Eleanor. From Amsterdam: Marie, Yokohama.

At SHANGHAI.—From London: April 22, Guinevere; 30, Challenger. From Sunderland: 22, Ethel; May 1, Hesperia. From Falmouth: April 28, Lalla Rookh. From Cardiff: May 1, Sir W. Wallace; 13, Madge Wildfire. From Newport: 6, Vincenno Giaunilla. From Marseilles: 7, La Virerge.

At HONG KONG.—From London: May 4, Devanar; 14, Taiping. From Hamburg: 15, Dioscuren; 17, Princess; 18, Zanzibar. From Newcastle; 15, Paradise. From Bremen: 18, Rudolph. From Antwerp: Miranda.

At MANILA.—None.

At SINGAPORE.—From Liverpool: Jessie Beasley. From Cardiff: Agenaria.

At PENANG.—None.

DEPARTURES.

From YOKOHAMA.—For London: Mirage.

From SHANGHAI.—For London: April 29, Cissy; for New York: 24, Marion; May 6, Eva.

From FOOCHOW.—None.

From HONG KONG.—For London: May 19, Banda; for New York: May 22, Recife.

From MANILA.—None.

From SINGAPORE.—For London: May 16, Clarendon, Martin Luther, and West; for Liverpool: 14, William Dixon; for Bordeaux: 6, Robur; for Bremenhaven: 10, Amazone.

From PENANG.—For London: April 26, Britannia.

VESSELS LOADING.

At YOKOHAMA.—For London: Dora.

At SHANGHAI.—For London: William Melhuish, Highflyer, Fire Queen. For Liverpool: Woosung.

At FOOCHOW.—For London: The Serica and Childers are waiting for the New Teas.

At HONG KONG and CANTON.—For London: Pakwan, S. S. Annette, Burdwan, Blackburn, Northfleet. For Liverpool: Vanda.

At MANILA.—None.

At SINGAPORE.—For London: Civiale, Zephiros, Bencleuch, Fortitude. For Liverpool: Richard Cobden. For Falmouth: Ida, Melbourne. For Bordeaux: Prophete. For Hamburg: Molly. For New York: Triton, Sea Ranger, Energie.

FREIGHTS AND CHARTERS.

YOKOHAMA.—To London, cotton and tea, £3 per ton; silk, £4. 10s. per ton of 50 cubic feet.

SHANGHAI.—Little or no inquiry exists for tonnage either for home or coast. Vessels on the berth for U.K. are loading slowly at £3.

HONG KONG and CANTON.—Small vessels to the northern ports alone can find employment; for large vessels no charters are to be obtained; the Pakwan and Northfleet are on the berth for London at £3.

MANILA.—The Raby Castle (English) has been taken up for Liverpool at £2 for unclayed sugar, and £4 per 20 cwt. for hemp; the sugar being loaded here, and the hemp in Cebu. The Vorsetzen (Ham.) has been fixed for Falmouth, to discharge at a port in the U.K., with about 500 tons unclayed sugar at £2 per 20 cwt.

At SINGAPORE.—Tonnage continues in abundance. Arrivals of disengaged ships have been numerous, and very little employment is offering for coast or home. The rates for U.K. are £1 per ton, £1. 10s. other dead weight, and £2 light freight.

At PENANG for LONDON.—Cargo is very scarce, particularly light freight. The Caroline has been compelled to reduce her rates to £2 per ton.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—April 20, Taiping, London to Hong Kong; 22, Scotland, Glasgow to Batavia; 25, Nheti Oeletei, London to Hong Kong; 28, Coral Nymph, Sunderland to Hong Kong; Amoy, Cardiff to Shanghai; 29, Fi-wan, Sunderland to Hong Kong; May 2, Banian, London to Hong Kong; Simoda, Liverpool to Shanghai; 3, Caractacus, London to Hong Kong; Dewa Gungadhur, London to Singapore; Invincible, Liverpool to Shanghai; 4, Cezard, Havre to Saigon.

From UNITED STATES to CHINA, &c.—None.

From CHINA, &c., to ENGLAND and CONTINENT.—April 18, Indien, Manila to London; 21, Ocean, from Macao; 24, Philippine, Macao to London; Ouderk and Amstel, Batavia to Holland; Cesarea, Manila to Falmouth; Kier, Manila to Falmouth; 25, Agamemnon, Shanghai to Liverpool; May 4, Conference, Singapore to London; 11, Osprey, Manila to London.

From CHINA, &c., to UNITED STATES.—April 25, Wild Rover, Manila to Boston; May 1, Hazard, Manila to Boston.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—July 5, at Deal, from Shanghai, Benvenue; 6, at London, from Colombo, Teviot, Charlotte Ann, and Attila; 4, at Liverpool, from Singapore, Springwood; 6, at London, from Shanghai, Cornish Girl.

SPOKEN.—Robin Hood, Sunderland to Shanghai, May 30, 2 N., 29 W.; Tagal (Dut. barq.), China to Amsterdam, June 26, 43 N., 34 W.; China (Dut. barq.), Batavia to Amsterdam, June 30, 47 N., 21 W.

CASUALTIES.—The Etienne, Abeille, which sailed 28th May from Mauritius for Singapore, put back on the 1st June, leaky.

MISCELLANEOUS.—At Mauritius: May 20, from Sourabaya, Margaretha, Muller; June 4, from Singapore, Conference, Reid; 4, Shaftesbury (s.s.), Aitken, said for Singapore.

LAID ON.—At Liverpool, for Shanghai, Lockett.

LONDON, FRIDAY, JULY 7, 1865

ALTERED CONDITION OF SHANGHAI.

SHANGHAI formerly received the well-deserved appellation of "The Model Settlement," *per se*, of all the foreign settlements in China. In those days trade flourished, merchants made their fortunes, residents bought land cheap, and built stately mansions on its mud soil, and great harmony prevailed among its motley community, who pursued theeven ten or of th ir way without governors and council to control, or judges and lawyers to dispute their acts. Although of nationalities and races differing from each other as much as cats and dogs, rabbits and monkies, or rats and mice, yet they associated together as peacefully as the famous "Happy Family" of the menagerie. Alas! those days have passed away. The dog is worrying the rat, the cat is pinching the mouse, and the monkey is pulling the rabbit by the ears. Everybody seems to be quarrelling with everybody else, and all are dissatisfied, more or less, with the Moloch they had set up to worship, and to govern their affairs by the administration of a *quasi* Municipal Council. Commerce is no longer flourishing, merchants are becoming bankrupt, a Supreme Court is being established, lawyers are flocking to that shrine of contention, foreign residents object to pay taxes which no authority has power to enforce, the necessary public works are abandoned for want of funds, and, generally, the "Model Settlement" is in sad case. The causes that have led to this altered condition of Shanghai are numerous, but that which immediately commands our attention is the unsatisfactory state of the Municipal Government, which is unable to cope with the pecuniary difficulties that surround it. On this head we have a partial explanation in the valedictory speech of Mr. HENRY W. DENT to the land-renters, on his resigning the office of Chairman to the so-called Municipal Council, in which the following occurs:—

"When times are prosperous and large fortunes made with "rapidity, men usually are far less prone to criticise the nature "of the taxes they have to contribute to, or even their amount. "Let, however, adversity come upon us, let commerce fail, let "property depreciate to a fearful extent, then different feel-"ings are awakened in the minds of tax-payers. Taxes which "heretofore have been found to yield a sufficient revenue, "gradually are becoming less productive. Hence new taxes "become a necessity, and with these the means of enforcing "them. This being one of the most important features in "municipal government, naturally leads to its consideration."

These trite remarks he illustrates by giving an historical sketch of the origin of the Council and the extent of its powers of self-government, as originally laid down by Sir RUTHERFORD ALCOCK in 1854, when he was British Consul at Shanghai. Without entering into details, we agree on the whole with Mr. DENT'S views as to the insufficiency of that institution at the present day, at the same time Sir RUTHERFORD deserves the highest encomiums for the plan on which he framed the Land Regulations, and the rules for guiding the Municipal Council. For seven years these met all the requirements of the settlement without a murmur, and it is only surprising how such a large and heterogeneous community could have been governed by so limited a code of laws and so slender an administration, for that length of time. As the circumstances under which the Council was formed out of the primitive "Committee of Roads and Jetties" was the growth of the settlement into a prosperous town, so the augmentation of that town into a great city or colony demands a new constitution. Sir RUTHERFORD ALCOCK is shortly returning to China in the well-earned capacity of Her MAJESTY'S MINISTER at the Court of Peking. Doubtless on his way to the capital he will call at Shanghai, where he will naturally inquire into the grievances of his bantling; and the time would be appropriate for the land-renters to set forth their views on the "Better Government of Shanghai" question. Three years ago this was the topic of the day, when the safety of the settlement was entrusted to the Defence Committee, to provide measures for its protection against the Taiping Rebels, which the Municipal Council had neither the means nor the power to initiate. That committee did its duty until the causes which brought it into existence had passed away; and before dissolving pointed out the absolute necessity of having some general system of government similar to that of the Free City of Hamburg. This idea, however, was not acceptable to the community; and any further attempt to raise the *locus standi* of the land-renters was quashed by the famous despatch of Sir FREDERICK BRUCE, wherein he considers them nothing more than squatters on Chinese territory, and the British settlement to have no legal existence. Be this as it may, the time is now at hand when something must be done to establish an efficient executive and legislative government at Shanghai. As to the Municipal Council, it is neither one thing nor another. It wants the vital power of all municipalities, namely, to sue and be sued; and hence it is not a corporation at all. It is a self-elected body under the *permissive* authority of the representatives of England, France, and the United States of America, *id est*, the joint act of a constitutional monarchy, an imperial despotism, and a republic. Such a heterogeneous authority is contrary to the laws of political economy, and will no more mingle than oil, water, and sand. It is this divided authority that renders the Council utterly powerless to enforce the payment of taxes. If it was under the jurisdiction of one treaty Power this could be done; as is the case at the British settlements of Hankow, Kewkiang, Tientsin and others, where none but British subjects are allowed to purchase or rent land. If Shanghai was a British settlement there would be an end of the difficulty, but it is not so, it is a "Foreign settlement," including what are called the English, French, and American concessions, according to the land and municipal regulations of July 1854, signed by ALCOCK, EDAN, and MURPHY, and the plenipotentiaries of their nations, together with TAOUTAI WOO on the part of the Chinese authorities.

Such being the case there is no possibility of forming a legal council unless the settlement is divided into separate concessions, the British having that which is commonly assigned to them. But since these regulations were passed, other Powers have ratified treaties with China, containing favoured-nation clauses; so that unless they agree to yield their privileges any of them can object to the participation of the foreign settlement. Perhaps Sir RUTHERFORD ALCOCK might persuade the Government at Peking to grant a concession, or possibly to have the land ceded; but that would be sure to raise the opposition of his colleagues, and cause endless negotiations, while the material improvement of Shanghai would go to wreck, and even the Chinese house-renters might refuse to pay taxes—which would be the death-blow to the bubble municipality. In that case what course would lie open for the British authorities to pursue? We know of only one, and that would be to abandon the foreign settlement altogether, and secure a concession from the Chinese Government of the land at Woosung, for British residents only, as at the Yangtsze open ports, where the Consuls have power to enforce the laws. Nay, more, if Sir RUTHERFORD were to represent that it was necessary for sanitary considerations to remove the forces from their present unhealthy locality to Woosung, where it is more salubrious, as in the annexation of the Kowloon shore to Hong Kong, it is just possible that the EMPEROR of CHINA would cede the land to Her MAJESTY. This would effectually solve the difficulty, as far as England is concerned, and with a railway to unite the new colony with the old settlement, Shanghai would be properly governed under the ægis of the glorious British Constitution.

CHINESE OWNERS OF FOREIGN SHIPS.

AN important concession is stated to have been obtained by Mr. ROBERT HART, Inspector-General of H.I.M.'s Maritime Customs, from the Chinese Government, to the effect that natives may legally be the owners of foreign ships, and trade at any port in China under the protection of the national flag. Hitherto the Chinese ownership of foreign vessels has been restricted to a few lorchas and small steamers trading between the treaty ports, and into the silk districts near Shanghai and Ningpo. Although the property of native owners, yet these vessels are all commanded by foreigners, chiefly English and American; and although part or most of the crews are Chinese, yet the officers, engineers, and other responsible persons, are also foreigners. Moreover these vessels sail under foreign flags, mostly British and the United States. But, what is of chief consideration, the register of a ship owned by a Chinese was made out in the name of a foreigner, in whom the true owner had implicit confidence, as it was an illegal transaction. Be that as it may, hundreds of lorchas and small steamboats have been sailed under the British flag, by English captains and officers, and ostensible English owners; and, to their credit, we know of no instance where the confidence in their integrity by the *bona fide* Chinese owner has been broken. However, the principle is wrong, and tends to the demoralisation of British relations in China. On the other hand, a large fleet of native junks is owned by foreign merchants, who are allowed to sail them under their national flags by their respective consular authorities, although they are manned by Chinese masters and crews. These junks are used as cargo-boats and barges. The latter on the Yangtsze being towed by steamers sometimes from Hankow to Shanghai. It is well known that from time to time some of these steamers, lorchas, and junks have visited non-treaty ports for the purposes of trade, and penalties have been inflicted on the owners for so doing, in accordance with the treaty of Tientsin. By this new concession, these restrictions, as far as the native owners are concerned, will be done away with, and the Chinese owners of lorchas and steamboats may henceforth have the vessels registered at the foreign Customs in their own names. This is only a just concession to the enterprising Chinaman who has ventured his capital in improving the shipping interests and commerce of his native country. But when it is proposed to extend this ownership to vessels of the largest burthen, with power to trade at every port in the empire, it infringes on the rights of foreign traders, who are excluded from other than treaty ports. As the bulk of the merchant fleet in China is British, of course our interests will be materially affected by this concession; and it behoves everyone interested in the shipping with China to look seriously into the matter. The Imperial decree promulgating this measure has not yet reached us, consequently we cannot enter into details; neither have the Ministers and Consuls of the treaty Powers published any notifications on the question. However, sufficient has transpired to enable us to form an opinion on the general question.

We think it a measure that will not stand, as it is contrary to the policy that hitherto has raised the foreign trade of China to its present high development—especially as sustained by British merchants, whose true course is to encourage and promote what has already been so successfully done in the conveyance of merchandise and produce in British ships only, manned by British sailors and officers, and owned by British owners. Not only do the foreigners of other nationalities in these waters recognise the safety and security of cargoes in British bottoms, but the Chinese prefer shipping in them. And why so? Simply because the practical Chinese mind sees the advantage of insuring his property in a British ship, when he cannot do so in one owned by his countrymen, as there is no law of insurance in China, and foreign insurance companies will not insure cargo in vessels owned or manned by Chinese, even with foreign captains and officers. If we are not mistaken, the lorchas, steamers, and junks already referred to are neither insured nor the cargoes they carry, even though the ownership is ostensibly in foreign names; in the same manner that houses owned and tenanted by Chinese seldom or ever have an insurance effected on them. There is no doubt that the preference given by the Chinese shipper to foreign vessels, where time is a matter of importance, has been influenced by their superior speed and punctuality in reaching their ports of destination. But his chief consideration is the "can insure;" which he readily avails himself of, and cheerfully pays the premiums. Now, in the event of the wealthy Chinese investing in foreign ships, and native merchants shipping cargo in them, to trade between any of the immense number of ports in China, is it likely that the insurance companies would grant policies on either vessel or goods? We should say not, even if they were officered or manned by Englishmen or sailors of other nationalities. The insurance offices, by their regulations, have shown hitherto that they have no confidence in Chinese ownership of vessels or houses, or property on sea or land, under their charge; and we very much mistake their policy if in this instance they will extend their operations to native risks. On the contrary, it is probable that they may be more particular in future as to enforcing the rules laid down where a policy becomes vitiated. Under these circumstances it is not likely that even the Chinese will avail themselves of this new measure; and we presume that no foreign trader would risk his goods on board such vessels. At the same time, as far as legalising the ownership of vessels at present held clandestinely is concerned, Mr. HART has secured a boon to the Chinese, and relieved many foreigners of questionable titles, for which he is entitled to the thanks of the foreign communities in China.

CHINESE IMMIGRANTS.—The barque *Paria*, 103 days from Whampoa, arrived in the gulf on the 25th May, bringing 279 Chinese immigrants, viz., 190 men, 76 women, and 13 children. She had nine deaths on the voyage.

THE NEW SECRETARY FOR JAPAN.—We intimated in our last issue that Mr. Ford had been appointed to Japan. The following has since appeared in the *London Gazette*:—The Queen has been graciously pleased to appoint Francis Clare Ford, Esq., now a Second Secretary in Her Majesty's Diplomatic Service, employed in Her Majesty's Embassy at Vienna, to be Secretary to Her Majesty's Legation in Japan.

THE DE MORNY SALE.

The auctioneer has distributed the late Duc de Morny's collection of pictures and curiosities to the four winds, and the widowed duchess and children will receive something like two millions of francs when all expenses are paid. The gross sum received was 2,023,937 francs, of which the pictures produced more than three-fourths. The curiosities realised 324,737 francs. It is with the latter that we have to do; the amounts paid for the pictures have been reported in all the journals in Europe.

As regards the curiosities, of which a large proportion consisted of Chinese, Japanese and other Oriental productions, scraps of information have appeared in the London daily and other papers, but the value of these may be estimated from the fact that the French journalist originated a mass of errors which have been copied with more or less fidelity with the blindest confidence on all hands. As instances of these blunders, we may mention a crystal cup which sold for 1,260 francs, set down at 12,600 francs, a jade ornament marked 2,300 instead of 1,010 francs, another at 1,505 in place of 900 francs, two vases at 4,000 instead of 1,600 francs, and two bowls at 770 in place of 170 francs. If information is worth anything at all it is worth while to give it accurately, and therefore we have taken the trouble to obtain the prices at which the principal articles were sold from the official documents, and it will be seen, as we have stated on former occasions, that Paris is not a bad market for Chinese and Japanese curiosities.

The most important items in the section of *cloisonnes*, or incised enamels, were the following, the prices being given in sterling money, and odd shillings being omitted. Bronze Monster seated and holding an oval disc of white jade, carved and pierced with dragons and flowers and surrounded by two long branches of flowers in enamel, £60. Two fine perfume burners in sea-green and blue enamels, with dragon handles in gilt bronze, £144. Flat box with cover, eight inches in diameter and four inches high, enamelled in medallions, containing landscapes with figures, the heads of the latter being in gilt bronze and standing out from the surface, £160. Perfume burner on three feet, round and about fifteen inches high, in turquoise enamel with ornaments in relief, £59. A large gourd-shaped vase with two handles covered with flowers in coloured enamels on blue ground, £92. Two square screens about fifteen inches square, enamelled flowers on blue ground, in carved and pierced wood stand, £112. Two enamelled pictures, 28 inches by 16, representing a river with junks in eagle wood frames, decorated with bronze, £45. Two square perfume burners, about sixteen inches high, enamelled with dragons and ornaments, standing on four heads of monsters in bronze with dragon handles, £75. Square vase decorated with mountain scenery in coloured enamels, £62. Round perfume burner with decorations on blue enamel ground, monster handles in gilt bronze, supported on a kneeling elephant in gilt bronze, altogether under nine inches high, £66. Pagoda, sixteen inches high, gilt bronze and coloured enamels, £52.

There were a dozen or more articles in rock crystal of European and Oriental workmanship; a richly ornamented cup of the time of Louis XV., sold for £139, and a fabulous bird, ornamented with precious stones, an Italian work of the sixteenth century, £240. A small upright vase not six inches high, of Chinese origin, with elephant head handles and loose rings, all worked out of the crystal, with engraved figures and dragon on the cover, £84.

Half-a-dozen incrusted jade vases and boxes of Persian workmanship, fetched nearly £800.

The other works in jade amounted to more than sixty in number. A round cup with cover, about four inches high and 6 inches in diameter in milk-white jade carved and pierced, fetched £41. Two perfume burners in the same

Digitized by Google

material and style, but of smaller dimensions, £100. Two pairs of small plain bowls on a tray in white jade, each marked with Chinese characters, each pair, £32. Flower-shaped cup in white jade with gilt and enamelled handle, about two inches high, £22. Fine circular cup with bats and monsters for handles, and cover with four ring handles, decorated with engraved flowers, white jade, £54. Two square screens, 10 inches by 6, white jade carved, on an enamelled stand, £45. Circular vase in white jade surrounded by a woman's hand, with flowers, and birds with rings in their beaks, with cover surmounted by a divinity, a very curious work, little more than eight inches high, £42. Screen in emerald green jade carved landscape with river, and junks on gilt bronze stand, 8 inches by 5, £40. Monster with small vase on his back, green jade, with very ancient inscription, 7 inches high, £52. Pair of spherical boxes with trees and birds cut in relief, green jade with carved medallions in white jade, inserted, 8 inches by 9, £90. Upright vase and cover in green jade with handles and wings, with landscape engraved and gilt, and a long inscription in Chinese, 14 inches high, £112. Cup and cover, spherical with flattened sides, carved and pierced, green jade with inlets of white jade, four ring handles, 14 inches high, £60.

The porcelain includes some fine pieces. Two old China vases, baluster shaped, with covers, and decorated with flowers on a white ground, brought from the Palace of the Escurial, 45 inches high. £400; pair of square vases, old china, birds and flowers on a white ground, 16 inches high, £64; bottle, old china, clouds, birds, and ornaments in blue and copper colour, 27 inches high, £22; Pitong, old turquoise china, 14 inches high, £54; pair of parrots in old turquoise, on violet coloured rockwork, £44; vase, with figures and ornaments in relief and sunk colours on blue ground, ancient and curious, mounted on a bronze stand of the time of Louis XVI., 16 inches high, £42; baluster shaped vase, in old grey crackling china, with flowers and ornaments in relief, with gilt bronze handles and mounting, 16 inches high, £44. These are but a few of the most important items.

The Chinese and Japanese bronzes were numerous, but less remarkable than the enamels and china. Two vases in the shape of open mouthed trumpets, in Japanese bronze, encrusted with silver, with leaf shaped handles, 16 inches high and 15 wide at the top, £57; teapot and heater, the latter in bronze, with handles, and decorated with flowers and ornaments in silver, the former in white metal, chased and gilt, with handle formed of birds, Chinese, £22; tazza, with butterflies in relief, encrusted with silver and gold, with gilt heads of monsters for handles, £40.

The lacquer works were numerous and good. Chiffoniere cabinet, with figures of Japanese, flowers, &c., in gold, and mountings in Tonquin bronze gilt, £54; pair of candlesticks in eagle wood, carved and lacquered, and decorated with tortoises and insects in gold and silver, £42.

Amongst the ornaments was a mandarin's necklace, composed of beads of lapis lazuli and coral, with pendants in rose and ruby coloured crystal, and mounted in gold, £47. A pendant with amulet in carved cornaline, green jade rings and three large pearls, £71; and a massive gold box with filigree ornaments, surmounted by a monster's head carved in turquoise, and containing a bronze figure of a divinity, from the Summer Palace, £58. Two mosaic pictures, one representing a landscape, and executed in mother o' pearl and coloured stones on a black ground, the other trees and flowers on a salmon coloured ground, £19; two cups and covers in Indian tortoiseshell, with decorations in gold, £36.

The ornamental furniture included four square stools in black lacquer, with incrustations of flowers and ornaments, of Chinese manufacture, £23. Two small round tables, carved and pieced with inlet porcelain tablets representing the fete of flowers, £76. Two small cabinets, with drawers, in carved soap stone, on wooden stands decorated with flowers, £123. Small cabinet in carved eagle wood, and decorated with figures in white jade inlaid with bronze, £18.

MALPRACTICES OF BANK OFFICERS IN THE EAST.

(To the Editor of the *London and China Telegraph.*)

SIR,—Your issue of April 17th, containing an extract on the above, has just come to hand, and I hasten to avail myself of your permission to reply to it through your columns, desiring on behalf of myself and *confreres* to repudiate the insinuations so lavishly and so undeservedly cast upon us.

With respect to the privilege of obtaining *sight* drafts on London, at the rate of exchange granted to the public on *six months'* sight paper, one might imagine from the tone of the writer that this was abused to an alarming and dangerous extent. Now, one who has succeeded in procuring so much information regarding the *strictly private* arrangements existing between the leading banks and their foreign staff, cannot be ignorant that the latter are rigidly forbidden to enter upon any speculative or trading operations whatever, on their own account. Whether this salutary regulation is closely adhered to, or if it is occasionally evaded, I am not in a position to say, but the shareholder in question may rest assured that the sending home of large remittances by sight drafts would most infallibly lead to the offender's detection and consequent dismissal were the latter the case. Writing from a tolerably wide experience, I have no hesitation in saying that the privilege is *never* made use of except in the case of family remittance, and I am much mistaken if the general body of shareholders is disposed to grumble at this slight boon being granted to such of their employés as have relatives to support in England.

The second ground of complaint is the allowance of interest at the rate of *six* per cent. per annum upon our current deposit account balances; and how much loss does this entail on the poor shareholders, I wonder? The rule, I believe, was originally established for the purpose of fostering a spirit of economy among the junior officials, but were the balances of the whole Eastern staff taken in the aggregate, I question if the average amount of the credit of each individual would represent more than *a month's salary!* I quite agree with the writer in his recommendation that "ledger-keepers" and "clerks" should be prohibited from keeping current deposit accounts with the establishments they serve, seeing that Eurasian and other native hands have of late so grossly decerved their employers; but were such a want of confidence as the imposition of this regulation would imply shown to a European bank officer, he would resent the insult by immediate resignation.

The insinuation that bank officials abroad are paid "ridiculously higher than they are worth," must have been made in ignorance of the fact that the leading establishment in the East has lost the whole of its Bombay staff (from the agent down to the junior assistant accountants) within the past eighteen months, they having procured more lucrative situations elsewhere, which testifies that the enterprising inhabitants of that city are of a different and more appreciative opinion, at any rate. In trading language, the market value of banking experience has risen considerably within the last few years; neither is this surprising when one reflects upon the enormous competition now prevailing, in the face of which the older establishments will do wisely to pause before they give heed to such insinuations as have been quoted above. An efficient foreign establishment is the best surety for a lucrative business, and this can only be maintained by a liberal scale of salaries.—Yours truly,

* * * * May 19, 1865. ONE OF THEM.

WOOSUNG FOR THE PORT OF SHANGHAI.

(To the Editor of the *London and China Telegraph.*)

SIR,—Having read with much interest the letter of "Free Trade," in the last impression of your journal, and considering the vast importance of the question, not only to the community of Shanghai but to the commercial world at large, I trust you will allow me space in your columns for a few observations, which a residence of some years in the "Model Settlement" may justify me in asking.

In my mind—which I am happy to say is not biassed by any shares in steam tugs, or uninhabited native dwellings in the settlements or their suburbs—there are very great doubts whether the transfer of the anchorage to the mouth of the Wongpu would be any advantage to the prosperity of the commerce at Shanghai, or saving in risk to vessels visiting that port. No doubt the ignorance complained of by "Free Trade" on the part of the Municipal Council in the bunding opposite the settlement, and the irregular construction of the jetties, thereby narrowing the channel at Pootung point, and making that elbow of the river more difficult to navigate, are great drawbacks to the present anchorage; but they are not insurmountable difficulties, and with the present works to commence from, a combination between the French and English councils to preserve an even river frontage, and regulate the length and construction of the jetties, would, I am sure, soon remedy the present evils. To transfer the anchorage to Woosung, I consider, would be a very questionable advantage even in the case of the river steamers transferring their cargoes of produce to the homeward-bound ships there, and so saving a river navigation of some 28 miles up and down, as this would entail a staff of clerks and native officials on the part of each firm, the establishment of a branch Custom-house, and the same risks that have been encountered at Shanghai of bunding the banks of the river, erecting jetties or wharves, or excavating, as your correspondent suggests, docks. To add to these difficulties it would not always be required or practicable to tranship produce at Woosung, for a deal of it arrives unprepared for the voyage home or intended for the Shanghai market; and where the agents of steamers would make no allowance for the 14 miles less distance, consignees would not care to incur the expense and risk of the railway transit to the settlement, and the attending removals and knocking about of packages; and from the past experience of pilfering in shipment homewards, I think it very unlikely that firms would care to trust their goods to a staff of natives, in whatever capacity, so far from their own supervision, or to encourage public Godowns or embark in private ones, with their extensive accommodation at Shanghai doomed to lie idle.

Again arises the question—would the river at Woosung be a safer or more commodious anchorage than the present one at Shanghai? I think most assuredly not, for below the bar the channel is narrow, and would not provide room for a third of the tonnage which assembles in the port in the south-west monsoon; while if the vessels had to cross the bar they might as well proceed to Shanghai at once, for then the greater part of the risk of navigation would be over; and I think it very doubtful whether much space available for moorings could be found in the broad expanse of water above the bar, which, if I remember right, is very shallow except on the left or channel side of the river; and I don't think that that accommodation would be much improved by interferring with the banks by bunding or wharves, which it is very likely would even be attended with worse results than at Shanghai, as the narrowing of the stream might only deepen the present bar at the cost of a much more dangerous one at the conflux of the two rivers, and the extension of the middle ground, now I believe worthy of the name of Gough Island.

In conclusion, Sir, it is my humble opinion, from the arguments I have given above, that it would be a great mistake to attempt to make Woosung the port of Shanghai, as when a terrific outlay of money had been expended the advantages might, and, I think would, be found to rest with the present anchorage. Then why incur such risk? A deal of money, it is true, has been squandered over the present settlement, but with it what is necessary has been obtained, and the experience should teach us that it would be folly to throw away more on an unnecessary scheme. Woosung as a Sanatorium, is a very different thing to "Woosung as the port of Shanghai;" and in the former capacity I should be glad to hear of it connected with the settlement by a good inland road, by means of which the *elite* of Shanghai could drive or ride out on a Saturday evening to enjoy a little pure air at their marine villas, and escape from the nauseous effluvia which have taken possession of the concession, since cupidity converted it from a healthy "model settlement" to a native settlement of sickness, filth, and vice.—I am, Sir, your obedient servant,

MERCATOR.

London, July 6, 1865.

Legal.

RE THE BANK OF HINDUSTAN, CHINA, AND JAPAN (LIMITED) AND THE COMPANIES' ACT, 1862.

This was a motion to rectify the register of this company by striking thereout the name of Mr. J. B. Higgs, of 22, Change-alley, Cornhill, merchant, who was by the register represented to have been a shareholder

Digitized by Google

in respect of 50 shares, which became forfeited on the 29th May last. The case turned upon the construction of the 161st section of the Companies' Act. On the 22nd April, 1864, the Joint-Stock Imperial Bank of China, India, and Japan was registered, and Mr. Higgs became a shareholder therein. Shortly afterwards the Imperial Bank proposed to amalgamate with that of Hindustan, which had been registered in 1862. In August, 1864, the terms of amalgamation were published, by which 20,000 new shares, of £100 each, of the Bank of Hindustan were to be issued to the holders of 20,000 shares of £50 each, in the Imperial Bank. The issue was to be at a premium of £6 per share, of which £5 was to be placed to the reserve fund of the united bank. Sundry general meetings of shareholders were held, and it was eventually, in effect, agreed that the liquidators of the Imperial Bank were to be authorised to receive, in compensation for the property of the Imperial Bank, shares in the Bank of Hindustan upon certain terms; and that if any member should dissent, in writing, from this arrangement within seven days from that meeting, and should require the liquidators to purchase his interest, the liquidators should raise the purchase-money to be so paid to such dissentient member by sale of shares in the Bank of Hindustan, which otherwise would have been allotted to such dissentient member. Mr. Higgs did not attend these meetings, nor assent to the resolutions, nor express dissent within the seven days. He received a circular from the secretary, informing him he was entitled to the allotment of fifty shares, and enclosing a form of application for them. Mr. Higgs did not return the former, as directed; nearly a year's delay occurred, the shares fell in value, and he eventually declined to take these shares. Meanwhile, Mr. Higgs's name had been entered on the register as a shareholder for fifty shares. The bank from time to time applied for calls on these shares, and, in consequence of their non-payment, the shares were declared forfeited. This motion was made under the 35th section of the Act of 1862. The company contended that full authority had been given to the directors to amalgamate; and that the resolutions, carried by a sufficient majority of the shareholders of the company, must be binding on individuals like Mr. Higgs, when his authority to the directors had been once given.

His Honour held that Mr. Higgs had never surrendered his option of accepting or refusing those shares; that he had been abroad, and on his return had immediately refused them. He must be struck off the list accordingly. Costs against the company.

THE MERCANTILE BANK OF INDIA V. PETO AND OTHERS.

This case raised an important question of mercantile law, relating to the right and title to receive goods imported from abroad and warehoused at the docks, and the liability of the dock companies for making or withholding delivery. It was an action against Sir Samuel Morton Peto and Mr. Brassey, lessees of the Victoria Dock Company, to recover the value of eighty-two boxes of tea, which had been delivered by the Dock Company, as was said, to the wrong parties. The defendants denied their liability.

Mr. Field, Q.C., and Mr. Archibald were for the plaintiffs; Mr. Bovill, Q.C., and Mr. Watkin Williams were for the defendants.

The action was to recover the value of 82 boxes of tea alleged to be the property of the bank, being 82 out of 331 boxes of tea shipped to Messrs. Maltby and Co., of Shanghai, on board the ship *Millbrook*, the bills of lading of which were held by the bank as endorsees for value, and which 82 boxes were not delivered to the bank by the defendants, at whose docks the tea was warehoused. One Bradley, a merchant carrying on business in London, was an extensive importer of tea from the East, which he was in the habit of warehousing in the defendants' docks. In July, 1864, the *Millbrook* arrived in the port of London from Nagasaki, with a cargo of tea, of which Bradley was consignee and owner. The teas were shipped by Maltby and Co., of Shanghai, for account of Messrs. Rothwell and Co., of that place, agents for Bradley. The bills of lading imported that the teas were shipped by Maltby and Co., and consigned to order, and they bore the "open," or "blank" endorsement of Maltby and Co. The firm of Rothwell and Co. drew upon Bradley for the amount of the invoice, and these draughts attached to the bills of lading were negotiated with the plaintiffs, the Chartered Mercantile Bank, in the usual way, and so the bank were holders of the bills of lading. It appears that business of this character is very largely transacted by the banks, and it is usual, it was said, for the banks to give notice on the arrival of goods thus hypothecated to them to the various dock companies. The ship in this instance arrived on the 23rd July, and no notice was given to the dock company, it will be seen, until the month of October. On the other hand, it was said that it is the custom at docks and warehouses in London not to deliver up goods coming from the East except on production of the bills of lading. And it was not denied that this was the custom with the older docks; but the defendants, when they opened the Victoria Docks ten years ago, established the following rule:—

"Bills of lading, or other satisfactory proof of ownership, must be produced in all cases before goods can be delivered to any party claiming the same."

But this, it was suggested, could not be intended to apply to cases where the party who had deposited the goods demanded them back. And moreover, it was suggested that this rule was intended only to apply to cases where vessels were entered and discharged at the docks on the delivery by the master of a copy of the ship's "manifest," in which case the dock company, or their lessees, the defendants, assume the duty of correct delivery of the goods, and for their own protection give notice that they will not deliver any goods to parties claiming them except upon production of bills of lading or other proof of ownership. This, however, it was insisted was a very different case, as it was a case not of the discharge of the ship by the master at the defendants' docks, and then of a claim to the goods by some third party, but it was the case of goods entered at the docks by a party and delivered to his order. In the present instance the teas were discharged at the St. Katharine's Docks, and were afterwards, on an entry by Bradley at the Custom-house, transferred by him to the defendants' docks, the Victoria, where they were entered under the name of Bradley as owner, and the defendants, from time to time, upon his orders, made deliveries of different portions of the tea—to the amount of the 82 boxes—to various parties. On the 27th of October, 1864, the defendants received notice from the bank that the bank held the bills of lading of the whole cargo as collateral security, on an hypothecation of the cargo, against bills of exchange not yet paid, and which had been discounted by the bank, and desiring the defendants not to deliver any part of the cargo, except upon production of the bills of lading. Thereupon the defendants stopped further delivery of the teas to the order of Bradley; but the question was as to the 82 boxes already delivered, and which were formally demanded on the part of the present plaintiffs, the bank, upon production of the bills of lading which Maltby and and Co., the consigners, had endorsed to them and which Bradley had never had. The question was whether the defendants' delivery of those 82 boxes to Bradley's order, without demanding production of bills of lading, was wrongful. The defendants contended that as they received the teas from Bradley they were bound to deliver to his order at all events until notice of the title of any other party. The bank contended that the defendants should have demanded production of bills of lading as proof of Bradley's title. It was found that the question—the facts not being in dispute—was one of law, and after the statement of the case—in substance to the above effect—by the plaintiffs' counsel, the defendants' counsel not disputing it, the Lord Chief Justice suggested that the question of law should be reserved for the Court upon the facts as thus stated; and the counsel on both sides assenting to that course, he accordingly directed a formal verdict for the plaintiff for £358, subject to a special case.

Literature.

Adventures Among the Dyaks of Borneo; by FREDERICK BOYLE, F.R.G.S.: Hurst and Blackett.—This interesting volume is just the book of travels suited to the season of the sea-side. From the first page to the last it is full of incident and novelty, without sensational excitement on the one hand, or heavy science and learned disquisition on the other. What was the object of the author and his brother in visiting Borneo it is difficult to discover. Commerce and trade are but casually noticed, unless indeed an exception is made with regard to the Borneo Company, of the extent of whose operations and the hospitality of their officers we hear a great deal. If the purpose of the travellers was sport, the account given does not say much for their perseverance and spirit; nor does the island appear to afford variety and abundance of game sufficient to keep up the ardour of a Briton's love for the chase. Borneo, or at least the neighbourhood of Sarawak, to which the writer's explorations were confined, does not yield the nobler and more terrible beasts that afford employment for the hunter's rifle or spear in regions of the East not so distant from England. The "batang" roads, too, of the impenetrable jungle are such that "no Englishman can ever overcome his natural feeling of giddiness"—for they are carried as the crow flies, over river, abyss, and morass, up hill and through valley—"so far as to encounter them when any other means of reaching his destination presents itself." Communication with the interior is in fact almost wholly carried on by means of the rivers; which, it is true, abound with alligators, brutes on whom the marksman little cares to waste his powder and shot. The purpose for the journey alleged late in the volume must, we conceive, have been an afterthought, formed when in Borneo:—

The great object we had in view—that of being the first white men to traverse Borneo from Sarawak to Pontianak—was put out of the question by the failure of the Kyans, through whose territory our journey lay, to ratify peace with the Rajah. If the ambassadors of that numerous people had come to Kennowit according to agreement, and fulfilled the antique ceremonies of friendship, rendering their country moderately safe to enter, we had hoped by ascending the Upper Rejang to its source, then traversing a tract of jungle, to reach a large lake of the interior, from which descends the river of Pontianak. . . . Though this expedition was prohibited by such unfortunate circumstances, we had hitherto made an active use of our time. We had visited every fort and station of the Sarawak territory, and had probably seen more of the outward aspect of the country than any other European connected with it. We had visited both the Land and Sea Dyaks in their own homes, and had made acquaintance with some of their most celebrated chiefs. If, by ill-fortune, the main object of our voyage had failed, at least our travels had introduced us to most of the points of interest in a kingdom whose history in connection with Rajah Brooke has been the most romantic story of modern times. And, therefore, since we regarded ourselves as mere wanderers, neither scientific nor anthropological, we decided that, our curiosity being already satisfied by the experiences of four months, nothing more remained for us to do in this country than to take our passage in the *Rainbow*, and return to England.

It will be seen from the extracts that, without making extraordinary pretensions, these "Adventures" carry the reader into a part of the world with which he is but little acquainted, and thence that every circumstance attending them, however trifling, has the merit of novelty told in an easy and unfatiguing style. At times Mr. Boyle's more ambitious flights

Digitized by Google

betray him into utterances that might as well have been avoided. When we are told that the Singapore "community is naturally addicted to gin and grumbling," we detect that the love of alliteration has led the author into an unjust and rude attack upon a body of residents by whom, he admits, "the traveller is sure to be hospitably received." Many curious facts in natural history are to be gathered from this volume, some of which deserve further inquiry. Is it true that the fibres of the tuba-root, tied round the feet, are a protection against sharks in the open sea? Neither are we sure that we should be disposed to handle a scorpion carelessly aboard ship from the assertion that "it has been frequently proved in the Far East that the most venomous reptiles lose all power of injury after a few days at sea." Not the least enjoyable portions of the book are the author's pictures of native life, of which he is able to give a minute detail, having lived freely among some of the chiefs, who appear to be a set of jolly dogs greatly addicted to one of the articles mentioned in the alliterative sentence given above. Mr. Boyle speaks in very laudatory terms of the treatment and accommodation he experienced on board the steamers of the "Messageries Imperiales," and very disparagingly of those of the P. and O. Company, who should take warning and look to their laurels.

Monetary and Commercial.

There has been no change in the rate of the Bank's discount, which remains at 3 per cent. As we have continued to impress on our readers, we have not seen the last of the failures in the China trade. During the past fortnight the old firm of Scott, Bell, and Co. have been endeavouring to get sufficient assistance to carry them over their engagements, but on the 6th inst. their formal suspension was announced, with liabilities for about £800,000. In 1847 the firm suspended, but subsequently paid 20s. Mr. Peter Bell has for some time been chairman of the City Bank.

The suspension has been announced of Messrs. John T. Bell and Co., in the Bombay trade, with liabilities for £380,000. Also of C. J. Nasmyth and Co., East India trade, with liabilities for £65,000.

It has been notified that the interest and responsibility of Mr. James White and Mr. James Mackrill Smith in the firm of White and Co., Shanghai, has ceased. Also that the interest of Mr. Frederick Grant White and Mr. Herbert Smith in the London firm of Mackrill, Smith, and Co., has ceased.

An adjourned meeting of the creditors of Messrs. Buchanan, Hamilton, and Co., of Glasgow, in the East India and China trade was held on the 3rd inst., when it was decided to accept a composition of 12s. 6d. in the pound, subject to confirmation at a meeting to be held in September, by which time accounts with regard to the position of the Shanghai house are expected to be received here.

The Agra and Masterman's Bank has received authority to divide their £100 shares into £50 each, with £25 paid. By this arrangement the old and new shares form a uniform capital of 60,000 shares of £50 each with £25 paid, and as such they will in future be quoted in our share list.

A call of £5 is to be paid on the 20,000 new shares in the Bank of Hindustan, China, and Japan (Limited) by the 12th of July. The third call, making £25 per share, will become due on the 12th of October next.

The Nowgong Tea Company have declared a dividend of 10 per cent. per annum, and the Borokai 8 per cent.

The biddings for £250,000 in bills on India took place at the Bank of England. The proportions allotted were—to Calcutta, £174,100; to Madras, £3,500; and to Bombay, £66,000. The *minimum* price was, as before, 1s. 10½d. on Calcutta and Madras, and 1s. 10¾d. on Bombay. Tenders on Calcutta and Madras at and above 1s. 11⅛d., and on Bombay at and above 2s., will receive in full. These results show some increase in the demand for means of remittance to India.

The Board of Trade Returns for May, compared with those of the corresponding month of last year, show a falling off of £981,882, or about 7 per cent., in the declared value of our shipments. Compared with the corresponding month of 1863, however, they show an increase of £1,910,469, or 17 per cent. The total declared values of Exports for the month ending 31st May in the present year is £13,194,758, against £14,176,640 in 1864, and £11,281,289 in 1863, which is a decrease as compared with the former period of £981,822, but an increase over the latter of £1,910,469. For the five months of the present year the total is £60,901,576, against £64,069,060 in 1864, and £50,742,670 in 1863, showing a decline of £3,167,484 as contrasted with 1864, but an increase of no less than £10,158,906 over 1863. The reduction from last year is almost entirely caused by the fall in the price of cotton and other important staples, and not by any diminution of employment—a fact illustrated by the circumstance that, while there has been a falling off of 2½ per cent. in the value of our shipments of cotton yarns, and of 10 per cent. in those of cotton manufactures, the quantity of yarns shipped shows an increase of 11 per cent., and of manufactured goods an increase of 8 per cent. The general trade of the month presents no very striking features of alteration. Among the principal articles in which there has been an increase of exportation are coal, earthenware, and machinery, and among those which figure for a decrease are haberdashery, hardwares, linens, woollens, and metals. As respects our trade with the Far East, these returns present results as follows:—

EXPORTS TO CHINA AND HONG KONG.

	1863.	1864.	1865.
For the Month ended 31st May.			
Cotton yarn	121,520	266,400	236,800 lbs.
Cotton manufactures	6,455,026	11,513,490	9,138,293 yds.
Worsted stuffs	1,023,188	1,550,922	1,003,619 ,,
Woollen and worsted cloths	202,435	208,780	149,292 ,,
Lead	1,798	1,493	66 tons
Value for the Five Months ended 31st May.			
Cotton yarn	£37,027	£97,423	£77,425
Cotton manufactures	387,622	835,699	1,026,543
Worsted stuffs	229,807	326,397	499,583
Woollen and worsted cloths	142,660	126,208	113,829
Lead	150,838	77,567	20,404

The Cotton Manufactures exported to other ports and countries of the Far East were in quantity for the month, and in value for the five months, as follows:—

	1863.	1864.	1865.
Quantity for the Month ended 31st May.			
Ceylon	2,358,762	360,550	1,505,233 yds.
Singapore	2,639,069	1,582,764	3,261,635 ,,
Java	2,808,053	3,722,803	5,033,109 ,,
Philippine Islands	—	4,651,404	6,042,350 ,,
Value for the Five Months ended 31st May.			
Ceylon	£111,265	£184,011	£114,130
Singapore	170,682	420,378	431,443
Java	100,948	326,344	247,885
Philippine Islands	77,242	286,059	330,701

Of Cotton Yarn, the quantity forwarded to Singapore in the month of May was 37,520 lbs., against 43,008 lbs. last year, and 185,776 lbs. in 1863. To Ceylon 34,750 lbs. was sent in May, against 9,500 lbs. in 1864, and 45,000 lbs. in 1863. The value of the export to Singapore for the five months is £64,447, in 1865, against £58,126 in the year preceding, and £55,906 in 1863; to Ceylon, £6,090 in 1865, £11,030 in 1864, and £18,800 in 1863.

IMPORTS.

Of Raw Cotton the import begins to show a diminution, as regards the total from all countries—more marked if the single month is considered than if the five months are embraced:—

	1863.	1864.	1865.
Quantity for the month ended 31st May.			
British India	310,157	472,508	290,381 cwts.
China	31,750	90,046	63,677 ,,
All parts	472,865	997,244	611,653 ,,
Quantity for the Five Months ended 31st May.			
British India	962,524	1,247,875	925,891 cwts.
China	68,613	300,164	206,495 ,,
All parts	1,676,491	2,756,664	2,637,022 ,,
Value for the Four Months ended 30th April.			
British India	£4,840,520	£7,211,413	£3,363,542
China	254,064	1,806,422	683,514
All parts	9,932,891	18,472,061	13,967,469

Of Unrefined Sugar, the quantity imported from Java and the Philippine Islands during May was 17,283 cwt., all of the 4th quality. The quantity for the five months, and value for the four months, is thus represented:—

	1863.	1864.	1865.
Quantity for the Five Months ended 31st May.			
Of all qualities (cwts.)	463,329	65,075	339,307
Value for the Four Months ended 30th April.			
Of all qualities	£335,421	£42,959	£318,821

Of Hemp the quantity imported from the Philippine Islands was 14,160 cwt., and the quantity and value are reported as follows:—

	1863.	1864.	1865.
Quantity to 31st May (cwts.)	122,397	58,334	89,985
Value to 30th April	£84,536	£79,568	£103,708

Ceylon delivered to us 6,764,065 lbs. of Raw Coffee in the month of May, and the quantity and value for the relative periods is thus returned:—

	1863.	1864.	1865.
Quantity to 31st May (lbs.)	21,327,449	23,365,001	22,114,380
Value to 30th April	£567,020	£562,689	£526,591

The Declared Value of the British and Irish Produce and Manufactures Exported during the first four months of the three years to the ports and countries named is represented by the amounts set against each:—

FREIGHTS AND CHARTERS.

In outward freights we have but to confirm our last advices, and our lastest advices from the East report no improvement as to homeward charters.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. 6d. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 35s. weight or measurement. To Bankok: 60s. weight or measurement. To Ceylon: 40s. weight, 25s. measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £38 and 37s. 6d. to 40s. For Shanghai: £43 to to £44 and 47s. 6d. to 50s. For Manila: £34s. to 35s. For Batavia: 24s. to 26s. For Singapore: £24 to £25 and 25s. to 26s. For Galle: £29 and £1. 5s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty have invited tenders for the conveyance of 142 tons naval stores from the river Thames to Hong Kong, and for the conveyance of 35 tons naval stores, including a few combustibles, from the river Thames to Trincomalee.

CASUALTIES.

Advices from Nieuwe Diep, dated the 16th June, state that on the previous evening a strong smell of fire was noticed on board the Batavia (ship) v. Dolder, bound from Amsterdam for Yokohama, whilst lying in port ready for sea; she was examined by surveyors, but no cause for the same being discovered, she sailed the following day for her destination, when a smell of fire again was noticed. She consequently put back to Nieuwe Diep, and her whole cargo will be discharged in order to ascertain the cause of this smell. Later advices from Amsterdam, under date June 22, state that after discharging two lighters of her cargo, some new ropes were discovered in a smouldering burning condition. Researches are being made, but the vessel will not be able to proceed for eight days.

The Reflect, from Java for Amsterdam, which was spoken with in lat. 27 S., lon. 8 E., reported that, during a gale off Mauritius, she lost her top-gallant-masts.

TRINIDAD, June 7.—The Paria, Nicol, which arrived here from Canton, May 25, reports that on the 30th March, in lat. 19 S., lon. 86 E., she fell in with a portion of the poop or housedeck of a vessel, apparently not long in the water, and with the dead body of a man lashed to it.

MISCELLANEOUS.

NOTICE TO MARINERS.

Master Attendant's Office, Colombo,
April 1st, 1865.

In consequence of several groups of rocks having been lately discovered in Sillavatorre Bay, to the S. Westward of the village of Sillavatorre, with from 2 to 6 feet water over them, the positions of which have not been accurately fixed as yet, vessels bound to that port from the southward are recommended to stand in for Kallar, when bearing East, until the Doric bears North; they may then stand to the northward, bringing the Doric to bear N. ½-W. when abreast of Condatchey.

(Signed) JAMES DONNAN, Master Attendant.

Messrs. A. Stephen and Sons launched on the 27th ult., from their building-yard at Kelvinhaugh, a composite sailing barque, named the Fusiyama, of 630 tons, and 14 A 1 at Lloyd's. The vessel is for London owners, and is to be employed in the Japan trade.

A ship named the John Milton, of 800 tons O.M., and to class 14 years, was launched recently from the yard of Mr. Clark, at Jersey. This vessel has been built for Joshua Le Bailly, Esq., and is intended for the China and India trade.

The first vessel of the mercantile marine which has obtained the Admiralty warrant to enable her to fly the blue ensign is the Golden Fleece, of London, 2,768 tons, and 500-horse power, commanded by Lieutenant R. W. Ker, of the Royal Naval Reserve, and owned by the East India and London Shipping Company (Limited).

PORT OF AMOY.

SHIPOWNERS, AGENTS and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

Amoy, March, 1865.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists, Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty, and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S OINTMENT and PILLS.—HOPE FOR ALL.—Whatever their ailments, none need despair of being cured until they have tried these inestimable remedies. Whether the disease be internal or external, spontaneous, or the result of violence, if a cure be possible, Holloway's medicaments will effect it. The severity or duration of the malady is no bar to the successful influence exerted by these twin medicines, which cleanse, purify, and invigorate every solid and fluid in the body, and completely renovate the digestion. They render every organ of secretion healthy. These admirable antidotes to disease act immediately on the absorbent system, lungs, heart, and circulation, whereby they invariably give energy, tone, and vigour to all the natural functions of life.

Per P. and O. steamer, from Southampton, Sept. 20.—To Shanghai: Mr. Henderson. To Ceylon: Mrs. Claughton.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Dates from this port are to the 18th May. The London mail of March 10th had arrived out.

The accounts now received confirm the intelligence that the Government had arrested and conveyed to Yedo a Yakonin named Samouvai, who had boasted that he had assassinated some Europeans at Yokohama. When under examination at Yedo, however, no such admission was elicited from him, but it is surmised that he may have been one of the murderers of Lieut. Camus, or of the two English officers lately assassinated.

It is generally known, although it has not been officially notified, that the Home Governments have left their respective representatives in Japan at liberty to settle the affair of the opening of new ports as they may think best. The representatives of England, France, America and Holland have therefore entered into special negotiations with the Japanese Government, and the immediate result has been the officially notified intention of the Japanese to postpone the opening of any new port until due time, and to pay a sum of $3,000,000 as indemnity for the expenses of the Inland Sea expedition.

The following paragraph, taken from the *Japan Herald*, would seem to indicate that the turf mania, which has of late somewhat abated in Shanghai, is on the increase at Yokohama. We trust, however, that betting, or more properly speaking gambling transactions of this nature will not be carried to the same extent, or attended with such disastrous results, as they have been at the former place:—"This morning the long talked of match (for $1,000) between Mr. M.'s Chinese pony Rat, and Mr. S.'s Japanese pony Batavia, came off at a very early hour. Course, round the New Road, from the first hill above the creek to the 20th's Barracks. A fair start was made, and the two went away freely, Rat taking an early lead, and at the crest of the first hill above Mississippi Bay, he was about half-a-dozen lengths a-head; here Batavia fell, giving an easy victory to Rat. Time thirteen minutes; distance estimated at four miles and three-quarters."

The following is the market report from this place:—

EXPORTS.—TEA.—During the past fortnight we have to report an active business, and prices have been maintained. Settlements about 2,200 piculs, leaving a stock of about 2,600 to 3,000 piculs. New teas are expected to arrive early in June. Quotations are: Good common, $14.50 to 17.00; medium, $19.00 to 22.00; good medium to fine, $22.50 to 27.50; finest, $32.00 to 38.00.

COTTON.—No business to report.

SILK.—An active business has been done during the past fortnight. Settlements about 1,200 bales, making a total for the season of 14,500 bales, against 14,800 same time last year. Prices have experienced little variation. Unsold stock about 650 piculs, and further arrivals are expected to come down freely from the country. Quotations are: Ida, medium, $680 to 700; inferior, $590 to 640: Mybash and Sinchu, best parcels offering, $700 to 720; medium, $680 to 690; inferior, $650 to 670.

From Nagasaki we have dates to the 19th May, but no news of interest.

CHINA.

PEKING.

A letter from Tientsin contains the following further information regarding the most remarkable event that has lately occurred in China, the sudden disgrace of Prince Kung, and his equally sudden restoration only a week later.

The Chinese Censorship, instituted with the view of ensuring the safety of the Dynasty and the efficiency of the Government, consists of a body of forty censors, who have the power of calling for an inquiry into the conduct of any official whom they may suspect of improper conduct. So high indeed is the nature

Digitized by Google

of their office, that they are even permitted to reprove the Emperor when he does wrong. Several of these censors combined to accuse Prince Kung of embezzling money intended for the use of the army; of disrespectful conduct towards the young Emperor; and of sowing dissension between certain exalted personages. Peking was astonished to hear early in April that this notable Prince was deposed from his offices. The members of the Cabinet were told that, being now without their President, they must the more diligently transact their business. The Foreign-office was consigned to Wen Siang. Duties connected with the palace, formerly discharged by Prince Kung, were distributed among his one elder and three younger brothers. The Presidency of the Astronomical Tribunal and the Board of Physicians was declared vacant.

This startling news was conveyed to all the Provinces by the daily press—in the form of those little yellow-covered pamphlets which constitute the *Peking Gazette*. Curiosity and wonder were excited. The question was asked,—who were the unmentioned personages between whom dissension had been sown? What was the meaning of this dim allusion which the Emperor's decree said could not be further inquired into? The ready answer was, the two Empresses; the Empress-Dowager in the eastern palace, and the Empress-Mother in the western. Perhaps it is as well not to inquire too minutely into the nature of the differences that existed between these august ladies.

Days passed on, and the Court was found to be dull. The well-known figure of the young Prince did not appear at the daily morning assemblage of grandees and statesmen in the presence of the boy of eleven years old who is called Son of Heaven. The absence of his business habits and able management was palpably felt. What secret influence induced his brothers to speak for him we know not. Whether it was a self-prompted feeling, or whether it came from the offended, but now relenting ladies before alluded to, we cannot tell. Suffice it to say that they gave their names as guarantee for his good conduct, and it was at once decided to recall him to his position.

Prince Kung has been taught a lesson, has kept his riches, has been punished for his indiscretion, been disgraced before the empire, and suddenly reinstated in the possession of the reins of power. The yellow stitched pamphlets will tell the empire to its remotest parts that he is an avaricious and unscrupulous man, but one necessary to the Government, in which his position for the remaining six years of the Emperor's minority is probably more secure than it was before these events occurred.

SHANGHAI.

The dates are down to the 23rd of May, or five days later than per French mail for which we published on the 7th inst. The items of news are scant. We take from the *Friend of China* the following:—"Mr. and Madame Simonsen gave their fourth concert at the Lyceum Theatre on Wednesday evening last to a large and fashionable audience, among whom we were delighted to see a number of ladies, for, after all, what is a concert or any other attempt at enjoyment without the presence of ladies? Madame Simonsen, in the grand cavatina from Lucia de Lammermoor and Meyerbeer's complaint from the Prophet, added greatly and deservedly to the high reputation she has obtained in Shanghai. She was several times encored during the evening, replying on each occasion with one of those home ditties we all so love to hear, and she so exquisitely renders. Her rich voice was in perfect tone, clear, pure, and full; while her execution was effective and faultless. Martin Simonsen's fantasia on 'La fille du Regiment' and the Carnival of Venice, were enthusiastically received. He was loudly encored, and gave some favourite airs with variations. His perfect mastery of the violin is unquestionable, and his talents as a musician, apart from mechanism, are evidently of a very high order."

The following account of the meeting of the new Council is from the same paper:—

Present:—W. Keswick, chairman; J. Hogg, T. Hanbury, J. C. Coutts, N. Latimer, W. Probst, R. F. Gould, secretary.

The members chosen to serve on the Municipal Council for the year 1865-6, assembled at the Council-room for the transaction of general business.

Messrs. Dent, Antrobus, and Heinsen, of the late Council, were also present.

The police force was inspected, and after a short speech from the Chairman of the retiring Council, was dismissed.

1. The minutes of the last meeting read, confirmed, and signed.

2. The members of Council for 1864-5 then retired. It was moved by Mr. Councillor Hogg, and seconded by Mr. Councillor Coutts, and resolved unanimously—

3. That Mr. Councillor Keswick be elected chairman of this Council for the year 1865-6.

4. The municipal engineer was then introduced to the Board, and informed that the public works committee would confer with him respecting the management of his department.

5. The secretary read a draft of proposed standing orders.

Resolved,—That the Standing Orders just read be adopted.

6. It was moved by the Chairman, seconded and

Resolved,—That the following members of Council be appointed to serve on the finance, rate, and appeal committees for the current year, viz., Councillors Hogg and Hanbury.

Resolved,—6. That the following Members of Council be appointed to serve on the public works committee for the current year, viz., Councillors Hanbury, Probst, and Nye.

8. That the following members of Council be appointed to serve on the match committee for the current year, viz., Councillors Coutts, Latimer and Hogg.

9. It was moved by Mr. Councillor Hogg, seconded, and

Resolved,—That a communication be addressed to H.B.M.'s Consul requesting him to submit the Budget to H.E. the Toutai, and obtain his assent to it, as far as it bears upon Chinese subjects, also that his Excellency be requested to increase the sum charged in commutation of native wharfage dues, to 15,000 taels, and the Council trust that H.B.M.'s Consul will urgently second this proposal.

10. It was moved by Mr. Councillor Latimer, seconded, and

Resolved,—That the finance, rate and appeal-committee be authorised to communicate with H.B.M.'s Consul, with reference to his obtaining powers for the enforcement of municipal taxation.

Resolved,—That the Council do now adjourn.

W. KESWICK, Chairman.

The following items are from the *Recorder*:—

Rebels and bands of disorderly "braves" are causing trouble in all directions. A force of some 8,000 Imperialist troops threw over their allegiance, looted the town of Kinkon, and declared their intention of marching upon Hankow, from which it seems they were only deterred by hearing of the presence of foreign gunboats. At Kiukiang similar disturbances have taken place. A large body of braves, who have revolted on account of the non-payment of their wages, have declared their determination to join the rebel ranks, and were within fifty miles of Kiukiang. Volunteer movements were inaugurated, and Mr. White, late of the S.V.C., was elected Captain, Mr. Paterson Lieutenant. The unsettled aspect of affairs has called public attention to the question of the withdrawal of the military forces, and a general feeling exists against such a measure.

The subject of the P. and O. steamers' moorings has again called forth public attention, and the notices which appeared in the papers are such as show, in a manner not to be mistaken, the general feeling of the public that they ought to have the advantage of being able to go on board the mail steamers from a wharf instead of having to go down to them in sampans.

At the first meeting of the new Municipal Council, they appointed separate committees to attend to the different departments. These consist of the finance, rate and appeal committee, the public works committee and the watch committee. This is a decidedly desirable innovation and it is to be hoped that it will conduce to a more successful administration of municipal matters than we have yet been able to record.

The election of Sir Harry Parkes (says the *Recorder*) as Commandant of the Shanghai Volunteers, will, we doubt not, meet with the unanimous approval of the community. It is essential that the gentleman occupying that post should be an influential and popular man; and above all that he should be one who will not spare himself trouble in the discharge of the duties which fall to him. All these qualifications are pre-eminently combined in Sir Harry Parkes. His personal influence and popularity do not make him more conspicuous than the well-known energy with which he has always devoted himself to the public service and to the furtherance of all objects likely to be beneficial to Shanghai. Amidst his onerous duties, judicial and diplomatic, while deciding lawsuits and writing despatches, Sir Harry has still found time to preside over meetings of the Asiatic Society; to take the chair at volunteer meetings; and in fact to interest himself in every movement of importance, which has taken place.

His co-operation as commandant of the Volunteer Corps will be in every way conducive to the success of the movement. What is wanted in public men in Shanghai is not more talent (though in that respect all who know Sir Harry will think him well qualified for the post alluded to), but more energy. Most men are here only for a short time. Their utmost exertions for the public good are likely to be rewarded only by a transitory popularity, and hence has resulted a spiri of indifference as to public affairs which has

Digitized by Google

been at the bottom of nine failures out of ten in matters of this description.

These considerations lead us to congratulate Shanghai upon the acquisition of a Commandant like Sir Harry Parkes. He has a high reputation to maintain. The successful conduct of volunteering matters will be only another, added to the many laurels which he has already won. His success, and the reward of that success—the high opinion of his countrymen and the approval of his Government—will be in proportion to the degree in which he furthers the general and permanent good of Shanghai.

The *Recorder* announces that the business premises, stock, machinery, &c., of Messrs. Nicolson and Boyd, at Pootung, were brought to the hammer by Messrs. Wainwright and Co. Owing, we presume, to the hardness of the times and consequent scarcity of speculators, the first lot, consisting of the yard and buildings, was knocked down to Mr. Boyd for 13,000 tls., a trifle over half the original cost of the place. For the machinery there was a slight competition, the greater portion of it, together with the bulk of the stock being purchased by Mr. Boyd; and we are glad to perceive that the firm again commences business, under its old style of Nicolson and Boyd, although the interest of the late Mr. Nicolson has, of course, ceased. His place will, we doubt not, be ably filled by the new partner, Mr. Adam, and we cordially wish the new firm success in their undertaking, for it would have been sad to have witnessed the breaking up of an establishment which reflects such credit on the energy and skill of foreigners in this settlement, and which is of such utility to the mercantile marine visiting this port.

The following is the market report from this place: —

EXPORTS.—TEA.—Black: During the past fortnight we have no business to report, and quotations cannot therefore be given. Reports speak favourably of the prospects of the new season's crop, but as yet no authentic information has been received. The incursions of the disorderly Imperial troops into the tea districts have not led to any apprehension of injury to the new crop.—Green: We have again to report a large business, chiefly for America, with an advance of 2 tls. for finer descriptions, but lower grades have shown a tendency to decline, owing to the larger quantity upon the market, and the anxiety of the teamen to realise before leaving for the tea districts.

KIUKIANG.—Dates to 17th inst., one chop of 200 pkgs. Green settled at tls. 18.5.0. Rumoured approach of rebels causing alarm among the teamen, they continue to hasten forward their teas, and stocks comprise only about 2,000 pkgs.

SILK.—We have no transactions to report during the past fortnight, and quotations therefore cannot be given. The reports from the interior respecting the new crop are various, but seem to concur in the opinion that we are likely to have a fair supply, and that under any circumstances, the yield will be much larger than last year's. It is to be feared that the usual anxiety on the part of foreigners to secure first parcels will prevent the chance of the market opening at such low prices as would otherwise be accepted by the silkmen; and tls. 420 to 440 for No. 3 Tsatlee, is spoken of:—

Settlements since 4th May to date	China Silk, Nil.	
	Japan „ 1,200 bales.	
Total settlements from 1st June, 1864, to 20th May, 1865	40,100 bales.	
Do. 1863, to 20th do. 1864	38,600 „	
Export for the season to date	38,957 bales.	
Do. from 1st June to 20th May, 1864	38,029 „	
Unsold stock	Nil.	
Do. last year	1,000 bales.	

COTTON.—The transactions in this staple have been almost nil. Prices are nominally tls. 14.50 to 15 for best description.

FREIGHT.—To London, £2. 15s. to £3 per ton of 50 ft. New York, £2. 15s. per ton of 40 feet.

NINGPO.

The following letter has been published at Shanghai:—

(To the Editor of the *Friend of China*.)

SIR,—The Campo, Ningpo, was disturbed yesterday from its usual quiet, by the appearance of a body of Cook's Disciplined Force, under the command of Lieutenant, or Captain, Watson, also a few Imperial soldiers under a white button Mandarin, and nearly the whole of the police force, all in fighting costume. It appears that their destination was a house or houses inhabited by Cantonese, supposed to be gamblers; and although the said Cantonese have lived in the houses over two years, and during that time conducted themselves in a quiet and peaceable manner, the way in which they were surrounded, dragged out by the hair of their heads, and made to kneel down before this imp of a Mandarin (those refusing to do so being beaten about the knees and body by the muskets and knives of these European drilled and impish Mandarin soldiers) is beyond description. The houses were completely gutted and looted, upwards of $4,000 in gold, silver clothes, &c., was taken away not by the Mandarin soldiers, but by that respectable body of disciplineds, called Cook's, under the very eyes of their commanding officer, the gallant Lieutenant or Captain Watson, who, strange to say, did not appear to trouble himself, or attempt to put a stop to such atrocious proceedings, though, upon marching away he said he would loot his men when he got them in the city, perhaps thinking that second plunder is better than first.

It is also rumoured that several of the gentlemen wearing the letters N. P. on the collars of their coats, had their pockets so full of dollars that they would not hold any more. (Nice protectors we have in Ningpo.) If such scenes as these are allowed to be carried on in the midst of a foreign settlement, and by a body of should be well-disciplined men, under the command of a European, what next may we look for?—Yours, &c.,

Ningpo, May 18, 1865. JUSTICE.

HONG KONG.

The local Bank Returns, as published in the *Hong Kong Gazette*, exhibit the following result:—

	Average Notes in Circulation.	Specie in Reserve.
Oriental Bank	$873,115 ..	.. $300,000
Mercantile Bank	757,855 ..	.. 300,000
Chartered Bank	604,948 ..	.. 250,000
Agra and United States Bank	609,517 ..	.. 250,000
Totals	$2,845,435	$1,100,000

The following glowing account of the progress of the new settlement at Kowloong is from the columns of the *Evening Mail*:—

"The works at Kowloong are rapidly progressing. The rough stone foundations of the sea wall on the west side are showing here and there above the water. The hills diminish daily in height and extent, and the earth taken from them goes far to fill in the space enclosed between their foot and the line of the Praya. Two main lines of road are already marked out and partly finished—so much so that planting has commenced and the appearance of a number of healthy-looking stumps at the sides of the roads give promise, at no very distant period, of shady and pleasant avenues. One of these roads runs from the most southern point of the Peninsula, along the west side of and close under the hills on which it is intended to erect the barracks. The second runs at the other side of these hills, and as nearly as possible through the centre of the territory. A third line of road will run parallel to the other two along the sea wall to the west, and from the Praya on that side. The lots disposed of some time since at Kowloong lie along those lines of road. Owners of lots would appear to be in no particular hurry to comply with the terms of their leases by filling in and building on their allotments. If we are not much mistaken, they were bound to complete the filling in within six months from the date of sale—a period which terminated some time in March last. They cannot, however, be blamed for not having as yet complied with the conditions of sale, as the colonial authorities, although they set about it energetically and at once, have not got through their share of the work—the construction of the sea wall and the making of roads—and until these are finished, it is neither possible nor advisable for lot holders to proceed with their operations. We were of opinion, at the time, that the six months granted was not sufficient, and the result shows that we were right. The day will come when the picture we have here drawn with feeble pen will be realised. Kowloong must, with common energy and prudence on the part of the merchants of Hong Kong, become the southern depot of the railway system of China. Wharves, godowns, and offices will congregate on the south and west sides of the Peninsula, where alone a safe anchorage and sufficient depth of water can be obtained. The eastern slopes and the shores of the many bays that indent the coast on that side will afford 'ample space and verge enough' for palaces, gardens, and villas; and if the Government and the community are wise enough and provident enough, the Chinese town will still nestle under and around the Peak and its sister hills."

From the same journal we extract the following:—

"We notice that the steamer *White Cloud* has commenced to ply upon the Macao line in opposition to our old friend the *Feiseen*. We are not astonished at the *White Cloud's* proprietors invading the ground so long and so honourably held by the *Feiseen*, although we believe they *did* resent the invasion of the Canton waters by the *Kinshan's* owners. What the public want is a good boat to go by, quite irrespective of flag or ownership. We admire the readiness shown by Messrs. Russell and Co. to offer the best accommodation to those who are willing to pay for it, and have no doubt that it will reap its reward. At the same time, we cannot see well how both steamers can pay. If one be got to pay, the other must go the wall. The choice of a steamer to go to Macao by is not altogether guided by old associations. Many of us feel, or fancy we feel, a preference for the *Feiseen*, on account of the deserved popularity of the captain, but that will never weigh for a moment against the superior cookery and general style of an American steamer. In saying this much, we are not speaking in any way sarcastically of those who travel to Macao or Canton by American

Digitized by Google

boats. Nine out of every ten passengers go to those places on excursions of pleasure, and a not unimportant part of that pleasure is what may be called the hotel life afloat. These river boats are floating hotels, and we select that which is most temptingly provided. It seems to be impossible for an Englishman to put down dinner or luncheon in a manner equal to that which a Yankee can achieve. We are almost prepared to swear that the thing cannot be done. Who among us has not sat down to a pleasant meal on board of a river steamer flying the stars and stripes? Did we not feel happy with the snowy table-cover before us and the exquisitely clean knives? Englishmen cannot clean knives, nor can they produce pure white table-cloths. If these superhuman, or rather super-English feats could be achieved on board of the *Feiseen*, then our favourite old boat would be our favourite boat still. Some of us may have a weakness for sailing under the British flag, but most people have a greater weakness for good meals."

A daring attempt had been made to capture the French barque *Louis*, which left Whampoa on the 3rd April, bound for Havana, with 290 Chinese coolies, and about $40,000 in specie. Tempted by the latter, the passengers, on the 10th April, rose and endeavoured to capture the vessel, but the energy and daring of the crew prevented their obtaining their end. The mutineers were overpowered, secured under hatches and a guard kept carefully over them, nine men being placed in irons. Three of the crew were rather severely wounded in the fray, and one of the ringleaders jumped overboard and was drowned. On the 12th April the vessel met the Bremen barque *Wartburg*, from Borneo, bound to Hong Kong, and a signal of distress being hoisted, assistance was immediately rendered, and the vessels kept in company until their arrival at that port.

The following changes have been officially noted in the Colonial Service:—The Hon. Chief Justice Adams having obtained six months' leave of absence on medical certificate, the Hon. Mr. H. J. Ball is to act in his stead; while Mr. Julian Pauncefote is to be acting Attorney-General until further notice. Mr. Cecil Smith has been confirmed in the office of Registrar-General; and the Rev. John Wilson will act as Colonial Chaplain during the year's absence of the Rev. Dr. Irwin.

SIAM.

The 28th April was the festival of agriculture. His Majesty was escorted with the usual procession to the Pavilion between the First and Second King's Palaces, and the customary ceremonies at that place were performed. The field for ploughing and for feeding the ox for the purpose of divining what products of the earth would be abundant this year came off on the new canal. This latter ceremony is conducted in this wise. A variety of edibles, such as paddy, beans, plantains, potatoes, &c., are arranged on the ground and a hungry ox let loose. Whichever article he eats first will not be abundant that year. We should fancy a hungry ox would not be very fastidious in his choice, and that the article that struck his eye first would be the likely one he would partake of.

The sugar mills at Laconchasee have stopped work for this season. The native mills have turned out but about 25,000 piculs this year against 90,000 piculs last year. The steam sugar mill has also ceased grinding. It is said to have turned out about 7,000 piculs, the grain of the sugar being of fine quality, though not so white as some of that produced by the native mills.

Great complaints are made of petty piracies along the coasts on the Gulf. The pirates are known to be chiefly Chinese fishermen. The unsuspecting traders either anchor or make their boats fast for the night. Their small crews sleep unconscious of danger, being fatigued with the toils of the day. About twelve o'clock at night, the crews of the fishing boats, taking advantage of the heavy sleep of the traders, board their boats and demand the property. Having got this, they haste away. The traders then make their depositions to the Governor of the Province, or the authorities of the place, who, of course, are unable to catch the pirates, and the traders return home glad to have escaped with their lives. It is said that these piracies are chiefly committed by Hainan Chinamen. "Hainan junks (observes the *Siam Times*) have a very bad reputation all along the coast. Something should be done to protect peaceful traders from robbery and violence. Out of the fleet of gunboats at present in Bangkok, surely some could be spared for this duty. This coast is under the special jurisdiction of the Prime Minister, and he has the means of breaking up these piracies. In case he fails to do so immediately he should be held accountable. A man who has the power and revenue he has at command, ought not to be so careless and negligent in the affairs of the country. We are of opinion that a little overhauling and exposure would do both the Prime Minister and the country much good."

The new dry dock under construction by Captain Bush, harbour-master, is making excellent progress, the dry season having been unusually favourable to its construction. The twin screw propeller brought down from Hong Kong by Capt. Shannon, has been purchased by Poh-Chin-Soo, for $4,500, and will be used both for pleasure and towing, for which she is very well adapted. The Siamese barque *Orestes* belonging to H.R.H. Krom Luang Wongsa, and which has been under repairs for some time past, has just been taken out of dock. This is the barque so long commanded by Capt. Cummings, and was the first Siamese vessel which visited Europe. She has been overhauled and re-coppered, and will soon be ready to resume her trading voyages. The Siamese vessels *Ocean Queen*, *St. George*, and *Rapid* have also undergone repairs. The owner of the latter had a company of Buddhist priests on board repeating prayers, and going through ceremonies preparatory for a voyage. Siamese shipowners have very generally improved the dull times to overhaul and repair their vessels.

The American schooner *Eclipse* sailed from Bangkok on the 10th May with a cargo of teak timber for San Francisco. This is the second cargo from hence for California. Teak is very scarce and dear this season on account of the low state of streams up country, and consequent difficulty in rafting it down.

In the absence of the usual rice trade, many of the natives have turned their attention to timber. Siamese rose-wood and a species of red wood is very abundant, and has been brought to market in large quantities. The Chinese, who are the principal purchasers, made some beautiful furniture out of it. Specimens of these timbers have been shipped to Europe, but European mechanics complain of their great weight and hardness, and refuse to purchase. The Siamese make very little use of any timber except teak. The best timber in Siam for enduring all climates, salt and fresh water, is mitakrao. This kind of timber is quite abundant on the eastern coast of the Gulf. It is rarely if ever used except for building religious edifices. Occasionally a little is used for the frame and planking of boats, but the superstitions of the people are so strong against employing it for any purpose except for "Wats," that they use other varieties of timber not half so good. It is rather heavier than the best of teak, and for the purpose of building war vessels it has no equal. The tree grows very large and tall, and timber of the largest size can be procured of it.

The Siamese ship *Siamese Crown* struck and dragged over a reef near Pulo Panjang on her voyage from China to Bangkok. This reef is not marked on any chart. At the time the vessel struck, Peak Island bore north and White Rock S.W. by W. The ship was drawing fifteen feet water. After crossing over the reef, soundings were got at thirty fathoms. It being in the night time the captain did not stop to examine it.

JAVA.

BATAVIA.

The firms A. van Hoboken and Sons, of Rotterdam; Rynst, and Vinju, at Batavia; and Anemast and Co., at Sourabaya, have forwarded a petition to the Netherlands India Government, proposing the establishment of a steam line between Batavia and the East coast of Australia.

PALEMBANG.

The rice plant promises a rich harvest. The price is from 8 florins to 10 florins per picul. The import of cotton from the interior still continues; but a small quantity was sold, so that the stock is abundant.

CELEBES.

From the first crop of rice no great produce was expected; but scarcity was not feared, as the second crop, and also the reaping of the *jagong*, were expected to be very favourable.

Pirates had been seen at several places on the coast, but care for protection had been taken.

BALI-BOLELENG.

The paddy promised a good harvest; also the coffee, the gathering of which had commenced. White rice 8f. per picul; tobacco, 25f.; coffee 33f.

Digitized by Google

COCHIN-CHINA.

Admiral Roze, learning that many pirate junks were in the neighbourhood of Phuoc-hai, and threatening that town, sent the armed steamer *La Fusee* to give chase. The commander, Captain Brice, directed his course to the Bay of Phantit and there found a number of junks strongly armed. A picked body of marines, under Mr. Robertjot, was ordered to board them, a feat that was accomplished after a mere show of resistance; and this done, their cannon were thrown into the sea. A lighted piece of charcoal was subsequently thrown near the spot where the marines were engaged in destroying the powder of the first junk boarded, and simultaneously they were attacked with spears. Mr. Robertjot and a sailor were slightly wounded by the explosion. A gallant charge on the pirates caused them to fall back, and all presently threw themselves into the sea. Three junks were captured.

The armed schooner *La Mitraille*, whilst engaged in the survey of the approaches to Cape Padaran, came upon a canoe containing the captain of the British ship *Ruby*, his daughter, and a portion of his goods. The *Ruby* had been pursued by pirates for thirty or forty miles off Cape Varella, and thus far distanced her pursuers, but a calm coming on, the pirates prepared to board the vessel to the number of 100 or 150. The captain of the *Ruby*, favoured by darkness, launched two canoes, and as they rowed away saw the pirates climb the sides of the vessel, and heard their cries of joy as they fell on their rich prey. The party had been on the sea without food and without water when fallen in with by the *Mitraille*. The second canoe was not in sight, but search was being made for it. As the *Mitraille* rounded Cape St. James the captain of the *Ruby* was surprised to discover his vessel lying at anchor. After relieving the *Ruby* of her rich cargo of tea, the pirates had abandoned the vessel, which was subsequently fallen in with by a Hamburg ship.

STRAITS OF MALACCA.

SINGAPORE.

Dates hence are to the 6th June. The London mail of the 26th April arrived out on the 30th May.

H.M.'s *Euryalus*, the flag-ship of Admiral Sir L. A. Kuper, left for England on the 27th May.

The *Government Gazette* notifies that Mr. F. Vonder Heyde ceased to have charge of the Hamburgh and Lubeck Consulate at Singapore, from the 11th May.

The death-blow has been struck at the Kling Hoeys by Colonel Cavanagh's determination to put a stop to all processions at the Mohorum. Without them these societies must cease to exist, for their sole object is the celebration of that festival with as much pomp and splendour as possible. For this purpose subscriptions are collected by the head men from the members, and it is said vast sums of money are spent on the occasion. The Governor has interfered on account of the disturbances that occurred last year, and the *Free Press* trusts he will on the same grounds be induced to suppress the processions of all the Chinese Hoeys that have been guilty of creating disturbances. There are two Kling secret societies in Singapore, called the White and Red Flag Kongsis or Hoeys. The first was established shortly after the institution of the Ghi Hin or Triad Society here, and is said to be a branch of the same. The second is of later date, and is supposed to be identical with the Chinese Kongsi called Ghi Hok, a rival of the Ghi Hin. The parent clubs are always at variance, and although the Mohamedan members of each hold exactly the same religious tenets, they, like the Chinese, are always at war. The processions at the Mohorum are considered heretical by a large section of the Mohamedan community in the Straits, who keep aloof and despise those who join in them. Nearly all the Malays are of the orthodox party. In a political point of view, therefore, Colonal Cavanagh will have a strong body of Mohamedans on his side.

PENANG.

Remarking on the defensive staff of both services that would probably be retained for the defence of the settlement, after the transfer, the *Gazette* observes:—

"While urging economy on the Straits Government, we would protest most strongly against the retention of the very expensive and utterly useless steam vessels, retained for the alleged purpose of suppression of piracy. Suppression of piracy where, we would like to ask? The Governor's annual report for last year mentions the number of cases of piracy brought before the Supreme Courts of Singapore, Penang, and Malacca, and they were these:—

PENANG.—There has been but one case of alleged piracy reported. Three Chinese fishermen stated that they had been attacked off Quallah Pry, by three Malay boats, with reference to the number of boats continually passing the mouth of that river, much credence is not, however, given to their statement.

MALACCA.—The only case of piracy was dismissed by the Grand Jury, it appearing that the prisoner only seized some Durians out of a boat passing down the river, as payment of a debt that was due to him by the owner.

SINGAPORE.—There was only one case of piracy, in which the alleged perpetrators were brought to trial, no conviction was however obtained. Now this is but a repetition of what has occurred for several years, and for this result we are to continue to pay a large sum annually for the maintenance of the *Pluto*, *Mohr* and *Tonze*. Vessels whether sailing ships or steamers, for the suppression of piracy, were no doubt necessary in former days, and indeed did good service in that way, but where do we see acts of piracy now-a-days in the Straits, necessitating the keeping up these steamers whose speed could not possibly enable them to overtake an ordinary well manned Malay sampan? We cannot for a moment think that these vessels are really kept for such a purpose, but simply that it is convenient to retain in the reports the name of the service they were once required to perform. Now, however, when they are no longer of use in that way, they had much better be at once struck off the lists of establishments for the Straits and their place supplied by one really good fast steamer, with a light draught of water and moderate size, and with passenger accommodation suited for the requirements of the Straits Government.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

DAWSON—On the 4th July, at Ponsonby Hall, Whitehaven, the wife of Capt. R. Pudsey Dawson, of a son.

DUFRESNE.—On the 27th May last, at Java, the wife of G. Dufresne, Esq., of a son.

D'ALMEIDA—On the 5th July, at The Grange, West Molesey, Surrey, the wife of William Barrington D'Almeida, Esq., of a son.

GARDNER—On the 14th May, at Hong Kong, the wife of Mr. William Gardner, Hamburg Tavern, Queen's-road, West, of a son.

LEWIN—On the 28th June, at Tynwald Lodge, Springfield-road, St. John's-wood, the wife of D. Duncan Lewin, Esq., formerly of China, of twin daughters.

MUIRHEAD—On the 8th July, at Grove-lodge, Colney Hatch-park, the wife of D Muirhead, Esq., of Shanghai, of a son.

VICKERS—On the 30th June, the wife of Cuthbert Vickers, Esq., of Farnborough, Kent of a son.

WADMAN—On the 27th June, at Slaugham Park, Sussex, the wife of E. Wadman, Esq., of a daughter.

WEATHERHEAD—On the 23rd June, at Shakespeare Villas, Tottenham, the wife of Mr. Alfred Weatherhead (late of Hong Kong), of a son.

MARRIAGES.

HEWETT—STEAINS.—On the 29th June, at St. Bartholomew's, Sydenham, by the Rev. W. H. Harke, cousin of the bride, assisted by the Rev. Hy. Stevens, William Hewett, eldest son of William Hewett, of Sydenham-hill, Kent, to Sarah Ann, second daughter of Arthur Steains, of Forest-hill, Kent. No cards.

STUART-WORTLEY—VERSCHOYLE.—On the 29th June, at St. Peter's Church, Pimlico, by the Rev. F. Norman, Archibald Henry Plantagenet Stuart-Wortley, eldest and only surviving son of the late Hon. Charles and Lady Emmeline Stuart-Wortley, to Augusta, youngest daughter of Robert Verschoyle, Esq.

DEATH.

HAPPER—On the 20th of May, at Hong Kong, Willie Daizelle, the youngest child of Rev. and Mrs. A. P. Happer, of Canton.

CHINA IMPORTS.

COTTON YARN.—A further decline, without in any way leading to inquiry, has been submitted to by importers, and the transactions to be noted since the date of last circular are confined to the settlement of 165 bales. Grey Shirtings: Show a decline in value, as compared with the prices current during the early part of the month, equal to 15 cents per piece. A moderate amount of inquiry has however been manifested for these fabrics, and settlements are estimated at 15,970 pieces. White Shirtings: The quotations for these goods have shared in the decline noticed for unbleached cloths, and the purchases reported during the fortnight do not exceed 2,300 pieces. Sales of 200 pieces of 64 reed are reported from Foochow at $5.40 per piece. T-Cloths: The settlements reported during the past fortnight have been almost entirely confined to a sale of 5,000 pieces made by one firm at a reduction upon the quotations previously current equal to 10 cents per piece. Settlements in Canton of 2,000 pieces are also reported. American Drills and Jeans: There is not any of these manufactures in stock. White Spotted Shirtings, Dyed do., Brocades, White and Coloured: Remain unchanged in value, and meet but with trifling inquiry; the sales of the past fortnight consist of 250 pieces of the first named and 750 pieces of Dyed Spotted Shirtings. Damasks: Meet with no inquiry. Chintzes: Have been in moderate request, and sales of 1,890 pieces are reported. Handkerchiefs: Have found buyers to the extent of 2,000 dozen, at about the quotations current under date of last report.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies' and Habit Cloths: These goods have met with a moderate amount of inquiry during the past fortnight, and the sales of Spanish Stripes (which remain at the quotations previously current) are estimated to amount to 700 pieces. 132 pieces of Medium Cloths have also found buyers. Long Ells: In the absence of almost any business in these goods, the advance of 20 cents quoted in the value of Assorted Colours must be deemed almost nominal. Sales are put at 100 pieces. Camlets: Remain unchanged in value, with sales reported since the date of last Circular amounting to about 680 pieces. Lastings: The transactions reported to have taken place in these fabrics amount to 460 pieces.

METALS.—Iron, flat, &c.: The value of Nail Rod Iron shows a decline as compared with the prices current under date of last report equal to about 15 cents per picul, and the settlements effected during the past fortnight are reported at 2,680 piculs of Nail Rod, 240 piculs of Square and Flat Bar, 340 piculs of Hoop and 400 piculs of Wire. Lead; Re-

Digitized by Google

mains as previously quoted, with sales of 375 piculs in this colony and 600 piculs in Canton. Tin: 1,500 piculs have found buyers. Tin-Plates: The sales of the fortnight are estimated at 1,150 boxes. Steel: There are not any sales to report.

EXCHANGES ON LONDON.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—July 16, at Falmouth from Akyab, Ironsides; at Liverpool from Shanghai, John Nicholson and Queensbury.

DEPARTURES.—July 13, from Sunderland for Shanghai, Prince Alfred; 15, from London for Shanghai, Dilkhoosh.

SPOKEN.—Prince Alfred (barq.), London to Shanghai, May 30, 5 S., The Gloucestershire (arrived at Manila) spoke the British ship Peep o'Day bound to Shanghai, in lat. 22 S., long. 110 E.; 179 days out.

LAID ON.—At London: For Hong Kong and Canton, Dilpussund.

NEWS has been received from Sydney of the death of Sir F. Pottinger, son of Sir Henry Pottinger, the well-known negociator of the China Treaty of 1841.

THE CHINA DINNER.

This event (the first of an annual meeting) came off on Saturday evening, the 15th inst., when a company of about forty, comprising army and navy officers, merchants, and members of the Civil Service, sat down shortly after eight. We believe the idea originated with Major Brine, Royal Engineers, who has lately returned from Hong Kong, and well known as the Commandant of the Hong Kong Volunteer force. Mr. J. J. Mackenzie, formerly a partner in Messrs. Dent and Co., co-operated with the Major as joint-secretary. From the remarks made by Major Brine, it was evident that he intended to promote the interest now attaching to the "China Challenge Cup," and which is being competed for by the representatives of thirty-two counties. It is hoped this cup will be an annual presentation. Several names were down on the list in addition to those recorded. The gentlemen present comprised:—

Admiral Sir Henry Keppel (in the Chair).	MESSRS.:—
Bishop Smith.	Warden.
Sir John Davis.	Brown (of Amoy).
Admiral Sir James Scott.	Luce.
Admiral Sir Lewis Jones.	Cleverly.
Capt. Roderick Dew.	Bridges.
Capt. De Casembroot (Dutch steamer Medusa).	Langley.
Colonel Sargent.	Adam Scott.
Colonel Gordon.	Harry Smith.
Major Brine.	Arthur Smith.
Capt. Byrom.	Silverlock.
Capt. Dent.	Montgomery Martin.
MESSRS.:—	Charles Compton.
Robert Jardine, M.P.	Spencer Compton.
Edward Pereira.	Brown (of Shanghai).
Robertson, M.P.	M'Andrew.
Stiff.	Ashton.
J. J. Mackenzie.	Maturin, D.C.G.
Donald Mackenzie.	Augier.
Dohmen (Legation in Japan).	Wright.
Stuart (Chief Manager Oriental Bank).	Blenkin.
Holliday.	Webb.

On the removal of the cloth, Admiral Keppel rose and was heartily greeted. He said:—

My Lord Bishop and Gentlemen,—It is with unfeigned pleasure that I meet my countrymen now present, representing, as you do, a quarter of the globe in which I have spent the happiest time of my life. The hospitality of the China merchants is not equalled in any other country. This alone is no trifling recommendation, but they are a set of men who seem thoroughly suited to amalgamate with naval officers. I often wish I could be First Lord of the Admiralty for a few minutes to make out my appointments to the China command. (Hear, hear.) I now propose the health of Her Gracious Majesty the Queen.

This toast being drunk, the health of the Prince and Princess of Wales followed; and the next toast proposed was the Church, coupled with the health of Bishop Smith, who in responding said:—

This occasion is one which all of us welcome, as reviving past associations, and as more particularly connected with the Volunteer display that has taken place at Wimbledon. The volunteer spirit that has been developed in China among foreign residents—the genuine character of which is so well proved in the gift that has been forwarded—is calculated to exert a happy and healthy influence, not only on the tone of the foreign community abroad, but also on the China mind. That mind—indeed, the whole organisation of China—demands greater stability. I recognise nothing so essential to stability as Christian truth; and, notwithstanding the feebleness of coherence to which I have referred, I feel assured that the moral and Christian influence of this country is beginning to have its effect on the Chinese. As a result, with their attention thus drawn to the true elements of power, they will have an increased sense of their weakness, and proceed, under the directive influence of our example, our guidance, and our teaching, to rectify their deficiencies. I trust yet to see generated that internal prosperity—the product of still greater benefits—of which China stands so much in need. The germ of progress may be discerned even in the present state of comparative disorganisation. The commercial spirit of England must be allowed to have contributed largely to this result. (Cheers.) The future page of history will, I trust, record a progress yet more conspicuous, and carried out under happier auspices; a progress, so far as China is concerned, that will be first manifested in a modification of those modes of thought and action that at present give such a dubious working to her institutions. (Hear, hear.)

The CHAIRMAN then proposed, "The Army, Navy, and Volunteers," coupled with the names of Sir James Scott, Colonel Sargent, and Major Brine. All these are, permit me to say, animated by the same patriotic ardour, and are equally ready, when occasion offers, to vindicate the interests and to defend the honour of the empire. (Cheers.) The services of the army and navy in China are matters of history, and worthy of all praise and encouragement is that Volunteer movement which has developed an amount of patriotism and martial ardour which will not fail of any requirement placed upon it. (Great cheering.)

Sir JAMES SCOTT: Mr. Chairman and gentlemen, on behalf of the navy as representing that portion serving in the China seas, permit me most cordially to thank you for the honour you have done it. If it has proved of signal service, that service has had the fortune to have been most fully appreciated. (Cheers.) For my own part, it has ever been my desire to serve the national interest in the way most beneficial and honourable. (Cheers.)

Colonel J. N. SARGENT, C.B.: Gentlemen, I am happy to respond for the army and myself. I can speak most kindly of the China community during my various terms of service in that country. I can tell you that nothing is so encouraging to us as the approval and good wishes of our countrymen.

Major BRINE: I could have wished that this toast could have been more efficiently represented. On behalf, however, of the Volunteers, permit me to return you our best thanks. The season of our meeting is unfortunately a late one; but it is to be hoped the dinner will be an annual one, and no doubt, at a more propitious season, will be still more largely attended. As to the prize offered by the Volunteers in China—I speak here for the Volunteers, and in a volunteer capacity, and I do not think I can point too strongly—you will remember that but for the money that has been added to the cup there would have been no such competition as that which has taken place; and speaking for the Volunteers, and in a volunteer capacity, I trust you will see the desirability—as I am sure you have the capacity—of permitting yourself to be copiously bled (laughter), by making a handsome addition to the fund. Looking to the great wealth represented by Anglo-Chinese residents at home, I do not think I can put the point too strongly—(Laughter, and continued cheering.) Five hundred guineas is a sum that would demand extreme thankfulness. I don't like going back to China without conveying a record of a worthy liberality on your part. Thirty-two counties have competed for the cup, and I trust the next contest will witness all England in the list. We Volunteers value very highly your support, and it is in your power to render us most essential service.—(Cheers.)

The CHAIRMAN: Gentlemen, the next toast to which you will be pleased to fill your glasses is the China Civil Service, represented on this occasion by no less distinguished an individual than Sir John Davis. I need say nothing as to those distinguished services which enhanced the political *prestige* of England, and so largely tended to promote her interests in China.

Sir JOHN DAVIS, who looked remarkably well for his years, and who was received with every demonstration of enthusiasm, spoke as follows Mr. Chairman and gentlemen, on behalf of the China Civil Service I most cordially thank you for the compliment you have paid to its efficiency, the character of this assembly, composed as it is of residents in China, giving a peculiar value and emphasis to such a recognition. To meet thus, gentlemen, fellow-residents in China, in a friendly interchange of sentiments and recollections, is truly grateful to my feelings. Indeed, there is nothing better to exercise a revivifying influence on old age—(cheers)—recalling as it does earlier associations. The weather itself is well fitted to recal China to our minds, but I trust, like the sheep who "left their tails behind them," we will forget the depressing influence from this cause in recalling former associations, which give a peculiar value and emphasis to such a recognition. Sir, the time in which I was a resident in China was not one in which ambassadors and plenipotentiaries were backed up by large military and naval forces. They had to make their way as best they might, among multiplying obstructions—against a policy that generally conceding our claims, endeavoured to defeat them in detail. It was a period, moreover, of great disorganisation. Merchants had to complain of the stagnation of trade, owing to the absence of available means for supplying the Chinese with the goods they were supposed so ardently to desire. Foreigners were treated by officials with insufferable arrogance, and although vexatious hindrances in the way of the development of trade have not disappeared, these are as nothing to those which then existed, our commercial and political relations being alike unsatisfactory. Although the export trade to China has not increased in such a degree as the number and known commercial disposition of the people would lead us to expect, we have secured, through a conciliatory but firm policy, numerous facilities for trade; and it is to be hoped that the advantages in time to come will be proportionately greater. I conceive nothing more flattering than the prospects opened up to us in China and Japan, notwithstanding that the obstacles that present themselves to a more extended trade have been but partially overcome. And with this state of things I cannot but associate the name of Sir Rutherford Alcock, whose discriminating and enlightened course of action has proved of such essential service in the advancement of our interests. European nations were strongly averse to interfere in the affairs of China, but a resort to arms, aided by the efforts of diplomacy, have in the end been found necessary.

Digitized by Google

The monarchical despotism of China, the feudal oligarchy of Japan were found hard to overcome in order to secure the establishment of our treaties. Our interest and our policy, however, is to strengthen as much as possible the internal Government. Neither accepting any overtures from the Taipings, nor yielding ground before the assassinators of Japan. Japan is a nation of Booths, and might appropriately be termed Boothenia Felix. (Laughter.) It is the wish of this Government, that a central power should be promoted and encouraged in both countries; and this accordingly has been realised. To what shall we ascribe our extraordinary success? Formerly one nation contended with another for Eastern trade; their jealousies and rivalries were mutually injurious; now all cordially co-operate from the same motives and for the same ends. All European nations are united as to their policy in China. To what must we attribute our success? Whatever England gains in her contest with China, whether in diplomacy or war, all nations share. The same policy will continue to be prolific of good results.

Sir LEWIS JONES: I propose, seeing a distinguished officer of the Netherlands Government present, "the Foreign Power." (Cheers.) There was a time when the interests of the two countries were not recognised as identical, but those times have long since passed away. The Netherlands has been in advance of us as to time in the East in gaining empire and power; the traces of hostile rivalry, political and commercial, and that subsequently culminated in conflict by land and sea, have left no traces of their influence so far as regards the mutual relations maintained between England and the Netherlands in the Far East, and we recognise in Holland a friendly Power ready to co-operate in all that can promote the common interest. (Cheers).

Captain M. DE CASEMBROAT, Aid-de-Camp to His Majesty the King of Holland, who commanded the *Medusa* in Japan, was enthusiastically received, and said: I cannot say what is in my heart. I hope in your indulgence, for my thoughts are better than my words. I shall be always happy for occasions presenting themselves to testify to the strength and sincerity which my countrymen entertain for yours.

The CHAIRMAN: Gentlemen, I propose to you "Prosperity to the Commerce of China."

Mr. ROBERTSON (formerly of Turner and Co.), M.P. for Hastings briefly and humorously responded, adverting to the beneficial system of the East India Company, so far, at least, as concerned the forcing our goods on Chinamen and securing large profits, to which, of course, the company said amen, but did not quite believe in.

Mr. W. T. BRIDGES: I rise to propose the health of our distinguished chairman, Admiral Harry Keppel. (Prolonged cheering.) No name is more distinguished, whether for organisation, rapid insight, and large prescience, and supreme and overpowering dash. In the China seas and in China he added lustre to the British name, and has vindicated himself as a worthy compeer of the immortal Nelson. We old Chinamen glory alike in his reputation and achievements. (Cheers.)

The CHAIRMAN: In rising to return thanks, I am at a loss what to say. I m now fairly overcome. (Cheers.) I assure you I have still a longing toreturn to the China station. Gentlemen, I thank you most sincerely, and cordially unite in the wish so generally expressed that this dinner may be an annual one. The annual meeting of the real and good friends of China cannot but prove both gratifying and beneficial. (Cheers.) The gallant Admiral resumed his seat under a storm of applause, and a rain of Kentish fire.

Mr. MONTGOMERY MARTIN: Mr. Chairman and Gentlemen, I rise to propose the health of a gentlemen who has done more to the civil cause in China than any Commodore,—(laughter)—than any Bishop, (increased laughter)—than the whole body of merchants. (Continued laughter.) I allude to Colonel Gordon. (Enthusiastic applause.) Although I happen to differ from him on many points, I pay every homage to his integrity of motive, to his marvellous sagacity, to his tried courage, to his reliance on his own convictions, and on the strength of which he has been ready to assume all needful responsibility. (Cheers.) He has been resolute, wise, and courageous in a novel and peculiar position, where the qualities he has manifested have rendered the British character better understood and more unreservedly trusted, and to this extent have largely contributed to improved and extended commercial and financial relations. China, with its material interests, its great staples, its large and active population, is eminently calculated to impress us with the possible advantages of a more extended trade in that quarter. We see in the condition of the country not only a national marvel but a standing type of the old civilisation brought to light, and coming into contact with the civilisation of the West, when, as if in obedience to some mysterious behest rather than through our own seeking, we are gaining in power and dominion over the whole of the Asiatic races. China, though containing one-third of the human race, and held together by municipal institutions for 2,500 years, is shaping itself anew under Anglo-Saxon influences. Notwithstanding all that has been accomplished, I see clouds hanging over the future of China—problems which it must yet be the task of political and civil wisdom to solve. What we demand is that we shall be able to put more fully to account the natural capabilities of that country for trade. We seek not only the increase of our commerce, but an increase proportionate to the augmented capital we have invested. Great as are our resources, we are not willing that the operative influence these carry with them should be arbitrarily curtailed. Eventually, by concerted action, we shall triumph, if not in extinguishing at least in destroying the effective force of that spirit of exclusiveness which is the bane of China. After these violent upheavals of political strife, let us hope to see an enlarged trade, such as the Government of China will be found not only to recognise but to encourage. We acknowledge the necessity of a great central Government, and of union among the provinces; what is desired is that the administration shall be conducted at once in a more liberal and vigorous spirit.

Colonel GORDON, whose rising was the signal for enthusiastic applause, said: I think on this occasion that you have placed too high a value on my services. Whatever I have done has been with the best intentions (cheers), and I thank you most sincerely for your testimony. I would especially mention the testimonial presented to me on leaving Shanghai. I consider myself amply repaid for any service I rendered to our national interests or those of the merchants in China.

Admiral Keppel, to the surprise of most of the company, then left the chair at a quarter to eleven. Had the gallant Admiral been asked, no doubt he would have presided for another hour or found a deputy. As it was the, toasts which properly applied to the occasion were not half accomplished. There was one which certainly should not have been omitted. We allude to Admiral Sir Michael Seymour, but for whose able and prudent conduct a great many who were then present would never have had the pleasure of again seeing "Old England." Our readers will remember that he conducted the operations known as the "Arrow War" in Canton, and subsequently at Taku, which finally led to the capitulation of Peking—unquestionably the most eventful period of our history in China.

CHINESE EMIGRATION TO THE BRITISH COLONIES.

The twenty-fifth General Report of the Emigration Commissioners, which bears date the 29th April in the present year, contains a very comprehensive account of all that occurred during the season 1864-65, both as regards emigration from the United Kingdom and the immigration into the British Colonies from whatever part of the world it took place. Of course the subject of "Chinese Emigration" comes in for its share of the Commissioners' attention. They state:—

"In our report of last year we explained the arrangement recently entered into by British Guiana and Trinidad to import a certain number of Chinese immigrants annually for a term of years, in the hope of reducing the expense and improving the character of the immigration. The amount which it was proposed to fix as a minimum was—to British Guiana, 1,250; Trinidad, 750—2,000. At their meeting, however, early in 1864, the Combined Court of British Guiana raised the quota for that colony for the ensuing season to 1,500 male labourers; equal, with the proportion of women, to 1,800 adults. The first vessel dispatched by the Emigration Agent, Mr. Sampson, was the *Brechin Castle*, which sailed from Canton on the 18th October with 270 emigrants (of whom 78 were women), and arrived in British Guiana on the 26th January. The deaths on the voyage were only 3; equal to 1·11 per cent. The immigrants were said to be a fine body of people, the women capable of working, and all appeared on arrival cheerful and contented. It was necessary to send seven to the Colonial Hospital, of whom one died. The next ship dispatched was the *Montrose*, for Trinidad. She sailed from Whampoa on the 17th November, and arrived at her destination on the 18th February, having lost on the voyage 11 out of 324; equal to a mortality of 3·39 per cent. Among the emigrants were 100 women. The surgeon of the ship died at sea a month after leaving Whampoa; but by the good management of the master and officers health and discipline were satisfactorily maintained. Besides the above, we have heard of the dispatch of the *Queen of the East* and of the *Sevilla* for British Guiana, the former with 487 emigrants, and the latter with 312, and of the *Paria* for Trinidad, with 288. One ship also, the *Light of the Age*, has been dispatched from Amoy to Honduras, in consequence of a special application from the Government of that colony. To procure the requisite number of emigrants the agent had been obliged to establish a subagency at Amoy."

The number of emigrants conveyed from China to the West Indies since the year 1843 is 12,175, of whom 2,107 were dispatched from 1843 to 1856. The contract price for the immigrants embarked last year for British Guiana in the *Brechin Castle* and *Sevilla* was £14, and for those in the *Queen of the East* (1,226 tons) £12. 17s. 6d.; and for those in the *Montrose* to Trinidad £15, and in the *Paria* £14.

With reference to the Australian gold-fields, the Commissioners state they have received the returns of the population there for the year 1864. "They show so extraordinary a steadiness in the numbers that, if correct, the gold-digging population, so far from being a migratory and excitable class, as has been supposed, must be singularly constant and stationary." This steadiness in the number characterises both the European and Chinese population. Of the latter the numbers were—for the 1st quarter, 31,957; 2nd, 32,277; 3rd, 29,963; 4th, 30,071. The Commissioners remark:—"In the return of population, the most striking fact is, the large number of Chinese men, and the total absence of Chinese women. It cannot be matter of surprise or regret that the Colonial Legislature should be anxious to adopt any measures calculated to check so pernicious a state of things." The Legislature of Victoria passed in 1864 an Act to consolidate the laws affecting Chinese immigrants. It reimposes, from the 30th June in the present year, the tax of £10 a head on Chinese arriving by sea, and £4 a head on those arriving by land, which was originally imposed by an Act passed in 1855, but by an Act passed in June, 1863, was suspended for two years.

At the conclusion of the document the Commissioners note:—"Several leases of Guano Islands in the Pacific Ocean have also been granted since our last report; the islands so granted are eleven in number, lying generally between 2 deg. north and 25 deg. south latitude, and between 143 deg. 52 min. east and 104 deg. west longitude,"—rather a wide section of the chart of the world.

CONSUMPTION OF SHERRY.—The official list of the export of sherry from Cadiz for the past half-year shows a total of 24,421 butts against 40,419 in 1864. The principal exporters from Jerez are Gonzalez and Byass, 2,228 butts; P. Garvey, 1,608; P. Domecq, 1,367; M. Misa, 1,277; Mackenzie and Co., 942; and Pemarten and Co., 751. From Port St. Mary—Widow, Harmony, and Co., 1,117; M. and F. Tosar, 1,045; Duff, Gordon, and Co., 772; M. de Mora, 728, and F. W. Cozens and Co. (Jerez, 1,301, and Port St. Mary, 759), 2,960.

LONDON, MONDAY, JULY 17, 1865

PRUSSIAN COLONISATION IN THE FAR EAST.

FROM the ambitious and equivocal conduct displayed last year by Prussia in her aggression on Denmark, her seizure of the Duchies of Schleswig, Holstein, and Lauenburg, and above all her subsequent appropriation of the harbour and Bay of Kiel as the head-quarters of her little navy, our readers will not be surprised to learn that that Government entertains still more ambitious views of aggrandisement, and proposes to take a higher flight in so remote a quarter that no fear of any remonstrance being made by European States need be entertained. Herr von BISMARK, Prussia's Prime Minister, believes it to be the destiny of his country not only to swallow up all Germany but to spread out over the globe like Russia; but though his SOVEREIGN may possess the ambition of PETER the GREAT, yet his genius is certainly not of the same calibre, although that requisite may be supplied by an unscrupulous and enterprising Prime Minister like himself. Besides, there is the infant navy, Prussia's latest hobby, to find occupation for; and as it is manifest there is no room for expansion in that respect in Europe, it will be good exercise to quarrel with some semi-barbarous nation, as they did some years ago with the Barbary pirates, and thus get accustomed to naval warfare. A few years ago, it will be recollected, a Prussian expedition, partly diplomatic and partly commercial, of three or four ships of war was sent out to the Far East, and Count EULENBURG, in his capacity of Ambassador Extraordinary, was fortunate enough to conclude very favourable Treaties of Commerce and Navigation with China, Siam, and Japan, which afford a fair pretext for keeping a ship of war or two in those waters, ostensibly for the protection of their commerce.

During the last ten days or fortnight a series of well-written articles has been published in a prominent part of a Berlin paper called the *Norddeutsche Allgemeine Zeitung*, belonging to that class called in German "officious" and meaning semi-official, and which is also well-known to be Herr von BISMARK'S pet organ, specially made use of—and in fact only very lately founded by him—for the dissemination of his own peculiar doctrines and the enunciation of coming events as well as the defence of his ministerial policy. That series of articles, which are just now concluded, bear the significant heading of "Prussia's Colonial Policy," and are generally ascribed to the pen of Count EULENBURG himself, who is now a member of the Cabinet—being Minister of the Interior—and a fast friend and supporter of the present *régime*. Under these circumstances, and as the imputation of the authorship has never been denied, the articles have made a great sensation, not only in Prussia, but all over Germany; and we have reason to believe, from trustworthy and reliable sources, that they do really and truly represent the feelings and intentions of Prussia, and foreshadow events that are on the eve of taking place.

After dwelling at some length on the advantages secured by treaties with the countries before-mentioned and the development of Prussia's commerce and navigation in the China Seas that has already taken place in consequence of those treaties, and after paying a just tribute to the wisdom and foresight of England in creating such flourishing places as Singapore and Hong Kong, the writer proceeds to demonstrate the benefits that must necessarily accrue to Prussia in particular and Germany generally, by the possession of a well-selected spot capable of being strongly fortified and easily defended, within an easy distance of China and Japan, where ships of war may repair for refitting, coaling, and taking in fresh provisions and water, and merchant vessels find a harbour of refuge under the protection of the Prussian flag and artillery. With reference also to the present highly to be deprecated want of system in German emigration to all parts of the world, by which during the last thirty years some millions of steady, frugal and hard-working Germans with their wives and families have not only become lost to their Fatherland, but whose strength and labour have gone to populate and enrich other countries that may some day or other be at war with Germany, the writer opines that many of them would easily be induced to prefer settling in a Prussian colony of the same language and religion as themselves, and with whose laws and customs they are familiar. He then refers to the progress made by the Dutch in pushing their relations with the Far East, and points out the extent of territory and the valuable possessions known under the generic term of Netherlands India, arguing that under the fostering care of a paternal government the contemplated Prussian colony may shortly become the nucleus and head-quarters of a "German India."

But where to find such a desirable spot combining all the advantages above described with a healthy climate, fertile soil, and capability of expansion? The German diplomatist calls out "Eureka!" and proceeds to develop his plan. He has pitched upon a safe and commodious harbour on the west coast of the Island of Formosa, or Tai-wan, that was partly surveyed by the officers of the late expedition, but not completed owing to the determined hostility of the natives. He thinks it might be easily fortified, and afford security and shelter for Prussian merchantmen frequenting the China Seas, as well as forming a naval head-station for the ships of war employed in those waters. He cites the works of Mr. FORTUNE and other late writers to prove the fertility of the country, supplying as it does the opposite coast of China with corn, rice, vegetables and fruits, and therefore affording a field admirably adapted for German industry and scientific agriculture, whilst the climate forms a desirable mixture of the temperate and the torrid zones, the Tropic of Cancer passing through the centre of the island. Our learned Theban seems to ignore that the Emperor of CHINA claims the sovereignty of this future German paradise—a claim that, as far as we know, has never been disputed; for he states as an undoubted fact that Formosa is "inhabited by "by savages owning no allegiance to any foreign Power, who "can be easily subdued or their acquiescence and friendship be "obtained by favourable treaties." Thus it seems that the prevailing idea is that it will be much easier to gain possession by force used against the natives than by negotiation or purchase from the Emperor of CHINA. But the dream of Prussian aggrandisement goes even much further, for the writer proceeds to show how the infant colony "would very soon spread "over the whole of the island, and even extend to the opposite "coast of the Chinese continent;" from which it appears that he considers the province of Fo-kien also a *herrenloses land*, or country without any recognised master, which term he more than once does not hesitate to apply to Formosa. "But it "may be asked (continues the writer), if Formosa offers such "advantages for German colonisation, how comes it that the "British have not thought it worth their while to take posses-"sion of it?" "The fact is," answers the diplomatist to his own query, "that England has quite enough colonies in all "parts of the world, and finds them rather an embarrassment "than otherwise; for she has even begun to get rid of them, as "was lately the case when she voluntarily renounced possession "of the Ionian Islands and transferred them to Greece, with "which kingdom they have now been incorporated. But it may "further be asked, what will England say should Prussia take "possession of Formosa? The answer is simply that though "England may demur beforehand, she will make no objection "when it is a *fait accompli*, and therefore the sooner we go to "work the better."

The articles conclude by a disquisition as to whether it would not be advisable to make it a penal colony, but after

Digitized by Google

weighing the benefits and disadvantages against each other, the writer seems to think it had better be left an open question for the present, but recommends the measures that ought to be taken under all circumstances in the course of the summer for the immediate realisation of the project. These are to send out a couple of the ships of war that are lying idle at Kiel and Danzig, with a certain number of troops on board, to take possession of the island and hold it in military occupation. There will also be sent out a body of skilled artificers of different trades to be employed in erecting the fortifications, building houses, barracks, &c.; those men to be allowed to take their wives and families with them, who will form the nucleus of the infant colony. As all Prussian subjects have served in the army for three years, these artificers have been trained to arms, and would be able to defend themselves if attacked by the natives. On the completion of the defensive works and habitations required, these original settlers would receive a free grant of land for themselves and their families, and turn their attention to the cultivation of the soil, in which they would be supported in a liberal manner by the Prussian Government. There are such a number of enterprising young men now in Prussia that the writer is convinced there would be not the slightest difficulty in procuring a sufficient number of intelligent young couples ready to volunteer to become the pioneers of the infant settlement which is to expand by degrees into "German India." It is in no spirit of hostility towards Prussia that we have penned these lines. The world is large, and there is plenty of room in it for us all to live and prosper in. But there is an old adage that says "the proof of the pudding lies in the eating," and as the Germans have hitherto not yet tried their hands at colonisation in any part of the globe, we cannot be induced to consider the project at present in any other light than as visionary dreams of the richly theoretical but certainly not practical Germans. We shall not fail to keep an eye on the prosecution of the plan, and, if it is carried into execution, we shall communicate in due time further particulars to our readers.

THE HONG KONG ROYAL MINT.

CAPTAIN KINDER (the Master) and family, and Messrs. Tookey and Allen, of the Hong Kong Royal Mint, proceed to Hong Kong by the present mail; Mr. Davies, the Comptroller, and Mr. Manning, of the melting department, will probably follow by the next steamer. With the exception of a few trifling articles, the shipment of the balance of the machinery for the Mint has just been completed, and we hope soon to hear of the establishment being in satisfactory working order.

W. H. MITCHELL, Esq., late Chief Magistrate of Hong Kong has been duly passed as barrister at Lincoln's-inn, and, we understand, will shortly proceed to Shanghai to practise. From his previous experience in China, and intimate knowledge of mercantile matters, as well as of criminal proceedings, we doubt not but that he will be found an able adviser, and an ornament to the "New Court at Shanghai." He possesses the *suavitur in modo* with the *fortiter in re*, which is so important to a barrister.

STRAITS OF SUNDA.

It will be remembered that some months since an article appeared in our columns in reference to difficulties said to have arisen between the local authorities at and masters of vessels passing through the Straits. In reply to this, a correspondent at Anjer assures us that no interference ever takes place with the masters, crews, or passengers of vessels, further than is necessary to carry out such salutary regulations for the maintenance of order as are usually enforced at every port to which merchant vessels resort. Our correspondent further states that the office of the Assistant Resident is always open to persons having complaints to make, and that such are invariably received by that functionary with courtesy and attention. We trust, therefore, that no further complaints will reach us, and that that delightful resting place on the route to the Far East will be appreciated as heretofore in the old times.

THE MESSAGERIES IMPERIALES.—This company will be prepared to open the branch line from Shanghai to Japan next September. A steamer is fitting out for despatch to Singapore to take up the Batavia line.

THE P. AND O. COMPANY.—The *Delhi*, which has been employed on the home line, has started for Galle, there to receive orders to take up one of the lines on the India or China station.

THE AMERICAN LEGATIONS IN CHINA AND JAPAN.—The simultaneous return of General Pruyn and Mr. Burlinghame, has given rise to a report that they have been recalled, in pursuance of an intention the part of the United States Government to abandon the Legations both at Peking and Yedo. There is, however, no truth in this supposition, both Ministers having applied some time ago for leave of absence.

THE WIMBLEDON MEETING.—The annual rifle competition begins to-day, the formation of the camp having been in progress since the 8th inst. Several new prizes have been introduced this year, the most conspicuous being the "China Challenge Cup," value 500 guineas, contributed by volunteers in China.

IMPORTS OF HEMP AND JUTE.—The quantity of hemp imported into this country last year was 1,010,688 cwts., against 1,067,913 cwts. in 1863, and against 915,807 cwts. in 1862. The chief sources of supply are Russia, Austria, British India, and the Philippine Islands; and these countries in 1864 furnished us with 540,093 cwts., 157,299 cwts., 75,522 cwts., and 183,943 cwts., respectively—all other places contributing 53,831 cwts. Reviewing the statistics of this article of commerce during the past fifteen years, it cannot be said to have exhibited any marked advance. Of jute and other vegetable substances of like nature the quantity brought into this country last year was 2,047,287 cwts., or 792,682 cwts. in excess of that in 1863, or 1,083,513 cwts. more than in 1862. Twelve years since, when jute was first specified in the official account under a heading distinct from that of hemp, the annual importation did not exceed 275,578 cwts.; the increment has been, therefore, more than sevenfold. Almost the entire supply was brought from India, Singapore, and Ceylon.

COLONIAL BISHOPRICS.—There are, it appears, by a return issued lately, thirty-eight colonial bishops, with salaries varying from £50 up to £2,500. The £50 bishop is Dr. Thomas, Bishop of Goulburn (New South Wales), and his munificent income is said to be derived from the Colonial Bishoprics' Fund, and from the interest on a sum returned blank invested in the colony. The prelate who has £2,500 a-year is Dr. Parry, of Barbadoes, whose income is entirely derived from the Consolidated Fund. Only five bishops are thus provided for, and they are all in charge of West Indian dioceses. A note appended to the return says, "The list of colonial bishops is made up without reference to the effect of the recent decision of the Judicial Committee in the case of the Bishop of Natal."

A clipper ship, built by Messrs. Robert Steele and Co. for the China trade, was recently launched from their yard on the Clyde. As the vessel left the ways she was named the *Ariel* by Mrs. Robert Steele, jun. The *Ariel's* dimensions are:—Length of keel and forerake, 195 feet; breadth of beam, 33 feet 9 inches; depth of hold, 20 feet 6 inches; register tonnage, 850. She is built on the composite principle, and will be classed 14 years A 1 at Lloyd's. Her owners are Messrs. Phillipps, Shaw, and Lowther, and Captain Maxton, London, and she will be commanded by Captain Keay, late of the *Falcon*.

DR. DANIELL, THE AFRICAN TRAVELLER.—William Freeman Daniell, M.D., F.L.S., late Staff-surgeon to Her Majesty's forces in Jamaica, from which island he arrived in England last September, with a constitution thoroughly broken up by climate, died, June 26, at Southampton, aged 47 years, and was buried in Kensal-green, July 3. Dr. Daniell was well known to the scientific world by his indefatigable labours and researches on the climate and productions of the pestilential coast of Western Africa, and other parts of the globe. He served the whole of his time as assistant-surgeon at our settlements on the African coast, and obtained his promotion to the rank of staff-surgeon in 1853; since which he has twice been employed in the West Indies, and accompanied the "Expeditionary Force" to China in 1860, where his love of his favourite pursuit, Botany, led him to make some additions to the flora of that interesting region, more especially of a fine new species of Tartary oak, which may at some future day furnish timber for a dockyard at Hong Kong—should our present iron-clads not altogether supersede the demand for that invaluable wood in the construction of Britain's best bulwarks.

THE CHINA CHALLENGE CUP.—The competition for this cup commenced on the 15th by representatives from thirty-two counties. It is expected to be completed to-day. Several designs for the cup have been submitted, and the selection is still under consideration. The conditions of the match having been left to the Council, great curiosity was felt as to the ultimate destination of it. The decision arrived at was that it should be placed in the hands of the Lord-Lieutenant of the winning county from year to year, and that £100 should be annually divided among the more successful of the competing squads, consisting of ten men drawn from every county desirous of entering.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, July 8.

The First Chamber of the States-General, as I anticipated in my last, passed the new tariff for the Netherlands Indies without a dissentient. This was certainly a great parliamentary triumph for the Minister of the Colonial Department, but I persist in my opinion that the tariff is not so liberal as we had the right to expect from this Cabinet. An important discussion took place about the abrogation of the existing free-ports and free provinces in India, which are exempted from paying duties. Several members were of opinion that these privileges ought to be repealed, but Mr. Fransen van de Putte thought it impossible to revoke those protective measures immediately. After having passed also the great politico-economical measure for modifying the law regarding the communal imposts, the First Chamber was prorogued.

Though the Cabinet had been thus successful, it was to be feared that the Minister of the Financial Department would suffer a check on the law about the personal taxes. At a former sitting, when the law met with some opposition from the Ministrial party, the illness of Mr. Betz delayed this defence of his principles. Every one thought that the law would be modified during this delay, but that not having been done Article I. of the Bill was rejected by 39 against 25 votes, and in consequence the Bill was withdrawn. There are many

Digitized by Google

rumours in circulation as to what he will do in his critical position. His resignation would follow according to strict constitutional usage, but I do not think that will be his resolve. Meantime the Second Chamber adjourned till Monday next, when the discussion on the law abolishing the Stamp duty on newspapers will commence.

Yesterday the commercial treaty with France was signed at the Hague. In my next I will give you some particulars about this important treaty. I can now only say, that on Dutch coffee imported into France no higher duty can be levied than 5 francs per 100 kilo. This is one of the most favourable stipulations.

Dr. Buddingh, Inspector of Education in the East Indies, has had the Leopold order conferred on him by the King of the Belgians.

COMMERCIAL.

COFFEE.—The market continues to be in a very firm condition. Very few parcels are offered, notwithstanding there is much inquiry for those qualities sold in the last auction. The unsold stock of the Trading Company amounts to 380,200 bales Java, against 417,900 bales in 1864, and 396,400 in 1863. The stock in the Netherlands amounts to 512,200 bales, against 563,100 bales in 1864. Since the 1st of January till the 1st inst. the Trading Company delivered 412,498 bales, against 384,923 bales in the six first months of 1864. At the close of the market holders declined to operate without a considerable advance, because it was officially known that the new crop would not produce more than 760,000 bales.

SUGAR.—(Raw). The market remains inactive, but in a firm condition. Holders decline to sell at the actual quotations; only 2,000 to 3,000 kr. changed hands at 1½f. beneath May prices. On the 21st inst. the Trading Company will offer at public auction 70,600 kr.

RICE.—The market remains still in an unaltered condition; only 300 bales Java were sold at the former rates.

TEA.—At the public sales for private account the quantities offered were partly sold at the following prices:—China: Superfine Congo 92 to 100c., Extra Fine Kaisow Congo 115 to 142, Fine Congo 98, Finest Pecco Souchon 160, Fine Kaisow Congo 100 to 105, Finest Kaisow Congo 76 to 100, Finest Flowery Pecco 130 to 140, Finest Congo 110 to 111, Finest Souchon 105, Extra Finer Oopack Congo 137 to 140, Extra Fine Flowery Pecco 112, Superfine New Season's Souchon 140 to 141, Finest New Season's Souchon 105 to 106, Finest Lapsang Souchon 175, Fine New Season's Congo 128 to 130, Finest New Season's Kaisow Congo 125, Fine Congo 105, Extra Fine Congo 105, Finest Hysant 60 to 100 c. Java: Boey 40 to 43c., Congo 48 to 76, Kempoey 60 to 80, Souchon 80 to 85, Congo Souchon Pecco 110, Pecco 110, Tonkay 40 to 50, Schin 37 to 40, Hysant 50 to 80, Uxim 65 to 80c. Since the auction the parcels retired were sold at the same prices. There is much confidence in this article.

SPICES.—Still dull, and with a very limited business at former prices. Since the 1st January the Trading Company delivered:—Nutmegs 330 casks, Mace 228 casks, Cloves 224 casks; against 996 casks Nutmegs, 347 casks Mace, and 234 casks Cloves, in 1864. The unsold stock of the Trading Company amounted on the 30th June to—1863, 2,116 casks Nutmegs, 960 casks Mace, 600 casks Cloves, 1,065 fard. Cinnamon, 5,181 b. Pepper; 1864, 1,466 casks Nutmegs, 856 casks Mace, 70 casks Cloves, 1,378 fard. Cinnamon, 3,707 b. Pepper; 1865, 3,061 casks Nutmegs, 756 casks Mace, 1,793 casks Cloves, 1,612 fard. Cinnamon, 1,619 b. Pepper. And on ceduls in the 2nd hand—1863, 4,474 casks Nutmegs, 1,150 casks Mace, 2,885 casks Cloves, 756 fard. Cinnamon, 616 b. Pepper; 1864, 4,190 casks Nutmegs, 1,096 casks Mace, 2,853 casks Cloves, 944 fard. Cinnamon, 464 b. Pepper; 1865, 4,786 casks Nutmegs, 1,129 casks Mace, 2,465 casks Cloves, 326 fard. Cinnamon, 264 b. Pepper.

COTTON.—The sales have been extremely light in the last days. In the former week the transactions were important, and with improved prices. Stock, 4,300c. Madras.

HIDES.—Without transactions, at least they are not known, the brokers being defended to give publicity as to the sales and prices.

INDIGO.—With a good demand at improved prices, but the stock being very unimportant in the first hand, business is limited. 91 chests were sold at an advance of 25c. on the last auction prices.

GAMBIER.—A parcel of 413 p. came in the market, of which 100 p. were sold; the rest may now be had at 14f. per p.

BANCA TIN.—The 168,704 slabs Banca and 1,223 slabs Billiton offered at auction by the Trading Company were all sold at 56f., which must be considered as very favourable. The actual stock amounts to 217,023 slabs (value 56f.), against 185,988 in 1864 (value 62½f.); and 148,218 slabs in 1863 (value 78f.).

COCOA-NUT OIL.—Very firm; the prices are still improving by want of stock.

RATTANS.—Only a few transactions have taken place at former quotations.

ARRACK.—There are no transactions to report, buyers declining to operate at the high quotations.

TOBACCO (JAVA).—(Report of Mr. N. C. Gregoor, broker, Rotterdam).—The several auctions went off not unfavourable with regard to the best qualities. The interior, however, were given at low prices, which, without doubt must give great losses to the consigners. These low quotations, however, caused some speculative inquiry, and it is more than probable that these operations at prices much beneath those at which can be produced, will give very favourable result. Those qualities fit for the London market were paid with fabulous prices. The trading marks H. and A. Blitar, de Blitar, Nauta Blitar, A. J. Walter, N. A. J. Walter, Blitar and Djaris, obtained the highest prices. The Rembang tobacco is waited for with much interest. Manilla: There was a good demand at improved prices for 2a. (cover), and the consumption bought a very important quantity. In the second-hand, many transactions took place. The market closed, however, inactive for want of parcels offered. Quotations, 3a. (dec. auction) 65 c., 3a. full auction 55 c.; 2a. 120 c., 1a. 150 c.; 4a. 32 c. Actual stock, 14,676 p. Java leaves; 3,118 p. Manilla; 3,000 casks Maryland.

MANILA SEGARS.—375,000 were offered to-day. The 2a Cortados were partly sold at 38¼f., the rest was retired at 40f. Another lot of 450,000 2a Cortados, 1864, were partly sold at 39½f. to 40f., and the rest retired at 42f.

TORTOISE.—The Netherlands Trading Company offered in public auction 93 ch. 10,000 kilo., which were partly sold at f.4.25 to f.10.25, and partly retired at f.8.75 to f.9.75.

MOTHER OF PEARL.—About 77,100 ps. were sold by the Trading Company; the 1a, at 81½ to 82½c.; 2a, 84 to 85c.; 3a, 65c.

SILK (JAPAN).—The Trading Company sold at auction 6 b. Hadchojee, at 33f. to 34f.; 20 b. Coshio, at 33½f. to 40½f.; 41 b. Sodai, at 31½f. to 38¾f.; 18 b. Idah (slips and bricks), at 34½f. to 42½f.; 166 b. Oshia (redevidée), at 34½f. to 42f.; 12 b. Sincheu (flotillons), at 40½f. to 44½f.; 16 b. Maybash (flotillons), at 37½f. to 42½f.; 5 b. Inchew (bricks), at 32½f. to 32¾f. For private account was sold: 2 b. Trame, at 51f.; 5 b. Organzine, at 43f. to 48f.; 57 b. Persian, at 26f. to 26¾f., 3 b. Chinchanttes, at 18f.; 1 b. Chinchea, at 18f.

MONEY is very abundant, and it is willingly given in the open market at 3 per cent. Bank discount, for bills, 3 per cent.; for acceptances, 3½ per cent.; Dutch debt, 2½ per cents. 62 11-16th; 3 per cents., 73⅝; 4 per cents., 97 3-16th; Handelmaatshappy, 146½; Dutch Rhenish Railway shares, 334f.; Central Railway shares, 121¾f.; Society of Exploration State Railways, 91½; East Indian Bank, 86; East Indian Railway, 90. The market in general is flat and business very limited. 'Change: London, 3 mo., f.11.78; 2 mo., f.11.81; short, f.11.89; Paris, 3 mo., f.46.70; 2 mo., f.46.82; short, f.47.20; Antwerp, 3 mo., f.46.65; short, f.47.12½; Hambro', 3 mo., f.34.90; 2 mo., f.34.98; short, f.35.10.

SHIPPING.—ARRIVALS.—June 22, at Flushing, from Singapore, Landrost Braun; 26, at Texel, from Batavia, Quartet, Ortelius; July 3, at Brouwershaven, from Banjoewangie, Nederland and Oranje; 2, at Texel, from Banjoewangie, Reflect; 4, at Brouwershaven, from Banjoewangie, Susanna Johanna; 5, at Brouwershaven, from Banjoewangie, Jeannette Cornelia; Burgemeester van Middelburg; 6, at Brouwershaven, from Tjilatjap, Tonia, Minister Pahud; July 7, from Padang, Isaac da Cotas; at Texel, from Passaraeang, Jacoba and Christina.

DEPARTURES.—June 26, from Texel for Sourabaya, Quintet; July 2, from Texel for Kanagawa, Batavia; 6, from Hellevoet, for Singapore, Sophia Amalia.

READY TO SAIL.—Helena and Anna, for Batavia; Alblasserwaard, for Sourabaya; Sophia Amalia, for Singapore.

LOADING.—At Rotterdam, for Batavia and Sourabaya, Bezoekie, Hugo Grotius, Boni, Johanna; for Batavia, Constantia, Cornelis Wernard Eduard; for Batavia and Samarang, Robertus Hendricus; for Samarang, Doelwyk, Bilderdyk, Koffyboom; for Singapore and Hong Kong, Sophia Amalia. At Amsterdam, for Batavia and Sourabaya, Louise; for Batavia and Samarang, Constance; for Decima and Kanagawa, Bantam; for Kanagawa and Nagasaki, Gloria; for Padang, Excelsior, Anna and Jeannette, Helena, Geradina Wilhelmina, Telanak; for Singapore and Hong Kong, Bernard and Agnes; for Sourabaya, Bellatrix.

FREIGHTS.—Quotations of Messrs. Fauchey and de Vletter, shipbrokers, Rotterdam:—For Batavia: Constantia, 741 tons; Cornelis, Wernard Edouard, 850 tons. For Batavia and Sourabaya: Bezoekie, 747 tons; Hugo Grotius, 673 tons; Boni, 575 tons; Johanna, 713 tons. For Batavia and Samarang: Robertus Hendrikus, 753 tons. For Samarang: Doelwyk, 824 tons; Bilderdyk, 754 tons; Koppyboom, 1,280 tons. For Kanagawa: Maria, 380 tons. Freights unaltered.

PASSENGERS INWARD.

From Java: per Ortelius, Messrs. J. H. Donleben and family, S. Fegel, J. F. Kooze, and Miss C. Abbink. Per Quintet: Messrs. W. J. Schroder and Bregman. Per Nederland and Oranje: Mr. F. A. Wethmar and family. Per Tonia: Messrs. F. Ten Hagen and family, C. Drayer, Labaar and family, Smits, Mrs. Graiken and family. Per Padang Packet: Messrs. C. de Haan Holtzinger and family.

PASSENGERS OUTWARD.

To Java: per Quintet, Messrs. T. and P. Blom and two children, C. J. Gysbers, Mrs. J. Schaffien von Bronkhorst and six children, Miss J. L. Sauer.

TEA.

(Traders' Circular.)

Two months have now elapsed since the announcement of the proposed reduction in duty, and with the exception of a few days of feverish excitement, the market has been, during the whole of that period, in a state of unprecedented stagnation. How different a result was anticipated! It was thought that the removal of one-half of an impost, equal to 100 per cent. of the market value of the great bulk of the tea used, would so materially reduce retail prices, that the immediate increase of consumption would again raise prices after the reduction was absolutely made. These anticipations have only been partly realised; retail prices have fallen, and consumption has increased, but the addition to price and the large demand which would, it was thought, naturally follow, have not as yet resulted. It would, however, be premature to suppose that retailers and consumers have reaped all the benefit of the reduction, and that no part of it is likely to reach importers of tea. Their future position will be improved, and a more speedy, and perhaps in the long run, a more profitable realisation would have taken place, if, instead of allowing themselves to be carried away by the excitement inseparable from fiscal changes, they had directed their attention to the real position of supply, and to the actual wants of the trade. To any one at all conversant with such matters it must have been evident that when the duty-paid stocks of tea held by retailers were as large as they were proved to have been by the unanimous outcry raised for a postponement of the reduction in duty, the bonded stocks held by them must also be considerable, and therefore that they would not be likely to buy for some time unless a great inducement was held out to them to do so. But this very obvious inference was generally lost sight of, and the brief period of excitement during which the trade would have bought freely at any moderate advance was suffered to pass away unimproved, in the hope of obtaining, at some unknown period, still higher rates. On the part of the trade it was felt that the demands of importers were not warranted by circumstances, being based upon an exaggerated estimate of increased consumption at home and a doubtful export demand, while, on the other hand, heavy arrivals and a year's stocks in the

Digitized by Google

country were used as arguments against any great rise in price. But the question was further complicated by the receipt of telegrams announcing pecuniary difficulties in China, and on these fresh arguments were founded both for and against an advance. It was stated that the crippled condition of some of the mercantile houses would interfere with shipments; that the first arrivals of the new teas would, in consequence, be much later this year; and that, from the same cause, the total exports of the season would be considerably restricted. These statements do not appear to have exercised much influence on purchases; indeed, rumours of short supply have been so often circulated, and so seldom followed by any actual scarcity, that the argument has lost its force. It was well known that China produced annually far more tea than she could consume at home, and that to the extent of the reduction of 6d. per lb. we were in a position to compete with the Chinese consumers themselves for the entire crop, and probably to outbid them; at any rate, the great bulk of the excessive production was certain to be sent to this country, as England had always been her largest and wealthiest customer. This certainty was further increased by the knowledge that the news of the reduction of duty, and consequent rise in price here, would be received in China about the middle of May, and that an inducement, sufficiently powerful to counterbalance the depressing effect of last year's losses, would thus be held out to shippers. China, too, was no longer the only source of supply. Japan had contributed largely of late years, while cultivation was extending rapidly in India, and large consignments were known to be on the way from that country. Under these circumstances, grocers, who had been willing to buy forward when prices were low, declined to purchase at the extreme advance, resolving to use up the stocks they had already bought before they again entered the market; and, as even now many of them are known to hold as much as they can sell in six months, it seems probable that they may be able to continue for some time this passive resistance to the demands of importers. These last do not appear to be disposed to yield, and it remains to be proved which side will have to give way first. Buyers, however, seem to have the advantage, and to hold the result very much in their own hands; the more so as recent advices do not confirm the statements made at the beginning of May as to the probability of the new season's shipments being later than last year. Two cargoes were dispatched from Foo Chow at the usual time; and though the opening price was higher, this has been more than counterbalanced by the differences of freight and exchange. When one leading argument in favour of a particular theory falls through, the other reasons urged in support of it are naturally regarded with some suspicion; and very little anxiety will now be felt as to the shipments of the present season being deficient. There is little probability of business improving till prices are lower, as grocers appear to be in a position to wait for more favourable terms, and are quite disposed to exercise more care in purchasing in proportion as retail prices are reduced, while the cost of delayed realisation is thus all thrown on the importers, who are losing interest on capital, and are incurring accumulated dock charges, besides injuring future prices, by allowing stocks to increase.

The Board of Trade Returns, just published, state the official stock on 31st May to have been 121,576,792 lbs., and even if the most liberal deduction is made for deliveries during the month of June, there must still be as much tea on hand as at this time last year. As it is probable that clearances at the new rate of duty were somewhat in excess of requirements, the stock will not be very much diminished during the month of July, and even when allowance is made for larger deliveries during August and September, no formidable decrease is likely to be exhibited when the new season's shipments begin to arrive.

Legal.

RE THE BANK OF HINDUSTAN, CHINA, AND JAPAN (LIMITED) AND THE COMPANIES' ACT, 1862.

(Before Vice-Chancellor Sir W. P. WOOD on the 6th inst.)

This was an application on behalf of Mr. Robert Montgomery Martin, under section 35 of the Companies Act, 1862, to have the register of the company rectified by striking out his name, which was entered in respect of 200 shares in the company. Two similar applications have been made with respect to this company within the last fortnight,—one at the Rolls, by a Mr. Los, the other in this court, by a Mr. Higgs, and in both instances the register was ordered to be rectified by expunging their names. The cases, which arose out of an amalgamation between the Imperial Bank of China, in which these gentlemen were shareholders, with the Bank of Hindustan, of which they did not choose to become members, are reported already. On the same day on which notice of motion in the present case was served the directors of the Bank of Hindustan, passed a resolution for removing from the register the names of 40 persons including Mr. Martin, in consequence of these decisions in the Court of Chancery.

Mr. Rolt, Q.C., and Mr. J. N. Higgins, in support of the motion, contended that the directors had no power to do what they had done, and that Mr. Martin was entitled to have the protection of an order of the Court, according to the provisions of section 35 of the Companies Act, 1862.

Mr. Giffard, Q.C., and Mr. Eddis, for the bank, argued that the applicant had no longer any *locus standi*, and that he ought not to have proceeded with his motion after receiving notice that his name had actually been struck off the register.

The Vice-Chancellor said that Mr. Martin was entitled to such indemnity as the Court could give him. It had been argued that even the order of the Court would not protect him against other shareholders, in case they could show that he ought still to be regarded as a member of the company; but his Honour considered that this was an incorrect view, and that his order would be binding on the other shareholders, although, perhaps, it might not be so as regarded creditors of the company. To hold anything else would be a most disastrous doctrine for companies, for it would imply the right of every individual shareholder to appear on such an application as the present. On the other hand, it was certain that the company was not bound by the act of the directors in removing this gentleman's name. The order now asked must therefore be made, and the company must pay the costs of the application.

Naval and Military.

It was generally expected by the public, when the American Monitor first appeared in our waters, that the Admiralty would take steps to produce a vessel on similar principles, so as to place our navy on a par with that of the United States. But, amid all its experiments and reconstructions, the Admiralty has never yet attempted to build a ship upon this model; and recent experience would seem to indicate that the authorities have acted prudently in declining to burthen the country with the cost of a fleet of Monitors until their qualities had been fairly put to the test. Mr. Ericsson's design, although doubtless an ingenious one, has turned out practically a failure. The original Monitor, after a short career of mingled failures and successes, went to the bottom, and others built on her model have since followed her. It would seem to have been reserved for Captain Coles so to elaborate and perfect the system of "central armament" as to produce an iron-clad vessel perfectly manageable and seaworthy, and able safely to carry guns of enormous calibre—600-pounders, for instance, which Sir W. Armstrong avers will be none too large to carry a charge sufficient to penetrate the side of a first-rate iron-clad vessel.

Major-Gen. Lord W. Paulet, K.C.B., gives up the command of the South-West Military District and the Lieut.-Governorship of the garrison of Portsmouth to his successor, Lieut.-Gen. Sir George Buller. Lord William Paulet succeeds Sir James Yorke Scarlett at the Horse Guards in the office of Adjt.-Gen.

Rear-Admiral George Elliot, Superintendent of Portsmouth Dockyard, next on the list of rear-admirals for promotion, has resigned his appointment at Portsmouth with the intention of offering himself to the constituency of Chatham as a candidate for their suffrages in the Conservative interest at the ensuing election.

The Hindostan, sailing hired transport, has arrived at Spithead from Hong Kong, which she left on the 23rd of February. The troops she had on board consisted of the 6th battery of the 12th brigade of Royal Artillery, comprising Lieuts. Cane and Ellerby, Assist.-Surg. Longbeard, and 103 non-commissioned officers and men, 91 time-expired and invalided soldiers, 3 naval officers, and a few naval invalids, with some women and children belonging to the troops. Sixteen men and two women died during the voyage. The Royal Artillery were sent into quarters in Fort Elson, near Gosport; the invalids to the Royal Victoria Military Hospital at Netley, and the time-expired men to the depots of their respective regiments. The naval passengers and invalids were sent to Her Majesty's ship Victory, and the Naval Hospital at Haslar. This vessel brings also several guns of varied calibre, part of our captures in Japan.

Dr. Robert Bernard (1845) has been promoted to the rank of Deputy Inspector-General of Hospitals, and will proceed immediately to Hong Kong, to take charge of the naval medical department in that settlement. Dr. Bernard's pay will amount to £500 per annum, whereas that of an officer of the same rank in the Army would be £1,000. No wonder the military service is more popular than the naval with professional men.

The Turret-ship Commission have reported against the construction of a vessel on Captain Cowper Coles' design, which they objected to chiefly on account of its being for a one-turret ship; and it is stated that they prefer two turrets combined with a fixed battery; so it will doubtless be decided to build the Hercules on Mr. Reed's plan, which, as we said in a former number, has a turret at each end of the ship.

The scheme by which the Duke of Somerset and his colleagues intend to abolish the rank of master in the Royal navy was laid on the table of the House of Lords on Tuesday. It has not as yet been printed, although, as a matter of course, it will be so immediately. We are, therefore, only able to deal very shortly with the supposed contents of the document. Their lordships have decided that in the face of the high qualifications which are required in our days from young officers before they can be promoted to the rank of lieutenant, it is absolutely wrong that attainments of the kind should be unavailable for the use of the public after they have been awarded their commission. It has, therefore, been resolved that while the whole responsibility connected with the safe navigation of Her Majesty's ships shall devolve upon the captain, he shall be assisted by a navigating officer taken from the class just mentioned. We regret to find that it is not intended to do much for the staff commanders and masters now on the list. We fear that these gentlemen will be called upon to serve in their present rank until death or retirement places them beyond the reach of their lordships.

LIEUTENANT-COLONEL GORDON, C.B., Royal Engineers, has been appointed to proceed to Dover for active service.

Monetary and Commercial.

At the half-yearly meeting of the directors of the Thames and Mersey Marine Insurance Company (Limited), held in London, an interim dividend at the rate of 10 per cent. per annum, and a bonus of 5 per cent., were declared, free of income-tax, being together at the rate of 20 per cent. per annum for the half-year ending 30th June.

At the half-yearly meeting of the Union Bank of London, Mr. Northall Laurie in the chair, the report stated the available total, including £61,375 brought from the previous account, to be £206,255, and recommended a dividend and bonus at the rate of 30 per cent. per annum, leaving, after an appropriation of £5,000 to the building fund, £21,255 to be carried forward. A vacancy in the direction, caused by the resignation of Mr. T. A. Gibb, was filled by the nomination of Mr. Scrimgeour, who has hitherto from the foundation of the establishment, for twenty-six years, acted as general manager,

Digitized by Google

with a zealous rectitude that was among the main causes of its success.

It appears that telegraphic communication with India is suspended, and it is feared that the difficulty on this occasion is through some break or fault in the Gulf cable.

The half-yearly bullion tables, prepared by Mr. F. M. Page, show that the export to China was £422,509, against £888,911, in 1864; to Singapore, Penang, and Batavia, £356,472, against £403,171; to Ceylon, £7,886, against £50,725. The total to all parts of India and China (with Alexandria) being £3,500,756, against £13,111,405, in 1864.

Another agency institution has been formed under the title of the "United Service Company," which is intended to absorb the agency business now conducted by Messrs. Saunders, Otley, and Morgan. The capital is fixed at £500,000, in 50,000 shares of £10 each; and the directors comprise first-class civil and military officers.

Owing to the failure of Messrs. Scott, Berland, and Co., the firm of Messrs. J. Samuels and Co., merchants, of Manchester, have been obliged to suspend payment. The liabilities are stated at £80,000. The liquidation will, it is expected, prove satisfactory.

The annexed circular has been sent to the shareholders in the China Steam and Labuan Coal Company (Limited):—

Sir,—The directors having had inquiries from some of the shareholders as to the reason for making the recent call, the board beg to inform them that the call was required not in consequence (as some shareholders think) of the depreciated price of the shares, but to carry out the original objects and intentions of the company. The directors think it desirable to let all the shareholders know that their hopes, as regards the future prospects of the company, have not been in any way lessened, and they are of opinion that the objects of the company offer a most legitimate source for investment, and, with careful management, will result in success; but they cannot possibly control the value of the shares in the market, and at the present moment the nominal market price of a share is no criterion of its value. The board have engaged a marine superintendent of ability and experience, who proceeded to China by the last mail, and as soon as he has had time to make himself acquainted with the position of affairs abroad he will make a detailed report for the information of the shareholders. As regards the Labuan property, a deputation of the directors have had an interview with the Secretary of State for the Colonies with reference to a concession of lands and other privileges connected with the construction of the railway from the coal pits to Victoria Harbour, and these negotiations are proceeding very satisfactorily, and when concluded will be of great advantage to the company. The present price of good steam coal at Hong Kong and Shanghai would leave a considerable profit on coals shipped from Labuan to those ports, and as soon as the short railway, seven-and-a-half miles, is made to Victoria Harbour, it will enable the company to ship coals in such quantities as to meet any reasonable demands. I may add that all the steamers are profitably employed, and if you will at any time favour me with a call, I shall be happy to show you all the reports, and afford any other information in my power —I am, &c., H. WALLER PLATT, Acting Secretary.

The bills have been returned of Messrs. Watson, Bogle, and Co., shipping merchants, of Manchester, a firm connected with Messrs. Scott, Bell, and Co., whose stoppage has been announced.

The Hong Kong and Shanghai Banking Company have appointed Mr. W. H. Vacher, late of Gilman and Co., China, as their special agent in London. The address is at present at Gresham House, Old Broad-street. The bank, as previously announced, draw on the London and Westminster Bank.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

ARTICLES OF IMPORT.

TEA.—Foo-chow Congous: In dust and broken leaf we hear of hardly any transactions, and all grades above these up to medium kinds are only saleable here and there at the reduced prices established at the public auctions; fine and finest are scarce, but the business in these kinds is quite of a retail character. Black Leaf: There have been several new parcels offering out of the late arrivals, but mostly of common to fair quality, for which it is impossible to obtain biddings; in medium and fine the transactions have been most limited. A few boxes "overland," of new Tayshan-make and fine quality, sold in public sale at 3s. per lb. Flowery Pekoes have been cleared off at the auctions at extremely low rates. In Scented Teas we have nothing new to notice. There have been several parcels of coloured Japan Teas on offer, but they are not of the class of late in demand. True Greens: A few parcels have been sold at full rates, but the bulk of the late arrivals are not yet on the market. At the public sales that concluded on the 10th instant, 34,474 packages were sold. An Indian sale was held on the 13th and 14th instant, consisting of 3,750 packages, of which 2,913 have been sold. The sales haveg one very heavily, and at a reduction of 2d. to 4d. per lb., the broken kinds being mostly withdrawn in the absence of offers. A China sale is advertised for the 18th instant; so far, only about 10,000 packages are printed, mostly "without reserve."

SILK.—According to a circular of Messrs. Arles Dufour and Co., of Lyons, the apprehensions of a bad silk crop, which for several months have influenced business, and caused a continual rise in prices, are confirmed. The European crop of 1865 may, it is said, be looked upon as the most disastrous since the breaking out of the disease. It is difficult to ascertain the mean price for the present year, on account of the great disparity in value of the various races of cocoons. The Japanese races are the only ones of which the success has been nearly universal, and, taking these for a basis, the season opens with quotations from 20 to 30 per cent. higher than those current at the corresponding period of last year. Indeed, for certain qualities they are even above those of 1857. Still it is felt desirable that producers should be on their guard—first, against the dangers arising from a probably diminishing consumption, on account of extreme rates; secondly, against the probability of a much larger importation from China and Japan, which, according to the last advices, may be double that of last year; and, lastly, against the equally great probability, on account of the success of the Japanese seed, of an abundant crop in 1866.

COTTON.—Prices are irregular, the market having been very quiet, with little business done. An advance of ¼d. to ½d., obtained at the very close of the week ending the 8th inst., has been mostly lost. We have no sales of China to report in the London market, but 80 bales Japan, fair, went at 12d. The stock of China and Japan in London on the 13th July was 5,020, bales against 31,435 same time last year; the total stock of all kinds being 63,568 bales, against 80,021 in 1864. The stock afloat to Europe on the 14th is 17,910 bales China, and 826 bales Japan, against 73,085 bales of the former, and 9,126 bales of the latter last year. The stock of cotton in Liverpool on the 14th was 360,527 bales, against 212,177 bales last year. At Liverpool there was similar advance to that noted above, at the very close of the week ending the 8th, but the higher figure has been lost during the present week. In China and Japan the current qualities command full prices, while the better descriptions are rather dearer. Middling Orleans is quoted at 19¼d. and fair Dhollerah at 14d. per lb.

SUGAR.—The buoyancy observable at the date of our last has not since continued, and the business done has been on a less extensive scale; prices, however, have been fully supported. 3,822 bags Penang were held for firm prices, and barely two-thirds were taken, fine brown to low yellow 30s. to 31s. 6d., low middling and middling yellow 32s. to 33s. The only transaction reported on the spot by private contract since the 7th is 4,000 bags unclayed Manila at 27s. At public sale on the 14th 537 bags common brown, Siam sort, fetched 25s. 6d. to 26s. 6d.

COFFEE.—The public sales of plantation Ceylon have amounted to 1,100 casks, 630 barrels and bags, which at the opening went off without spirit, but a slight reduction being submitted to, buyers afterwards purchased more freely, and the whole quantity offered has been sold; fine ordinary to low middling, 78s. to 83s.; middling to good middling, 84s. to 88s.; 244 casks 2,180 bags Native were about half realized, at rather easier prices, good ordinary mixed, 66s. 6d. to 67s.; real good ordinary, 68s. to 69s.; fine ordinary, 69s. 6d. to 70s. At auction 1,428 bags Singapore sold as follows:—Mixed Bonthyne, 72s. 6d. to 73s.; common to good Campar, 60s. to 64s. 6d.; fair Siam, 66s. 6d. to 68s., and Bally, 57s. 6d. to 58s.

HIDES.—The quantity of East India offered at the first public sales of the present month was not large, and consisted almost wholly of middling and inferior qualities only suitable for export, for which there was a fair demand, clearing the greater part at from last sale prices to an occasional

Digitized by Google

slight decline on hides of heavy average. 4,058 Singapore and Penang Cow Hides offered, 2,344 sold; Light, 6d. to 7d. per lb.; Heavy, 4¼d. to 5¼d. per lb.; Thirds, 4d. to 4¾d. per lb. 3,348 Singapore and Penang Buffalo Hides offered and sold at 5⅜d. to 5½d. per lb. for best; 5d. to 5⅜d for seconds, and 4½d. for light

RICE.—Continued quietness has prevailed in this market, buyers appearing indisposed to operate beyond their most immediate wants, and the sales reported do not exceed 5,000 bags. At auction, 915 bags Java (of 1862 import) and 3,000 bags Nakrenzie, meeting scarcely any offers, were withdrawn.

PEPPER.—In public sale the sound part of 1,008 bags good Black Singapore was held for 3¼d., and afterwards taken at that price, with the damaged portion at allowances. Privately, about 3,000 bags have been sold at steady rates—Singapore, 3⅜d.; cash and short prompts, Penang at 2⅝d. to 3d.

CASSIA LIGNEA is taken in moderate quantities at full prices, low middling to good 81s. to 85s.

CLOVES.—Only 15 cases Penang have been brought forward, which were withdrawn at 1s. 2d.

SAGO.—1,142 boxes, in public sale, were mostly realised at about former rates:—Fair medium, 18s. 6d.; fine, 20s. to 20s. 6d.; fair large grain, 21s. 6d. to 22s.; very good, 23s. to 23s. 6d. Flour has been purchased by private contract at 14s. 3d. to 14s. 6d.

COCOA-NUT OIL.—The market has been steady, but the demand is not very active; holders, however, are firm. At auction 7 casks of Ceylon only were offered, which were sold at 42s. to 42s. 3d., the quality being rather inferior, prompt one month.

CUTCH.—Demand steady, at 24s. to 25s. according to quality.

HEMP.—Firm; at £29 to £31 for roping Manila.

TIN.—Straits, cash, £91; Banco, £94 per ton.

FREIGHTS AND CHARTERS.

The export market has been devoid of any particular feature, owing, however, to the scarcity of available tonnage now offering at the various coal ports for the leading ports in China, high prices have been obtained in coal charters. Homewards, business is still much restricted.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Hankow: 60s. meast. To Amoy and Foo-chow-Foo: 50s. weight, 40s. meast. To Shanghai: 40s. weight, 25s. to 30s. meast. To Hong Kong: 40s. weight, 25s. 6d. to 30s. meast. To Manila and Labuan: 50s. weight or measurement. To Singapore: 25s. to 30s. weight or measurement. To Penang: 40s. weight or measurement. To Batavia: 35s. weight or measurement. To Bankok: 60s. weight or measurement. To Ceylon: 40s. weight, 25s. measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £43 and £2. 2s. For Shanghai: £52 and £2s. 13s. 6d. For Manila: 34s. to 35s. For Batavia: 24s. to 26s. For Singapore: £27 to £28 and £1. 8s. For Galle: £29 to £30 and £1. 6s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea respectively.

The Admiralty having invited tenders for the conveyance of 64 tons naval stores, including a few combustibles, from the river Thames to Trincomalee, have accepted the Charlotte Ann for that purpose.

CASUALTIES.

The Etienne, Abeille, which sailed 28th May from Mauritius for Singapore, put back on the 1st June, leaky. The following notice has been posted at Lloyd's:—The Peep-o'-Day, Fentll, from London to Shanghai, was spoken Dec. 15, in lat. 35 S., lon. 17 E., and has not since been heard of.

MISCELLANEOUS.

At MAURITIUS.—May 20, from Sourabaya, Margaretha, Muller; June 4, from Singapore, Conference, Reid; 4, Shaftesbury (s.s.), Aitken, sailed for Singapore.

On Friday the 17th inst. there was launched from the building-yard of Mr. Archibald Denny, Dumbarton, a tug paddle-steamer, named the Court Hey—so called after the seat of Mr. Robertson Gladstone, of the firm of Gladstone and Co., of this town. The following are her dimensions:—Length of keel and forerake, 160 feet; breadth of beam, 25 ft.; depth moulded, 15 8-12ths feet. She is to be fitted with a pair of oscillating engines, having feathering floats, of 200-horse power nominal, and is intended for the towing flotilla of Messrs. Gladstone, Wylie and Co., Calcutta.

The Japan, a steamer of 600 tons burden, 180 feet by 26 feet and 15 feet, built for the East India trade by Messrs. Hedderwick and Co., of Govan, has made a trial trip between the Cloch and the Cumbrae Lights. The steamer, which is fitted with a pair of direct-acting engines, of 85-horse power, nominal, by Messrs. J. Howden and Co., "ran the lights" in 81 minutes, being at the rate of 10·12 knots per hour.

An iron screw steamer, built and engined by W. Simons and Co., was launched on the 11th instant from the London Works, Renfrew. She is of 900 tons and 120-horse power, fitted with surface condensers, steam winches, and every recent improvement. She is named the Count Von des Bosh, and is the property of the Netherlands Steam Navigation Company. She has a full poop, fitted up with cabins in rosewood, teak, and maple.

There was launched on the 13th instant from the yard of Messrs. Vernon and Sons, Brunswick Dock, Liverpool, an iron screw steamer, named the Nerbudda, built for Messrs. Reynolds, Mann, and Co., and intended for the East India trade. Her dimensions are—length, 260 feet; beam, 34 feet; depth, 21 feet 6 inches. She is registered as a vessel of 1,474 tons O.M.

PORT OF AMOY.

SHIPOWNERS, AGENTS and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz.: a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

IMPORTANT ANNOUNCEMENT

JOSEPH GILLOTT,

METALLIC PEN MAKER TO THE QUEEN

BEGS to inform the Commercial World Scholastic Institutions, and the Public generally that, by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street, New York, and at 37, Gracechurch-street London

Silk, Alpaca, Gingham Steel Frames, Canes, Fittings and all kinds of Material for the Trade. Oiled and japanned silks and cambrics.

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, 12, THREE KING-COURT, LOMBARD-STREET, LONDON, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Toilet Vinegar, Inexhaustible Salts, Aromatic Vinegar, Aromatic Eau de Cologne.

JOHN GOSNELL and Co.'s Prince of Wales Perfume

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

JOHN GOSNELL and Co.'s La Noblesse Perfume.

JOHN GOSNELL and Co.'s La Noblesse Pomade.

JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists, Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty, and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S OINTMENT and PILLS.—In all sores, wounds, and sprains, Holloway's Ointment is the most efficient application. It at once gives ease by allaying inflammation and moderating the flow of blood to the part. Whenever the malady has been of long standing, the Ointment should be assisted by Holloway's purifying Pills, which act upon the stomach and liver, guarding digestion from falling into that state which the pain, restlessness, and fever attending these ailments is apt to produce, and which must retard recovery, and sometimes even make serious the slightest case. No mother or nurse should want these noble remedies, equally applicable to all ages and constitutions. They purify the blood, regulate its circulation, renew diseased structures, and invigorate the system.

List of Passengers.

PASSENGERS OUTWARD.

Per P. and O. steamer Massilia, from Southampton, July 20.—To Hong Kong: Staff-Commander Thain, R.N., Mr. R. S. Syer, Mr. and Mrs. Davies, Dr. R. Bernard, R.N. To Shanghai: Mr. Scheidt. To Ceylon: Rev. G. Middleton, Mr. A. C. Hoare, Maj.-Gen. Hodgson, Lieut.-Col. Young, Capt. Napier, Mr. and Mrs. C. J. Brown and infant, and European female servant. To Singapore: Mr. E. J. Smith, Mr. Souper. To Calcutta: Capt. G. L Fraser, Mrs. Adams, Surgeon-Major Gibant, Assistant-Surgeons Giraud and McLean, Surgeon Hooper, Mrs. Gibant, Mr. P. K. Hyndman, and six second class passengers. To Madras: Miss G. Goad, Mr. K. T. Best, Lieut. R. W. O'Grady, Dr. J. C. Burton, and two second class passengers. To Alexandria: Col. and Mrs. Stanton, Mr. Unincke and female servant, Miss Donahey, Mr. M. Bell. To Malta: Mr. W. Roskelly, and two second-class passengers. To Gibraltar: Mr. C. Morgan, Master Cresswell, Mr. Pasnet and one second-class passenger.

From Marseilles, July 28.—To Hong Kong: Mr. J. S. Fyfe, Mr. F. Troncoso, Mr. I. A. Tuton. To Singapore: Mr. Hoffmann. To Shanghai: Mr. E. B. Drew, Mr. R. Geller, Mr. and Mrs. Hughes. From Suez.—To Shanghai: Mr. M. Archer Shee, jun. To Calcutta: Mr. and Mrs. Duff, Capt. A. D. Vaurenen, Mr. T. W. Brookes, Mr. J. Maxwell. To Madras: Mr. G. Short, Col. and Mrs. de Saumarez, Mr. Drury, Rev. C. J. Goodhart. To Malta: Lieut. J. P. Jones.

Per P. and O. steamer, from Southampton, Aug. 4.—To Shanghai: Mr. Landale. To Hong Kong: Mr. W. Macfarlane. To Ceylon: Mr. G. Studdart. From Suez.—To Hong Kong: Mr. W. Hulse. To Singapore: Mr. Leveson.

Per P. and O. steamer, from Southampton, Aug. 20.—To Shanghai: Mr. H. P. M'Clatchie, Mr. M. O'Brien. To Hong Kong: Mrs. Tomlin, Mrs. Emilius Hughes, Mr. Rennie. To Ceylon: Mr. F. M. Evans, Mr E. W. H. Holdsworth, Mr. John Wodehouse. From Marseilles, Aug. 28.—To Singapore: Mr. and Mrs. M'Lean.

Per P. and O. steamer, from Southampton, Sept. 4.—To Hong Kong: Mr. W. Foster. Mr. W. Gaskell. To Shanghai: Mr. and Mrs. G. H. Fitzroy, Mr. Bloor, Mrs. G. Stanford and infant. From Marseilles, Sept. 12.—To Hong Kong: Mr. and Mrs. Davidson, Rev. J. S. and Mrs. Burdon. To Shanghai: Mr. R. J. Forrest, Mr. Herbert and friend. To Galle: Mr. W. Hudson. From Suez.—To Shanghai: Sir Rutherford and Lady Alcock and Miss Alcock.

Per P. and O. steamer, from Southampton, Sept. 20.—To Shanghai: Mr. Henderson. To Ceylon: Mrs. Claughton, Rev. A. and Mrs. Young. From Marseilles, Sept. 28.—To Hong Kong: Mr. and Mrs. Brackenbury.

Per French mail steamer Mœris, from Marseilles on the 19th inst.—To Singapore: Messrs. Authon and Hamscheld, Mr. and Mrs. Danesberg and infant.

THE INCOMING MAILS.

The incoming mails, due in London on the 27th inst., did not arrive at Suez until that day, and will consequently not be delivered until Monday the 7th August. The French mail, with ten days' later news, is also due here on the 7th.

Summary of News from the Far East.

JAPAN.

Two telegrams have been received from Shanghai, one announcing the loss of the British schooner *Satsuma* (belonging to Messrs. Glover and Co., of Nagasaki), on the Japanese coast; the other, stating in few words that "Civil war had broken out in Japan." Taking into consideration the disturbed state of the internal politics of Japan during the whole period of our intercourse with that country, we attach about as much significance to this telegram as we should to one which announced that "a rebellion had broken out in China." When the intelligence comes to us in a tangible form, it will most likely prove that Choshiu, unwilling to submit to the confiscation of his territory without another effort to retrieve his position, has once more arrayed his forces for a last desperate attempt to throw off his allegiance to the Tycoon.

The arrival of the Southampton Mails has placed us in possession of our files of Japan papers, and enables us to give a few additional items of intelligence.

YOKOHAMA.

At this port the swamp at the back of the foreign settlement was becoming a source of grave anxiety to the residents. As the heat of the weather increased, the effluvia arising from it were becoming so offensive that great fears were entertained of an outbreak of cholera, or some other epidemic. It appears that the Government had long ago agreed to fill it up, but had, as usual in such cases, invented an endless series of excuses for delaying the fulfilment of their compact, and there now seems no hope of the work being completed before the intense heat of the approaching summer converts the swamp into a hot-bed of pestilence.

The Tokaido, or high road leading from Miaco to Yedo, had for some weeks been a scene of continued excitement owing to the number of officials of high rank who had passed along it, with large retinues, on their way to the capital. Most of them seemed to be peaceably disposed, but on one occasion a party of foreigners who were riding on the Tokaido narrowly escaped coming into collision with the armed men forming one of these processions.

The *Japan Herald* confirms the statement alluded to in our last issue, that an indemnity of three millions of dollars had been agreed upon, as compensation to the several Powers concerned, for the expenses of the Simonoseki expedition. It was reported that in order to defray this, the Tycoon had decided to confiscate and dispose of the territory of the Prince of Nagato, and that the latter was preparing for a stout resistance against any encroachment on his domains.

Several audacious robberies had occurred in the foreign settlement, supposed to be the work of the Chinese "rowdies" who had lately flocked to the place in great numbers from Hong Kong and Shanghai. Vessels arriving from those ports had brought over numerous Chinese passengers of a very low class, who, not being amenable to the authority of any of the Consuls, were becoming quite a nuisance to the residents.

After many meetings and unsatisfactory discussions as to the best mode of governing the internal affairs of the settlement, a Municipal Committee had at last been formed, and invested with the necessary powers. The committee consisted of

Digitized by Google

Messrs. Kingdon, Gay, and Piquet. It is, however, understood that this is only a temporary arrangement, and that efforts are being made to hasten the formation of a Municipal Government on a solid and permanent foundation. The state of the swamp, above referred to, alone presents a difficulty requiring prompt and energetic action on the part of the Council.

Prince Satsuma has planted forty thousand mulberry trees during the past year, a significant fact, which shows his estimation of foreign commerce. He is also making considerable preparations for the improved manufacture of sugar at the Loo-choos, and is said to have engaged a Scotch overseer to the works there, and imported the latest improved machinery.

If reports be true, the local Daimios in the southern portion of Japan are all anxious to open their ports to foreigners, and to give them every encouragement and protection in their trading operations. A hope has been expressed among them, that the Treaty Powers will make further treaties with the Mikado direct, as, they assert, he would quickly consent to extend the foreign trade all over the island. Choshiu is also greatly in favour of foreign trade extending to his ports, but he declares the Tycoon will not consent.

The suicide of a soldier of H.M.'s 20th Regiment, under very distressing circumstances, had thrown quite a gloom over the settlement. About seven o'clock on the evening of the 12th of May, the unfortunate man (who had that morning reported himself unwell to his commanding officer) went to his knapsack in the barrack-room, unbuckled it, took out his razor, buckled up his knapsack again, walked up to the looking-glass, and drew the razor across his throat. His coolness and determination were evidenced by the effect. He cut through the jugular vein and windpipe, staggered into the middle of the room and died almost instantaneously. The evidence adduced at the inquest tended to show that the deceased had been subject to fits and had been for some time in a depressed state of mind. A verdict of "temporary insanity" was accordingly returned.

The *Japan Herald* gives the following account of an unexpected "naval engagement," that must have afforded much amusement to all but the sufferers:—"On the 26th instant a signal was made from H.B.M.S. *Conqueror* that 'her boats were about to attack H.B.M.S. *Osprey*, and that the latter must defend herself.' Accordingly the boats of the *Conqueror* being lowered, about 150 men were ordered into them. On reaching the *Osprey* they received the command to fire in blank cartridge into her and attempt to board. The *Osprey* literally defended herself, and the boarding party was opposed so vigorously, that several of them sustained very severe injuries. Rumour, indeed, had it, that one man had died of his wounds; but on inquiry on board we find this is a mistake. An official investigation took place on Thursday, the result of which has not yet transpired. It is stated that the commander of the *Conqueror* exceeded his orders.

From the same journal we extract the following report of an interesting case in the Consular Court, before Marcus Flowers, Esq., H.B.M.'s Acting Consul:—

James S. Downie, Agent for Messrs. Fletcher and Co., v. Thomas Silk, Master of the barque *Eleanor*, and C. S. Hope.

In this case the plaintiff claimed delivery of 53 boxes of tin plates, balance of 1,000 boxes shipped by A. Campbell, of London, in the *Eleanor*, the goods being deliverable to Messrs. Fletcher and Co. at Yokohama, as per bill of lading. Messrs. E. L. Budd and Co. claimed the goods as belonging to themselves, and authorised Messrs. Jardine, Matheson and Co., of China and Japan, to stop the delivery of the goods to Messrs. Fletcher and Co. Mr. Hope, the agent of Jardine, Matheson and Co., applied for an injunction to stop the delivery of the balance of the goods, and put in, in support, the order of Messrs. E. L. Budd and Co.

The captain of the *Eleanor* acknowledged the bill of lading, but did not know who A. Campbell was. He stated that he had already delivered 947 boxes of the 1,000 to the order of the bill of lading, and delayed the delivery of the remainder by order of the Consul.

Mr. Hope being called upon to show cause why the injunction placed on the goods in the captain's possession should not be removed, and delivery given to Messrs. Fletcher and Co., referred to the letters of Messrs. E. L. Budd and Co., and Messrs. Jardine, Matheson and Co., which he had put in.

Mr. James S. Downie stated that A. Campbell, who shipped the goods, was the head partner in the firm of Fletcher and Co., in London.

Decision: This matter is easily decided from the clearness of the law and the evidence in the case. The bill of lading is the only document of title which can be acknowledged, and that clearly states that the goods had been shipped by A. Campbell, who is shown to be the head partner of Fletcher and Co., in London. There is nothing in the bill of lading to show that Messrs. Budd and Co. had or has any property in the goods; and even if the bill of lading showed that the goods had been shipped by E. L. Budd and Co., the circumstances of this case would be sufficient to defeat their right to stop the 53 boxes now in question; for the law says that, when part of goods sold by an entire contract has come into actual possession, the vendor's right to countermand is wholly at an end, and cannot be exercised over the residue which may not have been delivered. Independently of this, however, the bill of lading of itself is quite sufficient to support Messrs. Fletcher and Co.'s claim; and the master of the *Eleanor* is ordered to deliver the goods to Messrs. Fletcher and Co.—Defendant to pay costs.

COMMERCIAL POSTSCRIPT.

The report from Manchester is as follows:—Grey Shirtings, 7lb., 12s. to 12s. 6d.; 8¼lb., 15s. to 15s. 6d. Cotton Yarn, Nos. 16-24, 1s. 8d. to 1s. 10d.

ARRIVALS NOT INCLUDED IN TABLES.—July 21, off Dungeness, from Java, Catherina Maria, Cornelia Henderika; New York, from Manila, Alhambra.

DEPARTURES.—July 17, from Hamburg, for Hong Kong, China; 18, for Shanghai, Malvina Vidal; 21, from Jersey, for Swansea and Shanghai, Georges; 22, from Cardiff, for Hong Kong, Madeira; 24, from Liverpool, for Shanghai, Aerolite; 24, from London, for Shanghai, Laurel; 25, Jubilee.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ANNESLEY—On the 16th July, at 5, Leinster-terrace, Hyde-park, the wife of the Hon. Sydney Annesley, of a son.

FENNELL—On the 19th July, at Newlands, Regent's-park, Southampton, the wife of Arthur Fennell, Esq., of a son.

ORMISTON—On the 24th July, at Rhyl, Mrs. Walter Ormiston, of a daughter.

TOWSE—On the 22nd July, the wife of William Beckwith Towse, Esq., of Fishmongers'-hall, of a daughter.

DEATHS.

FORBES—On the 16th July, on board the Nyanza, on his way home from China, in his 31st year, Murdoch Forbes, Esq., eldest son of John Forbes, Esq., Haddo, near Huntly, N.B.

THE NEW GOVERNOR FOR HONG KONG.

The post of Governor at Hong Kong, we hear, has been offered to and accepted by Sir Richard Greaves McDonnell, Lieut.-Governor of Nova Scotia.

SHIP LAUNCHES.

A beautifully-modelled ship, named the Western Chief, was launched from the building-yard of Mr. R. Hill, Catte Down, Plymouth, on Monday, July 24. She was named by Mrs. J. P. Hill, the wife of the Commander, and is intended for the China and Japan trade. Tonnage, 750 38-100. Dimensions:—Length, 170 feet 6 inches; beam, 32 feet 3 inches; depth of hold, 19 feet 4 inches.

Messrs. Charles Connell and Co. launched from their west shipbuilding yard at Overnewton a composite clipper ship, of the following dimensions, viz.:—Length of keel and forerake, 192 feet; breadth of beam, extreme, 32 feet 3 inches; depth of hold from top of floors, 20 feet 1 inch; register tonnage, 820 tons; builder's tonnage, 952; classed 14 years A 1 at Lloyd's. She was named the Taitsing by Mrs. Finlay, of Langlands, Kilbirnie, and is owned by Messrs. Jas. Finlay and Alex. Longmuir, and is intended for the China trade.

A barque named the Jane Avery has been launched from Messrs. Taylor and Scouler's yard, South Dock, Sunderland, for Jane Avery and Son, of North Shields. She is 140 feet in length; breadth, 28 feet, and depth, 17 feet, and of 500 tons O.M. She is intended for the Ceylon trade.

CHINA GRASS.

Some months ago the Chamber of Commerce of Rouen, in seeking for a substitute for cotton, thought of China grass, and some of the fibre was spun and mixed with cotton in various proportions. A number of specimens of tissues produced, which were exhibited at Rouen and also in England, created a decidedly favourable impression. Tissues of China grass are well known in the commercial world, especially in the form of fine muslin and gauzes, but those produced at Rouen are of a different character – drills, white and coloured, for trousers, long-cloth for soldiers' wear, and other kinds. Two Frenchman, named Mallard and Bonneau, occupied themselves in perfecting a process for preparing the fibre; a spinner named Legheer mixed it with cotton to the extent of 40 to 60 per cent.; the yarns were woven by a Rouen manufacturer, and the Chamber of Commerce of Rouen reported most favourably on the matter.
